STATE CONTRACTORS CONVENTION AT FORT WAYNE JANUARY 22 AND 23 DRAWING ATTENTION

Yearly Meetings Grow In Importance Each Season

An event of the year for many Indiana contractors is fast approaching. Just a little over two weeks' time intervenes until the state building contracting forces, as represented by the membership of the Associated Building Contractors of Indiana, will gather in Fort Wayne to hold and participate in the sixth annual convention of that organization.

These yearly meetings of the contractors have grown greatly since the initial affair held in Fort Wayne back in 1917 when several of the large operators from various cities of Indiana met in that city and organized the State A. B. C.'s. In place of that little group of builders who met in Fort Wayne originally, this year will see some two hundred or more contractors in attendance at the convention which has grown into a really important institution in Indiana building construction circles.

Year by year as the strength of the association has grown constructive moves toward co-operation, legislation and other matters of an advanced nature have been put into effect as a result of these conventions and are having a marked influence on the welfare and advancement of the industry, not only as regards building conditions and the contractor but as it affects architect, engineer, craftsman and owner.

The greatest achievements to the credit of the State A. B. C.'s, can be traced to the deliberations that have taken place at the annual conventions. First was the determined effort directed to effecting co-operation amongst the contractors of Indiana, then with architects, engineers and Labor, all for the advancement of the building business. That co-operation has finally culminated in establishment of the Administrative Building Council of Indiana, an institution that in time will give to the state a set of standard building requirements and regulations that will correspond to a State Building Code similar to those in use in other states.

Labor trouble throughout the state has been minimized and practically uniform wage scales have resulted in all cities, not that a set effort was made through the state association for the attainment of such a goal, rather it is the resultant effect of the close touch in which the contractors have kept with each other and the beneficial understandings that have come unheralded from such association.

That is why the coming convention. January 22 and 23, holds so much of interest. Many contractors realize what such gatherings mean to the industry and are anxious to further the good work.

Tentative plans are shaping up as a result of a conference held by Field Representative Owens of the State A. B. C.'s with Fort Wayne contractors, and while no details can be advanced at this time, arrangements have reached the stage where it is safe to say the 1924 convention will surpass any such previous affairs ever held by Indiana contractors.

1924 MARKS CENTENNIAL OF INTRODUCTION OF PORTLAND CEMENT INTO BUILDING FIELD

Result of Effort to Find Material Superior to Natural Cements Then in Use

Old records on file in the British patent office show that in 1824—just one hundred years ago—an English bricklayer named Joseph Aspdin was awarded a patent for a material he called "portland cement." At that time a number of men were engaged in experiments in an effort to produce a cement superior to the natural cements then in use. As far back as 1756 an English contractor named John Smeaton had discovered that an impure limestone containing a certain amount of clayey matter possessed decided hydraulic properties when burned. Aspdin's contribution was his discoverey of the value of taking proper proportions of different ingredients and then pulverizing and thoroughly mixing them before they were burned into clinker, which later was finely ground. He called his material "portland" cement because when it hardened it resembled a building stone quarried on the Isle of Portland.

Although Aspdin's invention was brought out in 1824, it was not until 1872 that the portland cement industry started in the United States. Of course natural cements had been used here for years, and in the late sixties imported portland cement was gaining a strong foothold in the American market. In 1872 David O. Saylor established a plant for the manufacture of portland cement at Coplay, Pa., and so far as can be ascertained this is the first plant of its kind to be started in this country. Within a few years other plants were built at South Bend, Ind., Kalamazoo, Mich., and various parts of the east.

Many interesting stories are told in connection with the early efforts to produce portland cement in the United States. One man used a cookstove in which to burn rock while conducting his experiments. Another used a piece of sewer pipe as a kiln, and ground his materials in a coffee mill. Still another pressed a bent car-axle into service as a part of a grinding machine. For a number of years the reputation of imported cements was so strong that American manufacturers had a difficult time in securing a market for their product. It was not until the late nineties that the home products took its place on an equal footing with imported cement, and eventually won the market.

One hundred years after the invention of the material, the plants of the United States are producing more portland cement than the rest of the world combined. United States Geological Survey figures indicate that about 135,000,000 barrels were made in this country in 1923.

This development has necessitated the revolutionizing of methods of manufacture. Where the early pioneers used crude domelike kilns for burning their raw materials a modern plant contains huge rotary kilns—steel brick-lined cylinders that may weigh as much as eight Pullman cars each. One of these great modern kilns will produce as much clinker in a day as one of the old kilns could turn out in a year. The old-fashioned grinding machinery has been supplanted by a variety of crushers and centrifugal, hammer and ball mills, in which the raw materials and clinker are reduced to a powder finer than flour.

THIRD ANNUAL INDIANA ARCHITECTURAL EXHIBIT.

Call Sounded To Members of The Profession In The State.

KURT VONNEGUT, Chmn.
Pageant and Exhibit Committee.

The Galleries of the Art Museum in Indianapolis, have been reserved during the month of February for our show.

Mr. McLean, the new Director of the Museum, has met with the Exhibition Committee. Through his co-operation, constructive suggestions and practical experience, he has given the Committee new courage to hope that the Third Annual Show will be better than its predecessors.

It Must Be! Will You Help!

We want original drawings in all media and photographs of work not previously exhibited in Indianapolis.

Under another cover you will receive full instructions and regulations governing the Exhibition. One of the stipulations will be, that photographs shall be of a uniform size 8x10 inches. In the meantime—

Photograph Your Best Work

and leave the prints unmounted until we tell you how.

One section of the exhibit will be devoted to STUDENT WORK, done at college, SCHOLARSHIP DRAWINGS, and TRAVEL SKETCHES. Go through your old portfolios and pick out the best stuff that hasn't been shown before in Indianapolis.

Allied Arts

An interesting addition to this year's Exhibit will be examples of the Allied Arts, such as, sculpture, terra cotta, tile, wrought iron, glass, etc.

"ART IS LONG AND TIME IS FLEETING"

OPENS DOWNTOWN OFFICE

Fort Wayne Architect In New Quarters

Wayne E. Bell, Ft. Wayne, architect, announces that he has moved his office to 613-14 First National Bank Building that city, where he will continue the general practice of architecture.

Mr. Bell, well known in building circles in Ft. Wayne, for a number of years was employed in the offices of some of the most prominent architects of that city before engaging in individual practice.

PAST YEAR GREATEST IN HISTORY OF INDIANA SOCIETY OF ARCHITECTS.

Former Efforts Now Bringing Tangible Results.

No greater activity ever marked the course of the Indiana Society of Architects than that which was carried on during 1923. Years of constant constructive effort thru numerous preceding administrations finally made it possible last year for the Society to reach that place from which it could strike out with tangible results and make its influence felt not only in architectural circles, but in the whole building construction sphere of the State.

An intensive membership drive under the personal solicitation of Architect G. W. Allen, Laporte, Chairman of the Membership Committee, was instrumental in causing many of the Indiana architects, hitherto seemingly disinterested, to come into the organization. This increased interest can be traced to a great extent to the regional meetings and two bg conferences that were held in various cities about the State at which it was possible for architects in those sections to get in direct touch with the organization and, with this first hand personal information as to the workings of the Society, determine for themselves the value of that which it was sought to accomplish.

There had been regional meetings previously but the start was not very auspicious. However, the board of directors believed in the scheme and pursued it. That they were right is attested by the attendance of architects that followed at the meetings held at Terre Haute, Evansville, South Bend and Lafayette. These gatherings were instructive, constructive and enjoyable and out of them grew a new spirit for progress. Following each meeting there were new applications for membership and the succeeding meetings grew in scope and interest.

Constant effort to effect a better understanding and co-operation amongst the professional and business elements in the Indiana building field also drew its reward, the greatest of which is the Administrative Building Council of Indiana, now established as the result of the combined efforts of the architects, contractors, engineers and Labor representatives. Such a council had its inception in the Indiana Society of Architects and the idea was passed on to the contractors, who espoused the cause. Next the engineers and Labor became interested and all four of these have finally succeeded thru co-operation in working out the idea to a reality.

Another big step forward, as part of the effort of the Society, endorsed and backed up by the Associated Building Contractors of Indiana, is to be found in the joint conferences between the architects and contractors of the State. The first conference held at South Bend met with a hearty response, attracted architects and contractors from far and near, and proved highly successful.

However, the crowning achievement of the year came to pass Nov. 15, when the Engineering Extension Service of Purdue University, having been attracted by the nature of the South Bend meeting, invited the State architects, contractors, engineers and Labor representatives to Lafayette on that day for a general Builders Conference of Indiana. It marked a new era in the building construction annals of Indiana being the first time the four great elements had met officially in common session and was the greatest recognition ever accorded the building industry of the state by an Indiana university.

Thus it is that the Indiana Society of Architects may well be proud of its achievements in 1923, and the realization of what has actually been accomplshed the past year should inspire members and all Indiana architects to get back of their own organization that is pushing the state architectural profession forward to deserved recognition and a commanding position of respect such as it has never before enjoyed generally.

Too much credit can not be given to the past and present officers and directors who have labored so constantly and unselfishly at a sacrifice of time and money to make the Society a real power for good.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

RESIDENTIAL BUILDING FEATURED THE 1923 CONSTRUCTION EFFORT OF EVANSVILLE.

Total Volume Proved Good.

Though there were no sensational or outstanding developments in the way of new building construction in Evansville in 1923 the general volume of work put across from January 1 to December 31, last year was in fairly good proportion and stands out ahead of the records of previous years.

The big feature of the building effort put forth centers around the extensive home building program that was put over. Never before in Evansville history were so many new residences built in one year and as an evidence of that fact are the structures that grace the residential and outlying sections. This type of building was greatly needed by the city which for some years faced a serious housing shortage. The Home Expostions that have been held lent a helpful impetus to home ownership urgings that were sounded for the past few years and 1923 marked the greatest progress that has been made in that direction.

The year just closed saw the completion and starting of quite a few industrial buildings which, in the majority, not large did add materially to the manufeaturing facilities of the city's industrial centers. Several churches were erected, quite a few store buildngs were built and two large high school buildings were gotten under way. Also, the city's largest apartment house was completed in 1923.

This in brief, sums up the city's building activity for the past year which, taken in the aggregate made for a good building year for Evansville.

The new $16,000 home of J. L. Knauss, Kentucky and Chandler avenues, has been brick veneered and roofed and interior work will be started shortly.

Eli Stingle local architect, announces he has made a connection with the Evansville Planing Mill Co., and will close his office in the McCurdy Bldg.

CONVENTION PREPARATIONS BEING MADE.

Ft. Wayne Builders Center Attention On State A. B. C. Meeting..

Local contractors, members of the Builders' Exchange, are getting busy now in preparation for the Sixth Annual Convention of the Associated Building Contractors of Indiana which is to be held at the Anthony Hotel, Ft. Wayne, January 22 and 23.

Particular interest attaches to the meeting this year as it was in Ft. Wayne some years back that the State contractors association was organized and it is the first convention of the association that has been held in Ft. Wayne since the perfection of the organization.

President Max Irmscher and Secretary Geo. Schack of the local Builders Exchange have been in consultation with Field Representative J. H. Owens of the State A. B. C., who was in the city for several days, and preliminary plans have been fairly well worked out for the big meeting now but a few weeks distant..

The quarterly conferences of the state association that were held during the past year here and there in Indiana have built up a new interest in the A. B. C. and indications are that a new attendance record will be established at this year's convention.

GREATEST BUILDING TOTAL EVER ROLLED UP IN FT. WAYNE.

City Starts Nearly $12,000,000 Worth of New Building Work In 1923.

Thru the failure of several large prospective projects to reach the stage where passage could be made upon them by the city building inspection department and permits issued the building record of Ft. Wayne for 1923 just missed reaching the $12,000,000 mark. With a good early season start and a brisk new building movement that carried along till August it was practically assured that the city's building operations for the year would outstrip the high record level of 1922, and the hope was cherished that a volume of $12,000,000 would be posted. However, beginning with August a recession of building began and has continued right thru to the year end. At that, had December lived up to the promise indicated several weeks ago the big goal desired would have been reached. As it was the total estimated valuation of new building construction work, $11,860,623 was just $139,377 short of the total wished for and marks by far the greatest yearly building effort ever put forth in Ft. Wayne.

Every month in 1923, except September, showed a greater issuance of building permits than the corresponding months the year previous. Eight of the months totaled greater estimated valuations than the same periods in 1922, while August and the three fall months showed a decline from the activity registered during the corresponding period the year before.

Ft. Wayne issued 650 more permits in 1923 than in 1922 showing a gain of $2,217,879, or 23 per cent.

The new building in 1923 amounted to $7,060,867 more than that done in 1921, an excess of 143 per cent.

A tabulated monthly report shows the following record for Ft. Wayne in building during 1923 and 1922.

Month	Est. Val.. 1923	Est. Val. 1922
January ------	$ 390,885	$ 136,660
February -----	420,330	191,035
March --------	1,450,000	573,375
April --------	1,939,275	582,385
May ----------	2,166,085	701,285
June ----------	1,022,539	903,455
July ----------	1,141,265	715,735
August -------	698,203	1,634,574
September ----	707,965	1,774,930
October -------	745,600	1,383,445
November -----	590,716	600,300
December -----	587,760	445,565
Total -------	$11,860,623	$9,642,744

SOUTH BEND, TOO, GOES BIG IN BUILDING CONSTRUCTION.

Yearly Record Tops Ft. Wayne's Sterling Performance.

Just as Ft. Wayne was pushing ahead in building construction to set a new record for the year, so was her northern Indiana sister city, South Bend. Both accomplished their aims though the latter city forged ahead of Ft. Wayne and hung up a $13,468,066 building volume. This figure was far out in front of any other yearly building record ever posted at South Bend and was a most commendable performance.

In 1923 South Bend issued 5359 building permits as against 4286 granted in 1922. The total estimated valuation of the year's permits was $13,468,066 as against $10,098,035 for 1922, a gain of 33 per cent.

GOOD BUILDING ACTIVITY IN DECEMBER AT INDIANAPOLIS MAKES FOR ANOTHER YEARLY RECORD.

Over $27,000,000 Total Posted

December stepped up nicely when its turn came and when it bowed itself out had added materially to Indianapolis' yearly building volume by contributing 795 permits for a total estimated valuation of $1,853,898. While the permits issued last month were considerably behind the number granted in November at the same time their valuation exceeded the November valuations. Nor is that all. Compared with December a year ago the month just closed showed 185 more permits posted for a 7 per cent gain in estimated valuations.

When last month came across with close to a $2,000,000 total valuation it assured Indianapolis of a yearly building record that is the greatest in her history the closest approach to which was the total registered in 1922.

According to the official figures of the city building inspection department there were 15,767 permits issued in 1923 which was 2185 more than granted in 1922. The estimated valuations were $27,144,484 last year as against $26,110,607 the year previous, a gain of $1,033,877 or 3.57 per cent over 1923's high record.

An analysis of the building operations for which permits were issued in Indianapolis last year shows this tabulation:

Projects	Number	Est. Val.
Residences	2828	$12,467,197
Fireproof Bldgs.	40	5,558,865
Nonfireproof Bldgs.	161	2,736,525
Stables & Sheds	2967	1,168,489
Repairs & Alts.	8003	2,879,155
Conc. Blocks Bldgs.	228	625,589
Tenement Houses	24	877,550
Miscellaneous	1516	831,114
	15,767	$27,144,484

LEAVE FORMER BUSINESS LOCATION FOR NEW AND LARGER QUARTERS.

WOULD MAKE SKILLED CARPENTERS

Contractor-Employer and Employe Representatives Back of Move

The Cleveland Carpenter Apprentice School, conducted under the auspices of the Building Trades Employers' Association, Carpenter Contractors' Association, and Carpenters' District Council in conjunction with the Board of Education, began operations Monday, November 5th.

This school is the first carpenter school in the country to be organized on this basis, wherein the employer and employe are represented on a joint committee, and its progress will be watched with interest.

It will be compulsory for every carpenter apprentice in the city of Cleveland to attend, for which time he will be paid by the carpenter contractor who is employing him.

MANUFACTURERS BEGIN TO REALIZE WHAT SHORTAGE OF BUILDING MECHANICS MEANS TO THEM.

Effect Is Far Reaching.

The recent conference at Washington to devise ways of making more skilled artisans, particularly in the Building Trades, disclosed the fact that manufacturers of material were very much interested in the problem and weer not only willing to help, but that many interests had already spent considerable money in promoting trade schools for the teaching of apprentices. One notable fact brought out at the conference was that the dearth of skilled decorators and painters would seriously interfere with the campaign of the paint industry to double its output by 19296. The conference took cognizance of conditions, realizing the necessity of pushing the scheme as fast as possible in order that the great demand for mechanics in all branches of the building industry could be taken care of at as early a date as possible. It looks now as if apprenticeship training will become a national effort, with all the forces interested co-operating towards a common end. To the entire building industry this is good news and all of the allied interests should at once get busy and help push the good work along.

INDIANAPOLIS BUILDING PERMITS

TO BUILDING MATERIAL SUPPLY FIRMS:

Gentlemen:

Preparations are now being made to get out the official souvenir program for the Sixth Annual Convention of the Associated Building Contractors of Indiana, to be held at the Anthony Hotel, Fort Wayne, Indiana, on January 22 and 23.

This program will in addition to routine convention data, carry a complete list of Indiana Architects and a compresentive and representative directory of Indiana contractors arranged alphabetically according to their cities and the trade under which they operate. It is the only list of its kind issued in Indiana and when gotten out in 1922 carried such an appeal that the demand soon exhausted the entire edition of over 2,000. Besides being used at the convention, copies are sent to all Indiana architects and contractors.

Three thousand of these programs are to be issued this year and in addition to being used at the convention, individual copies will be sent all contractors and architects throughout the State.

The advertising pages will be divided four ways as follows, at these rates:

One Eighth Page, 2½x2 in.	**$10.00**
One Quarter Page, 2½x4 in.	**17.50**
One Quarter Page, 5 x2 in.	**17.50**
One Half Page, 5x4 in.	**30.00**
Full Page, 5x8 in.	**50.00**

We should be pleased to have you consider the merits and possibilities of this advertising proposition, and shall be pleased to hear from you in the near future.

Very truly yours,

LEIGH C. FELTON,
Chairman.

THOUGHT TREND OF THINKING BUILDING MEN

Dawn of the New Year Causes Pertinent Questions to Arise

What will the new year of Nineteen Hundred and Twenty-four bring forth in the building construction industry? That is the thought uppermost n the minds of those who are connected with the bulding business.

Many influences bear upon the accomplishments and achievements to be recorded when the now new year has run its course. Building men are wondering about and pondering these points: Will conditions develop more favorably for the prosecution of building in 1924 than in 1923; has the big demand for new buildings, prevalent in the past few years, been met sufficiently to cause a slowing down of construction efforts; what will be the trend of wage demands of the building trades, also will material prices increase perceptibly; will the building industry be able to stand up under and thrive if construction costs are added to in any way; how about the availability of building loans to carry on building?

Only time can answer these questions, but there are those men who are optimistic enough to believe that, if those interested in the building industry exercise enough effort to hold conditions within reason, the prospect of a good building season lies ahead as 1924 unfolds.

COUNTRY CATCHING UP ON FORMER BUILDING SHORTAGES

Replies of National Extent Tend to So Impress

The impression seems to be growing that the supply of housing and business structure accommodations is beginning to reach the point where it will fairly satisfy the demand. Such is the conception to be gained from the answers received by the National Real Estate Board to numerous questionnaires that were circulated throughout the country.

The total percentages of shortages in various kinds of structures consequently must be accepted with reservations, as a large number of the cities reporting indicated that their individual shortage was slight.

Fourteen out of thirty-three cities of over 200,000 population specified no shortage, while six of the others acknowledged a lack of only one type of buildings. The conclusion to be arrived at from these facts is that twenty of the thirty-three of our largest cities have caught up practically in their building needs and can be considered to have reached a normal building condition.

Forty-nine of the cities from which replies were received announced that the supply of Labor is sufficient or even in greater availability locally to meet constructive needs.

Fifty-one per cent of the cities reported a shortage of building but only 6 per cent referred to the situation as acute.

Of the shortages mentioned the greatest seems to pertain to nominal priced modern single dwellings. The inference to be drawn from this is that the wage earner is unable now to build because of high construction costs, nor can the investor get the return in rents that would justify his building rental property. Such being the condition any added construction costs should cause a further decrease in new house building.

AUTHORITY ASSERTS DEMAND FOR NEW BUILDING IS BACK TO NORMAL

Industrial Centers the Exception

And, further reference to building shortages. D. Babson reports show that except for the industrial centers the big former shortages in building have been met and only the normal demand for structures in those localities will have to be met in the immediate future.

SHOULD AID CONTRACTORS

Shifting of Labor Forces Looked For

The coming year is likely to see a shifting of building labor. Some localities are due, according to indications, to experience a slowing down of building construction effort. This will cause some unemployment in the building craft circles and many of these unemployed men are most likely to be attracted to the centers where good wages and steady work rules.

The best feature of such a drift is that it will afford the busy contractors a more plentiful supply of men, give them a chance to pick skilled workmen and should result in better work and greater production.

CALUMET BUILDING PROGRESS

A. C. Berry & Co., architects, Hammond, are preparing plans for an Elks Club Building that will be situated along the Lincoln Highway at Valparaiso. The structure is to be four stories high with a basement, 44 feet by 138 feet. There will be store rooms at the street level with club and lodge rooms on the floors above. The cost is estimated at $150,000.

The above firm is also working on drawings for a warehouse and office building for Calumet avenue, to be one story and basement, 30 feet by 130 feet. A. H. Tapper is the owner.

A contract has been awarded to Rufus Danner & Co. to move two brick bungalows from the Rmback estate site on Sibley street to Wildwood avenue.

Archt. Mac Turner is preparing plans for Geo. W. Grisdale for a one story and basement brick store building, 50x80, to be located on Indianapolis Blvd. (Robertsdale) Hammond.

The Monon Railroad is receiving bids for a frame ice and storage building, to be built in the yards in South Hammond.

Owner, Board of Education, Orleans, Ind., and Charles B. Tegarden, trustee of Orleans Township, Orleans, Ind. Plans nearing completion. Owner expects to advertise for bids in February. Brick, stone trim.

***High School** (side addition), Brownstown, Ind., $35,000. Archt., Allen and Garriott, 401 Lombard Bldg., Indianapolis, Ind. Owner, Board of School Trustees, O. R. Emerson, president; Victor Sage, secretary; R. M. Robinson, Brownstown, Ind. Plans in progress. Owner will advertise for bids the latter part of February. Combination auditorium and gymnasium. Brick.

***Residence and Garage:** $25,000, 4100 block on Washington Blvd., east side of street. Archt., John P. Parish, 418 Castle Hall Bldg. Owner, Mrs. S. H. Smith, 2232 N. Meridian St. Bids in under advisement. Rather indefinite as to when contracts will be awarded. Brick, tile roof, vapor heat, tile and hardwood floors.

***Residence (14 rooms, 4 baths) and (3-Car Garage):** Muncie, Ind. Archt., Frederick W. Wallick, 308 Hume-Mansur Bldg., Indianapolis. Owner, Arthur Ball, c/o Ball Brothers Manufacturing Co., Ninth St. near Macedonia Ave., Muncie, Ind. General contractor, A. J. Glaser, Muncie, Ind. Work 50 per cent completed. Brick and hollow tile, cut stone, slate roof, marble and tile, ornamental wrought iron.

***Commercial Garage and 6 Stores:** $200,000, 6 sty. and bas. Site of Bates Hotel, Monument Circle. Archt., Bass, Knowlton and Co., 312 N. Meridian St. Owner, The Test Heirs, Donald Test, c/o Central Motor Parts Co., 409 N. Capitol Ave.; Schuyler Test, Millersville Drive; and E. D. Porter, Jr., vice-president of U. S. Bearings Co., 350 Century Bldg. Bids in under advisement. Expect to award contracts in two weeks.

BEDFORD

Apartment (4 apts.), $25,000, 2 sty. and bas., 45x50. Archt., O. L. Hill, East Side of Public Square. Owner, Mrs. Charles Lemon, Bedford. Plans in progress. Architect ready for bids soon. Brick veneer, composition roof, steam heat, tile and hardwood floors.

***Commercial Garage and Sales Room:** $35,000, 1 and 2 sty., 45x120. Archt., O. L. Hill, East Side of Public Square. Owner, name withheld for present. Plans in progress. Brick, steam heat, steel sash, comp. roof.

***Colonial Residence:** $15,000, 2 sty. and bas., Bedford. Archt., O. L. Hill, Bedford. Owner, Department of Conservation, Division of Fish and Game, Statehouse, Indianapolis, Ind. Plans in progress; mature about March 1. Brick, tile roof, furnace heat, tile and hardwood floors.

BLOOMINGTON

***Dormitory:** $250,000. Bids for the construction of a women's dormitory on the campus of Indiana Unversity will be received in the office of the undersigned until Tuesday, Jan. 29, noon. Plans may be examined in the offices of the architects, Lowe & Bollenbacher, 108 S. La Salle St., Chicago, Ill., and the Secretary of the Board of Trustees, Bloomington, Ind. Plans may be secured from the architects. John W. Cravens, Secretary Board of Trustees, Bloomington, Ind.

Water Works Improvements: Bloomington, Ind. Engineer, Pearse, Greeley & Hansen, Sanitary and Hydraulic Engineers, 39 West Adams St., Chicago, Ill. Owner, Bloomington Water Works Co., U. S. Hanna, secretary, Bloomington, Ind. Owner receiving bids to close January 29 on the following:

Division A. Pipe line to connect with new supply within city limits, including about 313 tons cast iron piping 12 inches to 16 inches in diameter, together with fittings, valves and other appurtenances.

Division B. Cast iron pipe line connecting with new source of supply outside of city limits, including alternates for 16-inch and 18-inch pipe, comprising about 643 tons if 16-inch pipe is used and 757 tons if 18-inch pipe is used, together with fittings, valves and other appurtenances.

Division C. A dam in the valley of Griffy's creek. Bids to be received on two alternates, namely an earthen dam and a reinforced concrete hollow dam. The dam will have a maximum height of 24 feet to spillway and 30 feet to crest and an approximate maximum length of about 800 feet, involving about 91,000 cubic yards of embankment, together with concrete spillway, conduit and intake tower. The concrete alternative is to be designed by the contractor, subject to the approval of the engineers.

Division D. A small pumping station containing two electrically-driven centrifugal pumps, each of 1,500,000 gallons capacity and operating against an average head of 345 feet. Plans and specifications may be had upon deposit of $20 from Pearse, Greeley & Hansen, Sanitary and Hydraulic Engineers, 39 West Adams St., Chicago, Ill. Plans and specifications may also be examined at the office of the Bloomington Water Company.

CONNERSVILLE

***Consolidated School** (addition), $38,000, 2 sty. and bas., 41x64, St. Paul, Ind., Adams school township, Decatur county. Archt., Harry M. Griffin, 105 McFarlan Bldg., Connersville. Owner, William Holland, trustee, St. Paul, Ind. Owner taking bids to close January 15. Common brick, slate roof, mill construction, pumping system, new radiation, heating.

***School Building:** $36,000, 2 sty., 48x74, Dupont, Ind., Lancaster township, Jefferson county. Archt., Harry M. Griffin, 105 McFarlan Bldg., Connersville. Owner, Charles M. McCaslan, trustee, Dupont, Ind. Plans in progress. Will advertise for bids soon. Brick, stone trim, direct-indirect heating, private water system, septic tank, comp. roof.

***School:** $50,000, 2 sty. and bas., Shelby Twp., Ripley county, Indiana. Archt., Harry M. Griffin, 105 McFarlan Bldg., Connersville. Owner, John G. Meisberger, trustee, Holton, Ind., Route No. 3. Plans in progress. Will advertise for bids soon. Brick, semi-fireproof construction.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that William Holland, trustee of Adams School Township, Decatur County, State of Indiana, whose post office address is St. Paul, Indiana, and the Advisory Board of said Township, will until one-thirty o'clock p. m. on Tuesday, January 15th, 1924, receive bids for alterations and additions to the school building at St. Paul in said Township; also for the installation and equipment of same with heating and ventilating system, plumbing and electrical work.

The estimated cost of the general construction is $24,000.00; of the heating and ventilating system is $8,000.00; of the plumbing system is $5,000.00; and of the electrical work, $1,000.00.

Contractors may bid on the general construction of said building and the equipment of same complete, or on any separate contract. All bids must be sealed. A Certified Check made payable to the order of the above named trustee in the amount of $750.00 shall accompany each bid on the whole of said work; in the sum of $500.00 shall ac company each bid on the general construction, only; in the sum of $200.00 shall accompany each bid on the heating and ventilating only; in the sum of $100.00 shall accompany each bid on the plumbing contract; and in the sum of $50.00 shall accompany each bid on the electrical work only. The proceeds of this check accompanying each bid of the successful bidder shall become the sole property of said Adams School Township in the event that the successful bidder shall fail to enter into a contract and execute and furnish an acceptable bond within ten (10) days after he has been notified that his bid has been accepted. Certified Checks of unsuccessful bidders will be returned to them within five (5) days.

Plans and specifications for all of the above work may be obtained by responsible contractors by applying to H. M. Griffin, Architect, 105 McFarlan Building, Connersville, Indiana. The deposit required for general construction plans and specifications will be $15.00, and for other plans and specifications will be $10.00, The above named trustee will have one complete set of plans and specifications on file at his office.

The Trustee and Advisory Board reserve the right to reject any or all bids.

(Signed) WILLIAM HOLLAND,
Trustee of Adams Township, Decatur County, Indiana.
Wickens & Hamilton, Lawyers,
Greensburg, Indiana.
Dec. 29-Jan. 5-12.

Hand Power Elevators

There are over 6,000 Kimball, Number Two, hand power elevators in operation throughout the United States.

Their popularity is due to the simplicity of construction and to the ease and speed with which they may be operated. Being of the ANTI-FRICTION type and equipped with roller bearings this machine operates easier, rises quicker, needs less care and lubrication than any machine on the market.

There are no gears to cause friction, no clumsy, rattling drums, and no cables to break.

CONVENTION DETAILS INCLUDE NEW FEATURES THIS YEAR

Ft. Wayne Prepared to Welcome Indiana Building Contractors

In view of the apparent increased interest that evidently has been aroused this year in the annual convention of the Associated Building Contractors of Indiana, set for January 22 and 23, at Ft. Wayne, Ind., no efforts are being spared by those in charge of arrangements to make this event a practical, enlightening, series of sessions that will redound not only to the benefit of the individual contractors who attend but the actions taken will make themselves felt thruout the contracting forces and the state building field in its entirety.

There must of necessity be more or less routine procedure but that is to be reduced to a minimum and attention directed to the really pertinent matters that make for constructive progress that will reach out, keep on working, and make its influence felt long after the convention lights have been dimmed and the sounds have died away.

Among the new features to be introduced this year at the convention is one relating to practical talks by well known and prominent contractors who will stress upon the need for more efficiency in contracting endeavor, extension of the building season, and other topics of particular interest to men in the building field.

ILLINOIS CONTRACTORS TO HOLD ANNUAL CONVENTION SOON

Three-Day Session Planned

Illinois builders, members of the Associated Building Contractors of Illinois, have gotten the drop on the association members of Indiana and will go into annual convention at Chicago one week earlier. That affair will cover a three days' period and is expected to attract a large crowd of the building fraternity of that state.

One of the big events of the Illinois convention will be the banquet of the Builders and Manufacturers Mutual Casualty Co. of Chicago, at which the contractor delegates will be guests. The banquet is to be held in the Gold Room, Congress Hotel, on the night of January 16. The speakers of the evening will be: Hon. William E. Dever, mayor of Chicago; Hon. Colonel A. A. Sprague, Commissioner of Public Works of that city, and the Hon. J. Adam Bede, former congressman from Minnesota.

GREAT BUILDING VOLUME PILED UP IN 1923 IN INDIANA EXCEEDS PREVIOUS HIGH RECORD BY IMPRESSIVE MARGIN.

Brilliance of 1922 Effort Dimmed by Unprecedented Result Achieved in 1923

The fi nal tabulation and an analysis of the building construction activities for which permits were issued in the nine Indiana cities that maintain building inspection departments wherein definite construction records are kept show that they all experienced during 1923 the greatest building expansion programs of their individual histories. Not one city fell behind its 1922 performance, a remarkable fact when it is recalled that many of them that year established new high building marks that sent the state record soaring to an unheard altitude as far as Indiana building construction effort was concerned. Consequently, the impetus that carried right on through 1923 set a new state record again, there being 6,590 more permits issued during the year past than were granted the previous corresponding period. The total estimated valuation of the 1923 Indiana volume of building amounted to $69,574,526 last year as against $59,187,442, a gain of $10,387,084 or 17.5%.

While some of the smaller cities showed the greatest gains and crowded Indianapolis, Ft. Wayne and South Bend to the rear, nevertheless, the performance of these three cities in smashing their great records of 1923 is really a great one in that they had big figures of millions of dollars to overcome and they all did it. Indianapolis topped a $26,110,607 level, South Bend went right on over a $10,098,035 record and posted a $13,468,066 high mark with Ft. Wayne just behind when she passed her $9,642,744 1922 record and recorded a $11,860,623 volume of building in 1923. Three of the cities, Gary, Evansville and Hammond, registered $4,000,000 and over. Terre Haute ran above two and a half millions of dollars work of new building. Richmond topped the million dollar mark and little Elkhart fell short just $79,050 of that figure.

It was a great year for Indiana building construction endeavor and the effect of a fairly certain degree of stabilization of material prices and a minimum of Labor trouble undoubtedly went a long way in aiding the rolling up of the great state building record in 1923.

In the matter of increase in issuance of permits and gains in estimated valuations the following order of the cities prevails: Elkhart, 66 more permits, 53.8%; Richmond, 113 more permits, 48.9%; Gary, 422 more permits, 45.6%; South Bend, 1,073 more permits, 33%; Evansville, 813 more permits, 30.9%; Ft. Wayne, 650 more permits, 23% Terre Haute, 869 more permits, 19%; Hammond, 399 more permits, 8.9%; Indianapolis, 2,185 more permits, 3.57%.

	1923		1922	
Cities	Per.	Est. Val.	Per.	Est. Val.

PLANS IN THE MAKING TO PROVIDE UNUSUALLY INTERESTING PROGRAM FOR SEMI-ANNUAL MEETING OF INDIANA ARCHITECTS

Two-Day Session Contemplated

The regular semi-annual meeting of the Indiana Society of Architects is to be held in Indianapolis Friday and Saturday, February 8 and 9. The two-day session has been decided upon in view of the fact that the annual Indiana Architectural and Allied Arts Exhibit is to be held at the John Herron Art Institute in February and is to be officially opened by the state architects Saturday, February 9.

It was officially moved, seconded and carried at the monthly meeting of the Indianapolis Architects' Association Wednesday night that that body meet jointly February 8 with the Indiana Society of Architects which will be in session at that time.

Tentative plans for this gathering of the architects from throughout the state provide for a noon luncheon at the Lincoln Hotel on Friday, to be followed by a business session that afternoon. At 6:30 p. m. there will be a banquet at the hotel and it is proposed to make this a real affair.

Since the regional meetings and various conferences held during the past year have offered such excellent programs that have been thoroughly enjoyed by the architects in attendance, a move is on foot to keep pace with the standard that has been set and endeavor to secure a speaker or speakers with a real message. It is the general opinion that the two big meetings of the state architects each year should take on a more serious entertainment feature and offer something worth while for the visiting Indiana architects to take back home with them. It is along that line that the February meeting is being planned.

One thing about the approaching assemblage is that so many things have been accomplished since the June meeting that a review of that which has taken place will be most interesting to many of the architects who have not taken an active part in the doings of the society, and should impress with the fact that the organization is functioning on a much larger scale than heretofore. Tangible evidence grows continually to acclaim that the missionary efforts put forth in years past to effect policies of broader vision have not been in vain, instead, as time moves on, the result of that early effort becomes more and more apparent in the achievement of things that years back would have been considered impossible.

There is no question but that today the building construction industry of Indiana is moving steadily ahead to a higher plane, has already gained a more generally acknowledged business recognition, has been imbued with a more advanced constructive business spirit, and is commanding greater respect from other business and professional interests. It is true that all this is the result of the combined efforts of the most important elements engaged in the Indiana building field, but no one element has had a greater hand in bringing about this distinct progressive advance than the Indiana Society of Architects, the official representative of the architectural profession of the state.

LITTLE HEARD OF RESEARCH WORK AS NOW EMPLOYED IN EDUCATIONAL AFFAIRS, DISCUSSED BEFORE ARCHITECTS

Indianapolis Association Highly Entertained at January Meeting

An auspicious beginning, and right in line with the entertaining and enlightening program feature that was carried right through the past year by the former officers, was made Wednesday night by the new administration of the Indianapolis Architects' Association at the regular monthly meeting of that body at the Hoosier Athletic Club. As per custom, there was the 6:30 p. m. dinner, with a short routine business session afterwards, and, as a conclusion, a most interesting talk by Murray A. Dalman, Director of Reference and Research, of the Indianapolis Board of Education.

Though somewhat apart from architecture, yet closely allied with it in that it is by means of such reference and research work that the building needs are arrived at in the modern handling of a large city's educational facilities and requirements, Mr. Murray's subject-matter proved most interesting.

Of those present many admitted that they were unaware of the extent to which the school authorities delved in arriving at a conclusion upon which to base a building program.

The speaker elaborated upon the effort spent in making a city survey to gain a school census by means of which to decide upon building sites and the type of buildings required.

He referred to the induction of the present research system and the decision of the Indianapolis Board of Education to secure from the architects, through competition, suggestions that could be incorporated into standardized building plans and requirements along the line of which the building program is now being carried forward.

The various charts employed by Mr. Dalman in keeping tab on attendance matters, movement of pupils from one locality to another, the increase in school population by the arrival of pupils from other cities, and the general average of the progress of pupils in their studies were interesting bits of evidence of the thorough manner in which the school research is carried on. It was not hard to realize the great value of this little known of work which analyzes the school situation and enables the school authorities to contemplate and visualize the future requirements.

The interest aroused by Mr. Dalman's remarks was attested by the pertinent discussion that followed and brought out many enlightening points.

Reference was made to the Labor shortage and to part time vocational and educational training as a medium through which to train apprentices and attempt to overcome the shortage in the Labor supply. Mr. Dalman asserted that the school authorities stood ready to encourage apprentices but added: "Where are you going to get a class of boys who are willing to study for the trades? You can't get the boys for that kind of work."

The selection of Mr. Dalman as the speaker for the evening was a most happy and fortunate one and he brought to the architects a message that was greatly appreciated.

AROUND THE STATE

Our good and earnest member, George W. Allen, chairman of the Membership Committee, has been elected president of the Kiwanis Club of Laporte and was in Indianapolis to attend the state meeting Wednesday night. George is a great worker and when the Laporte Kiwanians chose him for a leader it is our opinion they knew exactly what they were doing.

Architects Thomas and Allen, Terre Haute, announce the removal of their office from 25½ South Fifth street to Room 39, the Swope Block, that city.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

EVANSVILLE MAYOR DIRECTS ATTENTION TO CITY'S BUILDING ENDEAVOR LAST YEAR

Also Praises Effort to Effect New Building Code

One of the features in Evansville the past year, according to Mayor Elmdorf in his annual address, was the building construction expansion that took place. He called attention to the fact that the quoted valuation of the new work ran over $4,000,000, or $1,000,000 more than the best previous yearly record.

He stressed upon the point that most of the building activity related to residential work, though there were a few schools and public buildings erected. However, there was a noticeable shortage of industrial construction work.

A real accomplishment of the building inspection department in 1923, as pointed out by the mayor, was the compilation of a new city building code upon which much effort was spent. This code has now been completed and is in the hands of printers. It will be passed to the city council for their approval. In considering this the council will no doubt have some opposition by persons who have selfish interests. The code should be fair, reasonable and lenient toward contractors and supply men but the security and safety of all citizens should be weighed above the selfishness of a few. This code should be considered at an early date and passed as promptly as possible consistent with thorough investigation because this is the last obstacle in the way of a class two basic insurance rating.

AGITATION FOR SPANNING OHIO RIVER AT EVANSVILLE GROWS

Big Bridge Improvement Project Gains Support

Now that the water impediment to highway traffic north and south from and to Evansville has been bridged at Hazleton, a few miles north, the sentiment favorable to the construction of a bridge across the Ohio river in the vicinity of Indiana's southern metropolis continues to gain momentum in every direction.

This is particularly true in Kentucky, where the advantages of such a connection between the two states is becoming better understood. Numerous newspapers in southern Indiana and western Kentucky are lending editorial support to the project and thereby spreading the gospel in quarters where it is calculated to be very beneficial.

It is only a question of time until this project, long contemplated, will become a reality, as the entire project now but waits upon the will of our Kentucky neighbors. The federal government and the state of Indiana are ready to proceed as soon as Kentucky finds herself in a mood and position to co-operate.

Such a bridge will be of inestimable value to Evansville's commercial life and growth, and would prove a great boon to western Kentucky, furnishing a commercial highway outlet such as that section has never had.

MOVE TO SET NEW DOWNTOWN THOROUGHFARE BUILDING LINE STIRS UP OPPOSITION

Property Owners Are Busy on Remonstrances

Zoning in the way of establishing new building lines in the downtown business districts of Fort Wayne is meeting with more or less spirited opposition on various occasions.

The most recent evidence of the above was indicated last week at a meeting of the board of public works and had a bearing on the proposed effort to set a new building line on West Main street from Calhoun to Broadway. One signed remonstrance was presented and several other property owners appeared in person to request more time for the preparation of further remonstrances. The board has granted property owners an additional week in which to file remonstrances against the proposed new line and indicated that hurried action will not be taken in order to pass the resolution.

SATISFIED WITH ADVICE OF EXPERT ENGINEER

So City Officials Tell Realtor

Citing the fact that a special landscape engineer, named Kessler, employed by the city at an approximate cost of $5,000. had recommended in 1911 that the Columbia street bridge should be retained at its present location, the city board of public works wrote a letter to the Realty Board Special Bridge Committee stating that it felt the matter of the Columbia street bridge location was a closed incident and that it was not in accord with the move agitating the securing of more expert engineering advice.

The above referred to the contemplated new Lakeside bridge.

ORDERED STARTED

Subway Passage Under Railroad to Materialize

Work will be started immediately on the subway beneath the Wabash and Pennsylvania tracks at Lafayette street, Fort Wayne, according to the latest announcements from the city hall. The Arter Construction Company, having the contract for the work, has been instructed to begin construction operations at once, starting on the south side of the Wabash tracks and working to the north.

This project will be rushed throughout the winter unless weather conditions become so severe as to make excavation impossible. Switch tracks of the Pennsylvania railroad have already been cut and removed from the street right of way and the newly acquired switch site completed and placed in use.

BIG START MADE

Bank Clearings' Record for a Week Posted

If business activities in Fort Wayne during 1924 are indicated by the record made by local banks during the first week of the year, unusual prosperity will prevail during the coming twelve months.

The report of the Fort Wayne clearing house for the week disclosed the fact that the total bank clearings in the city for the first week of the new year were $3,752,212.49, the largest the local clearing house has ever reported for one week. The clearings for the week were nearly $1,700,000 more than the last week of last year and more than $1,500,000 more than the first week of 1923.

GREAT MEETING HELD BY INDIANAPOLIS BUILDING CONTRACTORS

Fine Turnout at Annual Association Gathering

Whether it was Indianapolis' unprecedented building year, the continuity with which it was possible to carry on construction operations, or whether the 1924 prospects were back of it all nobody knows. However, the members of the Building Contractors' Association and Builders' Exchange met at the Severin Hotel Friday night for their annual meeting, which developed into a "regular fellow" affair, a love feast, in other words a fine jolly gathering.

It was one of the best sessions in point of numbers ever participated in by the association and exchange members and the spirit of good fellowship that manifested itself was great to see.

Talks having to do with association work and endeavor, building conditions, the outlook, etc., were made by various members and a general keynote was sounded for greater co-operation between the men of the industry.

The special feature of the evening was a stirring address on "Human Engineering" by Charles Watkins, Muncie, Ind., nationally known welfare worker, who stressed upon the point of contact between man and man, employer and employe and the benefits to be derived from the proper method of contact, the great good that will accrue from a proper understanding of one man for another.

ANNUAL ELECTION MONDAY

Indianapolis Members to Vote on New Officers

Inventory has been taken, reviews of the work of the past year have been made and the decks are now being cleared for action for the coming building season by the Indianapolis Building Contractors' Association.

The first important move will be the annual election to be held at the association headquarters, 320 Peoples Bank Building, Monday, January 14. The polls will be open from 10 a. m. till 2 p. m.

There is but one ticket in the field so far, and no opposition to it is expected. The men nominated have long been associated with organization work and are all leaders in their craft field. They can be depended upon to give the association the very best effort to make it a real factor in the local building sphere. The men proposed for office are:

President—William Carper.
First Vice-President—G. C. Wege.
Second Vice-President—J. G. Hays.
Third Vice-President—W. W. Wise.
Fourth Vice-President—R. E. Poehner.
Treasurer—Robert Berner.

These men represent the following contracting crafts: General contractoring, marble and tile setting, plumbing, brick contracting, heating, structural iron.

NEW METHOD TRIED AT NEW ORLEANS IN ARRIVING AT WAGE SCALE BASIS

Purchasing Power of the Dollar the Big Factor

An experiment in the settlement of wage disputes is being tried out in the electrical trade in New Orleans, which is based on the purchasing value of a dollar now as compared to 1914, since that year is generally accepted as being normal. Both the contractors and journeymen agreed that the average number of days worked in that trade is 300, therefore with a rate of $4 per day in 1914 the average yearly income of each worker was $1,200. The value of the dollar, however, began to depreciate in 1915 until now it is only worth 63.8 cents. It was found that although the hourly wage rate had increased to 90 cents the workers' real wages had decreased, and a new scale of $1.05 was determined upon to equalize the difference.—Weekly Bulletin, National Building Trades Employers' Association.

BIG RENT INCREASE SHOWN BY EXTENDED INVESTIGATION

Government Puts Out Figures

The average family throughout the United States during 1923 spent to obtain shelter 63.4 per cent more than in 1913, according to investigations made by the United States Department of Labor. Rents are now higher than they have been any time since 1913.

TO BUILDING MATERIAL SUPPLY FIRMS:

Gentlemen:

Preparations are now being made to get out the official souvenir p r o g r a m for the Sixth Annual Convention of the Associated Building Contractors of Indiana, to be held at the Anthony Hotel, Fort Wayne, Indiana, on January 22 and 23.

This program will in addition to routine convention data, carry a complete list of Indiana Architects and a compresentive and representative directory of Indiana contractors arranged alphabetically according to their cities and the trade under which they operate. It is the only list of its kind issued in Indiana and when gotten out in 1922 carried such an appeal that the demand soon exhausted the entire edition of over 2,000. Besides being used at the convention, copies are sent to all Indiana architects and contractors.

Three thousand of these programs are to be issued this year and in addition to being used at the convention, individual copies will be sent all contractors and architects throughout the State.

The advertising pages will be divided four ways as follows, at these rates:

One Eighth Page, 2½x2 in.	**$10.00**
One Quarter Page, 2½x4 in.	**17.50**
One Quarter Page, 5 x2 in.	**17.50**
One Half Page, 5x4 in.	**30.00**
Full Page, 5x8 in.	**50.00**

We should be pleased to have you consider the merits and possibilities of this advertising proposition, and shall be pleased to hear from you in the near future.

Very truly yours,

LEIGH C. FELTON,
Chairman.

HAMMOND DID IT

Followed Other Indiana Cities and Hung Up New High Building Record in 1923

Regarding building construction in Hammond 1923 outstripped all previous records. The sum total of the estimated valuation of the building work for which permits were issued amounted to $4,007,940 according to the official report of city building inspector Henry Vis who had listed in his office 1,184 permits. In 1922 785 permits were issued for an estimated valuation of $3,679,425 while in 1921 there were 599 permits granted representing an estimated investment of $1,942,435. Thus it can be seen that 1923 stands out head and shoulders above the two previous years which were among the best ever recorded locally.

Building Commissioner Vis states that, of the four millions and over put into building construction expansion, one million represents new business structures and the remaining three million was invested in apartment houses and dwellings. There was only one really large project recorded on the records last year and it was the Hotel Indiana, the permit carrying a $375,000 estimated valuation.

The official monthly figures for the year just closed are:

January	32	$159,150
February	23	431,373
March	119	606,225
April	131	408,075
May	144	363,820
June	140	390,690
July	113	296,840
August	112	265,385
September	94	155,450
October	122	338,200
November	92	326,950
December	62	265,780
Total	1184	$4,007,940

GOOD START PROMISED

Prospective Work Lends Hope for Active Year in Hammond Building Circles

Two promising projects for 1924 are casting a hopeful glow over the new year building prospects. The First National Bank is contemplating a large bank and office building for Hohman and Fayette Sts., and St. Margaret's Hospital has a $365,000 addition under consideration. However, that which Hammond needs badly is more home building operations the city still being woefully short on housing facilities despite the fact that many houses were built in 1923. What is needed most is a development of effort toward the construction of medium priced modern homes that will be within the cost reach of the wage earners, or which could be rented at a reasonable figure that the working men with families could afford to pay.

There is considerable talk relative to contemplated apartment house construction in 1924, in fact, if such work now in prospect materialized the city should be well supplied with that type of buildings when 1925 rolls around.

AT LEAST THINGS ARE NOT AS BAD AS ONE MIGHT THINK

Union Disciplines Reckless Business Agent

Things have not all gone to pot in union circles even though untoward circumstances have arisen now and then to slap an inky smudge across the union firmament. Just recently a Union Trial Board at Chicago assessed a $5,000 fine and a five year suspension against Fred (Frenchy) Mader, erstwhile business agent of the now disrupted Fixture and Hangers Union, 381. The charges preferred against Mader several months ago alleged that he had appropriated to his own use certain of the union funds and on those charges he was convicted by the trial board.

NO WAY TO GET AROUND ATROCIOUS WEATHER OF LAST WEEK

Cold Spell Puts Absolute Halt on Calumet Building Operations

Even advocates of winter building were forced to back up last week and keep within the radiating possibilities of heating appliances, and oh what a dent the weather man put in local building activities.

Beginning Monday, December 31, the rain set in and soon cooled the atmosphere. By 10 a. m., there was a decided drop in the temperature but that was only a starter. Once on the toboggan the mercury kept slipping, sliding and skidding, then along came snow and a real cold snap until New Year's day found the thermometer registering five below zero. Good-bye outside work for the time being and even inside work on new construction operations. While everybody shivered and chattered the mercury jazzed on till it slumped to 16 below Saturday, where it hit bottom and started on a rebound upward. It was the first serious impediment building effort has experienced since away back last spring.

NOW THEY'RE BUSY

Convention Calls Sound for Association Secretaries

Remember the old saying, "Every dog has his day?" So has an association secretary. His big time usually occurs about this season of the year and 1924 has dawned with no exception to the general rule as far as secretaries are concerned.

January has popped with an outlay of attractions for which the B. T. E. A., mentor made hectic preparations. Topping the list came an invitation from the National Building Trades Employers Association to attend the annual convention and banquet at the LaSalle Hotel, Chicago, January 7 and 8. Next was an "invite" to a like affair to be staked January 16 and 17 by the Associated Builders of Chicago and the Builders and Manufacturers Mutual Casualty Co., and last but not least, a summons to be present at the convention and banquet of the Associated General Contractors of America also at the LaSalle Hotel, Chicago, January 21 to 24.

Though these engagements will necessitate some stepping, Secretary Cole is the one to step when Hammond representation is at stake.

TRACK ELEVATION PROSPECTS GROW

Chief Engineers of Railroads With Hammond Right of Ways Hold Important Meeting

It appears as if finally something really is to be done toward railroad track elevation in Hammond. Last week the engineers of all the railroads passing through the city held a special meeting to formulate preliminary details looking toward a comprehensive track elevation scheme. Definite plans are to be worked out and just as soon as the blue prints are ready the engineers will hold another meeting.

It will all require time but now that the railroads are showing active interest in the scheme Hammond citizens are hopeful that this big work will actually materialize before long.

BUT WHY REMIND US

It's Hard Enough As It Is

Tugging at a taut, quivering fishing line, listening to the chirping birds or sniffing of the perfume of blooming flowers, the products of a rare day in June come back as pleasant memories to remind one that there are other more facinating things in life than hugging a sizzling radiator while the January blizzard roars without.

CALUMET BUILDING PROGRESS

Rufus Danner & Co., general contractors, are putting on the final touches on the school buildings under construction at Gary and Indiana Harbor.

Charles Rhoades, contractor and Florida migrator, just returned home in time for the zero weather. He insists Dixie winter weather is much more likable than that that grips northern Indiana. We have never been to Florida, but admit the weather down there wouldn't have to exert itself much to outdo our brand up here. E. E. COLE.

News of the Week

The asterick (*) prefix to an item indicates additional information to report published in previous issue.

INDIANAPOLIS

Jasonville, Greene County, Indiana, at the office of said Board in the Meridian Street School Building at Jasonville, Indiana, until 2 p. m., February 4, 1924, in accordance with the plans and specifications prepared by Johnson, Miller, Miller & Yeager, architects of Terre Haute, Indiana.

Separate bids will be received for the general construction of the building, and for the installation of the heating and plumbing systems of said building.

The total estimated cost of the general construction, heating and plumbing of work aforesaid is $75,000.00.

The plans and specifications are now on file at the office of Mr. E. A. O'Dell, superintendent of schools, Jasonville, Indiana, for inspection of the bidders, and additional copies of said plans and specifications may be obtained at the office of said architects at 30 North Fifth street, Terre Haute, Indiana, and in the office of the State Board of Accounts, State House, Indianapolis, Indiana.

All bids must be submitted on forms as prescribed by the State Board of Accounts and with a non-collusion affidavit. The right is reserved to reject any and all bids. Each bidder must deposit with his bid his certified check made payable to the said Board in an amount equal to four per cent (4%) of said bid, as a guarantee that he will enter into a contract and bond to carry on said work according to the plans and specifications if said contract be awarded to him. In the event the bidder fails or refuses to enter into a contract and bond, if a contract be awarded him, within ten days after the notice of the acceptance of his bid, said check and the amount of money represented thereby shall become the property of the School City of Jasonville which sum is agreed upon as liquidated damages for the failure of the bidder to enter into said contract and furnish bond for its faithful performance.

Each bid must be enclosed in an envelope and the name of the bidder placed on the outside thereof.

WOMEN'S DORMITORY
NOTICE TO BIDDERS

Bids for the construction of a Women's Dormitory on the campus of Indiana University will be received in the office of the undersigned until Tuesday, January 29, noon. Plans may be examined in the office of the architects, Lowe & Bollenbacher, 108 South LaSalle Street, Chicago, Ill., and the Secretary of the Board of Trustees, Bloomington, Ind. Plans may be secured from the architects.

JOHN W. CRAVENS,
Secretary, Board of Trustees.
Bloomington, Ind.

Jan. 12, 1924.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that William Holland, trustee of Adams School Township, Decatur County, State of Indiana, whose post office address is St. Paul, Indiana, and the Advisory Board of said Township, will until one-thirty o'clock p. m. on Tuesday, January 15th, 1924, receive bids for alterations and additions to the school building at St. Paul in said Township; also for the installation and equipment of same with heating and ventilating system, plumbing and electrical work.

The estimated cost of the general construction is $24,000.00; of the heating and ventilating system is $8,000.00; of the plumbing system is $5,000.00; and of the electrical work, $1,000.00.

Contractors may bid on the general construction of said building and the equipment of same complete, or on any separate contract. All bids must be sealed. A Certified Check made payable to the order of the above named trustee in the amount of $750.00 shall accompany each bid on the whole of said work; in the sum of $500.00 shall ac company each bid on the general construction, only; in the sum of $200.00 shall accompany each bid on the heating and ventilating only; in the sum of $100.00 shall accompany each bid on the plumbing contract; and in the sum of $50.00 shall accompany each bid on the electrical work only. The proceeds of this check accompanying each bid of the successful bidder shall become the sole property of said Adams School Township in the event that the successful bidder shall fail to enter into a contract and execute and furnish an acceptable bond within ten (10) days after he has been notified that his bid has been accepted. Certified Checks of unsuccessful bidders will be returned to them within five (5) days.

Plans and specifications for all of the above work may be obtained by responsible contractors by applying to H. M. Griffin, Architect, 105 McFarlan Building, Connersville, Indiana. The deposit required for general construction plans and specifications will be $15.00, and for other plans and specifications will be $10.00, The above named trustee will have one complete set of plans and specifications on file at his office.

The Trustee and Advisory Board reserve the right to reject any or all bids.

(Signed) WILLIAM HOLLAND,
Trustee of Adams Township, Decatur County, Indiana.

RECOUNT OF PROGRESS ADDS TO ATTRACTIVENESS OF THE FT. WAYNE CONVENTION

State A. B. C. Ready for Annual Meeting

The sixth annual convention of the Associated Building Contractors of Indiana to be held at Ft. Wayne next week, Jan. 22 and 23, will be to some extent in the nature of a home-coming, for six years ago the organization had its inception there and this will be the first time an annual convention of the State A. B. C. has been held in that city since the original meeting. No one in 1924 would be able to recognize in the present body the infant to which Ft. Wayne gave birth back in 1918. The membership has grown from 17 to approximately 800 and includes general contractors and sub-contractors of all the building crafts from all over the state of Indiana.

The organization is fully representative of the building contracting industry in all its ramifications thruout the state and for the past years since its beginning has endeavored constantly to promote, protect and advance the combined interest of Indiana builders and the general welfare of the whole building industry.

With another convention at hand, at which future policies are to be discussed and planned it is not amiss to look back, take inventory and check up on the activities of the State A. B. C., that have brought beneficial results.

These are the most important achievements:

It has secured for its members connection with a company organized and operated by builders to furnish compensation insurance at actual cost. It has successfully opposed and defeated proposed legislation in 1919-1921 and 1923 that would have been detrimental to builders. It has promulgated an acceptable working agreement; assisted in organizing local builders; advised and assisted member associations in the adjustment of labor difficulties; it has supported and aided in the successful maintenance of a weekly publication of building news, The Indiana Construction Recorder, and has brought the builders of various cities together in conferences, giving them an opportunity for closer acquaintance and a better understanding of current issues.

The A. B. C. was instrumental in the promulgation and passage of a law in the 1923 legislature providing for an Administrative Building Council of Indiana, composed of state officials, architects, engineers, contractors and employes, the duty of which council being to formulate and provide standard building requirements for the regulation of building construction and to see that this law is administered. This council has been organized and is now at work. This is one of the greatest constructive movements ever accomplished by those engaged in the building industry of the state. None other than the A. B. C. of Indiana, a state organization, made it possible for the contractor to have a say in this matter. The co-operative spirit manifested by the architects, engineers, contractors and employes for the advancement of progressive constructive principles in the industry has brought those four elements to a better understanding of their responsibilities and a more wholesome respect for each other.

And, in the final analysis, there is no disputing the fact that the Associated Building Contractors of Indiana, as an organization, has done much to stabilize and insure wholesome conditions under which the present-day builder, be he an organization member or not, operates.

It is a recollection of what has been done and a realization of the beneficial influences that have developed that is causing a greater interest than ever in the approaching convention, indicating a record attendance at Fort Wayne next Tuesday and Wednesday.

INDIANAPOLIS CONTRACTORS' ANNUAL MEETING SURPASSES IN SPIRIT ANY PREVIOUS LIKE EVENT

Big Gathering of Builders Make Merry and Listen to Inspiring Talks

The annual dinner of the Indianapolis Building Contractors Association and Builders Exchange, held at the Severin Hotel, Friday, January 11, was a real event in the organization's history marking, so it would seem from appearances, the dawn of a new day of even greater fraternization and understanding amongst the leading contracting interests of the city. There was a large and enthusiastic crowd present, men representing the various contracting crafts, and on all sides sounded a great vibrant key-note calling builders to a greater co-operative effort that more unity of action may be put into force for the better facilitation of the promotion and advancement of the combined interests that center in building construction affairs.

The dinner itself was a sumptuous affair and of itself would have been a sterling evening feature. However, it was but a part of the excellent program that had been arranged, and that which followed proved even more attractive, not only from the atmosphere of good-fellowship it generated but from the broader vision it inspired.

President Fred W. Jungclaus of the association, whose term of office was nearing its close, ably presided as toastmaster, and in a short address referred modestly to the efforts he and his fellow officers had sought to exert in order to cement the contracting fraternity closer together by eliminating selfishness and substituting in its place a big broad co-operative spirit that would work to the benefit of all regardless of their crafts. In closing he thanked the members of the organization for the support they had extended and beseeched them to loyally back up the efforts of the incoming administration in its campaign for continued progressive policies. He then called upon Wm. Carper, presidential nominee, since elected, who pointed to what had been accomplished by the association in 1923 and entered a plea for the whole-hearted support of the membership in the work that lie ahead in the future. He asked the indulgence of the members in that it was a little early to announce given policies for the coming year but assured his auditors that such policies would be of a constructive nature.

Attorney Harry Fenton, General Counselor of the Associated Building Contractors of Indiana was next called upon, and in his sincere, earnest, stirring way sought to arouse the contractors to the urgent need for greater and more intensive co-operation among themselves not only locally but on a state-wide scale. Such practice he asserted kept the contracting forces in close touch with each other and created a solidarity of the

whole thru which it was possible to exert a power for good and a defensive force that would brook no inimical intrusion from influences that might seek to discount or impede the building contracting industry. He earnestly urged contractors everywhere to support their local associations and thru them back up and encourage the advanced policies that are being introduced and carried on by the state associations of builders.

When all the rest had had their say Toastmaster Jungclaus paved the way for big feature of the evening by introducing Charles E. Watkins, Muncie, Ind., nationally known welfare worker, connected with the Muncie Products Co., Division of the General Motors Corporation. The many Indiana contractors who, upon several occasions, have heard Mr. Watkins talk can well appreciate the latent power concealed in the message he had for the Indianapolis association membership.

The speaker took for his subject, "Co-operation" and sought to impress upon his audience its inestimable value in the present day scheme of life in all its branches. He stressed upon the fact that the late war had taught this country, all nations and men, the need for co-operation in national crises. That being the case, Mr. Watkins insisted co-operation was an everyday necessity with men in every day life, especially amongst men of given industries, and should be practiced between the industries themselves. No man, no industry, no nation can advance, get anywhere unless he or they exert a spirit of co-operation, the speaker asserted. He pointed to the fact that progress is marked by unity of action and admonished contractors to effect unity of effort, to build an association the personnel of which would clothe it with authority and enable it to speak with such authority.

In conclusion he endorsed such meetings as the Indianapolis affair as a means for men to take stock of themselves, cast off personalities and adjust themselves and their affairs to prevailing conditions.

It was a fine meeting, brimful of enthusiasm and is still the talk of those who attended. Many have expressed the belief that last week's gathering has aroused a new spirit, and tangible benefits will develop sooner or later as a result of this effort to inspire the contractors that their attitude toward each other is of as great importance to their business as the more material things they employ in the pursuit of their calling.

DECREASE IN LABOR FIELD

Not in Wage Matters, However

The S. W. Straus and Company has just completed a nation-wide survey which shows that in seventeen building trade unions there has been a loss of 60,000 members since 1920.

Membership in the bricklayers, masons and plasterers' union is reported unchanged at 70,000; electrical workers unchanged at 142,000, and lathers unchanged at 8,000. Hod carriers report a gain from 46,000 to 47,500; plasterers and cement finishers a gain from 23,900 to 25,200; sheet metal workers from 24,200 to 25,000; slate and tile roofers from 2,800 to 3,000 and stone cutters from 4,400 to 4,900. In the Carpenters and Joiners' Union, there was a drop from 352,000 to 315,000, and in the painters from 113,300 to 92,800.

EVERYTHING READY FOR ANNUAL MEET OF INDIANA CONTRACTORS

All plans have been completed for the State Contractors' Convention, Tuesday and Wednesday of next week and Ft. Wayne is just awaiting the opportunity to welcome the many delegations of the contracting fraternity from out over Indiana who are expected to attend this event.

The headquarters for the contractors have been established at the Anthony Hotel where the convention sessions and banquet are to be held.

All delegates are urged to register with the Credentials Commitee as soon after arrival as is convenient. This is very important.

As a big crowd is in contemplation it is suggested that all A. B. C. members and others who are figuring on attending the convention make early reservations for hotel accommodations.

Especial attention has been devoted to this year's convention program which in some respects differs from those provided at previous like affairs. An attempt has been made to get up an arrangement of subjects that will prove especially instructive and entertaining, this in addition to the routine matters that must naturally be taken care of.

Every indication points to a record attendance and a representation of contracting forces that will bespeak the strength of the Associated Building Contractors of Indiana.

TIME—January 22nd and 23rd, 1924, 10:00 a. m.

PLACE—Fort Wayne, Indiana, Anthony Hotel.

LABOR GETS INTO FINANCIAL FIELD

Has Many Banks Around Country

Eighteen banks scattered over the United States having aggregate resources of $104,125,522 are now owned and controlled by labor organizations. Indianapolis is the latest city to become possessed of one of these institutions.

STEEL OFFICIAL ENDORSES EIGHT HOUR DAY

Asserts Efficiency of Men is Increased

James A. Campbell, president of the Youngstown Sheet and Tube Company, believes the eight-hour day is a permanent fixture in the continuous process of the steel industry, and that the higher cost of steel making which it brought along is to be equally permanent. Mr. Campbell further states that the efficiency of the men has increased considerably since the twelve and fourteen hour shift was abolished.

RENT RECEIPTS DON'T APPEAL TO CONGRESSMAN

Would Re-establish Building Program

Chairman Langley of the House Committee on public buildings, plans to introduce in the next Congress legislation authorizing a bond issue by the government to provide funds for a public building program now favored by President Coolidge. Very little government building has been done during the past few years, and it is now costing $23,000,000 annually to keep certain governmental agencies in rented buildings.

WHAT'S THE USE?

Worry Never Got Anyone Anywhere

Don't worry if the coal bin is low or the old overcoat is threadbare! Don't do it!

Dr. Charles D. Walcott of the Smithsonian Institute, Washington, D. C., reports that the heat from the earth's surface is driving glaciers back toward the north pole. For instance, he advances the information that the famous Selkirk Glacier has moved back more than 2,000 feet in the last seven years, and that in another 1,000 years or so fur coats will be an effectation in the Klondike. We do feel sorry for that great army of pencil pushers who are writing reams and reams for the encouragement of winter building. How about their ilk in a thousand years when there is no more ice, and cold, and snow?

Again we say, "Don't worry!"

BILLIONS IN LOSSES REVEALED

Research Work on Part of Government Brings Forth Staggering Estimates

The first serious attempt to estimate the direct loss to the people of the United States through financial crises and business depressions was made by the Committee on Unemployment and Business Cycles of the late President Harding's Conference on Unemployment. In the report, submitted to Secretary Hoover, who appointed the members, Dr. Wesley C. Mitchell and Willford I. King of the National Bureau of Economic Research made exhaustive studies for the committee. They present tables which show the difference between the production of goods in years of depression and production in years of moderate or intense activity.

It is their conclusion that the worst years run something like 15 to 20 per cent behind the best, and something like 8 to 12 per cent behind the moderately good years.

Even 10 per cent of the national income represents several billions of dollars, so that the direct economic losses are enormous. These losses do not measure the intangible losses resulting from anxiety, privation and other concomitants of unemployment; unless, of course, one adheres to the opinion that the reduction of economic uncertainty would lead to a decline of efficiency. This view, however, is shown to be not nearly so common as the belief that the strain of booms and the suffering of depressions impair efficiency to a greater degree than uncertainty stimulates it.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

ARCHITECTS CAN BE A BIG FACTOR IN RELIEVING SPRING BUILDING CONGESTION

Clients Should Be Told Actual Facts About Folly of Postponing Projects Under Winter Conditions

The tendency, born of years of nothing more nor less than habit or custom, possibly, of the folks who have building projects in mind to lay aside their contemplations when the cold weather comes on has developed in these days of great building volumes to the point where it is a serious impediment to future building. Such action is but a jamming up of the building construction flow which, when the spring thaws come, causes a great flood and sweeps on to overwhelm the building industry. Included in the inundation is the architect, contractor, engineer, material supply man and even the prospective owner himself, the latter "hoist on his on poniard."

The monthly bulletin of the National Association of Builders' Exchanges ably sizes the situation up as follows:

"'When winter comes,' construction men know, that 'surely spring can not be far behind.' Unfortunately through the years the idea became fixed that the winter season was disadvantageous to successful prosecution of construction projects. But winter construction has been done, can be done and should be done.

"In the early days of the country's development, when time was less essential than it is today and when our industrial situation was less complicated, it was seemingly justifiable to defer building until climate conditions made matters a little easier. In our present rapid age when our vast population consumes the limit of production in many lines, construction can not afford to doze in the atmosphere of mid-Victorian non-aggressiveness.

"There is the possibility of a volume of construction for 1924, if present inditions are sound, equal to if not greater than for 1923. Realizing this the Council recently urged all those interested in essential building projects in the near future to undertake such work at an early a date as possible in the fall and winter.

"If winter is to bring a lull in meeting the demand for construction, next spring will find the construction industry confronted with problems of shortage in materials and labor transportation facilities, and a rising market that will seriously interfere with its progress. If that occurs the public will be forced to incur costly delays in getting needed improvements and run the risk of higher if not prohibitive prices.

"The advantages of uninterrupted construction throughout the year must be apparent to everyone. Whether used as an ameliorative on transportation problems, or as an aid to continuity of employment, or as a necessity in stabilizing production of materials, or as an effective contribution to the public demand for construction projects, every day added to construction is of incalculable value.

"It is curious to note how tenaciously prospective investors in construction projects and builders cling to the abscession that winter work is impracticable. I have indicated how this practice arose in the earlier days, and I am sure that a brief consideration of the winter of 1917 will reveal that cessation of construction during the winter months is the result of a psychological hallucination. The most severe winter weather was encountered in 1917—blizzards, extreme cold and high winds. But the nation was at war. All along the Atlantic seaboard, docks, piers, foundries, factories and warehouses were in course of construction. Did a blizzard bring delay? Not much. Tons and tons of steel were bolted up while the snowflakes sizzled on the red rivets. Yards of concrete were poured while the tampers' gloves froze to the shovels. But the work went on. The job was done. The possibility of a twelve months' construction year was revealed.

"Notable instances of major operations conducted during the Fall and Winter months during the past year or two with savings in construction costs ranging as high as ten per cent show the practicability of winter work and the benefits immediately accruing to individual owners and the public as well as to builders and labor on the job.

"The country's need today is very acute. The construction industry must stand or fall in its obligation to the public as it meets that need or fails to meet it. It must have the help of those who contemplate building or other construction projects if it is to meet this need. Every day lost means an added accumulation to the growing demand."

Architects long have been advocates of winter building for they realize that the rush is over, that they can better prepare plans, that material prices are ordinarily lower than under the heavy summer demand and that contractors will figure closer to land a job, thus hoping to hold their working organizations intact.

The architects have done good work in encouraging this off season construction move. More plans have been prepared during recent winters and contracts let earlier in the spring than was hitherto prevalent, but, still there is a void and the architects can do a great good by putting the facts clearly up to clients and impressing them with the value of the winter time to stick to their building contemplations and push them thru before the flood breaks in the spring.

PENCIL SKETCHES

Calfskin is used for making shoes, but the fellow who was skinned out of a commission by a competitor by unfair practice was walked on.

Yes, we have a fresh supply of application blanks. Write for them.

Old Fashion—The reason some people are always a back number.

Oversight—The thing always laid on the office boy.

Overalls—What college boys study to keep from wearing.

Acoustic—The doctrine of sound. Perhaps this accounts for all the noise made by the would-be's.

Appendix—That superficial part of our designs which needs a surgeon's knife.

Nudation—A set of blue prints showing our mistakes in life.

Odd Fellow—The man who is always at variance with the world.

Long Leaf or Short Leaf—You have leave to send in your one new member to I. S. A.

Opportunity is the occasion when man comes forth and shows his real worth, while lack of opportunity has held back many a good man through life.

You may have seen a door step and a side walk, but have you ever seen men hold back so hard sending in applications for I. S. A.?

Option—The power of choosing, but when we call to pay taxes we have no option.

Octagon—Has eight sides. Some men have more.

Promptness is one of the lost arts with most men these days.

None filed with Recorder of Marion county this week.

MASON CONTRACTORS OF INDIANAPOLIS STORM MEMPHIS, TENN.

Go to Attend International Mason Contractors' Annual Convention

So!

The cause for the harmonious melody that had seemed to grip the Indianapolis mason contractors for the past few weeks has been discovered. Everyone had wondered why it was the masons were continually humming, singing, or whistling "Dixie" and "Tennessee, I Hear You Calling Me." Early in the week the mystery was solved when a delegation of local masons, some accompanied by their wives, nineteen in all, gathered at the Union Station and boarded "the rattler" for Memphis, Tenn., there to attend the Fourteenth Annual Convention of the Mason Contractors' Association of the United States and Canada, held January 14, 15 and 16.

This is the big event of the year for Indianapolis masons and one to which they look forward with much anticipation. The Indianapolis association always sends a good-sized delegation, making a sort of annual holiday outing, paying the expenses of all members desiring to attend. This year was no exception to the general rule and the following made up the crowd from Indianapolis: James Hodgson, W. H. Hodgson and wife, A. Reed and wife, F. Gray and wife, F. Keeley and wife, Harry A. Fenton and wife, Walter W. Wise and wife, M. M. Bonnewitz, James Hodgsoon, Jr., Leon Joyce, Tom O'Hara, E. Pierson, James Rybolt and W. Rubush. Tom O'Hara is state vice-president from Indiana, while Harry Fenton is general counsel of the international association.

The convention was held at the Hotel Chisca and was largely attended by mason contractors from all parts of the United States and many sections of Canada, a fine program having been arranged to cover a three days' period. In addition to the customary business sessions, many social features were also provided for the entertainment of the delegates and their wives and it was herein that the far-famed southern hospitality shown in all its grandeur much to the pleasure of the guests. Auto trips about Memphis, theater parties, dances and a big banquet and grand ball were the main features.

NEW ASSOCIATION OFFICERS ELECTED

Strong Ticket Named

The annual election of officers of the Indianapolis Building Contractors' Association and Builder's' Exchange for the ensuing year, held Monday, January 14, resulted in the naming of these men:

President—William Carper.
First Vice-President—G. C. Wege.
Second Vice-President—J. G. Hays.
Third Vice-President—W. W. Wise.
Fourth Vice-President—R. E. Poehner.
Treasurer—Robert Berner.

The above officers in the order named represent these crafts: General contractoring, marble and tile setting, plumbing, brick contracting, heating, structural iron.

The men who are to guide the destiny of the association through 1924 are all successful building men, thoroughly familiar with the influences with which the industry meets up with and are old hands in organization effort, all of which should assure to the local association a strong and successful administration for the current year.

STATE RETAIL LUMBER DEALERS HOLD ANNUAL MEETING

Big Crowd at Indianapolis

The retail lumber industry of Indiana was strongly represented at Indianapolis the past week when some seven hundred or more lumbermen stormed the city to attend the three-day annual convention of the Indiana Retail Lumber Dealers' Association.

A program was arranged that would offer to the Hoosier lumber dealers practical ideas and suggestions that they could apply to their business. An attempt was also made to include addresses and discussions from which ideas might be developed that could be passed on to the prospective home builder and user of building materials to their individual benefit.

One of the principal speakers was William A. Durgin of the Department of Commerce, Washington, who explained the federal plan for standardizing lumber sizes, beginning next July. Mr. Durgin has been one of the federal department's most active workers in stabilization movements, including lumber and other commodities, which have very largely reduced the number of sizes made in many lines of industry.

INDIANAPOLIS BUILDING PERMITS

Issued Week of January 10 to January 17

Grade School: $148,550, Rochester and Walnut Sts. Owner, Board of School Commissioners. General contractor, William P. Jungclaus Co., 825 Massachusetts Ave. Work started.

NATIONAL BUILDING TRADES EMPLOYERS ASSOCIATION PUTS OVER BIG CONVENTION AT CHICAGO

Large Crowd Enjoys FineProgram Features

Unusually interesting, indeed, was the annual convention of the National Building Trades Employers' Association which took place at the LaSalle Hotel, Chicago, Jan. 7 and 8. There were a number of excellent speakers on the program who dwelt upon pertinent topics regarding building matters that appealed greatly and advanced information of much value to the contractors who were fortunate enough to be present.

One of the subjects that drew particular attention was none other than that pertaining to apprentices. It was admitted generally that the one and only way out from under the labor shortage burden for the building industry was through the avenue of the extension of encouragement to apprentices. Further, it was agreed that Industrial Schools, with proper co-operation and supervision, can be made into the best means for the making of a greater supply of skilled mechanics.

Along another line, the contractor auditors were urged upon the importance that should be made to create a more attractive market for building bonds. It was even suggested that contractors themselves should interest themselves in a nation-wide move in that direction as the selling of such bonds means investment in building securities which diverts money to the building construction field thus producing the financial wherewithal making possible the carrying on of building operations. Certain conditions have lessened the attractiveness of building securities for banks and other investors and some steps must be taken by building men to restore that attractiveness and draw to the industry a greater degree of confidence.

A general survey of the country as to conditions in building circles brought forth a response that indicated things to be in a satisfactory and healthy state. Most sections reported the building trades unions inclined to ask for increased wages next season, but in the main these contemplated demands are not much advanced over the present wage scales. There were some localities that reported no increased wage demands and others announced that the crafts had already signed up at the present rate. Practically every section of the country reported the building prospect for next season most promising.

Then the subject of association and organization endeavor was gone into thoroughly bringing to light one great drawback in the way of advancement, in the building up process and proper functioning of contractors' associations throughout the country. The great impediment to growth has to do with the lack of exercised co-operation, and the inclination of many members to "let George do it." In other words, the contractors join up, but fail to attend meetings of their own association or district and state organizations of like character. Such men, many of them, fail to keep in touch with what is going on, preferring to shift the burden of action to the shoulders of some other men who in their sincerity to the cause "carry on" regardless. However, the stay-aways are prone to severely criticise when results are not as great as they, in their individual selfishness, expected.

There were other diversified features which limited space prevents entering into except to say that the whole program was well selected and arranged, going to make up a splendid and inspirational meeting.

As a wind-up to the convention was an elaborate banquet put on Monday night, January 7, by the Building Construction Employers' Association of Chicago at which all delegates were guests.

PITIFUL

Cold and Heartless Tenant Turns on Landlord

So far we have heard no loud wailing or been impressed by any great display of loving sympathy. Yea, yea! The life of a landlord is a hard one.

The owner of one of Hammond's new apartment houses was arrested recently upon a complaint filed by a tenant to the effect that said landlord had not kept his fires up to the state of combustion that would furnish the proper amount of heat as required by the city ordinance. Why be so cruel and hard hearted as to expect the poor landlord to spend his bare rent pittance for coal to furnish heat for which contract had been made? Think of the suffering and mortification a little forbearance would have saved!

YES! WE HAVE OFTEN NOTICED SUCH THINGS

Where Does the Crowd Come From?

America will soon be stealing Russia's "stuff" from her. The latter country has the reputation of being the quickest crowd-collecting one in the universe. And yet, if Russia has a greater crowd assembler than some American construction operations we would like to see it.

For instance, recently the men making borings to get data on general ground conditions on the site of Hammond's proposed nine-story bank and office building had hardly begun work than they were surrounded by a considerable crowd of the curious.

NO!

It Hardly Seems Possible

Glory be! Word is going the rounds that the bricklayers are going to be real charitable and have decided to ask for no increase in wages next season. Could it be someone is spoofing? Yes, what?

CALUMET BUILDING PROGRESS

Morris Bros., general contractors, are building two six-room bungalows on Garfield street for themselves. Just a slack time proposition with them.

Contractors are putting the roof on the new Schlessinger apartment building situated on Hyslop Place.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given by the undersigned that the Advisory Board and Trustee of Madison School Township, Carroll County, Indiana, at the office of W. C. Smith, attorney, Delphi, Ind., will receive sealed proposals for the furnishing of all material and labor for the building and equiping of a four-room, one-story school building, including basement, heat and ventilating system, plumbing and septic tank and sewerage, electric wiring and fixtures. Separate bids will be received for each of the above, but joint bids will be considered for heating, ventilating and plumbing. As set out in plans ond specifications, profiles and requisitions now on file in the office of the Trustee of Madison Township and in the office of Samuel Young, architect, Monticello, and in the office of Will C. Smith, Delphi, Ind. Plans and specifications may be had for the individual use of bidders, from the trustee or from the architect, upon a deposit of ten dollars for general contract and five dollars each for heating and ventilation systems, plumbing and electric work, all of which will be returned if plans and specifications are returned in good condition on or before date of letting. Said sealed proposals to be opened and contract awarded for said improvement on the 15th day of February, 1924. Bids or proposals will be received up to 12 a. m. on said date. The said improvements are located in Madison Township, Carroll County, Indiana, and more particularly known as the northwest corner of the Eli Craig farm. The estimated cost of soid building is $36,000. Said bids will be for the completion of the said improvement in accordance with the plans, profile and specifications in the office of trustee, architect and Will C. Smith, at Delphi, Ind., and shall include all labor and material for said work. And in no cose will extra compensation be allowed for any additional work alleged to have been done by the contractor or contractors, to whom is awarded the contract. Each bid must be accompanied by a personal or surety bond in a sum equal to double the amount of the bid filed for the work bid on, to be approved by the trustee and advisory board, said bonds will be conditioned for the faithful performance of the work, the sureties if personal shall be resident freeholders of the State of Indiana, one of whom shall be a resident of Carroll County. Said bonds shall be for the benefit of any person, persons or corporations who shall suffer any loss or damage, by reason of any such bidder failing or neglecting to enter into a contract to perform such work, awarded on the bid, or to carry the same out in any particular or to pay for any labor or material which may have been furnished to any such contractor or contractors or to any sub-contractor, agent or superintendent under him, in the construction of such work. Said contract will be let as a whole or in part to the lowest responsible bidder, upon affidavit of non-collusion, which must be submitted with the bid, upon failure to submit such affidavit, such proposals or bid will be rejected and the board reserves the right to reject any and all bids. Time for the completion of said work will be agreed upon at the letting of said contract, by the trustee, advisory board and successful bidder.

B. W. AIKENS,
JOHN NICHTER,
RAYMOND DUBES,
Members of the Advisory Board of Madison Township.
PERRY RULE,
Trustee of Madison School Township.
Will C. Smith, Attorney.

Hand Power Elevators

There are over 6,000 Kimball, Number Two, hand power elevators in operation throughout the United States.

Their popularity is due to the simplicity of construction and to the ease and speed with which they may be operated. Being of the ANTI-FRICTION type and equipped with roller bearings this machine operates easier, rises quicker, needs less care and lubrication than any machine on the market.

There are no gears to cause friction, no clumsy, rattling drums, and no cables to break.

INDIANA CONTRACTORS HOLD ANNUAL CONVENTION AT FT. WAYNE

Fine Attendance and Program Mark Best Yearly Meeting Ever Held by State A. B. C.

Max Irmscher Elected to Head State Contractors Assn., for 1924

That long looked-forward-to event of the Associated Building Contractors of Indiana, the annual convention, has come and gone once more, and in its wake has left the impressive conviction that the Sixth Annual Convention, which occurred at Ft. Wayne, Tuesday and Wednesday, January 22 and 23, 1924, outshown and outdid all similar previous conventions of the State A. B. C. The program arranged was perfect down to the most minute detail and under the able guidance of President Fred W. Jungclaus was carried through with precision that precluded lost motion or time. The presiding officer was master of the situation at all times, seeming to inspire delegates with an attitude for business and constructive effort, instilling an impetus not to be denied, enabling an opportunity to cover the ground mapped out in an easy, methodical manner that never once allowed of confusion or a grand rush to finish up the business at hand in the given time up to adjournment. It was this ability of the presiding officer to center interest and keep things moving that gave to the recent convention such an attractive atmosphere that relegates once seated remained throughout sessions and never once was there that disturbing element, so frequent at conventions, of men coming in and going out and moving around.

Owing to the extreme cold weather that prevailed making trains and interurban cars arrive behind schedules delegates were a little late in arriving for the short opening session held in the auditorium at the Anthony Hotel. An invocation by Rev. Paul Krauss and an address of welcome by Ed. C. Miller, President Ft. Wayne Chamber of Commerce, to which President Jungclaus responded, comprised the morning's program.

Following the noon adjournment the afternoon session was held at the Chamber of Commerce, the roll call showing these cities represented: Anderson Chicago, East Chicago, Evansville, Ft. Wayne, Gary, Huntington, Hammond Indianapolis, Indiana Harbor, Kokomo, Lafayette, Muncie, Marion, Michigan City, Peru, South Bend, Terre Haute, and Vincennes. This was a 100 per cent representation of the city associations affiliated with the State A. B. C. organization.

Greeting From Architects Highly Appreciated

President Jungclaus, in his message of greeting to the delegates, stressed upon the fine attendance record which bespoke the interest in the State A. B. C., referred to the efforts exerted by the State Association during the year and particularly called attention to the greetings from the Indiana Society of Architects as printed in the convention program which read as follows:

"Fellow Workers in the Building Industry: We extend to you our greetings at your Sixth Annual Convention now being held at Fort Wayne, Indiana.

"We feel that our joint Regional Meetings have produced a better fellowship between the Contractor and the Architect. The LaFayette meeting was the final result of years of looking forward to a time when the Contractors and Architects could get together on a mutual basis. We earnestly hope that these meetings will continue in the future.

"Wishing you a very successful convention, we are,

"Very truly yours,
"THE INDIANA SOCIETY OF ARCHITECTS."

He said he considered that message a wonderful thing, really remarkable, true evidence of the spirit of fellowship that had been established between the two elements, the architect and contractor, and said he cherished the hope that that fellowship might be nourished and propogated through continued joint conferences, to the advancement of the building industry. Nor did he omit to comment on the better and more direct contact that had been established with Organized Labor, whereby the interest of the employer and employe could be taken up and threshed out with reason for mutual adjustments. In conclusion, he congratulated his auditors upon the result their co-operative efforts had achieved and urged a sincere continuation of that constructive policy.

Urges Contractors to Work for Extension of Building Season

A. E. Kemmer, Lafayette, First Vice-President of the State A. B. C., a general contractor of prominence and one speaking from experience, earnestly urged the contractors to use their best efforts to bring about an extention of the building season. He sought to impress upon the builders that their primary function is service; that the financial emolument they receive is, in reality, of secondary importance to the service they should render to the public. Demand, he asserted, necessitated an extension of the building period now in vogue and a large part of the burden of bringing about that extension developed upon contractors. Then by a process of analization he showed the advantages to be gained, summing it up this way: By "carrying on" through the winter season a contractor has a better selection of craftsmen from which to choose; there is always a seasonal decline in material quotations in the winter which reduces costs, a decline which is not offset even though artificial methods of warming and heating must be employed; the cost of stopping and again starting a job, a costly operation to the contractor, is eliminated; by continued building effort a successful working organization is held intact, a most important item to the contractor of large projects. Further, the owner gets his building sooner and is thus enabled to realize financially upon his investment at an earlier date. An extension of the building season will make for service to the public, relieve the strain on the available labor supply, eliminate an item of economic waste, make for a more steady employment of craftsmen, and accrue to the profit of the contractor who puts across his business in the dull season.

Secretary's Report

Secretary C. C. Pierson next reported on the condition of the State A. B. C., showing a good financial standing, a healthy tone and an increased membership, all of which was most gratifying to those present.

Advantages of Cold Weather Construction Brought Out

In line with Mr. Kemmer's' address was a most interesting talk on "Cold Weather Construction" by W. E. Hart,

manager Structural Bureau, Portland Cement Association, Chicago. By way of introduction the speaker said the Portland Cement Association is a service organization founded on the idea to promote building by aiding the architect, engineer and contractor with their problems. The cement association has nothing to do with prices, the selling or making of cement.

The greatest source of loss to the building industry, the speaker contended, is due to the seasonable element that enters into its operation. By eliminating that feature architects, engineers and contractors can greatly relieve the country's building congestion that occurs each spring. By so doing they can speed up building, make it an attractive investment field and aid owners greatly. To the men who will pursue winter ilding will come benefits, not only will working organizations be held to a high state of efficiency, but Labor conditions will become more stabilized and men will work closer to a 12-month than to a 9-month standard and wages will not have to be adjusted so as to support men through a three months period of idleness. Transportation, too, enters as a factor as cars are more available for shipments in the winter than in the spring and summer business rushes when transportation facilities are taxed to the limit. Modern introductions of certain processes have made winter construction possible with little added effort and such construction should, with encouragement from architects, engineers, contractors and their associations, become a custom rather than an unusual procedure as is now the case.

Individual reports of cities were then made by the delegates, all of which indicated a promising outlook for new building next year. However, the majority of the cities reported Labor restive with many crafts demanding considerably increased wages, while other crafts were pursuing a watchful waiting policy to see how the other fellows come out before submitting demands.

Would Eliminate Waste

Max Irmscher, President of the Ft. Wayne Builders Exchange and one of the best known general contractors of northern Indiana, brought the first day's session to a close with a very pertinent treatise on "Elimination of Waste in the Building Industry." His points were all well taken, he pointing out the moves that were being taken nationally by certain of the allied interests in building affairs to eliminate waste in individual fields and held that contractors should fall in line in that endeavor not only for their own benefit but as a means to reduce costs and thus benefit the prospective builder and the whole industry. He minced no words in his admonition and covered a wide range of features impressively convincing his audience with the volume of waste that is a distinct loss. Better management, close supervision, a more intensive distribution of men to suit the occasion and a more methodical and economical use and application were the remedies he advanced to cut down the waste that eats into a building operation. He cited many examples to drive his arguments home and, at the conclusion of his remarks, the comments that followed indicated the logic of his reasoning.

Activities of State A. B. C. Reviewed

Bright and early Wednesday morning the delegates were back at the assembly room at the Anthony Hotel eager to plunge into convention business. As an opening wedge to the order of the day President Jungclaus called upon Field Representative J. H. Owens for a report on State A. B. C. activities during the year. Mr. Owens first made a report on the actions of the Administrative Building Council of Indiana, this in the absence of Walter Wise of Indianapolis, who was scheduled for this subject. The field representative, who has been in direct and intimate touch with the Council, gave a most interesting review of the effort that is being made to codify the existing laws of Indiana and give to the state a standardized set of building construction regulations and requirements that will guarantee the factors of safety and health and yet minimize requirements to such an extent as to lower building costs. This talk was convincing and clearly revealed that much progress of a practical nature has been made since the establishment of the Council and proved to the members of the A. B. C., that their association together with those of the architects, engineers and Labor, has made one of the most constructive moves ever made in the history of Indiana building matters. Following this up Mr. Owens reviewed the legislative activities carried on during the 1923 session of the State Legislature and demonstrated to the delegates the great worth of those activities as evidenced in the concrete results he enumerated. One of the most interesting features of the speaker's remarks had to do with the expansion of A. B. C.'s. activities in the direction of joint conferences with allied building interests. Three such affairs were held during the year, one at Indianapolis, another at South Bend and the third, at Lafayette, the largest one of all where architects, engineers, contractors and Labor representatives met resulting on a most inspiring and interesting gathering. This report attracted undivided attention and created much enthusiasm as was demonstrated by the ovation that followed its conclusion.

Tribute Paid to Memory of Departed Members

A number of resolutions were then reported in by the Resolutions Committee and passed. Limited space here prevents a listing of the resolutions except to mention one that was a new departure. It had to do with members of the association who had died the past year and as a token of respect to their memory all delegates arose and with bowed heads stood in silence for a minute. The deceased members were: Chas. W. Glenn, Plaster Contractor, Indianapolis; Henry Isman, Sheet Metal Contractor, South Bend; Mike Liss, E. Chicago and Indiana Harbor; Arthur Sanford, Plaster Contractor, Indianapolis; Joseph Smith, Plaster Contractor, South Bend; Edgar M. Stevens, Mason Contractor, Indianapolis; H. Hockemeyer, General Contractor, Fort Wayne; J. H. Achey, Anderson.

A Heart to Heart Talk

When Harry A. Fenton, general counsel for the State A. B. C., arose for an address he remarked at the ceremonial of silent respect for departed members and friends and referred to the sentiment that association work generates, lasting friendships and memories that are dear to all, things that money can't buy. "Your interest men lies in this association," said Mr. Fenton. "We are placed here, most of us remain right in our given sphere, there to live and die and in our, your association, friendships are formed that live on and on and grow and are an aid to us. We do the kindnesses we do because it is but the service we owe to our brother men and in the doing of that service we are happy.

"And, in speaking of service, I would call your attention to a magnificent, attractive, enthusiastic servant, my friend, right in your midst, a man of magnetic personality, one who is always fair and just, an analyzer of problems, the motive power back of your association, who gives willingly of his time and experience in the interest of you men. I refer to him who has no peer for rendering service, your secretary, Chiron C. Pierson. (Loud and continued applause.)

"It was he and sixteen other men who, here in Ft. Wayne, conceived this State A. B. C., and launched it years back. And today, it is gratifying to feel, to know, that that move has taken hold, root, and is growing ever, gathering speed as the years roll on. It is composed of men who delve into the fundamentals, who inspire a spirit of loyalty, men who are doers, not fault-finders and criticizers.

"Co-operation is the key to the arch upon which they build to span the gap that has separated the builders. It is real co-operation for which they are striving, not a condition where one man or a set of men may have their own selfish way, and the effort they have put forth has created such a state of agreeableness as you see today, where you men may come together for conference.

"When selfishness strives for power and too much authority is vested in one men or a set of men there is an abuse of power, a middle age regime. It is that thing your association overcomes, it sticks to the fundamental and strives not for the secret advantage of one man or one set of men but for the good of the whole.

"I beseech of you men to continue this great work, follow up your recently established conferences with more conferences and then more of them, a great good lies on ahead of you, thru the efforts you are exerting."

And then to demonstrate more fully the value of co-operation Mr. Fenton referred at length to the recent arbitration award made at Terre Haute in favor of the John A. Schumacher Co., general contractor on the St. Anthony Hospital building, when an architect, engineer and contractor, sitting as a board found for the Schumacher Co. In detail the speaker recited the injustice that was practiced on the contractor, the dark ages policies employed to coerce him to finally drive him from the job. Next he called attention to the co-operation that ensued when the architect, contractor and engineer arose to defend the Standard A. I. A. General Contract Form for which they have contended and which they have held inviolate. In conclusion Mr. Fenton urged the contractors to stick together, to co-operate as they had been doing for they never knew when their turn might come to face just such

UNUSUALLY ATTRACTIVE PROGRAM BEING ARRANGED FOR I. S. A. MEETING

To Be An Affair In Keeping With High Tone That Architectural Influences Inspire

A real-for-sure treat, in the way of interest and entertainment, is in store for the state architects who will attend the semi-annual meeting of the Indiana Society of Architects at Indianapolis, Friday and Saturday, February 8 and 9. This assertion is made advisedly and without fear of equivocation when the final verdict of those present is rendered.

Especial attention to the program is being given and the policy being pursued in that directoin this year is entirely different from that followed on previous occasions. Every effort is being exerted to lend a new attractiveness to the Society and this bent is being given to the arrangements for the meeting two weeks hence.

Tentative plans are in the making to provide an evening program the high standard of which has never before been reached at an I. S. A., meeting. Though details have not been definitely completed suffice it to say that there will be talks by selected speakers each one of whom will have a clear cut message for the architects. These men are leaders in their own sphere and are of acknowledged ability. Plans have also been made to have a presiding toastmaster, who is gifted in the art of repartee, a man of state-wide prominence.

As an added attraction there will be entertainment features of the highest class consisting of, an orchestra, vocal selections, comedy, selected interpretative dancing, and magic stunts, a layout of refined variety divertissement par excellence.

All of the above to be in addition to the routine business session to be held in the afternoon of February 8. The banquet and entertainment is to be held that evening at the new $1,800,000 home of the Indianapolis Athletic Club, just completed and formally opened. This is acknowledged to be the finest club home in the country and will prove a revelation to visiting architects. If possible a tour of inspection of this magnificent club house will be arranged for the benefit of the Indiana architects just previous to the banquet.

Both the Indiana Chapter, A. I. A., and the Indianapolis Architects Association members will meet jointly with the Indiana Society of Architects on the evening of February 8th.

The second day's session of this semi-annual gathering of the Society will be marked by the formal opening of the Third Annual Architectural and Allied Arts Exhibition at the John Heron Art Institute by the members of the I. S. A., who will go in a body to the art galleries for that purpose.

The approaching meeting will be well worth attending and those who fail to be present will have sincere cause for regret.

SCHOOL PLANNING CONFERENCE TO INCLUDE ARCHITECTS

Unusual Meeting to Occur Day Before I. S. A. Semi-Annual Gathering

An event of particular interest to state architects and one that occurs at a most propitious time, since the semi-annual meeting of the I. S. A., is to be held in Indianapolis Feb. 8 and 9, will be the first state-wide conference on School House Planning scheduled for Feb. 7th, at the Assembly Room of the Claypool Hotel, Indianapolis, under the auspices of the State Department of Public Instruction, Division of School House Planning. Arrangements have been made for a discussion of some of the most important problems connected with school planning.

Invitations to attend the conference are extended especially to school authorities, township trustees, architects and contractors for school buildings.

Dr. F. B. Dresslar, the principal speaker on the program is a specialist in School Hygiene connected with the United States Bureau of Education and the securing of his services for this meeting was a most fortunate and timely connection.

The following program has been arranged:

Morning Session 10 a. m. to 12 m.

"Purpose of meeting and of Division of Schoolhouse Planning," Benj. J. Burris, State Supt. of Public Instruction.

"The Need for Better School Buildings." Dr. W. F. King, Sec'y. State Board of Health; Dr. F. B. Dresslar, Specialist in School Hygiene, U. S. Bureau of Education.

Afternoon Session, 130 p. m. to 4:30 p. m.

"The Schoolroom as a Unit in School Planning"
Dr. F. B. Dresslar

Round Table Discussion
Dr. F. B. Dresslar

Evening Session, 7:30 p. m.

"Schoolhouse Heating and Ventilation"
Dr. F. B. Dresslar

Round Table Discussion
Dr. F. B. Dresslar

The Indiana Society of Architects should be well represented at this affair and the architects attending will undoubtedly benefit from the discussion and addresses that will occur.

INDIANA CHAPTER A. I. A. TO HOLD IMPORTANT MEETING

Set for February 7 at Indianapolis

The regular meeting of the Indiana Chapter A. I. A., deferred from December, will be held at Indianapolis on the evening of Thursday, February 7. This arrangement was made so that the chapter members desiring to do so, could attend the semi-annual meeting of the Indiana Society of Architects to be held on the following day and also the Annual Architectural Exhibit of Indiana Architects scheduled for formal opening February 9.

This meeting is an important one as the officers feel the need for the working out of a policy that will encourage an expansion of membership and extend the influence of the chapter in its effort to build up its prestige and that of the architectural profession in Indiana.

MEETINGS

Executive Committee meets second Tuesday each month.

Painter Contractors meet every Wednesday, 3:00 p. m.

Plasterer Contractors meet every Wednesday noon.

Mason Contractors Association meets every Thursday—1. P. M.

General Contractors meet second Friday each month.

PLANS ON FILE

None this week.

WAIVER OF LIEN

None filed with Recorder of Marion county this week.

ONE OF THE CITY'S AND STATE'S BEST KNOWN BOSS PLASTERERS PASSES ON

Arthur Sanford Succumbs to Sudden Heart Attack

The Building Contractors' Association and Builders' Exchange the past week lost another staunch and loyal member when Arthur Sanford, one of the most prominent plastering contractors of the city, was stricken with a heart attack Saturday, January 19, and died at his home, Seventy-ninth street and Spring Mills road, north of the city, that night.

Mr. Sanford had been a contracting plasterer in Indianapolis for the past twenty years and in that time had executed contracts for plastering some of the largest buildings in the city.

The passing of this man marked the second heavy inroad death has made in the local ranks of the plastering bosses, it having been just three months to the day when he was stricken that Charles W. Glenn died.

The deceased was an ardent organization advocate and in addition to being an active worker in the local association was a member of the national organization of plaster bosses. For years he was deeply interested in the National Association of Builders' Exchanges.

BUILDERS' BOWLING LEAGUE NOW HOLDS CITY HIGH GAME RECORD FOR THE YEAR

C. B. Mayer Hangs Up 280 Total

A blaze of glory burst over the builders' bowling league at Indianapolis Friday night, January 18, when C. B. Mayer, fireproofing specialty man, bowling on the Wege-Stanford team, rolling in rare form, established a new high game city record for this year when he totaled 280 in his third game of the evening.

Mayer started his remarkable game with a strike, left the five pin on his next ball, then cleaned up the spare and came through to the end with ten straight strikes. As inning after inning brought strikes the crowd collected to watch and when the final ball recorded the tenth complete clean-up "C. B." received a great ovation.

INDIANA BUILDING SUPPLY MEN LOOK FOR PRICE INCREASES

Early Season Building Outlook Promising

Building supply men from all parts of Indiana, to the number of several hundred, put in a busy two days at Indianapolis the past week, the occasion being the annual convention of the Indiana Builders' Supply Association.

Diversified and varied subjects as they related to the building supply business were gone into to bring out many interesting points regarding the handling of building supplies, distribution, efficient methods, etc.

The expression was general that indications pointed to a healthy condition of the building business for the first six months, at least, of 1924. However, the belief was advanced that prices would probably show a slight upward trend under a heavy demand.

Officers elected for the ensuing year are: Warren Cox, Winnimac, Ind., president; Charles Monyhan, Connersville, Ind., Herschel Moore, Bedford, Ind., A. D. Zuber, Fort Wayne, Ind., and Fred Stiltz, Indianapolis, vice-presidents; H. A. Rogers, Indianapolis, treasurer. A secretary will be elected by the board of directors at a meeting to be held next month. R. A. Hilderbrand of South Bend, Ind., has held the position for seven years.

TO HOLD ANOTHER BIG HOME SHOW

Indianapolis Making Preparations

The third annual Home Complete Exposition sponsored by the Indianapolis Real Estate Board will be held at the Manufacturers building of the state fair grounds at Indianapolis April 7 to 12.

This building which housed the former expositions and which provides 53,000 square feet of space on one floor with ample facilities for approximately 200 exhibits, will present entirely new scenic effects and decorations for the 1924 show.

The policy of the Indianapolis Real Estate Board to confine the exhibits to those articles that contribute to the making of a home, it is announced, will be strictly adhered to at the exposition again this year. There will be no features or exhibits that will detract from the home furnishing and building idea. The annual exhibitions have proved excellent stimulants to business; the Indianapolis board has insisted, however, that the educational advantages of the show must be primary consideration at all times.

Citizens of Indianapolis and of the Indianapolis trade area have come to regard the annual exposition in the light of a Home Makers' Institute. From the standpoint of the exhibitors it is a six-day market where builders, realtors, building material men and house furnishers meet under one roof with the thousands of men and women seeking information on the subject of home plans and furnishings.

Last year 90,000 persons visited the exposition. A survey by the Indianapolis News showed that orders taken on the floor during the exposition totaled $520,882. This sum does not include sales completed by exhibitors with visitors after the ending of the show.

The Indianapolis News will conduct a house plan contest offering a number of cash prizes to architects and draughtsmen who submit the best plans for a house for all year occupancy of a family of limited means and in which economy of construction and attractiveness will be the predominating considerations. The plans will be exhibited at the show. A similar contest was successfully conducted by this newspaper last year.

J. F. Cantwell, an Indianapolis realtor, who is director of the exposition, declares that he is assured that the 1924 exposition will far surpass the show last year, which he also managed. He said that already one-half of the available space has been reserved.

The committee of the Indianapolis Real Estate Board in charge of the exposition is made up of E. L. Cothrell, chairman; W. H. Kinnear, William L. Elder, H. L. Richardt, Mr. Cantwell and Henley T. Hottel, executive secretary of the board.

INDIANAPOLIS BUILDING PERMITS

Week of January 17 to January 24

Theater (Motion Picture): $13,000, 1 sty., 38x100, 2153-55 Martindale Ave. Private plans. Owner Samuel Nisenbaum, 2443 Baltimore. General contract let to Sam Jacobs, at site. Brick.

Residence (double): $14,000, 3645-47 Central. Owner, Jessie M. Negley, 2833 N. Talbott. General contract let to Homer H. Negley, 2833 Talbott.

Residence: $28,500, 3242 N. Meridian. Owner, W. C. Garten, 518 S. Senate. Contract let to H. L. Simons, 4244 N. Capitol. Brick.

GREAT BUILDING EXPANSION PROGRAM EFFECTED BY CALUMET STEEL INDUSTRY

Improvement Outlays in 1923 Estimated at $25,000,000

Expansion in the steel-making and rolling-mill industry of the Calumet region during 1923 was greater than probably any like period in the history of the district. The value of these enlargements has been placed to various amounts up to $25,000,000.

New rolling mills made available for steel production during the year just closed numbered 10 at the Gary National Tube Works. These extensions involved an expenditure estimated at $15,000,000. The mills completed here last year include 5 buttweld tube, 4 lapweld and 1 seamless tube.

At Indiana Harbor plants vast improvements were made in 1923. Some are still under way of construction.

Four one hundred ton capacity open hearth furnaces, representing one-fourth of the new furnaces on which construction was started in the United States during the year just ended, are now being erected at the Harbor plant of the Inland Steel Company. There is also one fourteen-inch merchant mill being built in connection with the extension building program of the Inland that is scheduled to be completed shortly.

Acquisition of the Sheet & Tube Co. of America plant at Indiana Harbor by the Youngstown Sheet & Tube Co. last year has resulted in many new changes at the Harbor works.

Actual construction has begun on a 600-ton blast furnace and two buttweld mills since this acquirement was put into effect.

Gathering from general reports the present year presages as great if not more extensive improvements at steel mills in the region.

NO STOPPING THEM

B. and M. Annual Dinner at Chicago Proves to Be a Real Magnet

Snow, ice, cutting blasts of wind sweeping in from the lake, and zero weather meant little or nothing to the band of fifteen Hammond contractors who braved the elements one afternoon last week as they, bundled and securely wrapped, started for Chicago to attend the annual banquet of the Builders and Manufacturers Mutual Casualty Co., held in the Gold Room of the Congress Hotel at that city. Many of the men in the party were those who had attended similar functions of the B. & M. before and five inches of snow, whistling winds and a low temperature was as no barrier at all to block these men from reaching the 1924 event.

Bernard Graves of the firm of Rhoads & Graves, general contractors, blazed the trail to Chicago and beat the rest of "the gang from The Calumet" in. His time, Hammond to Chicago, was 50 minutes flat.

SPLENDID AND EDIFYING MEETING PUT ON FOR CONTRACTORS AT CHICAGO

Builders Entertained by B. and M. Insurance Company

The meeting and banquet above referred to was a most interesting and enjoyable affair, attracting approximately two thousand contractors and their friends. With the dinner completed President Andrew Lanquist, "Father of the B. & M.," addressed those assembled with a recount of the origin, growth and present state of development of the company, including a financial report that was most encouraging to the contractor policyholders, all mutual members of the B. & M.

Other speakers on the program were Corporation Counsel Bush of Chicago, and Hon. J. Adam Bede, ex-congressman from Minnesota.

It was a fine representative gathering of the building contracting fraternity, men who cast the ordinary routine of business aside for the moment and entered into the edifying spirit of the occasion, imbibing of a fount of inspiration, accentuated by entrancing music, splendid addresses and embellished by a sumptuous repast.

Congratulations, warmly and wholeheartedly cherished, were openly extended to the officers of the company for the magnificent and elegant manner in which the affair was carried through to such a successful conclusion. It was an affair of, by and for the contractor, encouraged and sponsored by a company of which the contractor is a part and in whose interest the company is vitally interested.

THINGS JUST ABOUT CLINCHED TO LOCATE TWO NEW PROMISING INDUSTRIES IN HAMMOND

Final Details Pending

Tentative deals have been arranged according to W. J. Hastings, realtor, that when consumated, as expected shortly, will mean two new industrial plants for Hammond. These plants will employ 500 and 150 people respectively. Though complete details can not be given out at this time assurance is advanced that these additions to Hammond's long list of diversified industries will be of great benefit to the city.

JUST DRIFTING

Wage Negotiations Somewhat in Abeyance

The labor wage scale situation in the Calumet District remains unchanged. There have been several conferences between the contractors and Labor representatives without any definite conclusions having been reached. It seems that both sides are resting on their oars awaiting a favorable shift in the current of events.

PROBES INTO HARDWOOD FLOORING ASSOCIATION METHODS

Government Indictments Result

"Indict twenty-three firms as Hardwood Flooring Trust," The Chicago Tribune reports that twenty-three companies, members of the Maple Flooring Manufacturers Association, known as the hardwood flooring trust, were indicted the 18th by the Federal Grand Jury on charges of violating the Sherman Anti-trust Act. Thirty officers of the companies also were named in the indictments.

All the companies, who manufacture 70 per cent of the flooring material used in the United States, are charged with conspiracy to "eliminate competition through price regulation." Most of the concerns are located in Minnesota and Wisconsin. Bench warrants for all those named in the indictments were issued by Judge Cliffe, who placed the bonds at $5,000 each.

CALUMET BUILDING PROGRESS

Architects A. C. Berry & Co., Hammond, who prepared the plans for the Masonic Temple to be built at Mannoka, Ill., announce that the general contract has been awarded to M. V. Grimm, North Manchester, Ind.

The project consisting of an addition to the Griffith, Ind., school building that was postponed last fall when bids ran high, has been revived and plans are now being distributed to contractors again for estimates. Mac Turner, Hammond, Ind., is the architect.

The last named architect also has plans out for a store and office building for Dr. O. W. Ostrowski, at Holman and Douglass streets. The structure will be two stories and basement, 50x75.

The committee appointed to fix damages on property along Hohman street, that will be affected by the widening of that thoroughfare, has been holding daily sessions of late at which estimates are being compiled.

E. E. COLE.

CONVENTION

(Continued from Page 7)

an ordeal as that which had come to their fellow member.

The convention had now reached the concluding stage which called for an election of officers and the selection of a site for the 1925 convention. This detail resulted as follows:

President, Max Irmscher, Ft. Wayne; 1st vice-president, A. E. Kemmer, Lafayette; 2nd vice-president, Joseph Doeppler, East Chicago; 3rd vice-president, O. E. Toelle, Terre Haute, Ind.; Secretary and treasurer, C. C. Pierson, Indianapolis; field representative, J. H. Owens, Indianapolis; general counsel. H. A. Fenton, Indianapolis.

After a spirited contest between Muncie, Terre Haute and Indianapolis the later city was selected for next year's convention.

CONVENTION BANQUET A GORGEOUS AND INSPIRING AFFAIR

Delegates Guests of Builders' and Manufacturers' Mutual Casualty Company of Chicago

Occasionally there arises some event to create a memory of lasting brilliance that nothing can efface. And in the recalling of that memory we certainly find few phases that lend to it new gleams of radiance at first unsuspected.

There came to pass in Fort Wayne the past week, on the night of January 22, to be exact, just such an event and, now that it is over, there comes a memory that grows and glows, and glows and grows. The occasion was the banquet given by the Builders' and Manufacturers' Mutual Casualty Co. of Chicago at the Hotel Anthony at which the delegates to the State A. B. C. convention and their friends were guests. Some three hundred building men were seated around the tables, there to be enveloped in an atmosphere most enchanting. There was a boundless wealth of good fellowship, a melody of music that was divine, table decorations of flickering candles and dainty flowers, the perfume from the latter scenting, to accentuate, the soothing atmosphere, a sumptuous repast, and a series of addresses it would be hard to excel for the interest they held for builders.

E. W. Puckett, a prominent citizen of Fort Wayne, acted as toastmaster. Fred W. Jungclaus, Indianapolis, one of Indiana's largest general contractors, and a director in the Builders' and Manufacturers' Mutual Casualty Co., represented President Andrew Lanquist, who was detained at home in Chicago by illness, and extended a welcome to the guests.

Robert Hanna, former postmaster of Fort Wayne, a deep student of and an authority on city planing, spoke on that subject and its relation to the growth of a city. He declared that it was as important to plan a city before building as it was to plan a house and that we plan practically everything we have anything to do with in life with the exception of municipal futures. He likened city zoning to the planning of one room of a house for a purpose and another room for a still different purpose so that there will be a specific location in every city for residences and factories.

J. S. White, Indianapolis attorney and Indiana counsel for the Builders' and Manufacturers' Mutual Casualty Company, gave an explanatory talk on insurance. He said insurance of all forms came into the scheme of modern life as a result of the element of risk and fear in production. The courts have recognized insurance to be intimately connected with public life and have regulated it with as much attendance to detail as that of transportation, he said.

The featured address of the evening was delivered by Dr. William F. King, secretary of the state board of health and president of the Indiana Building Council. He spoke regarding the latter body and most clearly and intimately explained the purpose of the State Building Council, toward which, he declared, there was much misapprehension in the minds of architects, building contractors and the general public. He gave an estimate of the work which the recently created body was attempting to do, stating that its purpose was to bring out of the confusion and chaos of state building regulations some semblance of the best thought, best experience and best practice in reference to building construction.

It was without doubt the finest, most complete and most capably handled evening dinner engagement ever conducted in Indiana for builders, and, in passing, it is only meet to mention especially the musical program rendered by the Chicago Concert Co., a mixed quartet. Their voices were excellent, well suited to the selections, classical and semi-classical, offered, into which was blended a feeling and sincerity to make for a charm that appealed and made the audience loath to acknowledge that there must be an end though the singers were most liberal and gracious with their offerings.

News of the Week

The asterick (*) prefix to an item indicates additional information to report published in previous issue.

INDIANAPOLIS

Schools (miscellaneous equipment): Owner, Board of School Commissioners, Richard O. Johnson, business director, 150 N. Meridian St., receiving bids to close February 12 at 8 p. m., for the following:

Furnishing and installing a complete automatic oil burning device or system, with mixing chambers, pilot lights, burner heads, temperature thermostats and automatic pressure staat, electrical motors, and other appliances necessary to make a complete installation for the purpose of making steam pressure under three boilers now located in a school building known as School No. 60. The estimated cost of this work is $2,400.

The installation of a 3,000-gallon oil tank, to be installed on the grounds of School No. 60, piping, tees, elbows, valves, etc., connected from tank to oil burning device; also heating coil inside of tank. Estimated cost of this work is $1,000.

The manufacturing, delivering and installing in the Indianapolis Central Public Library Building, located on the north side of St. Clair street between Pennsylvania and Meridian streets, Indianapolis, Ind., one level of steel book stacks, together with one mezzanine floor of steel construction, with marble flooring, stairways, with necessary railings both for stairs and balcony, all electrical work with conduits, outlets, switches, fixtures, bulbs and hangers, necessary for properly lighting the new floor level of stacks in the same manner as the second level of the stack is now lighted. visory Board of said Township, will receive sealed bids, furnishing all labor and material for the construction of a one-story and basement brick school building in said Knight Township, known as "Lodge School," in accordance with the plans and specifications now on file in the office of said trustee, R. R. 4, Newburg, Indiana, and in the office of Alfred E. Neucks, architect, 605 Old National Bank Bldg., Evansville, Indiana. Said bids will be received up to two o'clock p. m. of said 16th day of February, 1924.

The estimated cost of said construction is $32,000.00.

Said trustee, in conjunction with said Advisory Board, will examine said bids and award the contract for said construction to the lowest and best bidder therefor; and the successful bidder will be required to enter into a written contract with said school trustee for the furnishing of all labor and materials for the construction of said school house in accordance with said plans and specifications, and to give bond, with surety to be approved by said school trustee, for the faithful performance of said contract.

Each bidder will be required to submit a certified check in an amount equal to three per cent of bid submitted, said check to be forfeited to the township trustee in the event that the successful bidder refuses or fails to enter into a proper contract with proper surety.

The school trustees and Advisory Board hereby reserves the right to reject any and all bids.

FRED MANN,
Trustee of Knight School Township,
Vanderburgh County, Indiana.

Arthur C. Stone,
Attorney for Trustee.

STREET IMPROVEMENT
NOTICE TO CONTRACTORS

Notice is hereby given, that sealed bids or proposals will be received by the undersigned Clerk of the City of Greenfield, Indiana, at the office of said clerk up until the hour of 7:30 p. m., February 6th, 1924, for the improvement of North street in said City of Greenfield, commencing at the intersection of the east line of the west alley in Exchange addition to said City of Greenfield, Indiana, and North street in said City and extending east to the west line of Howard street in said city, by grading and paving the roadway with vitrified brick, sheet asphalt, emulsified asphalt or concrete all as authorized by Improvement Resolution No. 13, 1923.

Said bids will be received according to the several sets of specifications now on file for said improvement. No part of the cost of said improvement is to be paid from the general fund of said City unless an assessment is made against said City as provided by law.

Said proposals will be opened and considered by the Common Council of said City of Greenfield, at 7:30 p. m. on February 6th, 1924. All work done in the making of said described public improvement shall be in accordance with the terms and conditions of the improvement resolutions as numbered and the detail plans, profiles, drawings and specifications which are on file and may be seen in the office of said Clerk of the City of Greenfield, Indiana.

The bidders, in submitting proposals to make said described public improvement, must accompany each bid with a certified check in the sum of not less than two and one-half (2½) per cent of the engineer's estimate of the cost of said improvement, as evidence of good faith that the successful bidder will execute within ten days from the acceptance of proposals, contracts and bonds satisfactory to said common council to do the work of making said improvement. A failure of the successful bidder to enfer into such contract and bond upon the acceptance of such proposal will forfeit the check and the sum of money payable thereon to the City as agreed and liquidate damages for such failure.

The Common Council of said City of Greenfield reserves the right to reject any or all bids.

Dated at Greenfield, Indiana, January 17, 1924.
By order of the Common Council of said City.

MABEL K. HARDING,
Clerk of said City of Greenfield, Ind.

Jan. 26-Feb. 2, 1924.

HAND FIRE STOKERS
NOTICE TO BIDDERS

Notice is hereby given, that the Common Council of the City of Greenfield, Indiana, will receive at the office of the City Clerk, in said City, until 7:00 p. m. on the 6th day of February, 1924, sealed bids for the furnishing, for the lectric Light Plant, hand fire stokers, bidders to submit specifications. Bids to be opened on February 6th, 1924, at 7:30 p. m.

The Common Council reserves the right to reject any and all bids.

Dated at Greenfield, Indiana, January 17, 1924.

MABEL K. HARDING,
Clerk of the City of Greenfield, Ind.

Jan. 26-Feb. 2, 1924.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given by the undersigned that the Advisory Board and Trustee of Madison School Township, Carroll County, Indiana, at the office of W. C. Smith, attorney, Delphi, Ind., will receive sealed proposals for the furnishing of all material and labor for the building and equiping of a four-room, one-story school building, including basement, heat and ventilating system, plumbing and septic tank and sewerage, electric wiring and fixtures. Separate bids will be received for each of the above, but joint bids will be considered for heating, ventilating and plumbing. As set out in plans ond specifications, profiles and requisitions now on file in the office of the Trustee of Madison Township and in the office of Samuel Young, architect, Monticello, and in the office of Will C. Smith, Delphi, Ind. Plans and specifications may be had for the individual use of bidders, from the trustee or from the architect, upon a deposit of ten dollars for general contract and five dollars each for heating and ventilation systems, plumbing and electric work, all of which will be returned if plans and specifications are returned in good condition on or before date of letting. Said sealed proposals to be opened and contract awarded for said improvement on the 15th day of February, 1924. Bids or proposals will be received up to 12 a. m. on said date. The said improvements are located in Madison Township, Carroll County, Indiana, and more particularly known as the northwest corner of the Eli Craig farm. The estimated cost of soid building is $36,000. Said bids will be for the completion of the said improvement in accordance with the plans, profile and specifications in the office of trustee, architect and Will C. Smith, at Delphi, Ind., and shall include all labor and material for said work. And in no case will extra compensation be allowed for any additional work alleged to have been done by the contractor or contractors, to whom is awarded the contract.

Each bidder shall state in his bid approximately the time at which he will entirely complete this contract, this is desired, as time is an essential feature in the letting of this contract. each bidder on the general contract shall accompany his bid with a certified check in the sum of one thousand dollars, payable to the order of Parry Rule, trustee. Said sum to be paid as liquidated damages by the bidder to whom contract is awarded should he fail to enter into a contract for the construction of this building, and provide acceptable bond according to law within ten days after being notified that his bid had been accepted. The successful bidder will be required to sign a uniform contract with such requirements as set forth in the specifications, bond be given by contractor in the sum of contract price. Personal bond acceptable to the trustee may be given, but at least one sureity must be a resident of Carroll County, Indiana, and all such bondsmen should be resident freeholders of the State of Indiana.

Said contract will be let as a whole or in part to the lowest responsible bidder, upon affidavit of non-collusion, which must be submitted with the bid, upon failure to submit such affidavit, such proposals or bid will be rejected and the board reserves the right to reject any and all bids. Time for the completion of said work will be agreed upon at the letting of said contract, by the trustee, advisory board and successful bidder.

B. W. AIKENS,
JOHN NICHTER,
RAYMOND DUBES,
Members of the Advisory Board
of Madison Township.
PERRY RULE,
Trustee of Madison School Township.
Will C. Smith, Attorney.

Hand Power Elevators

There are over 6,000 Kimball, Number Two, hand power elevators in operation throughout the United States.

Their popularity is due to the simplicity of construction and to the ease and speed with which they may be operated. Being of the ANTI-FRICTION type and equipped with roller bearings this machine operates easier, rises quicker, needs less care and lubrication than any machine on the market.

There are no gears to cause friction, no clumsy, rattling drums, and no cables to break.

INDIANA ENGINEERING SOCIETY PREPARES FOR ANNUAL MEETING

Attractive Program Preliminaries Announced

The Indiana Engineering Society will hold its annual meeting at the Lincoln Hotel, Indianapolis, starting at 10 a. m., February 14. There will be a joint luncheon February 14 with the A. A. E. and on Friday afternoon and evening a joint meeting with the A. S. M. E. local section. The annual dinner and dance the evening of February 15 will be held jointly with the A. S. M. E., Scientech Club and other local societies.

A very fine program for this two-day affair has been arranged, the committee in charge having made a special effort to obtain well-known men to present papers that will be of interest to you. The preliminary program of speakers and their subjects is:

"The Aims of the Administrative Building Council," by Dr. W. F. King, President of Council and Secretary State Board of Health, Indianapolis.

"A Review of the Work of the Administrative Building Council," by John H. Owens, Secretary of the Advisory Board, Indianapolis.

"The State Board of Registration," by Harvey B. Anthony, Member Indiana Board of Registration for Engineers, Muncie, Ind.

"Motor Transportation," by S. C. Hadden, Editor Municipal and County Engineering, Indianapolis.

"Boiler Laws of Indiana," by B. W. Bissell, Chief State Boiler Inspector, Indianapolis.

"Indianapolis Developments in Garbage Disposal," by Ervin W. McCullough, Consulting Engineer, Indianapolis Sanitary Commission, Indianapolis.

"Valuation of Utilities," by Rollin B. Bibbins, Washington, D. C.

"Trend of the Automobile," by O. C. Berry, Wheeler-Schebler Carburetor Co., Indianapolis.

"Recent Developments in Illumination," by J. R. Colville, National Electric Lamp Works, Cleveland, Ohio.

"The Prosser High Economy Engine," by Dudley W. Taylor, Chandler & Taylor, Indianapolis.

"The Engineer in South America," by Calvin W. Rice, Secretary A. S. M. E. New York City.

1923 A RECORD YEAR FOR THE CEMENT INDUSTRY

All Previous Production Figures Eclipsed

Preliminary report on the cement industry for the year 1923 just released by the United States Geological Survey, indicates the remarkable development which has taken place in the manufacture and distribution of portland cement during the past year.

The remarkable record made by the industry during 1923 in taking care of a demand which has increased over 40 per cent in two years could scarcely have been achieved under less favorable conditions. The cement industry is particularly sensitive to transportation and fuel situations and the absence of shortage of both these essentials during 1923 was most helpful.

Production of portland cement in December was nearly 10,000,000 barrels and shipments were about 6,400,000 barrels, both records for that month although showing the usual seasonal decline from preceding months.

Stocks of finished cement in manufacturers' hands increased over 3,500,000 barrels during the month and on December 31, were 10,581,000 barrels, a quantity exceeded only once during the past eight years. Apparently stocks are being accumulated in anticipation of a continuation of the greatly increased demand which has developed during the past two years.

Prior to last year, 1922 was the banner year in the industry and the following figures show the substantial progress which has been made during the past two years.

	1921	1922	1923
Production (in barrels)	98,842,000	114,789,000	137,377,000
Shipments (in barrels)	95,507,000	117,701,000	135,887,000
Stocks on hand December 31	11,938,000	9,134,000	10,581,000

MICHIGAN CITY A. B. C. ELECTS OFFICERS FOR 1924.

Organization Up There Thriving.

Though the delegates from the Michigan City A. B. C. got frozen up January 22 and 23 and did not get over to the State Contractors Annual Convention at Fort Wayne, word comes from the former city that the association is very much alive, is going strong and growing.

The annual meeting held a few days ago brought out a fine crowd and when it came to the election these men were named for the ensuing year: Henry Koelln, Prest.; George Johnson, Vice Prest.; Paul Harbart, Secy.; E. A. Simpson, Treas.; J. Schminski, Sargeant-at-Arms. Elmer Bloomquist was named to represent Michigan City on the Executive Board of the Associated Building Contractors of Indiana.

SHORTAGE OF BRICKLAYING CRAFT WORKS REAL HANDICAP ON BUILDING PROGRESS

Twice the Present Number Needed

The bricklayer is the key to the building situation, and the shortage of labor in that craft for new construction will not cease until nearly twice as many bricklayers are trained in the trade as now are engaged in the building industry.

NOT OVERLY ENTHUSIASTIC

Labor Only Shows Luke-Warm Interest In Apprentice Encouragement Move

Organized labor attending the recent conference at Buffalo upon the subject of apprentices plainly indicated that they were not so very enthusiastic upon the subject, partly it is believed, because they feared that certain methods and standards of text books and studies would be adopted without regard to the union's ideas as to methods, studies and terms of indenture. Another objection was apparently to the presence and activity of a number of professional vocational training men, who by their remarks raised a question of distrust in the minds of the labor bloc. Perhaps after all the apprentice question will have to be settled in a national way and through conferences between the Employers' Associations and the Employees' organizations.—Bulletin, Building Construction Employers Association,

ANNUAL ARCHITECTURAL EXHIBIT TO BE NOTEWORTHY EVENT

No Effort Spared to Assure Success

The third annual architectural exhibition of Indiana to be held February 10 to 24 at the John Herron Art Institute, Indianapolis, has been planned on a broader scope this year and promises to hold unusual interest not only for the architect, but will carry a strong appeal for the public, especially the prospective builder.

J. Arthur MacLean, director of the John Herron Art Institute, has taken a deep interest in the exhibition and is co-operating with the Indiana Society of Architects to make the affair particularly attractive. It will consist of drawings in plan, elevation, section, perspective and detail, illustrative of structural, decorative and landscape architecture; photographs of executed work, cartoons for stained glass, sketches and painting of decorative subjects and executed work in wood, bronze, wrought iron, mosaic, glass, leather and tapestry. When practicable, perspective and elevations are to be accompanied by carefully rendered plans of the same, and scale drawings or details of some portion of the work, as well as models of architectural detail and sculpture in wood and stone, will also be shown. The committee has particularly solicited exhibits of groups of drawings, models and cartoons illustrating in combination the architectural, sculptural and decorative scheme of a single important work in course of execution. A special effort is to be made to assign definite spaces to such groups of exhibits.

Then also there will be a photographic display of the best work done by sundry individual Indiana architects, and student work, not previously shown that was done at college, in traveling, in competition for scholarships, etc. Director MacLean, in addition proposes to arrange a small but attractive display of the allied arts connected with architecture and building.

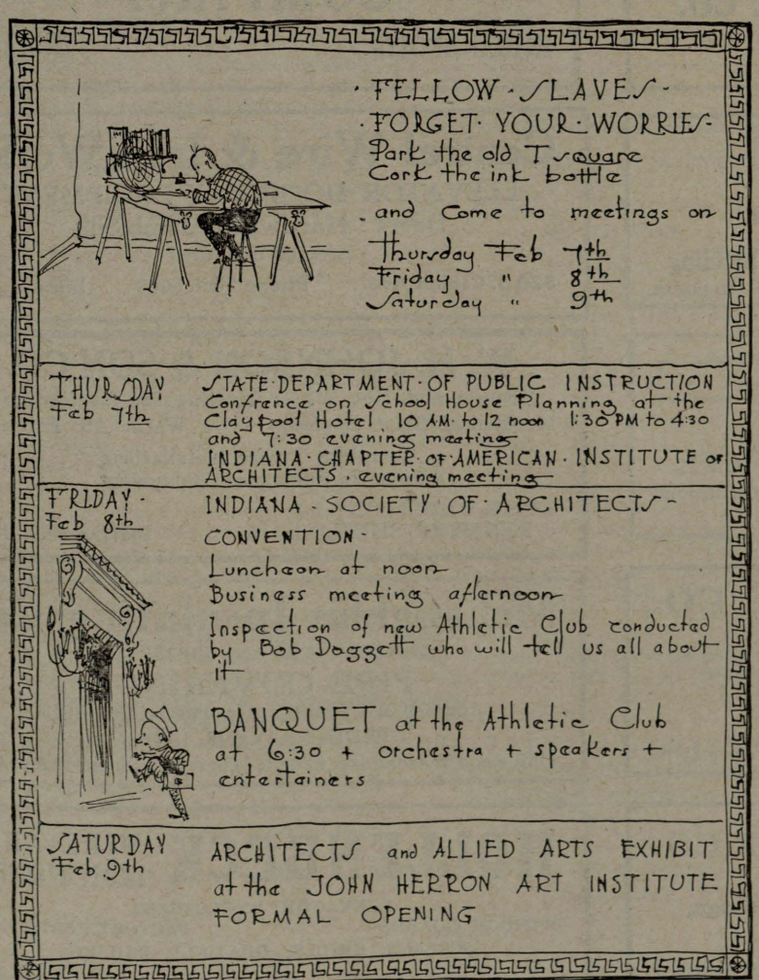
The Indiana Society of Architects has offered a prize of $50 together with a certificate for the exhibit showing the greatest merit in architectural design of executed work. The exhibit will be on view to the members of the Indiana Society of Architects on Saturday, February 9. At this time members will vote to determine the winner of the prize. The greatest number of votes shall determine the winner. In case of a tie the prize shall be divided.

All entries must be received at Art Institute not later than February 5, 1924.

Exhibition opens Feb. 10, 1924, and closes February 24, 1924.

Press view February 8, 1924.

The I. S. A. committee having the exhibit in charge is: Kurt Vonnegut, chairman, William H. MacLucas, Donald Graham, all of Indianapolis; John B. Bayard, Vincennes; Karl D. Norris, East Chicago.



ARCHITECTURAL DRAFTSMEN AT INDIANAPOLIS TO FORM A CLUB OF THEIR OWN.

Organization Plans Now Underway.

A move has been started in Indianapolis to organize an Architectural Club similar to those that are to be found in many of the larger cities around the country. Some twenty-five architectural draftsmen and young architects of the city met recently at the Hoosier Athletic Club in response to a special call and evinced much enthusiasm over the proposed scheme.

There was a lengthy discussion regarding the need for such a club and at the conclusion a committee of five was appointed to draw up a constitution and set of by-laws which are to be presented soon for approval. As soon as a permanent organization is effected an election of officers will be held and a definite meeting night and place will be set.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

EVANSVILLE CONTRACTORS NOW REORGANIZING LOCAL BUILDERS' ASSOCIATION

Earnest Effort in That Direction Being Exerted

After lying dormant for, lo, these many months, the local building contractors' association is showing signs of new life. Several meetings have been held within the past few weeks at which preliminary plans for reorganization have been gone over. There is considerable interest and enthusiasm being shown in the move. The older general contractors have rallied to the cause and quite a few of the more recent entries into the local general contracting field have linked up with the revived organization.

Henry Veatch of Anderson & Veatch and Ben Diehl of the Tri-State Construction Co. were sent as delegates from Evansville to the State A. B. C. convention at Fort Wayne last week. Upon their return a special meeting of the new Evansville association was called and Messrs. Veatch and Diehl made extensive reports on that which took place at Fort Wayne, all of which made a favorable impression.

Local contractors were particularly interested in the conditions reported from the various cities about the state and the enlightenment on the indicated attitude of Labor toward wage demands for the coming year.

The builders of Evansville know what organization means to the industry, both that of the employer on one hand and the employe on the other, and every effort is to be made to build up a real contractors' association this time.

While a temporary organization has been formed and a start has been made, a definite move toward permanency is to be taken in the near future when officers are to be elected and committees named.

NEW HIGH SCHOOL OPENED

One of the Finest in the State

The crowning achievement in local building effort for the 1923 season culminated Monday, January 28, when the new $800,000 Benjamin Bosse high school was formally opened and assumed its official position among the city's institutions of learning.

The structure is a magnificent one and a great credit to the community. Designed in accordance with the very latest and most highly developed ideas of high school building construction, the new edifice will ably care for the growing demand for high school facilities for years to come and will fill a long felt want in the eastern section of the city.

The initial enrollment ran up to over six hundred students, who, with teachers and visitors, were delighted with the new building.

JUST LIKE OLD TIMES

Many Familiar Faces Seen at Fort Wayne Meet

Someone called attention to the fact that the 1924 A. B. C. convention looked more like the old gatherings some years back, for practically all the "old-timers" were on hand. Sure enough! There were Max Irmscher, H. Witte, Fort Wayne; C. C. Pierson, Indianapolis; L. B. Snowden, Gary; Joe Goodall, Peru; Frank Willis, Vincennes, and Charles Morrow, Muncie, who were among the original organizers of the State A. B. C. Then, too, these stand-bys were also seen around the convention hall: Jerry Gallavin, Muncie; Henry Veatch, Evansville; Harry Fenton and James Hodgson, Sr., Indianapolis; O. A. Toelle, Frank Burget, Guy Brill, Terre Haute; Lee Glass, Muncie; Walter Fassnacht and Tom, Hickey, South Bend; A. E. Kennier, Lafayette, and Victor Knauth, Vincennes.

FORT WAYNE APPRECIATED OPPORTUNITY TO ENTERTAIN BUILDING CONTRACTORS OF THE STATE

Every Evidence That Convention Was a Big Success.

It was a pleasure to the members of the Fort Wayne Builders' Exchange to welcome back to the city the Associated Building Contractors of Indiana upon the occasion of that organization's sixth annual convention held at the Anthony Hotel, January 22 and 23. There was but one regret growing out of the convention and that had to do with the limited time to which the gathering was scheduled, a feature that prevented the Fort Wayne contractors from taking a more active part as hosts.

Though a hurry-up sight-seeing trip was arranged for the last afternoon of the convention there was hardly time to fairly see the city and the evidences of the great building strides she has made forward in the last year or so.

However, the Fort Wayne contractors, in the matter of entertainment, labored under a handicap and extend a welcome to the state contractors to visit Fort Wayne at any time they desire.

From the word left with us and that which has come back, it is gratifying to learn that the Fort Wayne meeting created such a favorable impression and is acknowledged by many to have been the best convention ever held by the State A. B. C.

FIRST NATIONAL BANK TO OPEN HOME AND OFFICE BUILDING WITH PUBLIC RECEPTION

Fort Wayne's Finest Business Structure

The First National Bank will begin business in its new $1,000,000 building on West Berry street Monday morning, February 18. The bank's new building is one of the most beautiful and complete in the middle west and is one of the largest building projects started and practically completed during 1923, Fort Wayne's record building year.

The banking rooms are the last word in bank planning, being large, commodious, light and airy, while on the floors above are modern, well-appointed office suites.

TWO BIG SCHOOL PROJECTS READY TO BE AWARDED

Many Contractors Figuring

A special meeting of the school board of Fort Wayne will be held Friday, February 8, for the purpose of opening bids submitted by building contractors on the new Harrison Hill and Forest Park schools. There was every indication that there will be many bidders as nearly every contractor in town had "figured the jobs."

At the regular board meeting for Monday afternoon, February 11, it is hoped to award the contracts. With the coming of spring weather to allow building operations to be carried on, work on the new school buildings will be pushed with all possible haste with a view to having the buildings ready for occupancy early next fall.

INTERESTING SIDELIGHTS ARE THROWN ON FUNCTION OF STATE BUILDING COUNCIL

Highly Explanatory Talk Made by Dr. W. F. King

"The purpose of the Administrative Building Council of Indiana," said Dr. W. F. King, secretary of the State Board of Health and chairman of the Council, in speaking to the members of the State A. B. C. at Fort Wayne last week, "is not so much to formulate as to correlate and to make it possible for the building public to have the benefit of the best experience and practice in building operations without paying the penalty on the one hand of ill-advised and unchangeable building laws and codes, or, upon the other hand, of misunderstanding and friction, due to the isolation of groups engaged in building work."

He then briefly detailed the plan of organization of the state building body to show how it was sought to co-ordinate the co-operation of the principal elements that go to make up the building industry, definitely setting forth the fact that nothing can become a rule except by the unanimous vote of the three members of the advisory committee.

"Many things can not be settled by state laws," Dr. King declared. "We as Americans have a blind and childlike faith in legislative enactment and as I see it, that is one of our grevious faults. I believe firmly, not so much in statutory laws, but in placing the enforcement of fundamental and natural laws in the hands of competent and conscientious men.

"The first work of the state building council is to codify the existing regulations of building in Indiana and show wherein the present laws are weak and not in line with present practice. We are looking toward the repeal and amendment of laws which handicap building construction in this state. There are today in the state government many building requirements that are obsolete to be observed, side-stepped or violated. It is our purpose to codify laws and eliminate friction and lost motion in the machinery of justice and regulation."

He cited several examples of the obsolete building laws. He told of the provisions for apartment house kitchens found in the housing law of 1917, requiring a minimum floor space and cross-ventilation of windows. Now kitchenettes have replaced kitchens and there is no need for that law, he declared.

"The state government is not centered in the statehouse at Indianapolis," he continued, "but in the hearts and minds of the people. The building council is not for more confusing regulation. On the other hand, it offers an opportunity for representatives that have to do with building to come together in mutual service and co-operation to every citizen of the state that owns a home or builds a home. That is the spirit which pervades the so-called building council of Indiana."

SHEET METAL CONTRACTORS NAME INDIANAPOLIS MAN HEAD OF THEIR STATE ASSOCIATION.

Joseph Gardner Honored

Joseph Gardner, Indianapolis, was elected president of the Sheet Metal Contractors' Association of Indiana at the fifth annual convention of the organization held at the Severin Hotel, Indianapolis, this week. Other officers elected were August Hartman, Terre Haute, first vice president; Earl Clinton, East Chicago, second vice president; J. D. Ortmeyer, Evansville, treasurer, and L. W. Beach, Richmond, secretary.

After a heated debate a resolution to sever the connection between the state organization and the national was voted down by a small majority. The convention city for 1925 was not selected, that question to be decided later.

Philip H. Geitz, Indianapolis, was elected president of the Indiana Fur-Mets, a social auxiliary of the Sheet Metal Contractors' Association. J. C. Henley, Indianapolis, was re-elected treasurer and O. Voorhees, also of Indianapolis, was made secretary for this year. Vice presidents elected were W. A. Wilkening, Indianapolis; F. L. Canine, Crawfordsville, and Robert Kruse and Frank Ingalls of Indianapolis. The new membership committee will consist of H. R. Jones and Robert Wilcox, both of Indianapolis. Two new directors of the Sheet Metal Contractors' Association to serve for three years are V. L. Roland, Elkhart, and John Balkema, Lafayette.

The convention closed with a banquet in the Athenaeum. Paul R. Jordan, retiring president of the Fur-Mets, and H. P. Sheets, secretary of the National Retail Hardware Association, were the speakers at the closing evening session.

EARLY SEASON ACTIVITY NEVER SURPASSED IN 1923

Late Spring and Early Summer Registered Big Slumps

March holds the record for the greatest building month of the year 1923. The monthly curve which began to rise in January, reached its apex in March; dropped steadily until July; rose slightly in August; dropped considerably in September and through October, November and December ascended again.

Every region in the country, East, Central, South and Pacific Coast, gained over the year 1922, ranging from 14 per cent in the Central to 36 per cent in the Pacific West.

INDIANAPOLIS BUILDING PERMITS

BIG RAILROAD IMPROVEMENT SCHEME LAUNCHED

Erie to Build Near Hammond

An announcement of more than ordinary interest to Hammond citizens and business interests has just been made to the effect that the Erie Railroad has under contemplation a building program that will mean the expenditure of approximately half a million dollars at Highland, near Hammond, for the erection of new car shops.

Plans are being prepared for the improvements which will consist of the new shops, a power house and coal hoppers with mechanical loading equipment. Soon after the proposed track elevation began to take definite form the word got out that the Erie was contemplating establishing yards at Highland and the prospect of this more extended improvement scheme is generally attributed to the move for track elevation.

LABOR SITUATION UNCHANGED

Painting Contractors Hold Big Meeting

There has been no change in the Calumet District relative to the Labor situation. It seems that both employers and employes are holding to a watchful waiting policy. The painting contractors held an interesting and enthusiastic meeting a few days ago at the B. T. E. A., headquarters in Hammond and in addition to the local bosses present there were quite a few from Gary who also attended that affair.

LOST OUT

Unavoidable Situation Upset Plans for Trip to Ft. Wayne

It was just our luck to have things break all to the bad last week just when several of our directors and the secretary were all set to go to Ft. Wayne to attend the State A. B. C., convention. Local affairs arose to require a session of our Board of Directors with the Executive Board of the Chamber of Commerce and a notification came from the latter that all arrangements were prepared for the meeting Tuesday afternoon, January 22. A short session resulted and adjournment was then taken till the evening of January 23. It was a most aggravating situation and knocked our Ft. Wayne preparations into a cocked hat. Rufus Danner from Hammond, however, slipped away and took in the Ft. Wayne gathering. We hope now that we can get to the Indianapolis convention next year.

TO DISCUSS BIG PROJECT

Will Have Big Bearing on Hammond's Future

An important meeting is scheduled for Hammond on the fourteenth when the chief engineers of the railroads entering Hammond are to hold a conference with the city engineer and the city council to talk over and study the proposed plans for the track elevation of the roads.

COME THRU WITH ANTE

Steel Plant Pays

The city treasury was added to the other day when a nice "piece of change" was received from the Jones-Laughlin Steel Co., in payment of its assessment for the construction of the deep sewer on the north side. The check received from the above firm amounted to $178,-458.

LANDMARK GOES

Makes Room for Modern Business Structure

Things move fast these days.

It was not so many years ago that the Bijou Theatre on State Street was quite a place according to the way people looked at things in that day. Now it must come down to make room for a more modern building. S. Silver, jeweler, has purchased the show house, is having it wrecked, and in its place will erect a new store and office building.

ZERO ALL AROUND

Weather Puts Crimp in Activity

Calumet building operations, contractors, craftsmen, in fact the whole industry, have been handed several knockout blows by the weather man of late. The way he has parried and thrust, feinted and jabbed, has been downright malicious. He would keep the mercury hovering down around zero and drive everybody inside, then would sort of heat things up long enough to entice us mortals out once more, and then, down would go the mercury again to send everybody scurrying for cover. That sort of thing has been going on for several weeks now and as a consequence building activity itself has dropped down to zero, too. Oh, well, there is one consolation, it can't go on forever and everyone is trying to cheer himself along with the thought that Spring is not so very far off.

WHY BOTHER TO WORK AT ALL?

Massachusettes Carpenters Endorse Five Days a Week Scheme

The Massachusetts State Council of the United Brotherhood of Carpenters and Joiners at its recent convention went on record as favoring a five-day week in place of the present work week of five and one-half days. Plans of the international for a pension system and a home for aged workers were endorsed, and a resolution passed favoring a continuance of the restrictive laws on immigration.

WRESTLING WITH THE SAME ANNUAL PROBLEM

Wage Conferences in Progress

Wage and agreement matters are the big topic just now in this section. The contractors' committee has had several sessions with the various Labor committees but nothing tangible has developed to date. Further negotiations are pending. Negotiations, as it were, go to make up the great indoor sport these days.

OUCH!

Where Does the Money Go?

Now and then it happens. Labor in the Calumet District has been "touched" according to the evidence submitted at the trial of J. R. Koble, Financial Secretary of Local 697, International Brotherhood of Electrical Workers. A hearing was held in the city court at Crown Point a few days ago and Judge Cleveland passed the case along to the criminal court. Local 697 embraces Lake and Porter Counties with headquarters at the Labor Temple at Hammond. It is alleged that Koble is $1,314.05 short of what an official audit showed and that the shortage covers a period of three months.

CALUMET BUILDING PROGRESS

A new hotel is contemplated for Crown Point. The owners have finally decided on and purchased a site. Plans are now being distributed among the contractors for estimates.

Hammond contractors are now figuring on a fine new $30,000 residence for Dr. Oberlin to be erected in South View Addition. The house will be of brick veneer, 2 sty. and basement, 62x28 and will also include a garage. Buckley and Skidmore, Hammond Building, are the architests.

Architect Mac Turner, Hammond, is receiving bids on two projects for J. C. Paxton. One proposition is a 2 sty. & basement store and office building, 50x-90, the other is a store building. After the bids are submitted the owner will decide which building he will erect.

J. J. Ruff, hardware merchant, is having plans prepared by A. C. Berry & Co. for the construction of a $20,000 brick veneer bungalow. The new structure is to be erected on Wildwood Ave.

E. E. COLE.

News of the Week

The asterick (*) prefix to an item indicates additional information to report published in previous issue.

INDIANAPOLIS

High School: $1,500,000. New Shortridge High School, 34th and Meridian. Archt., Herbert Foltz, J. F. Wild Building. Owner, Board of School Commissioners, Richard O. Johnson, Business Director, 150 No. Meridian St. Archt. just selected. (Note change of architects). Brick, fireproof construction.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given by the undersigned that the School Board of the City of Sullivan, Sullivan County, Indiana, at the office of the Superintendent of Schools, in the present High School Building in Sullivan, will receive sealed proposals for the furnishing of all material and labor required for the erection and completion of a basement and two-story brick high school building located as shown by lot plan in the City of Sullivan, Sullivan County, Indiana, until one o'clock P. M. on Monday, March 3, 1924.

The above work will be divided into three classes, to-wit: General Contract, Electric Wiring and Heating, Ventilating and Plumbing. Contractors may bid on any of the above classes of work or on the work as a whole.

Plans and specifications for the above work are now on file at the office of the above School Board and elsewhere as required by law; also at the office of John B. Bayard, architect, of Vincennes, Indiana.

Prospective bidders on the above work can secure copies of the plans and specifications by application to the office of the architect. Each bidder shall file their bid in a sealed envelope plainly marked with the name and address of the bidder and the class or classes of work bid upon. Each bidder shall attach to his bid a certified check made payable to the School Board of Sullivan, Indiana, for (3%) three per cent of the total amount of his bid, this check to be forfeited to the Board in event bidder whose bid is accepted, does not enter into contract and give bond approved by the Board to the full amount of his bid. Checks attached to rejected bids will be returned when bid is rejected.

All bids shall be accompanied by a non-collusion affidavit as required by law.

Bid forms for the above work will be furnished by the architect. Payments on the above work will be made by the Board at its regular meetings on estimates of the architect based on 85% of the value of the material and labor forming a part of the work and material on the ground which is protected from the elements in a manner approved by the architect.

The Board reserves the right to reject any or all bids submitted.

SCHOOL BOARD OF SULLIVAN, IND.
JAMES R. BROWN, President.
DR. G. D. SCOTT, Treasurer.
A. C. OWENS, Secretary.

February 2, 1924.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned, Trustee of Harrison School Township, Delaware County, Indiana, and the Advisory Board of said township, will receive bids at "Center" School House in District No. 7, in said Harrison Township, Delaware County, Indiana, until 1:30 o'clock p. m. on Saturday the 23rd day of February, 1924, for the construction of a new school building and for the installation of heating and ventilating system and plumbing and drainage system, and for electric wiring, all for said proposed building. All bids shall include all labor, material and supplies necessary for complete construction or installation of that part of the work bid on, and shall be strictly in accordance with the plans and specifications provided therefor, which have been properly accepted and approved and are now on file in the office of said Trustee in his residence in said Harrison Township, and also in the office of Houck & Smenner, Architects, 123½ West Main Street, Muncie, Indiana. Said building is to have one story and to be without basement except basement for heating and ventilating system, and is to be of brick, tile, stone and concrete construction, and is to be located on a tract of real estate owned by said Harrison School Township in the southeast quarter of Section 16, Township 21 North, Range 9 East in said township.

Bidders will submit their bids as follows:

(1) For the construction of school building (general contract).

(2) For the installation complete of heating and ventilating system and plumbing and drainage system.

(3) For the installation complete of electric wiring.

(4) For the construction as a whole or any combination of contracts.

The estimated cost of said building is $79,000.00.

All bids must be sealed. Each bid on the general contract shall be accompanied by the certified check of the bidder for $2,000.00. Each bid on the heating and ventilating system and plumbing and drainage system shall be accompanied by the certified check of the bidder for $1,000.00. Each bid on the electric wiring shall be accompanied by the certified check of the

bidder for $100.00. Each bid for complete construction or for any combination of contracts shall be accompanied by the bidder's certified check in an amount equal to the total amounts required for the contracts included in the bid if the same had been bid for separately. All checks shall be payable to John W. Black, Trustee. The proceeds of the certified check accompanying the bid of each successful bidder shall become the sole property of said Harrison School Township in the event such successful bidder shall fail to enter into a contract and execute and furnish an acceptable bond within 10 days after he has been notified that his bid has been accepted. Certified checks of unsuccessful bidders will be returned to them.

The successful bidder or bidders will be required to enter into a written contract or contracts and to execute a bond or bonds with sufficient surety or sureties to be approved by said Trustee in an amount equal to the amount of the contract or contracts and conditioned for the faithful performance of the same.

Plans and specifications may be had for the individual use of bidders from the architects, Houck & Smenner, Muncie, Indiana, by making a deposit of $10.00 for each set, which deposit will be returned upon the return of such plans and specifications in good condition on or before the day of letting the contracts.

The right is reserved to reject any and all bids.

STREET IMPROVEMENT
NOTICE TO CONTRACTORS

Notice is hereby given, that sealed bids or proposals will be received by the undersigned Clerk of the City of Greenfield, Indiana, at the office of said clerk up until the hour of 7:30 p. m., February 6th, 1924, for the improvement of North street in said City of Greenfield, commencing at the intersection of the east line of the west alley in Exchange addition to said City of Greenfield, Indiana, and North street in said City and extending east to the west line of Howard street in said city, by grading and paving the roadway with vitrified brick, sheet asphalt, emulsified asphalt or concrete all as authorized by Improvement Resolution No. 13, 1923.

Said bids will be received according to the several sets of specifications now on file for said improvement. No part of the cost of said improvement is to be paid from the general fund of said City unless an assessment is made against said City as provided by law.

Said proposals will be opened and considered by the Common Council of said City of Greenfield, at 7:30 p. m. on February 6th, 1924. All work done in the making of said described public improvement shall be in accordance with the terms and conditions of the improvement resolutions as numbered and the detail plans, profiles, drawings and specifications which are on file and may be seen in the office of said Clerk of the City of Greenfield, Indiana.

The bidders, in submitting proposals to make said described public improvement, must accompany each bid with a certified check in the sum of not less than two and one-half (2½) per cent of the engineer's estimate of the cost of said improvement, as evidence of good faith that the successful bidder will execute within ten days from the acceptance of proposals, contracts and bonds satisfactory to said common council to do the work of making said improvement. A failure of the successful bidder to enfer into such contract and bond upon the acceptance of such proposal will forfeit the check and the sum of money payable thereon to the City as agreed and liquidate damages for such failure.

The Common Council of said City of Greenfield reserves the right to reject any or all bids.
Dated at Greenfield, Indiana, January 17, 1924.
By order of the Common Council of said City.

MABEL K. HARDING,
Clerk of said City of Greenfield, Ind.
Jan. 26-Feb. 2, 1924.

HAND FIRE STOKERS
NOTICE TO BIDDERS

Notice is hereby given, that the Common Council of the City of Greenfield, Indiana, will receive at the office of the City Clerk, in said City, until 7:00 p. m. on the 6th day of February, 1924, sealed bids for the furnishing, for the lectric Light Plant, hand fire stokers, bidders to submit specifications. Bids to be opened on February 6th, 1924, at 7:30 p. m.

The Common Council reserves the right to reject any and all bids.
Dated at Greenfield, Indiana, January 17, 1924.

MABEL K. HARDING,
Clerk of the City of Greenfield, Ind.
Jan. 26-Feb. 2, 1924.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given by the undersigned that the Advisory Board and Trustee of Madison School Township, Carroll County, Indiana, at the office of W. C. Smith, attorney, Delphi, Ind., will receive sealed proposals for the furnishing of all material and labor for the building and equipping of a four-room, one-story school building, including basement, heat and ventilating system, plumbing and septic tank and sewerage, electric wiring and fixtures. Separate bids will be received for each of the above, but joint bids will be considered for heating, ventilating and plumbing. As set out in plans ond specifications, profiles and requisitions now on file in the office of the Trustee of Madison Township and in the office of Samuel Young, architect, Monticello, and in the office of Will C. Smith, Delphi, Ind. Plans and specifications may be had for the individual use of bidders, from the trustee or from the architect, upon a deposit of ten dollars for general contract and five dollars each for heating and ventilation systems, plumbing and electric work, all of which will be returned if plans and specifications are returned in good condition on or before date of letting. Said sealed proposals to be opened and contract awarded for said improvement on the 15th day of February, 1924. Bids or proposals will be received up to 12 a. m. on said date. The said improvements are located in Madison Township, Carroll County, Indiana, and more particularly known as the northwest corner of the Eli Craig farm. The estimated cost of soid building is $36,000. Said bids will be for the completion of the said improvement in accordance with the plans, profile and specifications in the office of trustee, architect and Will C. Smith, at Delphi, Ind., and shall include all labor and material for said work. And in no case will extra compensation be allowed for any additional work alleged to have been done by the contractor or contractors, to whom is awarded the contract.

Each bidder shall state in his bid approximately the time at which he will entirely complete this contract, this is desired, as time is an essential feature in the letting of this contract. each bidder on the general contract shall accompany his bid with a certified check in the sum of one thousand dollars, payable to the order of Parry Rule, trustee. Said sum to be paid as liquidated damages by the bidder to whom contract is awarded should he fail to enter into a contract for the construction of this building, and provide acceptable bond according to law within ten days after being notified that his bid had been accepted. The successful bidder will be required to sign a uniform contract with such requirements as set forth in the specifications, bond be given by contractor in the sum of contract price. Personal bond acceptable to the trustee may be given, but at least one sureity must be a resident of Carroll County, Indiana, and all such bondsmen should be resident freeholders of the State of Indiana.

Said contract will be let as a whole or in part to the lowest responsible bidder, upon affidavit of non-collusion, which must be submitted with the bid, upon failure to submit such affidavit, such proposals or bid will be rejected and the board reserves the right to reject any and all bids. Time for the completion of said work will be agreed upon at the letting of said contract, by the trustee, advisory board and successful bidder.

APPRENTICE EDUCATION MAKES RAPID PROGRESS, ASSERTS FEDERAL BULLETIN

Part-Time Training Advocated

An encyclopedia of information on the subject of apprenticeship in the United States is now available in the Bulletin on Apprentice Education which has just been issued by the Federal Board for Vocational Education.

New methods of apprentice training have been made necessary by the introduction of large scale production in industry, the Bulletin shows. During the last fifteen years, we have witnessed the development of the class room method of apprentice education to supplement job experience. Such education has arisen, either in the form of vocational training in the public schools, or through corporation schools under the auspices of employers, or through classes controlled by the trade unions.

The most surpring progress has been made along the lines of part-time apprentice training classes organized by the public schools, according to the Bulletin. Such training dates from the passage of the Federal Vocational Education Act in 1917. At the close of the fiscal year 1921-22, a total of 265,494 pupils were enrolled in such continuation classes. The Bulletin believes that the public school is destined to fill a role of increasing importance in apprentice education, since it it supplies a neutral training agency, acceptable to both capital and labor.

Sharp issue is taken with the belief of many educators that the part-time school is only a temporary make-shift to be displaced as soon as the age of compulsory full-time education can be raised to a desired point. The Bulletin questions the wisdom of full-time education for boys and girls over 14, whose minds are set on employment. For such youths, industrial experience will prove of greater educational value than unwilling attendance at high schools, it is declared. At the same time, the part-time school holds these young workers within the influence of the public school system.

Too many educators hold the 'Camel' theory of education, says the Bulletin. They assume that the child is an intellectual camel, who can take his education in a prolonged meal—an educational gorge—store it up in an intellectual hump, and live off the hump all the way across the journey of life. They assume that the school is able, by itself, to furnish a balanced ration. They overlook entirely the educational value of work for youth, as well as for older people.

Part-time vocational education bridges the gap between the job and the school, and enables the child to gain the cultural benefits of both, during his formative years, declares the Bulletin. The increasing use of the public school for apprentice training by both employers and trade unions will be a mighty stimulus to the growth of part-time education, it asserts. At the same time, it will give a new practical value to the public school.

SALES CONFERENCE TO BE HELD BY H. J. BAKER & CO.

Representatives From Indiana, Ohio and Illinois to Meet at Indianapolis

An affair indicative of progressive initiative is scheduled February 14, 15 and 16, when the entire sales organization of Hugh J. Baker and Company will gather at Indianapolis for an annual sales conference. Quite a lengthy program has been arranged, to consist of a discussion of policies and talks on service and the products handled by the firm.

The conference will be opened February 15 with a noon lunch in the Italian Room at the Lincoln Hotel, after which there will be a business session in the afternoon.

The second day of the conference will be featured that night by a dinner and entertainment at the new home of the Indianapolis Athletic Club. The concluding session of the conference, February 16, will be held in the Italian Room at the Lincoln. The conference will be attended by representatives from Dayton, Ohio, Fort Wayne, Chicago and Decatur, Ill., branches, and representatives from our agents, such as Evansville Structural Supply Co. of Evansville, Ind., and General Builders Supply Company of Springfield, Ill.

COUNTRY DINNER FOR MATERIAL MEN AND CONTRACTORS

Ladies of Heltonville to Serve at School House Letting

Occasionally a building project comes up for consideration out in the remote rural districts and fails of attraction because of its remoteness and the inconvenience attendant at the letting of the contract. However, nothing like the latter is to occur February 19, when the Heltonville, Ind., school comes up for letting. Dr. Perry Woollery, the trustee of Pleasant Run township, expects to overcome the usual handicaps that deter material men and contractors from attending rural lettings and announces that the Ladies' Aid Society of Heltonville will serve dinner a real country dinner, that day to all material men and contractors who go to the letting.

LOOKS LIKE WHITE COLLAR TRADE MAY REGISTER A SLUMP

Pittsburgh Youths Start Out for Real Money Jobs

Another jolt for the "white-collar job" is seen in the announcement from Carnegie Institute of Technology of Pittsburgh that, of the 1,200 night students enrolled for the present year in the College of Industries, 50 per cent have signed to take courses in the building trades classes. This division of students is viewed with unusual significance by officials of the Institute as representative of a growing tendency among the young men of Pittsburgh to learn craftsmanship.

Moreover, according to the report, the increased interest in the building construction courses is not confined to no one branch of the industry, but is reflected in each department offering building courses.

INDIANA ARCHITECTS GATHER FOR SEMI-ANNUAL MEETING

Many Features Prove Attractive

A combination of circumstances united this week to make possible a most attractive program for the semi-annual meeting of the Indiana Society of Architects at Indianapolis, drawing a fine representation of the state architectural profession to that city.

A most fortunate arrangement, entirely independent of the I. S. A. meeting, developed to culminate in a State-wide Conference on Schoolhouse Planning on Thursday, February 7, under the auspices of the State Department of Public Instruction. When it was learned that the Indiana architects were to meet the following day, a special invitation was issued inviting them to attend the school planning conference.

The program for that event was as follows:

February 7

—Claypool Hotel—

10 A. M.—Purpose of Meeting and of Division of Schoolhouse Planning, by Benjamin J. Burris, State Superintendent of Public Instruction. The Need for Better School Buildings, by E. E. Ramsey, State School Inspector. Public School Sanitation, by Dr. W. F. King, Secretary State Board of Health, Indianapolis, and Dr. F. B. Dresslar, Specialist in School Hygiene, United States Bureau of Education.

1:30 P. M.—The Schoolroom as a Unit in Schoolhouse Planning, by Dr. F. B. Dresslar.

7:30 P. M.—Schoolhouse Heating and Ventilation, by Dr. F. B. Dresslar.

That evening the regular meeting of the Indiana Chapter, A. I. A., was held at the Columbia Club, Indianapolis, beginning with a 6:30 p. m. dinner, after which there was a business meeting.

On Friday, February 8, came the semi-annual gathering of the Indiana Society of Architects, which was well attended.

This was the program arrangement for the day:

February 8

—Indianapolis Athletic Club—

10:30 A. M.—Meeting of Board of Directors.

12:30 Noon—Luncheon.

2:00 P. M.—Business session.

3:30 P. M.—Inspection of the new Indianapolis Athletic Club, conducted by Robert Frost Daggett, the architect.

At six-thirty there was the banquet and entertainment at which the members of the Indianapolis Architects' Association met jointly with the members of the Society and those of the Indiana Chapter, American Institute of Architects.

Toastmaster: S. C. Hadden, editor of Municipal and County Engineering.

Orchestra.

Cabaret entertainment.

Address: J. Arthur MacLean, Director, The John Herron Art Institute, Indianapolis.

Music.

Address: "Snapshots of England," Rev. F. S. C. Wicks, Indianapolis.

Cabaret entertainment.

Special Act: C. Roltare Eggleston, of Keith's Theater.

The concluding feature of the meeting came Saturday morning, February 9, when the architects assembled in a body and went to the John Herron Art Institute to formally open the annual architectural exhibit of Indiana architects.

DRAFTSMEN AT INDIANAPOLIS ORGANIZE ARCHITECTURAL CLUB

Officers Elected

Starting with the gathering of several draftsmen at luncheons at noon there has developed at Indianaolis a new and permanent organization known as the Indianapolis Architectural Club, the membership of which is made up of draftsmen employed in the local architects' offices.

Permanent organization was effected the past week with the adoption of a constitution and by-laws and the election of these officers,—President, R. Karl Galbreath; Vice-Pres., George Caleb Wright; Sec'y., Sam E. Becker; Treas., J. Ed. Clemens.

The club has been meeting at noon at the Board of Trade dining room and as soon as suitable quarters can be found a definite regular monthly meeting night will be set.

EVANSVILLE ARCHITECTURAL FIRM REORGANIZED

C. Shopbell, Well-Known Southern Indiana Architect, Makes Change In Business Organization

Announcement is made by the architectural firm of C. Shopbell and Company, Evansville, Ind., that a reorganization has been concluded and the firm hereafter is to be known as Shopbell, Fowler and Thole. The same offices as formerly occupied at 707 Furniture Building are to be retained.

MERITOROUS EXHIBIT PUT ON BY INDIANA ARCHITECTS

Annual Architectural Display A Noteworthy Affair

Indiana architects can well be proud of the Annual Architectural Exhibit that will be thrown open to the public at the John Herron Art Institute, Feb. 10th. It is a fine example of the offerings Indiana architects are in a position to furnish and speaks volubly of the ability of the profession in the state.

There was a liberal co-operative response from the architects and the result of the effort put forth has produced the best exhibit of the sort ever sponsored by the Indiana Society of Architects.

The exhibit has been enlarged this year and includes not only drawings and perspectives but photographs of finished structures of all kinds with architectural merit. Exteriors and interiors go to make up this interesting photographic display. Then, in addition to the plans and photographs, there is also an exhibit of five of the most important building materials, roofing, tile, brick, lumber and finishing hardware so arranged as to bring out the artistic merit of these materials.

Director J. Arthur MacLean of the Art Institute has shown a great interest in the exhibit and has extended the fullest co-operation to the Exhibits Committee, Kurt Vonnegut, chairman; W. H. MacLucas, Donald Graham of Indianapolis; Karl D. Norris, East Chicago and John Bayard, Vincennes, to make this display a real credit to the Indiana architectural profession.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

BUILDING SHOWS SIGNS OF ACTIVE REVIVAL

Promising Indications Follow Big January Slump

Though Evansville has not been proud of her building record for the past five months, being forced to sit back and watch other cities keep piling up big building totals, and had to record another mediocre set of figures for January, nevertheless, a ray of encouragement has developed and the prospect is good for a change for the better before long. Building talk is beginning to buzz again indicating a renewed construction activity in the not far distant future.

Evansville, however, was not alone in the general decline of building activity that set in during the latter half of last year for Indianapolis, Ft. Wayne, South Bend and other Indiana cities showed the same tendency. In the "Pocket" section of the state building men are sensing indications that mean that the end of the building lethargy is apparently in sight and a decided improvement is expected from now on.

During the past month new building endeavor, according to local building inspector Edward Kerth, reached its lowest ebb over a year's period as only 70 permits were issued for a total estimated valuation of 94,112. This was far in arears of the January, 1923, record when 66 permits with an estimated valuation of $208,000 were granted.

A summary of the building business transacted by the building inspection department during the first month of the new year shows the following.

	Per Is.	Est. Val.
New York	43	$81,564
Repairs, alterations and additions	27	12,548
Total	70	$94,112

PLUMBING TRADES SCHOOL FOR BEGINNERS ATTRACTS

Eighteen Students Enrolled

Eighteen young men are now enrolled in the plumbers' school operating under the auspices of the master plumbers of Evansville. The class made up of youths between 17 and 24 years of age meets at the Central high school Tuesday and Thursday nights.

Only those serving as apprentice plumbers and actually engaged in plumbing work are eligible to receive the instruction.

CHIPS AND SHAVINGS

The Scarborough-Davies Contracting Company has started work on the remodeling and addition to the L. J. Davis Manufacturing Company store, 518-520 Main street. The two stories and basement of both properties will be made into one store building and was contracted at $12,731.

William H. Thompson of Thompson and Geary, New York architects, designers of the new Y. W. C. A. building, Second and Vine streets, was in the city the past week conferring with Charles L. Troutman, associate architect, of Evansville. Plans are to be prepared this winter and bids for the erection of the new $250,000 structure will be received in the spring.

The Central Methodist Church has received preliminary plans for a new building which structure is contemplated for spring.

C. Kanzler & Son, Evansville contractors, report steady progress on the attendants' houses at the Newburg, Ind., government dam site.

FT. WAYNE BUSINESS FLOURISHING

Bank Clearings for Week Pass Two Million Dollars Mark

Business activities in Fort Wayne were brisk through last week, the bank clearings on but one day, Thursday, running under $300,000, while on two days during the week the clearings ran over $400,000 and on one of these the amount ran near the half million point. The clearings for the week totaled more than $2,000,000 and showed a substantial gain over the previous week and the corresponding week last year.

BUILDING LINE PLAN COMES UP AGAIN

Territory To Be Effected Has Been Extended

After filing a remonstrance carrying the names of 57 per cent of the property owners along West Main street between Calhoun street and Broadway, a large delegation of the remonstrators who appeared before the board of public works recently have agreed to withdraw their objections to the establishment of the building line if the board will amend its resolutions so as to call for the establishment of the line from Calhoun street to the G. R. & I. tracks, the full length of the west end of the street. The board has agreed to the proposed action and ordered the amendments made as requested.

Reasons cited by the remonstrators for desiring the longer line were given by several spokesmen, all of whom protested the shorter line on the strength of arguments to the effect that this would leave a shorter area in which to stand possible damages when, eventually, the street should be widened. By taking in the entire street, this would permit the assessment of the entire district benefited and thus provide smaller assessments for each lot while giving a through street of good width.

BUILDING IN FT. WAYNE IN JANUARY SLOWED DOWN

Considerable Decline Registered From Figures of a Year Ago

The effect of the blustery inclement weather with its wintry chill, that prevailed in Ft. Wayne thruout the month of January, is readily seen, as far as building operations were concerned, when one stops to scan the local building permit record for the month.

Building progress sloughed off most noticeably last month and both permits and their estimated valuation were far below the figures that have been posted right along for months in Ft. Wayne.

There was a decided falling off from the building business of December and even January a year ago.

During last month there were but sixty-six permits issued for a total estimated valuation of $239,450, this against ninety-nine permits amounting to $390,885 in January, 1923, a decline of 38%.

However, this falling off is regarded as due to seasonable conditions and no one is downcast as the prospects are promising for an active building season again when spring nears. It is readily appreciated that the city had a wonderful building year in 1923 and that it will require much hustling to reach such record figures again this coming year.

MASON CONTRACTORS PROPOSE STATE ASSOCIATION

Move Advocated at Ft. Wayne Takes Definite Form at Indianapolis This Week

A suggestion proposed at Ft. Wayne at the time of the recent annual convention of the Associated Building Contractors of Indiana seemed to strike a responsive chord among certain of the contractors present and from all appearances gives every indication of developing into a state of permanency.

As the result of a special meeting called at Ft. Wayne the brick mason contractors in attendance at the convention got together to talk over conditions, prospects and other business matters. The information evolved at that meeting led to the suggestion that the mason contractors of Indiana should keep in closer contact with each other and it was proposed that a state association of mason contractors be organized. The twenty-eight masons present, representing fifteen cities endorsed the idea and at once elected James Hodgson, Sr., president, and M. M. Bonnewitz, secretary, of a temporary commitee to foster a permanent organization.

At a meeting of the Indianapolis Mason Contractors Association, Thursday, the scheme for a state association was gone into and heartily endorsed. Determined effort is to be launched immediately to effect a state-wide masons' organization and the first step in that direction is to be taken at once. A special meeting has been called for Tuesday, Feb. 19, 10 a. m., at the Building Contractors Association headquarters, Indianapolis, invitations to attend which are to be sent to all Indiana mason contractors and general contractors who do their own brick work.

BUILDING BOWLERS WAGING A HOT FIGHT

Indianapolis Scores Mounting

Team Standing

Team	W.	L.	Per.
Colvin's Triangles	41	19	.683
Wege-Stanford	39	21	.650
Thumbtacks	36	24	.600
Conder-Culbertson	31	29	.517
Central Supply Co.	31	29	.517
Hugh Baker	30	30	.500
Indpls. Elec. Sup. Co.	23	36	.390
Robt. Berner Co.	8	51	.136

The building men at Indianapolis at their weekly bowling sessions are making the pins fly on the alleys, and, as the teams of the Builders' League, (Architects, Contractors, Engineers and Supply men,) have rounded into the back stretch and are approaching the final dash for the finish, they are all putting up a hot fight.

Just last week the Hugh J. Baker team of the second division crashed into the Wege-Stanford crowd and dropped the runners-up for two games, all contrary to the dope. The Baker "gang" ran wild posted a 950 score and equaled the season's high team single game score.

Colvin's Triangles, the leaders, also hit a snag and saw their percentage shrink accordingly. J. Geiger, for the Conder and Culbertsons, did the dirty work in this series when he ran his second game score up to 230.

A summary of the best performances of the builders on the alleys this season is as follows:

High Team, 1 Game

Hugh Baker ---------- 945
Colvin's Triangles ---------- 945

High Team, 3 Games

Colvin's Triangles ----------2650

High Individual, 1 Game

Mayer of Wege-Stanford---------- 280

High Individual, 3 Games

Mayer of Wege-Stanford---------- 637

OFF TO A POOR START

Indianapolis Building for January Behind That of Same Period a Year Ago

The official figures of the city building inspector show that building operations at Indianapolis continued in January the slow down that started in several months ago. While the figures do not stand up well under comparison, nevertheless, in view of the fact that the weather in January was anything but conducive to encouraging new building operations, the $1,012,221, total recorded is not bad after all.

In December there were 795 permits issued, totaling an estimated valuation of $1,853,898, while in January there were 634 permits granted a decline of 161 permits. The past month showed a 45% loss in the matter of estimated valuations.

As compared with 1923 Indianapolis got a poor start in 1924, for in January a year ago the estimated cost of new construction work started amounted to $2,021,138 or 49% more than the amount registered January, 1924.

Month	Per	Est. Val.
January, 1924 ------	634	$1,012,221
January, 1923 ------	619	2,021,138

BUILDING MATERIAL PRICES SHOW ONLY SLIGHT INCLINATION TO EASE UP

Quotations Hold Generally Steady

Movements in the building materials market in December were somewhat irregular. A few commodities in some cities showed further declines, for instance cement in New York City, finishing materials in New York City, starting materials in Chicago, and some grades of lumber. On the other hand common brick and starting materials in the East have tended upward. Structural steel shapes still remain firm at the level reached some months ago. On the whole, while the general level may have tended downward the decline is undoubtedly less than the usual seasonal movement.

INDIANAPOLIS BUILDING PERMITS

(Week of February 1 to February 7)

Store and Office Building: $21,000, 2 sty., 120x65. Archt., J. Fred Brubaker, 157 E. Market St. Owner, Yankuner Bros. (Abraham and Louis) ,2344 Station St. Architect builds and awards separate contracts. Brick.

Factory: 1 sty., 60x150, $6,000. Owner, Hoosier Veneer Co. Owner builds. Metal construction, walls and roof.

I CAN, YOU CAN'T

Attitude Assumed by Certain Craftsmen In Ax-Grinding Situation

"Consistency, thou art a jewel," so the old saying goes. However, appreciation of value seems to depend upon who receives the jewel. Then again, in the building trades consistency relates not to whether an electrician or a plumber is what he is, rather, it all depends on his affiliation with or not with the unions.

As an example of the above Hammond has a concrete case on her hand in the situation that has developed at the new Indiana Hotel building. There all the tenants of the store rooms are denied telephone and gas service because one set of electricians and plumbers refuses to let another set of such craftsmen come on to the job and finish up a certain essential part of the work to which the tenants are entitled.

The electricians and plumbers now on the job have balked at allowing the employes of the telephone and gas companies to do final installation work until the former craftsmen have finished up and left the project. All this because the employes of the two companies are non-union men. And yet, these very same balkers are using a telephone in the Labor Temple that was installed by telephone company men of the same status as those to whom they object at the hotel building. Further, these same union men have telephones and gas in their homes, a service that was made possible because the companies did the installation with their own non-union employes. None of these union folks are refusing to use either telephone or gas service for their own convenience, and yet, they would deny other folks that convenience when the latter are in no way concerned with the cherished grievance of the employes. If any one can find any consistency in such a position Webster was all wrong.

It all reminds one of the old story of the Irishman who, after lambasting his boy, said, "Shure it's not because I hate ye that I spank ye, but, just to show me authority."

QUIET NOW BUT ACTIVITY EXPECTED BEFORE LONG

Optimism Rules in Calumet Building Circles

Local architects in the Calumet region announce a sudden dearth of inquiries from prospective builders but many are not taken this slump seriously, rather, they are inclined to attribute the lack of interest in building contemplations to the cold spell that has been lingering around intermittently. Though prospects indicating an early revival of building are somewhat tardy in making their appearance to date there was considerable evidence late in the fall that spring would develop some nice work before the sun will have traveled very far north.

Both architects and builders are optimistic regarding the future building business and hold to the argument that with anything like a fair break in conditions, wage settlements, and material supply quotations 1924 should prove a good building year.

ALL OF WHICH SOUNDS LOVELY

San Francisco Seems to Have Found the Remedy

An interesting and lengthy report has just been issued by the Industrial Association of San Francisco covering the activities of that organization since its formation three years ago. It is announced in the document that San Francisco is the only city in the country where union and non-union men of like crafts work along side by side without friction on the same work.

The association contends that the old-time much employed restrictive production practices have been abolished and that today all building trade mechanics are giving a full day's work to the employers in return for the wages received.

Further, the assertion is made that there has been no labor trouble under the regime of the Industrial Association and that as a result the volume of building construction work has steadily increased. In 1922 the estimated valuation of the building permits issued ran up to and over forty-five millions of dollars, while for the first nine months of 1923 the permits recorded over thirty-four millions of dollars worth of new construction work.

Maybe Horace Greeley had a hunch on just such a situation as now prevails in San Francisco when he uttered his immortal words, "Go west, young man! Go west!

LOOKS LIKE AN EARLY SUMMER FOR THE CALUMET

Impenetrable Fog Bank Clouded Sun on Ground Hog Day

He may have seen it in some localities but if any Calumet ground hogs saw their shadows on Feb. 2, they must have been slinking along somewhere in the vicinity of a powerful electric light. No one has reported having seen one of the weather manipulators and many there are who claim these little furry quadrupeds had too much sense to wander forth in the heavy Calumet fog that prevailed that morning. If any did the chances are they never found their way back to the old winter home of a hole.

It is now alleged that the fog was so thick that the ice company seized at the opportunity to cut it up in chunks and freeze it into blocks for summer consumption.

BUILDING DROPS

January Permit Business Shows Quite a Decline

City Building Inspector Henry Vis says business was slow during January and backs up his assertion with a record which leaves no doubt about it. It so happens that the same number of permits were issued in Jan. 1924, as during the corresponding period in 1923, but in the matter of estimated valuations there was a drop of 18.5%.

The official figures are:

	Per	Est. Val.
Jan., 1924 ----------	32	$129,690
Jan., 1923 ----------	32	159,150

JUST MARKING TIME

Employe and Employer Make No Move In Wage Adjustment

Labor conditions remain unchanged, a policy of watchful waiting having seemed to have taken hold of employer and employe alike. Each side is watching and patiently waiting for the other fellows to make a move.

PAINTER BOSSES BUSY

Employers Holding Frequent Meetings

The painting contractors of the Calumet are the only ones showing any kick at all. Those fellows are confering constantly and keeping their ears close to the ground. Early this week the painting bosses of Hammond, East Chicago, Gary and Whiting got together for an enthusiastic meeting at the B. T. E. A. headquarters. It was an interesting meeting according to all reports but no details were advanced for publication.

NEW INDUSTRY GETS UNDER WAY

Big Force of Men Given Employment

The new Ford plant at Hegewick, just across the Illinois line started off with a bang, just like a regular "Lizzie," Feb. 1. Five hundred men were given employment right at the jump and it is the intention of the officials to rapidly increase the force as demand requires.

CALUMET BUILDING PROGRESS

Bids submitted on the new residence for Dr. Oberlin ran higher than contemplated and no contracts were awarded. An effort at revision is to be made in an endeavor to reduce the cost here and there.

Cold weather has seriously impeded the progress of the new Neidow Funeral Home. M. A. Dickover, the contractor, has the structure ready for roof but has been forced to suspend operations for the time being until it warms up a bit.

The Henderlong Company, of Crown Point, was the low bidder on the Griffith, Ind., school addition. The bids as follows: Henderlong Co., $40,448.00; Pearson & Son, $45,670.00; C. N. Scott, $48,236.00.

E. E. COLE.

News of the Week

The asterick (*) prefix to an item indicates additional information to report published in previous issue.

INDIANAPOLIS

Bank Building (rem. from 2 store rooms) and 1 sty. addition, 30x42: Corner 30th and Clifton Sts. Archt., Thos. A. Winterrowd, American Central Life Bldg. Owner, Northwestern State Bank, James L. Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

The undersigned trustee of Jefferson School Township, Putnam County, Indiana, hereby gives notice that on Thursday, February 21st, 1924, until 10 o'clock A. M., at the office of A. R. Hurst, attorney, in Greencastle, Indiana, he will receive sealed bids and proposals for the erection and completion of a new township consolidated school building, and at the same time and place will also receive sealed bids and proposals for the installation of the heating and ventilating, plumbing and sewering and electric wiring in the said building, all in accordance with the plans and specifications heretofore adopted and approved by the said trustee and his advisory board and which are now on file in the office of the said trustee located in Jefferson Township, Putnam County, Indiana.

The estimated cost of the proposed building is Forty Thousand Dollars ($40,000.00).

All bids must be in writing on forms provided therefore, signed, sealed and delivered and in every respect must conform to the laws of the state of Indiana.

Each bid for the general construction shall be accompanied by a certified check for one thousand dollars ($1,000.00); each bid for the heating and ventilating shall be accompanied by a certified check for four hundred dollars ($400); each bid for the plumbing and sewering shall be accompanied by a certified check for two hundred dollars ($200); and each bid for the electric wiring shall be accompanied by a certified check for one hundred dollars ($100). These checks must be made payable to the trustee of Jefferson School Township, Putnam County, Indiana, and

will be held by him as a guarantee of good faith that said bidder or bidders will enter into a contract and execute a bond for the full amount of the bid, approved by the said trustee, for the due performance thereof, if his or their bids are accepted. The checks of those bidders who fail to be awarded a contract will be returned to them when the contracts have been awarded. Should the successful bidder or bidders fail to enter into such contract and execute such bonds then he or they shall forfeit the amount of said certified check as liquidated damages for such failure, for the use and benefit of the proper fund of Jefferson School Township, Putnam County, Indiana.

Copies of the said plans and specifications are on file in the office of The Elmer E. Dunlap Company, Architects, 1050 North Delaware Street, Indianapolis, Indiana; in the office of the State Board of Accounts, State House, Indianapolis, and in the office of A. R. Hurst, Attorney, Greencastle, Indiana. Copies of the said plans and specifications may be obtained from the office of the Architects upon the deposit of Twenty-five Dollars ($25) for each set. Said deposit will be returned to the bidders upon the safe return of said plans and specifications on or before the day and hour set for receiving bids.

The right is expressly reserved to reject any or all bids and to use sufficient time to investigate the bids and qualifications of the bidders.

Feb 9th.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received by the undersigned Trustee and Advisory Board of Pleasant Run Township, Lawrence County, Indiana, at the office of said Township Trustee, until 10:30 o'clock A. M., Tuesday, the 19th day of February, 1924, for the erection and completion of alterations and additions to the present school building in said township; all in accordance with the plans and specifications prepared by The Elmer E. Dunlap Co., Architects, copies of which are on file in the office of the Trustee at Heltonville, Indiana; in the office of the State Board of Accounts, State House, Indianapolis; and in the office of the Architects, 1050 N. Delaware Street, Indianapolis, Indiana.

At the same time and place separate bids will be received for furnishing all labor and materials necessary for the installation of the Plumbing and Sewering and Heating and Ventilating Plant for the above building.

The estimated cost of said building is $21,500.00.

The Trustee reserves the right to reject any or all bids; and further to require any bidder to show to the satisfaction of the Trustee and the Advisory Board that he is competent to perform the work on which he bids.

Each bidder will be required to file with his bid a certified check in the sum of three per cent (3%) of his bid as a guarantee of good faith that said bidder or bidders will enter into a contract and execute a bond approved by the trustee for the faithful performance thereof, if his bid or bids are accepted. The checks of the bidders who fail to be awarded contract will be returned when the contracts of the successful bidders have been executed. Checks to be made payable to the Trustee of Pleasant Run Township, Lawrence County, Indiana.

Each bidder to whom a contract is awarded will be required to execute a bond, approved by the Trustee, for the full amount of his contract. Should the successful bidder fail to enter into such contract and execute such bond as required within ten (10) days after the award of the contract, then he or they shall forfeit the amount of said certified checks, as liquidated damages, for the use and benefit of the proper fund of Pleasant Run Township, Lawrence County, Indiana. All bids must be submitted upon Form No. 96 prescribed by the State Board of Accounts.

Copies of plans and specifications may be obtained at the office of the architects, 1050 N. Delaware Street, Indianapolis, upon deposit of $25.00 for each set, said deposits to be returned to the bidders upon the safe return of the plans and specifications to the office of the architects on or before the day and hour set for receiving bids.

PERRY WOOLERY,
Trustee, Pleasant Run Township, Lawrence County, Ind.
S. J. FORD,
W. W. ETTER,
ROLLAN NORMAN,
Advisory Board.

Feb. 9, 1924.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned, Trustee of Harrison School Township, Delaware County, Indiana, and the Advisory Board of said township, will receive bids at "Center" School House in District No. 7, in said Harrison Township, Delaware County, Indiana, until 1:30 o'clock p. m. on Saturday the 23rd day of February, 1924, for the construction of a new school building and for the installation of heating and ventilating system and plumbing and drainage system, and for electric wiring, all for said proposed building. All bids shall include all labor, material and supplies necessary for complete construction or installation of that part of the work bid on, and shall be strictly in accordance with the plans and specifications provided therefor, which have been properly accepted and approved and are now on file in the office of said Trustee in his residence in said Harrison Township, and also in the office of Houck & Smenner, Architects, 123½ West Main Street, Muncie, Indiana. Said building is to have one story and to be without basement except basement for heating and ventilating system, and is to be of brick, tile, stone and concrete construction, and is to be located on a tract of real estate owned by said Harrison School Township in the southeast quarter of Section 16, Township 21 North, Range 9 East in said township.

Bidders will submit their bids as follows:

(1) For the construction of school building (general contract).

(2) For the installation complete of heating and ventilating system and plumbing and drainage system.

(3) For the installation complete of electric wiring.

(4) For the construction as a whole or any combination of contracts.

The estimated cost of said building is $79,000.00.

All bids must be sealed. Each bid on the general contract shall be accompanied by the certified check of the bidder for $2,000.00. Each bid on the heating and ventilating system and plumbing and drainage system shall be accompanied by the certified check of the bidder for $1,000.00. Each bid on the electric wiring shall be accompanied by the certified check of the bidder for $100.00. Each bid for complete construction or for any combination of contracts shall be accompanied by the bidder's certified check in an amount equal to the total amounts required for the contracts included in the bid if the same had been bid for separately. All checks shall be payable to John W. Black, Trustee. The proceeds of the certified check accompanying the bid of each successful bidder shall become the sole property of said Harrison School Township in the event such successful bidder shall fail to enter into a contract and execute and furnish an acceptable bond within 10 days after he has been notified that his bid has been accepted. Certified checks of unsuccessful bidders will be returned to them.

The successful bidder or bidders will be required to enter into a written contract or contracts and to execute a bond or bonds with sufficient surety or sureties to be approved by said Trustee in an amount equal to the amount of the contract or contracts and conditioned for the faithful performance of the same.

Plans and specifications may be had for the individual use of bidders from the architects, Houck & Smenner, Muncie, Indiana, by making a deposit of $10.00 for each set, which deposit will be returned upon the return of such plans and specifications in good condition on or before the day of letting the contracts.

The right is reserved to reject any and all bids.

POSTAL AUTHORITIES CALL ATTENTION TO SERIOUS ECONOMICAL WASTE

Seek to Encourage Better and More Accurate Addressing

Since the days of Benjamin Franklin every Postmaster General has found occasion to inveigh against a condition which has been the bane of the postal service since its foundation. Periodic and systematic campaigns have been waged against it but the evil grows as fast as the rapidly increasing business of the postal service itself.

The Post-Office Department, or, in the final analysis, the taxpayer, pays an annual toll for the support of this malignant growth, amounting, in round numbers, to $1,740,000.

Of late years it has become more and more apparent that the Department and the taxpayer are not the only sufferers from the evil. Private business and private industry every year lose millions of dollars from the same cause, which, strange to relate, is, in most part preventable.

This economic waste—this strange disease—is nothing more or less than the careless addressing of mail matter; the depositing of letters and packages with incomplete, inadequate or incorrect addresses, an overwhelming majority of which comes from large patrons of the mails.

In another effort to stem the tide of this waste; to save money for the taxpayer and to turn back into constructive business channels the millions now lost through mistakes, Postmaster General New has designated the week of February 18 to 25 as BETTER MAILING WEEK.

During that week he will seek the co-operation of chambers of commerce, boards of trade, large business and industrial enterprises and the press of the country, with a view to having antiquated mailing lists brought up to date and every check placed against the possibility of letters reaching the postal system without accurate addresses.

The Post Office has gone a long way toward assisting business men in solving the problem. Postmasters have interviewed heads of firms, who, due to the fact that their mail is handled by subordinates, often are not aware of their own mailing difficulties. The Department has even offered to furnish its own clerks to correct and bring mailing lists up to date at the nominal charge of 60 cents an hour.

At one time the proposal was made to Congress to place a one-cent charge upon each letter requiring directory service, thus attacking the problem through the pocketbook of the mailer as the only means of solution.

It is believed, however, that if the individual, firm or corporation, depending to any extent on the mails for its business, can be brought to realize that the delay, and often non-delivery of mail, results in loss of business and profits, the most important step will have been taken to correct the evil.

SEMI-ANNUAL MEETING OF I. S. A. DEVELOPS INTO LARGEST AFFAIR EVER HELD BY STATE ARCHITECTS

Much Satisfaction Expressed at Evident Growth and Progress Shown by State Architects' Body

Just an off-hand quip pronounced by an architect, Robert Daggett, as he entered the semi-annual meeting of the Indiana Society of Architects at the Indianapolis Athletic Club Friday, February 7, most ably described that affair. He was a little late in arriving and after opening the door hesitated momentarily taken back by the crowd assembled. He glanced about the room, then said: "Mr. President, am I in the right room? Seems as if there was a mistake, I never saw so many Indiana architects gathered together in one body before."

He was in the right room and was correct in his appraisal of the situation, for never before had so many Indiana architects ever responded to a meeting call. While every effort was made to lend attractiveness to the semi-annual I. S. A. session and a good turn out of members was hoped for, the response of the state profession not only fulfilled the hope but surpassed all anticipations, making for a record attendance and sectional representations far exceeding any previous ones. There were some seventy architects present, representing sixteen different cities, features that denote the appeal the Society has today and the interest it is arousing in the architectural professional ranks in Indiana. It was suggested that members advance some constructive ideas upon which future policies might be based in order that progress might be assured. Architect Wilson Parker, Indianapolis, interposed at this point when there was a tendency to silence, to remind the members that a natural constructive force seems to be impelling the organization, that it has found itself and is steadily going ahead, continually reaping the fruits of the seeds of constructiveness that have been sown along its path. The ideals it has cherished have been practical, he said, and he was satisfied the inspiration is there to carry the organization on to greater achievements without having to force things by trying to conjure up future moves on the spur of the moment. As illustrative of his contention, he pointed to the spirit of co-operation that had been created among the architects themselves, between the contractors' and architects' associations, certain legislative acts, regional meetings, and the contact that had been established between the architect, engineer, contractor and Labor and had culminated in the joint conference at Lafayette, a most memorable meeting not long ago. This is a record of which the members of the Society may well be proud, for it is the realization of practical ideals that the organization adopted years back and has kept working on.

The Board of Directors held its regular bi-monthly meeting in the morning at which attention centered mostly on routine business. Reference, however, was made to the recent arbitration proceedings at Terre Haute as provided for in the Standard General Contract Form of the A. I. A., and resulted as a sequence of the repudiation by an architect and owner of a certain clause in that standard form. The I. S. A. directors voted to endorse the A. I. A. Standard Contract and to stand behind it solidly.

SEMI-ANNUAL MEETING

(Continued from Page 5)

It was moved, seconded and carried to hold the next board meeting at Vincennes, Ind., in April and make a regional gathering of it.

At noon a delightful luncheon was served in one of the several private dining rooms at the athletic club at which all delegates were present.

Next a general meeting was called in the afternoon with a fine representation of the state architectural profession in attendance. During the afternoon session there were general discussions relative to the past and future activities of the Society. Much interest was shown in the various committee reports and especial enthusiasm aroused by the reports of the membership committee and the treasurer both of which were splendid and betokened the I. S. A. to be in a strong, healthy and virile condition.

Later in the afternoon Robert Frost Daggett, architect for the new $1,800,000 athletic club, took the architects in a body for complete inspection of the building. Much praise was showered upon Mr. Daggett for his execution and there also was much commendation for the promoters of the project, through whose efforts Indianapolis is now possessed of such a handsome and much needed institution.

While the program for the day was enjoyable, the real treat was reserved for the evening banquet. The entertainment committee simply outdid itself and provided an arrangement of divertisements that far outshown anything in its line ever set before the state architects for their amusement as a body.

For a toastmaster, S. C. Hadden, editor of Municipal and County Engineering, was secured and proved a past-master as a presiding officer. He was quick to take advantage of situations and kept things moving in hair-trigger style which kept the crowd keyed up to a spontaneous stage of merriment at all times.

Nevertheless, there was a serious side also which was ably taken care of by Arthur McLean, Director The John Herron Art Institute, and Rev. F. S. C. Wicks, pastor of All Souls Church, both of Indianapolis. These men made sterling talks, Mr. MacLean on the practicability of art, and Rev. Mr. Wicks took for his subject "Snapshots of England."

Thus far the program provided, in itself, was almost a sufficiency, but the committee went even farther, wishing to show the visiting architects a royal time. Interspersed here and there were attractive numbers by professional entertainers that made for a vaudeville performance par excellence. This part of the entertainment consisted of orchestral selections, vocal solos and duets, fancy dancing, sleight of hand stunts, and a comedy act that went big. The special features were provided by Hazel Dell Silvey and Lillian Hueslein, while C. Roltare Eggleston, Manager Keith's theater, worked some magic that had everybody guessing.

When all was over the architects voted the evening dinner affair the best ever.

Saturday morning the architects went up to the John Herron Art Institute to inspect and formally open the Annual Architectural and Allied Arts Exhibit. That affair, which is to continue over several weeks, is most attractive and consists of many and varied displays of the different stages developed in architectural practice. Also there is an artistic exhibit of several of the most important of the building materials, such as lumber, tile, brick and finishing hardware. The whole is most creditable and not enough praise can be given to the Pageants and Exhibits Committee and to Director MacLean, who are responsible for this well-arranged and attractive light in which the architectural profession is brought to the attention of the public.

The architects after viewing the exhibit voted the $50 I. S. A. prize to Robert Frost Daggett for the best architectural exhibit. The work that took the prize was a most artistic photograph of the handsome new athletic club. The directors of the Society also gave a dinner for Mr. Daggett at the club Saturday noon.

The architects present at the meeting and banquet were: E. F. Miller, Anderson; L. L. Johnson, Attica; Everett I. Brown, Bluffton; Harry M. Griffin, Connersville; Harry E. Boyle and Alfred E. Neucks, Evansville; Wayne Bell, Guy Mahurin and A. M. Strauss, Fort Wayne; Rodney W. Leonard and Mr. Wolfe, Thomas McGaw, Kokomo; Walter Scholer, Lafayette; George W. Allen, Laporte; Hubert M. Garriott, Logansport; Paul Werking, Richmond; E. R. Austin, South Bend; Warren Miller, Terre Haute; John Bayard, J. C. Bixby and Rudolph Schucker, Vincennes; these Indianapolis members of the profession: William Albersmeier, Layton Allen, Charles E. Bacon, Phil Bartlett, Herbert Bass, Sam Becker, A. C. Bohlen, O. D. Bohlen, F. S. Cannon, A. J. Capella, K. Coffin, Everett Crabb, Sam Craig, R. F. Daggett, L. De Milt, Elmer E. Dunlap, Herbert Foltz, R. Karl Galbraith, Donald Graham, Merritt Harrison, Norman Hill, Frank B. Hunter, M. Kaylor, C. C. Martindale, O. E. McMeans, William MacLucas, Clarence Myers, Wilson B. Parker, Ed Pierre, Anton Scherrer, Herman Scherrer, Clyde Stoughton, R. R. Springman, M. G. Thompson, Maurice Thornton, L. A. Turnock, Kurt Vonnegut, Frederick Wallick, Roger N. Williams, J. E. Woodward, G. C. Wright. The visitors were: Miss Mary McMeans, Illinois University; F. B. Dresslar, Specialist in School Hygiene, United States Bureau of Education, Nashville, Tenn.; C. K. Ammerman, J. H. Owens, Associated Building Contractors of Indiana; Leigh C. Felton, Indiana Construction Recorder, the latter three of Indianapolis.

PENCIL POINTS

We are not sent into this world to do anything into which we can not put our hearts. We have certain work to do for our bread, and that is to be done strenuously; other work to do for our delight, and that is to be done heartily; neither is to be done by halves or shifts, but with a will; and what is not worth this effort is not to be done at all.—John Ruskin.

Vehicles are much like men; they make faster headway on the level.—Wenatchee World.

Consider the fish. If he didn't open his mouth he wouldn't get caught.—Jack-O-Lantern.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

CLEANING UP IN PREPARATION FOR A NEW START

Last Year's Building Just About Out of the Way

The odds and ends season is here, consequently Evansville building men as far as operations go are engaged mostly in clean-up work, finishing up the hang-over projects from last season in an endeavor to get them out of the road before the new work of the approaching season begins to appear. They have been aided greatly in their efforts by the open fall and winter weather that prevailed up till just recently and as a result find themselves in a good position to handle the new work in prospect as soon as it develops.

There are a few of the larger jobs that will require several more months to complete, but, generally speaking, most of the 1923 building work has been or is just about finished.

Though the past week developed no unusual features in the local building field, there were a few small jobs came out for figures. However, the prospects are fair for some active estimating before long and considerable optimism regarding the outlook is ruling among those engaged in the industry. While not local, there are several projects in the architects' offices destined to be built in sourthern Indiana and southern Illinois that carry an interest for Evansville contractors and material supply men, work that is to be figured soon. It is still a little early for the Evansville future building to take on an actual aspect, but such work is not far distant and the situation is such that the local contractors will be ready for it when it does come along.

KEEPING STEP WITH THE OTHERS

City Plan Move Adopted by Evansville Bespeaks Her Progressive Pulse

The effort put forth in city planning and zoning evidently is well directed and in accordance with the most advanced municipal practice, that is, if the following is to be taken as a criterion:

The division of building and housing of the United States Department of Commerce has published a list of zoned municipalities as of September 1, 1923, which details as to date and character of the ordinances under which they were zoned, together with reference to the legislation in different states. This list shows that more than 22,000,000 people, comprising 40 per cent of the urban popuation of the United States, live in zoned cities. The number of cities zoned reached 183 on the date mentioned, showing an increase of more than 300 per cent over the figures for September, 1921. During the first eight months of 1923 there were fifty-four municipalities with more than 6,500,000 population adopted zoning ordinances.

CHIPS AND SHAVINGS

The Tri-State Contracting Corporation, one of the more recent additions to the general contractor members of the city, announces that it has closed for a new office location with warehouse facilities at 226-228 Second avenue and will move to the new site at once.

Scarborough-Davies Co. are pushing the remodeling of the L. J. Davis Manufacturing Co. at 518 Main street and expect to have it ready for occupancy about March 15. The same contractors have the Sunday School and Community House for the First Evangelical Church well under way.

"KEEPING THE BUILDING TRADES BUSY MEANS REAL PROSPERITY"

That Is the Message of Fort Wayne Building Men to Fellow Citizens

In order to extend the building season that the owner who would build may get the best of service, that the rush season may be lessened, that the citizenry engaged in the building industry may not be forced to remain idle, and that the business of that industry may be kept functioning to influence prosperity in other channels, the building men of Fort Wayne have continually encouraged straight thru the year building operations.

This is the way they have sounded their message through the press:

"Ordinarily there is little talk about 'tight money' during the summer when carpenters, bricklayers, electricians, plasterers and others are at work.

"When men are at work there is money in circulation.

"And when money is in circulation some of it is sure to come your way, no matter what line of business or work you are engaged in.

"And the surest way to have money in circulation the year round is to have money spent the year round for wages—and wages paid to men in the building trades represent a large part of the money paid out in wages.

"Fort Wayne is prosperous. There is no doubt about that. The city is in excellent condition.

"But the city will be in even better condition if men who have building work to be done will let the contracts now.

"Winter is a good time to build. It is a specially good time to have repair, alteration and addition work done. Surely there is no better time to build on that extra room, that new porch, that garage, that bedroom, that back porch, that additional room in the attic, or to repair the ceiling in the coal cellar, the floor in the laundry room, the fixtures in the bathroom, the cellar steps, or to do the other repair work which every householder finds.

"One trouble in the building field is that everybody wants work done at the same time—during the 'rush season.'

"And that very fact makes prices higher, for when a contractor has more work to do than he can do he does not feel inclined to put his prices down. And work will be better done, in many instances, in the winter when the workmen are not rushed and when the crew does not need to be hurried from this job to the next.

"By placing the contracts for new building or repair jobs now—in the winter—much benefit will accrue all around.

"The man who sells building material can give better service. So can the electrician, the painter and decorator, the plumber, the heating man and all the rest of the contracting fraternity.

"One way to help Fort Wayne is to provide work the year round instead of crowding most of the building work into a few short summer months."

EFFORT TO BE MADE TO EFFECT PERMANENT STATE MASON CONTRACTORS' ASSOCIATION

Arrangements Made for Big Meeting at Indianapolis February 19

Members of the Indianapolis Mason Contractors Association have found plenty of work to occupy their time even though it is the off building season. Why all the work and hustle? Oh, they are busy planning for the big called meeting of Indiana brick mason contractors and general contractors who do their own brick work, which is to be held at Indianapolis Tuesday, February 19, beginning at 10 a. m.

This gathering is the outgrowth of an idea conceived at Fort Wayne, several weeks ago, when the Associated Building Contractors of Indiana met in annual session in that city. The mason contractors present held an extra special meeting and it was proposed that an effort be launched having as its object the formation of a state organization of mason contractors. The plan was unanimously aproved and a preliminary organization formed with a temporary president and a secretary, namely, James Hodgson, Sr., Indianapolis, and M. M. Bonewitz, Indianapolis, respectively.

As soon as convenient the temporary officers, upon their return home, took up the matter of a state organization with the members of the Indianapolis Mason Contractors' Association, which heartily approved the plan. It was then moved that, in view of conditions, a general meeting be held February 19 at Indianapolis because of its central location and an invitation be extended to the new but unnamed organization to be the guests of the Indianapolis Mason Association.

The meeting is to be held at 320 Peoples State Bank Building, at which permanent officers are to be named and policies mapped out that may prove effective in bringing about settlements for the ensuing year where controversies may arise between local labor organizations and individual contractors, and other matters of vital importance to the trade craft and the building industry.

At the conclusion of the meeting there will be a 6 p. m. dinner at the Severin Hotel, all delegates to be the guests of the Indianapolis mason contractors.

A cordial invitation is extended to all Indiana mason contractors to attend the meeting February 19, assurance being given that there will be points brought out that will make for an interesting and enlightening affair.

UP AMONG THE LEADERS

Building Effort of Indianapolis Gives Her High Rating

A nation-wide survey of the building permits in December, as represented in the returns from 266 cities, taken in conjunction with the unusual volume of permits issued in October and November, indicates the likelihood of a continuance of extensive winter building.

The December permit figures added to those of the preceding eleven months rolled up a tremendous building construction for the year of 1923, approximately estimated at $5,500,000.

That Indianapolis did her share in the building performance last year is attested by the fact that she took nineteenth place in the list of the leading American cities that put over great building programs in 1923.

The standing of the cities in order of the volume of new building work started last year is:

1.	New York	$792,911,559
2.	Chicago	329,604,317
3.	Los Angeles	200,133,181
4.	Detroit	129,662,711
5.	Philadelphia	123,511,935
6.	Cleveland	69,390,540
7.	Washington, D. C.	49,623,605
8.	San Francisco	49,594,011
9.	Baltimore	46,988,002
10.	St. Louis	41,443,755
11.	Boston	40,626,352
12.	Milwaukee	39,007,845
13.	St. Paul	35,735,627
14.	Pittsburgh	32,915,312
15.	Minneapolis	32,315,545
16.	Newark	32,226,106
17.	Buffalo	27,907,000
18.	Oakland, Calif.	27,628,897
19.	Indianapolis	27,307,279
20.	Cincinnati	27,160,520
21.	Atlanta	27,094,498

REAL INCENTIVES FOR EARLY READJUSTMENT OF BUILDING

Maturity of Promising Prospects Hinges on Reason

A situation anywhere near approaching favorable labor conditions and reasonable construction costs the approaching building season will mean for Hammond the erection of two substantial additions to the business district, projects that in estimated expenditure of money will run two millions of dollars or more. This prospect in itself should encourage those engaged in the building industry locally to do all in their power to bring about conditions that will inspire confidence in building investment and assure the maturity of these projects. Structures of such proportions, if carried ahead, will lend impetus to other building construction contemplations and develop a building activity such as the city has never known before.

The two large projects to which reference is specifically made centers around the former site of the Central High School at Hohman and Fayette streets. One of them is a nine-story bank and office building for the First National and the First Trust and Savings Bank at the above corner and the other is a six-story theatre and office structure for the Gregory Theatre Syndicate just south of the bank property.

Purchase of the former school site was made last year at public auction by the bank at which time $307,500 was paid for it. The property has a frontage of 223 feet on Hohman St., fifteen feet of which will be cut off to widen Fayette St., and 83 feet will be used for building frontage on Hohman St. Plans for this structure have been drawn and the bank officials announce that a settlement of labor conditions and the establishment of a reasonable price level on materials is all that is holding procedure back.

As for the theatre, the preliminaries provide for an auditorium with a seating capacity of 3,400 people. There will be no gallary and the balcony will consist of a horse-shaped arrangement of a series of boxes. It is planned to make the theatre the handsomest in the State and one of the big features will be a grand ball room. The Gregory interests own the Parthenon Theater, which has a seating capacity of 2,500, on Hohman St., and built it at a cost of $500,000.

Each of the contemplated structures will involve an investment of $1,000,000 each and when built will mark the greatest downtown building improvement advance ever made in Hammond.

ANOTHER CALUMET CITY HARBORING BIG BUILDING PROSPECT

New Theatre to Cost $400,000

Indiana Harbor comes forward also with its contribution to the budding building program of the Calumet District for 1924. Michael Kozacik announces plans are under way for the erection of a modern theatre, store and apartment building on Michigan Ave., across from the new postoffice.

The new building, which is to be patterned after the Tivoli Theatre at Chicago, is estimated to cost $400,000. The structure, in addition to the theatre proper, will contain a number of store rooms and also 24 kitchenette apartments. It is proposed to start active building construction operations just as soon as the weather opens up. When this project is completed Indiana Harbor will be possessed of seven moving picture houses. The new Garden Theatre on Main street is now nearing completion and will be formally opened soon.

QUARTER OF A MILLION DOLLARS HOME BUILDING PROGRAM IN CONTEMPLATION

Early Season Start to Be Made

It appears as if home building is in for a good start as soon as the weather opens up in and near Hammond. One realty and building firm, McEwin & Eesley, 688 Hohman St., announces it has contracts all signed at this early date for the erection of at least $100,000 worth of new homes. Among these prospects are two $20,000 homes for Sheriff Wm. Olds and Attorney Floyd Murray in South View Addition, and one to cost $12,000 for Charles Lauer at Lawndale and Hohman Sts. The same concern is contemplating a home-building program in their West Park Addition just across the Illinois line near the Forest Reserve that will call for the expenditure of a quarter of a million dollars.

SOME STILL INCLINED TO OVERLOAD BUILDING INDUSTRY WITH FURTHER WAGE ADVANCES

Effect Is Far Reaching and Dangerous

Cold facts and figures are startling at times even if only contemplative and do make one stop to think. Just imagine this possibility, and at the same time cherish the hope that it may not come to pass, for, if it did, it would be a smothering damper on building prospects and be a sad blow to the industry.

When folks talk of a twenty-five-cent advance on the hour for building mechanics it don't sound so big, and yet over an eight-hour day it means an additional $2 to the wage already being paid. Take for instance, in Chicago there are 70,000 building trades mechanics who hope to get in at least ten months' working time. Now take your pencil and paper and do a little figuring to learn what such an advance as 25c cents per hour means in the way of an additional burden to the prospective builders. The advance, if evenly distributed throughout the ranks of the mechanics, would amount to an added tax of $140,000 per day or five and a half times that amount for one week's work; over a month's period it would swell to $3,080,000 and for a season of ten months it would read $30,800,000.

When one talks of advancing building trades mechanics' wages these days the thought is brought to mind that the industry is now weighed down heavily by the wage burden and the question arises: Is it possible for construction to carry any added impost without breaking under the strain?

Chicago is mentioned specifically merely as an example; what a wage increase there of 10, 15 or 20 per cent means to the future of building holds just as surely in like proportion in cities of lesser size.

NOTHING DEFINITE DECIDED

Contractors of Calumet District Threshing Out Labor Problems

So far the Labor situation in the Calumet district has undergone no recent change. The contractors are holding meetings right along to discuss matters and conditions but no definite conclusions have been reached as yet. It looks as if the union painters may spill the beans by acting up for they have a very inflated idea of the value of their services, are growing more insistent in their demands for an increase in wages and at the same time would reduce their working time to five days a week.

WEATHER RETARDS BUILDING

Sleet and Snow Bury Hammond

No relief has come to Hammond building operations from weather conditions; in fact, if anything, things have grown worse of late. Last week, for instance, one of the worst sleet storms in years swept down over the Calumet section and buried everything under a blanket of ice. Not only were outside building operations stopped, but even the street cars, telephone and telegraph lines were put out of commission. Next came a heavy snow and that has put a complete quietus on building.

CALUMET BUILDING PROGRESS

Architects A. C. Berry & Co., Hammond, report a number of plans in course of preparation. Those that will be out soon for bids pertain to the remodeling of the Cass residence at Whiting into an English type at an estimated cost of $10,000, and a second story addition to a warehouse of the Northern Indiana Gas & Electric Co., at Hohman street and the river.

E. E. COLE.

News of the Week

The asterick (*) prefix to an item indicates additional information to report published in previous issue.

INDIANAPOLIS

***Colored High School:** $500,000. Archt., Harrison and Turnock, 500 Board of Trade Bldg. Owner, Board of School Commissioners, Richard O. Johnson, business director, 150 N. Meridian St. Preliminary plans in progress. Brick, fireproof construction.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received up to 3:00 o'clock p. m. on Thursday, March the 6th, 1924, at the office of the Board of Trustees of the School City of Logansport, Cass County, Indiana, the same being in the Seventh Street School Building in said city, for the alteration of and construction of an addition to Franklin Elementary Buildings, the same to be known as the Franklin Remodeling. Full details, prints and plans and specifications for all such work are on file at the office of the undersigned, where the same are open to the inspection of all persons interested. The same are also on file at the offices of Allen & Garriott, architects, Masonic Temple, Logansport. Indiana; Lombard Building, Indianapolis, Indiana.

All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits.

Each bidder will be required to deposit with his bid a certified check in an amount of not less than 2 per cent. of his bid, payable to the Board of Trustees of such School City of Logansport, conditioned to secure the entering into of a proper contract and the giving of a proper and sufficient bond by such bidder in the event that he be awarded such contract.

The successful bidder will be required to enter into a contract in a form and with surety acceptable to the Board, requiring the completion of such work within a time to the satisfaction of such Board, in no event to be later than September 1st, 1924.

The estimated cost of such work is $60,000.00. The right is reserved to reject any and all bids.

Dated at Logansport, Indiana, this 13th day of February, 1924.

BOARD OF SCHOOL TRUSTEES OF THE SCHOOL CITY OF LOGANSPORT.

JOHN BRADFIELD,
THOS. J. FLANEGIN,
C. C. CARR.

Allen & Garriott, Architects.
February 16-23, 1924.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned, Trustee of Harrison School Township, Delaware County, Indiana, and the Advisory Board of said township, will receive bids at "Center" School House in District No. 7, in said Harrison Township, Delaware County, Indiana, until 1:30 o'clock p. m. on Saturday the 23rd day of February, 1924, for the construction of a new school building and for the installation of heating and ventilating system and plumbing and drainage system, and for electric wiring, all for said proposed building. All bids shall include all labor, material and supplies necessary for complete construction or installation of that part of the work bid on, and shall be strictly in accordance with the plans and specifications provided therefor, which have been properly accepted and approved and are now on file in the office of said Trustee in his residence in said Harrison Township, and also in the office of Houck & Smenner, Architects, 123½ West Main Street, Muncie, Indiana. Said building is to have one story and to be without basement except basement for heating and ventilating system, and is to be of brick, tile, stone and concrete construction, and is to be located on a tract of real estate owned by said Harrison School Township in the southeast quarter of Section 16, Township 21 North, Range 9 East in said township.

Bidders will submit their bids as follows:

(1) For the construction of school building (general contract).

(2) For the installation complete of heating and ventilating system and plumbing and drainage system.

(3) For the installation complete of electric wiring.

(4) For the construction as a whole or any combination of contracts.

The estimated cost of said building is $79,000.00.

All bids must be sealed. Each bid on the general contract shall be accompanied by the certified check of the bidder for $2,000.00. Each bid on the heating and ventilating system and plumbing and drainage system shall be accompanied by the certified check of the bidder for $1,000.00. Each bid on the electric wiring shall be accompanied by the certified check of the bidder for $100.00. Each bid for complete construction or for any combination of contracts shall be accompanied by the bidder's certified check in an amount equal to the total amounts required for the contracts included in the bid if the same had been bid for separately. All checks shall be payable to John W. Black, Trustee. The proceeds of the certified check accompanying the bid of each successful bidder shall become the sole property of said Harrison School Township in the event such successful bidder shall fail to enter into a contract and execute and furnish an acceptable bond within 10 days after he has been notified that his bid has been accepted. Certified checks of unsuccessful bidders will be returned to them.

The successful bidder or bidders will be required to enter into a written contract or contracts and to execute a bond or bonds with sufficient surety or sureties to be approved by said Trustee in an amount equal to the amount of the contract or contracts and conditioned for the faithful performance of the same.

Plans and specifications may be had for the individual use of bidders from the architects, Houck & Smenner, Muncie, Indiana, by making a deposit of $10.00 for each set, which deposit will be returned upon the return of such plans and specifications in good condition on or before the day of letting the contracts.

The right is reserved to reject any and all bids.

JOHN W. BLACK,
Trustee of Harrison School Township, Delaware County, Indiana. Address, Gaston, Indiana, R. F. D. 3.

MASON CONTRACTORS OF INDIANA ORGANIZE A STATE ASSOCIATION

Many Respond to Call Despite Rain, Sleet and Ice

The world is full of dreamers: dreamers who do but dream and dreamers who dream and do. Some men dream of empires, some of business conquests and still others muse of that ambitious scheme, brotherhood amongst men, cooperation and far-reaching effects for the good of the whole not just a few. Though not as flashy a dream as those entertained by empire builders, or the fantasies of the business baron, both inspirations of selfishness, nevertheless, the modest dream of those who would serve loses nothing of its worth or scope because of its unostentatiousness.

It is just such a dream as the latter that was realized at Indianapolis the past week when a certain coterie of Indiana mason contractors met at Indianapolis, February 19, and organized the Mason Contractors' Association of Indiana.

The meeting, the outgrowth of some skirmishing at Fort Wayne a month ago, was held at 320 Peoples Bank Building, Indianapolis, and was attended by many local and out-in-the-state contractors, who do brickwork contracting, who were most enthusiastic about getting just such an organization started. There was a long discussion as to the need for such a body and in the end a constitution and a set of by-laws was adopted. The purpose of the association is to function throughout the state, to aid all mason contractors with their problems peculiar to the craft, and instill a co-operative spirit that will put all in closer contact with each other, interchange ideas not with the intention of imposing restrictions, rather, to work out the salvation of the mason contracting business and the men therein engaged. .

The election of officers was only gone into in so far as a president and secretary and treasurer, James Hodgson, Sr., and M. M. Bonewitz, Indianapolis, respectively being named. The first, second and third vice-presidents and members of the executive board are to be elected at the next meeting to be held when the next quarterly conference of the Associated Building Contractors of Indiana is held and at the same city to be designated later by the latter organization.

A state association of mason contractors, long contemplated and anticipated, is now a reality and is in a position to function from now on in the interest of Indiana brick contractors and the bricklaying industry. Membership is open to all brick masons and general contractors who do their own brickwork.

The initial meeting of the new body was brought to a close with an evening dinner at the Lincoln Hotel at which there were stirring talks by Robert Gillespie, St. Louis, President of the Mason Contractors' Association of the United States and Canada; Walter Wise, President of the Indianapolis Mason Contractors' Association; Attorney Harry Fenton, Indianapolis; T. J. O'Hara, and others. President James Hodgson, Sr., acted as toastmaster and, like his trowel to which he referred, though little, he was merry and busy.

Tom O'Hara is inclined to sit back and listen, but when he does take the floor he always says something worth while.

Just to say Harry Fenton talked is sufficient without going into details. He always has a message.

"Walt" Wise hasn't been in politics for nothing. His speeches these days are right to the point, entertaining and carry a real bark.

And don't forget, Charles Morrow, Muncie, answered present. He tried to explain the Ladies' Auxiliary he formed at Memphis and his testimony was accepted by the jury.

BUILDING EXPANSION INVADES SOUTHERN STATES

Many Sections Seek to Prevent Overbuilding

Southern cities of from 100,000 to 200,000 population are growing far more rapidly than representative cities of the same population in other parts of the country. This is the outstanding fact revealed by an analysis of building operations during 1923 just prepared by G. L. Miller & Company, financiers of building projects in the southern states.

On the other hand, the very large cities of the north and west expended a larger amount per capita during 1923 for building construction than the largest cities of the south. Los Angeles, for example, issued building permits totaling $346 per capita during 1923; St. Paul, $153 per capita, and New York City, $137 per capita. The largest per capita expenditure in any southern city of more than 200,000 population was in Atlanta, Ga., where the expenditure was $135.

Commenting on a comprehensive southern building survey, the following is set forth: "Building expansion in the south is being carefully controlled and regulated. The cities of that section have carefully avoided the danger of overbuilding. Their conservatism is indicated by the checking of expenditures in the cities where construction work has been previously carried on with vigor.

"The growth of the smaller places, however, is a clear demonstration of the active business life which is rapidly building up the population of these cities. The issue of building permits in Miami to the extent of $244 per capita may seem to be rather rapid expansion, but it is only necessary to recall that the population of Miami, according to the United States census, increased 440 per cent between 1910 and 1920. In the larger southern cities the capital for building operations is being raised to an increasing extent within the communities themselves, although the growing popularity of southern first mortgage investments has brought in a great deal of outside capital. This is especially true of the smaller centers, where the accumulations of local wealth are not yet sufficient to meet the needs for new construction."

The following table shows the per capita issues of building permits in a number of southern cities during 1923:

Cities Over 200,000	
Atlanta, Ga.	$135
Louisville, Ky.	72
Baltimore, Md.	64
St. Louis, Mo.	53
New Orleans, La.	33
100,000 to 200,000	
Houston, Texas	$138
Dallas, Texas	132
Memphis, Tenn.	120
Richmond, Va.	91
Nashville, Tenn.	81
Fort Worth, Texas	78
Birmingham, Ala.	68

ARCHITECTURAL EXHIBIT A REAL CREDIT TO INDIANA ARCHITECTURAL PROFESSION

Display Varied and Attractive

The annual exhibition of the work of architects of Indiana was exhibited this year in Galleries X and XI at the John Herron Art Institute. These two galleries afforded much more space for this annual exhibition than had been available before and it is hoped it will continue to outgrow its space each year. The Indiana Society of Architects has been instrumental in making this exhibition an annual event, and credit for this year's fine display is due to Architects Kurt Vonnegut, chairman of the exhibit committee; William MacLucas, and Donald Graham.

The interest in this field of art will no doubt be increased by the incentive which has come to Indianapolis through the final presentation of the plan for our World War Memorial, which includes an important area through the center of the city connecting the Circle and Federal Building on the south and the Library on the north, and the changes and reconstruction which may take place because of this beautifully conceived plaza. This renewed interest will undoubtedly redound throughout the state, and the art institute will be pleased to have its available space taxed to the utmost because of it.

Drawings in plan, elevation, section, perspective, and in detail, illustrative of structural, decorative, and landscape architecture, made up the exhibition, together with photographs of executed work, cartoons for stained glass, pencil sketches, colored sketches, and paintings of decorative subjects, also executed work in wood, bronze, wrought iron, mosaic, glass, leather, and tapestry. Models of architectural detail and sculpture in wood and stone were also shown.

In the scheme of the exhibit every effort was made to produce a result fully illustrative of architectural work in general to a finished exposition of the architectural activities of the state during the preceding twelve months.

An additional attractive feature to the exhibit was made possible by Director J. Arthur MacLean of the Art Institute who augmented the display with a photographic survey of achitecture from ancient to modern times through the generosity of the Indianapolis Public Library, the St. Louis Public Library, the Cleveland Public Library, the Indiana University Library, and the Carnegie Library of Pittsburgh. The classification for photographs printed by the Metropolitan Museum of Art was used as a basis for this arrangement, and from the above sources were photographs of architecture from the time of Chaldean ruins to New York skyscrapers of the twentieth century. That range of time was represented by American, Assyrian, Austrian, Belgian, Chinese, Dutch, East Indian, English, Egyptian, French, German, Greek, Italian, Persian, Roman, Romanesque, Saracenic, Spanish, Swiss and Turkish architecture. The groups were separated on the wall by flat pilasters with terminals reminiscent of the countries represented on each of the contiguous wall spaces.

An independent artistic exhibition of fundamental building materials was also shown both in the rough and finished state. The groups were arranged in much the same way that groups of pictures or examples of art and crafts would be installed, to demonstrate the artistic qualities in commercial products of that character. The thought was that visual education of that kind is valuable, particularly because the modern American product, no matter how commercial, is becoming more and more artistic.

It was gratifying that five material supply firms, commercially interested, came forward to co-operate in the way they did for the cause of art and the sake of the ideal. Only a sincere and thorough appreciation of the value of the knowledge of art in the community and an appreciation of the fact that it has come to be a vital issue in the manufacturing of the products of the commercial world have made possible such a satisfactory plan.

All in all, the annual exhibit in all its ramifications was a big success, attracted much attention, drew most favorable comment from the public and was a distinct credit to the Art Institute and the Indiana Society of Architects.

PENCIL POINTS

How do you expect to get ahead if you don't use the one you have?

When we were boys they used sheets—now they use sheetrock.

Moore's push pins are fine in their place, but why not pin your faith to the membership committee by sending in an application to the I. S. A.?

Inspiration is the hair-spring of action in the things beautiful.

The future no man knows; however, we can challenge opportunity of the present.

The man who cuts into the big things of the world is the one who possesses a non-revertable edge.

It's what we think—what we do—that makes us what we are.

You may have tired and aching feet—but no arm has grown tired from writing out membership applications for the I. S. A.

The world is made up of two classes of people—the up and doers, and the down and outers.

Hew to the line if you exepect to come out straight.

Strength is what they put in onions—a minus quantity in weaklings.

Speak out in acts; the time for words has passed, deeds alone suffice.—Whittier.

Service is the greatest gift to man; to serve, to assist your fellowman is a great opportunity, then do thy dutious service.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

YOU CAN GET IT AT VONNEGUT'S

THE THREE GRACES; REARRANGED

Charity, Hope and Faith

The building contracting business has progressed much in later years, it is not what it was twenty-five, twenty, or even ten years ago. It is more exacting today and calls for different procedure than followed some years back. The old "go-it-alone days" are gone if success is desired. And just as methods have changed so have relationships among contractors who are successful. However contractors today are not a unity by any means and can be classed in three groupes after this manner:

First. The individuals who do not believe in joining any business organization or association whatsoever. They show an utter lack of any responsibility to the industry of which they are a part. They believe in receiving without giving; they enjoy the benefits which accrue to them through the efforts of their fellows who are organized with never a thought of helping to support the organization.

Second. Those who believe in organization as it effects their own particular community or city. They see the need for an association locally, but believe that here their responsibility ends. They have failed to see beyond the horizon of their own locality and are unmindful of their responsibilities to the industry as a whole.

Third. That groupe of men, which unfortunately so far as numbers go is the smallest of them all. It is this group that has really caught the vision, and are cognizant of the fact that their responsibility does not end at the city limits, but that it is as wide as the state, and even the nation itself. These men are giving willingly both of their time and money to the end that conditions may be made better in the construction industry.

Is not this a good time to sit down and calmly think this thing over, asking yourself the question, In what class am I? If you are in group one, send in your application to your local association at once. If you are in group two, ask the officers and members of your Executive Committee why your local association is not helping to carry on the work in its broader aspects. If you are in group three, resolve that in the future you will work harder than ever in an endeavor to bring about the realization of the high ideals that have been set up by you and your brother workers in the building industry advancement movement.

PLANS FOR NEW Y. W. C. A. TO BE PRESENTED FOR APPROVAL

Two Semi-Public Projects in Prospect for 1924

Plans for the new $250,000 Y. W. C. A. building, upon which Architects Thompson and Geary, New York City, have been working, arrived in Evansville the past week for presentation to the building committee for final approval. As soon as approved the working drawings will be started so as to have them ready for the contractors to figure early this spring.

Another promising project for early consideration will be the new community house addition to the Central M. E. Church, plans for which are being prepared by Architect W. C. Jones, Chicago. Charles L. Troutman, Evansville, has been chosen to act as supervising architect on both of these structures.

BRISK BUILDING MOVEMENT MAKES ITS APPEARANCE

Thirty-Five Residence Permits Granted In 18 Days

Local builders and others interested in the building construction business are greatly encouraged over what they take to be a harbinger of an active season ahead. While the prospect of work has been bright a new ray of sunshine has slanted down to cause a greater degree of optimism.

Since the first of February up to and including the eighteenth there have been thirty-five permits for new houses taken out at the city building inspection department. This is quite a boom for so early in the season and many are inclined to believe it is but an indication of the rush that will set in when spring comes, at least that is the hope that is being cherished.

ADD TO CITY PARK

Resolution Adopted to Acquire More Land

A resolution authorizing the purchase of property owned by Mrs. John White at the intersection of Glasgow avenue and Washington boulevard as an addition to Memorial park has been adopted by the park board. The tract, 303x285 feet.

Property owners in the southern part of the city will be assessed to care for this purchase.

HOLIDAY AFFECTS BUSINESS

Bank Clearings Fall Off

There were only five banking days last week, Lincoln's anniversary intervening and this condition cut in on the bank clearings which failed to reach the previous week's figures, but compared with the clearings of the corresponding week last year there was a gain in activities of more than a half million dollars.

DEMAND GOOD IN BUILDING FIELD AND MAY CAUSE INCLINATION OF PRICES BEFORE LONG

That Is Opinion Advanced By Some

Sizing up the building situation as it pertains today a material supply dealer said, "Prices are lower now than at any time during 1923. Demand is better than a year ago. Supply is good; transportation is better than at any time in recent years and indications point to a large demand in 1924. An increase in building permits of 15 per cent to 25 per cent over 1923 would not be surprising."

A lumber dealer, in the same connection, stated there is no immediate prospect of any reductions in lumber quotations, in fact if anything, there is every reason to believe that prices may shortly display an upward trend."

OF INTEREST TO BUILDERS

Proposed That National Department of Public Works Be Established

At the recent annual meeting of the American Engineering Council, held in Washington, D. C., a movement was started to provide for the establishment of a Department of Public Works as a separate branch of the Federal Government. This is a question that has been of interest to building trades employers for some time and the future of this new move will be watched with interest on a national scale.

DEATH CALLS ONE OF INDIANAPOLIS' OLDEST CONTRACTORS

Figured Prominently in City's Building Progress

He was a builder and that which he erected stands today as an integral part of Indianapolis, a monument to his skill and the effort he put forth in the commission of his task. Reference is made to Charles F. Wehking, 78, one of Indianapolis' oldest mason contractors, who died Monday, February 18.

Fifty years of his life were spent in the building up of Indianapolis, actual construction work, and though he is gone his work remains in the form of many of the large structures that stand in the business center of the city. Most of his work antedates the advent of fireproof construction, but followed the line of building development from 1871 down to the steel frame skyscrapers. Among the many buildings he built are: The original store building of the L. S. Ayres & Co., Centruy Building, Shortridge High School, original Manual Training high School, H .P. Wasson store, C. A. Schrader Co. Building, New York Store, Newton Claypool Building, Marion Club, Bell Telephone Building, Meridian M. E. Church, Blind Institute, Hoosier Athletic Club, Central Insane Hospital, Y. M. C. A. and many other prominent structures.

Mr. Wehking was born in Letteln-Westphalia, Germany, in 1846, where he resided until he was 25 years old. He then left his mother country, after the Franco-Prussian War, and came direct to Indianapolis, where he entered the contracting business. He was the founder of the Charles F. Wehking Brick Contracting Company, of which he was president until five years ago, when he retired on account of his health.

Funeral services were held Thursday at the Trinity Lutheran Church followed by interment at the Concordia Lutheran cemetery.

Surviving him are his widow, Mrs. Charles F. Wehking; six daughters, Mrs. Edward Resener, Mrs. Otto H. Schulz, Mrs. William A. Kurman, Mrs. Otto P. Kern, Mrs. L. H. Flinn and Miss Florence Wehking; twelve grandchildren and three great-grandchildren.

JUST HOW BIG A FACTOR MAY BE JUDGED FROM THIS

National Survey at Least Gives an Approximate Idea of Enormity of Building Volume

It has been recognized by everybody that one of the chief factors in the industrial revival from its beginning in 1922 has been the great amount of building construction under way, the explanation for which is to be found in the restriction of such work during the war, and high costs in the years immediately following. The Copper and Brass Research Association has completed a survey of such construction in 1923 and sums up the result, divided among the different classes of building, as follows:

Classification	Total	Pct.
Apartments	$ 947,670,000	16
Churches	400,980,000	6.77
Dwellings	710,750,000	12
Hospitals	450,015,000	7.60
Hotels	643,820,000	10.87
Industrial buildings	748,065,000	12.63
Office buildings	607,690,000	10.26
Public buildings	248,770,000	4.20
Schools	1,165,140,000	19.67

—From Bulletin of National Association of Building Trades Employers.

JUSTIFIABLE PRIDE

A contractor, who was as square as a brick,
As many good contractors are—
Was "laid by the heels"—he was grievously sick
And just about crossing the bar.
His friends were all gathered just outside the gates,
Ere he entered upon the long rest,
They asked him which, of his many good traits,
He really considered the best.

He gazed on the faces surrounding him there,
His look was of one unafraid.
He murmured "I've always tried hard to be fair
And when under the sod I am laid,
There is one thing I want you to put on my stone
So the fact may never be hid.
Let the words be deep graven and stand out alone,
'He Never Peddled a Bid.'"

—By F. N. Farrar, Secretary Buffalo (N. Y.) Builders' Exchange.

THE LUMBER INDUSTRY IN 1923

A Brief Analysis by Wilson Compton, Secretary and Manager, National Lumber Manufacturers Association

"The lumber industry is fast resuming its pre-war stride in volume of production and shipments, and 1923 was, generally speaking, one of the most satisfactory years in the recent history of the lumber trade. The volume of lumber movement has been perhaps the greatest in ten years. This activity has been widespread, not localized. The service rendered by the railroads for the transportation of sawmill products for the country as a whole is the best in the industry's history—a credit to railroad performance and to the better understanding between shipper and carrier. An increasing volume is being transported by water, probably 20 per cent of the shipments of the larger sawmills and perhaps 15 per cent of the total shipments of the lumber industry. Water transportation is adding a valuable new facility to large portions of the lumber industry as a substantial guarantee against involuntary tie-up by car shortage. There is great safety in two alternative transportation outlets.

"The lumber stocks at the saw-mills are generally smaller than a year ago. Many mills have run double, even triple, shifts throughout a considerable portion of the past year. That the stocks are relatively low is an indisputable evidence of the tremendous volume of actual lumber consumption during 1923.

"It is a tremendously significant fact that a volume of lumber, unprecedented during the last decade, has moved day by day from the mills to the retail yards and from the retail yards to the job. This was achieved without substantial increases in lumber prices. Prices realized for lumber at the saw-mills are no higher than a year ago. In fact, there has been during the past six months a considerable decline in the average price level. Manufacturing costs, which had been greatly reduced during 1921 and 1922, have increased substantially during 1923. In some lumbering regions wages paid are the highest in history. The quality of labor performance has improved and the labor turnover greatly decreased except in certain regions affected by special conditions, such as the negro labor exodus to the North from the South Atlantic."

WOULD PROVIDE FOR REVIVAL OF GOVERNMENTAL BUILDING CONSTRUCTION ACTIVITY

$50,000,000 Program Proposed

The National Government, according to information from Washington contemplates soon undertaking a building program entailing an expenditure of $50,000,000, to cover a period of years, if a bill recently introduced in the Senate secures the speedy action being planned for it to push it thru the congressional legislative machinery in short order.

This bill, introduced by Senator Smoot, chairman of the Public Building Commission, provides that not more than $10,000,000 shall be expended in any one year and is designed to substitute a comprehensive building program for the piece-meal method of appropriating of one building at a time.

It is proposed that the work shall be under the supervision of the Public Buildings Commission which, it is stated, is the logical agency to handle such matters because of its five years' experience in intimate connection with the government housing activities.

Such a proposal, that the work be under the commission's authority, is a strong argument in favor of the establishment of a Bureau of Public Works in the Department of the Interior, for it indicates an adherence to the principle that the building activities of the various branches of the government may well be co-ordinated under one head.

Authority would be delegated to the commission, under the proposed bill, to make a study of the requirements of all government establishments with the view to determine floor areas and the types of structures necessary.

CONTRACTORS AND CARPENTERS SPARRING ON WAGE ISSUE

Hammond Building Trades Employers and Carpenters Split on Wage Scale

The committee representing the general contractors held another meeting with the committee representing the Carpenters' District Council Friday night, but were unable to come to any agreement. The contractors are standing on their offer of $1.25 per hour and the carpenters are holding out for $1.50.

NO LOAFING THERE

The secretary was in Chicago Thursday to give the labor situation the once over. While there he called on E. M. Craig of the Building Construction Employers' Association, also upon the boys at the Builders' Mutual Casualty Co., and found everybody hustling.

WAGE DEMANDS ANNOUNCED

Four Chicago Building Crafts Want $1.50 Per Hour

Ever since the late "Teddy" threw his hat in the ring everybody else from time to time has followed his example when some issue was at stake. Only recently the plasterers, bricklayers, carpenters and painters of Chicago did a hat tossing stunt when they came forward with a demand for $1.50 per hour as the 1924 wage scale. The stunt did not arouse any applause from the contractor audience who say there is no appeal in it for them.

PROSPECTIVE BUILDERS WAITING

That Is Report of Architects

Architects report that there are a large number of persons contemplating building this season who are holding off having plans made and figured until they see what will be the outcome of the demand for an increased wage scale by the building trades.

BIG PLANING MILL FIRE

Millwork Goes Up in Smoke Instead of Building

The mill at the Hammond Lumber Co. yard burned down Saturday morning. The fire was discovered about 3 a. m., but had gained such headway that it could not be checked. No damage was done to the lumber yard. The fire originated in the boiler room.

BETTER, THANK YOU!

The weather man has given us a week of fairly good winter weather. Just a little more sunshine, please, to get the ice and snow out of the way. Auto driving is yet hazardous on account of the ice on the roads.

CALUMET BUILDING PROGRAM

Architect Mac Turner is making plans for William Kuhn, the butcher, for a two-story brick store and flat building, 25x100, on Calumet avenue near State street. Plans will be ready for bids in a few days.

M. A. Dickover has the outside work on the Neidow funeral home on Rimbach avenue completed and will soon have the interior finish finished.

Charles N. Scott was the successful bidder at the refiguring of the Dr. Oberlin residence, cutting his original bid about $700.

The Bates Expanded Steel Truss Co., East Chicago, manufacturers of steel trusses and steel telephone and trolley poles, will start work as soon as the weather permits on the erection of a large addition to their plant.

Gostlin, Meyn & Hastings, realtors, are negotiating the sale of sites for two manufacturing concerns, one employing 150 men, the other 500 men. One of Hammond's greatest assets is the number of diversified industries located here.

Bids are to be received March 12 by the East Chicago Board of Education for the construction of two nice school projects, one a ward school, the other a large auditorium addition at the Washington school.

E. E. COLE.

News of the Week

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, publicity obtainable from no other single publication published in or entering the Indiana field.

Copy should reach us, at the latest, Wednesday of the week of publication.

COLONY BUILDING
NOTICE TO BIDDERS

Bids will be received by the Board of Trustees for the Indiana Farm Colony for the Feeble-Minded, Butlerville, Indiana at the office of Herbert Foltz, architect, 129 E. Market St., Indianapolis, Indiana, until 2 o'clock p. m., Wednesday, March 5, 1924, for the construction of and the steam heating, electric work and plumbing in a new colony building to be erected on the Institution grounds at Butlerville, Indiana.

Drawings and specifications will be on file on and after Wednesday, February 13, 1924, in the office of the Superintendent of said Institution at Butlerville and releases will be made to bidders from the office of the architect in Indianapolis on and after said date.

The estimated cost of the building without equipment is $48.000.00.

Proposals shall be made according to the form attached to the specifications and each shall be delivered in a sealed envelope addressed to the president of the Board of Trustees, marked Proposal, bearing the title of the work and the name of the bidder.

Proposals will be considered on each branch of work on any combination of branches.

Each proposal must be accompanied by a certified check payable to the Board of Trustees in a sum equal to three per cent of the amount of the proposal, in accordance with conditions included in the proposal form, which check shall be forfeited in case of failure of any bidder to enter into a contract and furnish a satisfactory bond within eight (8) days after notification of the acceptance of his proposal.

The Board of Trustees is not obligated to accept the lowest or any other bid submitted but reserves the right to reject any or all proposals and to defer such acceptance or rejection for a period not to exceed eight (8) days.

A deposit of ten dollars ($10.00) will be required of prospective bidders for each set of drawings and specifications taken from the Architect's office, which amount will be returned in full in case the following two conditions are complied with, viz: (1) The return of drawings and specifications to the Architect within seven (7) days from the date of their release, and (2) the delivery to the Board of Trustees of a bona-fide bid at the time and place fixed for receiving bids. Should the bidder fail in the observance of either of these conditions, he shall be entitled to a refund of five dollars ($5.00); should he fail in the observance of both conditions, he shall forfeit the full amount of his deposit.

By order of the Board of Trustees.

W. P. KELLER, President.

February 23, 1924.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received up to 3:00 o'clock p. m. on Thursday, March the 6th, 1924, at the office of the Board of Trustees of the School City of Logansport, Cass County, Indiana, the same being in the Seventh Street School Building in said city, for the alteration of and construction of an addition to Franklin Elementary Buildings, the same to be known as the Franklin Remodeling. Full details, prints and plans and specifications for all such work are on file at the office of the undersigned, where the same are open to the inspection of all persons interested. The same are also on file at the offices of Allen & Garriott, architects, Masonic Temple, Logansport. Indiana; Lombard Building, Indianapolis, Indiana.

All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits.

Each bidder will be required to deposit with his bid a certified check in an amount of not less than 2 per cent. of his bid, payable to the Board of Trustees of such School City of Logansport, conditioned to secure the entering into of a proper contract and the giving of a proper and sufficient bond by such bidder in the event that he be awarded such contract.

The successful bidder will be required to enter into a contract in a form and with surety acceptable to the Board, requiring the completion of such work within a time to the satisfaction of such Board, in no event to be later than September 1st, 1924.

The estimated cost of such work is $60,000.00. The right is reserved to reject any and all bids.

Dated at Logansport, Indiana, this 13th day of February, 1924.

CITY BUILDING INSPECTOR IMPRESSED BY I. S. A. HANDBOOK

Hammond, Indiana, Official Desires Copy For His Files

The new handbook of the Indiana Society of Architects, recently off the press, has attracted much favorable comment, not only that but the merit of the annual volume has impressed in territory outside of Indiana.

Such assertions are made on the strength of the inquiries that have come into the secretary and the requests that have been made upon him for copies. One of the latest requests was received this week from Henry Vis, City Building Inspector, Hammond, who stated he considered the handbook a valuable reference book and should like to have one on file in his office.

PAST PRESIDENT RESIGNS

Architect A. F. Wickes Now Located at St. Louis Mo.

It is with regret that the receipt of the resignation from the I. S. of A., of Architect A. F. Wickes, formerly of Gary, is announced this week. Mr. Wickes was one of the original members of the society and served as president of the organization from June, 1919 to June 1920. He was also a member of the Board of Directors for several years and at one time was chairman of the membership committee securing quite a few new members for the society during his tenure of office.

Mr. Wickes early recognized the function of the I. S. of A., as a constructive business organization for the furthering of the interests of the State architectural profession in its material relationship to the building industry, and worked actively to promote those things that would make for a greater spirit of co-operation in Indiana building circles that a greater service might be rendered the building public.

As explained in Architect Wickes' letter to Sec'y. Harrison, his resignation is due to his removal from the state, he having gone to St. Louis, Mo., where he is now Consultant Architect for the Christian Church Foundation. His passing from the Indiana Society of Architects takes from the organization a staunch adherent. In his new venture Mr. Wickes will have the best wishes of his former I. S. A., associates and a sincere hope for new and greater success in his new field.

PUBLICITY FOR ARCHITECTURE

Effort Should be Rightly Directed or Not at All

Publicity is now recognized as essential to the growth of any movement, industry or art. It is the great modern force and like other instrumentalities is used with varying degrees of intelligence. Every profession recognizes publicity campaigns in some form as legitimate means for making known its value to the public. Architects are especially justified in such undertakings for the reason that arhcitectural service is essential to good building. In fact, the increasing complications incident to building construction at this time, makes necessary the employment of expert architectural service. There was a time perhaps when the contractor and the engineer may be considered as usurping the functions of the architect when they undertake to plan and construct a building without his aid. This can only be combatted successfully by establishing a complete understanding in the minds of the public of the peculiar and necessary factor that the architect's service is to every satisfactory building project.

How then should this publicity be conducted to produce this result? It must be done in such a way as to convince the public that architectural service is essential and desirable. That can only be accomplished in a logical and dignified manner. The man who is investing his resources in a building will not be favorably impressed by any flippant or sentimental appeals.

Publicity is far reaching in its effects. Good results are of slow growth and bad results are quickly achieved due to that very human willingness to depreciate rather than appreciate. It is a serious thing to engender a false impression about any important thing. The best publicity is that produced by those who have a broad and intimate knowledge of the thing to be exploited. Architecture can best be promoted by architects, it cannot be done properly by comedians or humorists in a low-comedy, jazz style. (Bulletin—Illinois Society of Architects)

A. I. A. ANNUAL CONVENTION ANNOUNCEMENT

Event to be Held in Washington Latter Part of May

The Fifty--Seventh Convention of the American Institute of Architects will be held in Washington, D. C., on May 21, 22, and 23, 1924. Information concerning Convention subjects, the program as a whole, and other matters will be announced later.

As required in the By-laws, the Secretary advises each member of his privilege of nomination by petition. This provides than any fifteen members belonging to not less than two Chapters may nominate by petition candidates for any office about to become vacant, provided said nominations are filed with the Secretary of the Institute not less than thirty days prior to the Convention at which the election is to take place.

The offices to become vacant at the time of the Convention are those of President, First Vice-President, Second Vice-President, Secretary, and Treasurer; and also those of three Directors whose terms expire.

The expiration of the terms of three Directors will leave three Regional Districts unrepresented on the Board of Directors.

The names of all nominees filed with the Secretary of the Institute not less than thirty days prior to the Convention will be sent to each member at least two weeks in advance of the Convention.

Under the requirements of the By-laws, Article VIII, Section 1, the number of delegates for each Chapter should be determined on a basis of two delegates for each Chapter, plus one for every twenty members. For a major fraction over fifteen name one more delegate.

IMPORTANCE OF BUILDING INDUSTRY IN CITY'S LIFE BROUGHT OUT

Illustrated Review of Building Accomplishments for the Year Proves Impressive

The big part the building fraternity played in the development of Evansville last year was forcefully impressed upon one a few days ago when the local Courier issued a special "Progress Edition." The city's industries and activities were stressed upon but no feature of the development was more impressive than the reference made to the building activities and the profuse illustrations used to substantiate that information. There were photographs of numerous stately and handsome school structures, churches, commercial buildings, factories and a myriad of beautiful homes.

Little consideration or interest is taken by the public in the fight the building interests are forced to make to keep construction work going and yet no phase of a city's life is more important than an active building program. Such a program means the healthy growth of the city, more business for various and sundry merchants, employment of thousands of well-paid craftsmen, and new homes and business structures of all descriptions to meet the growing demands of the city.

A portrayal of the year's accomplishments in new construction work, as shown by the recent Courier edition, surely accentuates the vital importance of the building industry in a city's progress.

STAMP OF APPROVAL PUT ON NEW EVANSVILLE BUILDING CODE

Final Action for Adoption to Be Taken by City Council March 3

The much agitated, long talked of new city building code promised Evansville is about to materialize. The former code, which has outlived its usefulness and failed to cover many contingencies arising with the advance of modern construction endeavor is to be replaced by an entirely new set of building regulations and requirements modeled along the lines of the latest improved building practices and factors of safety.

The new code, compiled by City Building Inspector Edward Kerth, after a year's study, has measured up to the legality test and has been approved by City Attorney John Brill. The common council has passed the new document through the first reading and at the second reading on March 3 it will be read by title, adopted and submitted to the mayor for final ratification. It will become effective as soon as the mayor's signature is attached. The final adoption of the code will mean a reclassification of the city's fire insurance rates and will place Evansville in Class 2 instead of Class 3, the present rating.

Two of the most drastic changes in the new code are the transfer of the building department from the jurisdiction of the board of public works to the board of public safety and the creation of a building commissioner. City Building Inspector (as he is now termed) Ed Kerth will be known as commissioner of buildings, with the final adoption of the code.

The proposed new building regulations make up quite a volume, containing fifty-six chapters with a total of 230,000 words and cover practically every phase of building construction and every type of structure. It required nine hours to publicly read the code at its initial introduction at a recent city council meeting.

TO REPLACE BIG STORE DESTROYED BY FIRE

Contract Just Awarded

Contract for the reconstruction of the Tepper brothers store building on East Berry street, destroyed by fire New Year's day, has been awarded the Rump-Kintz Company.

The new building will follow substantially the lines of the old structure, although there will be a number of improvements.

While it had at first been planned to add a fifth story to the new structure, engineers found the remaining walls, which may be used for a building of the same size, would not carry the extra floor. The new structure will utilize part of the front and side walls while the rear wall will be entirely rebuilt.

Plans include specifications for a new and modern lighting system, and entire new system of plumbing, new dressing rooms, fire doors on all openings except the front, a modern freight elevator and a number of other features lacking in the old structure. The upper floors of the new structure will be 60x150 feet in size and the basement, which in the old building was approximately 50x100 feet, will be enlarged.

SOUGHT TO BRING ABOUT A SHOW-DOWN

Building Trades Officials Try to Clarify Chicago Situation

Efforts to establish who's who as official office holders of the Chicago Building Trades Council were made by representatives of the International Building Trades at a general conference held Monday, Feb., 25th., in New York City. Delegations of local heads representing both factions, attended the meeting. Arthur Wallace, President of one local group, lead his delegation, while President Edward Ryan, of the other faction, presented his side of the argument.

STRIKE TO ENFORCE A DISCRIMINATORY WAGE SCALE IS UNLAWFUL

So Holds a New Jersey Court

A decision which will likely be far reaching in its effect was recently handed down by a Court of Chancery in New Jersey. Briefly, the history of the case and the decision is as follows: A New York concern secured a contract to do a job of painting in Newark, N. J. It hired union men at the Newark rate of eight dollars per day. The men struck on the grounds that inasmuch as the contractor was a New York concern the rate should be nine dollars a day, the wage scale in effect in that city. The contractor appealed to the court to enjoin the strike and was successful. The court held that the practice of compelling an employer whose place of business is in one city to pay the wage scale of that city to workmen he employs to do work in another city where the wage scale is lower, violates public policy and is in restraint of trade. And where the employer is a citizen of one state employing men in another state, this practice infringes the policy of the Constitution of the United States, guaranteeing to the citizens of each state the privileges and immunities of citizens in the several states.

EFFORT TO ADJUST WAGE SCALES FOR 1924 SEASON STARTED

Building Trades Employers and Employes Centering Attention on That Matter at Indianapolis

At this season of the year as we near the opening of the new building season there is a general attitude of expectancy, and in the anticipation of that which is most fondly hoped for, a big building year ahead, conditions must be looked into and every effort made to remedy the apparent obstacles that would intrude to retard the prospects that give promise of creating an active building future.

During the last few weeks the architects' offices at Indianapolis have shown a tendency to take on a busier atmosphere, with many sketches and preliminary plans being developed for contemplated work. As always, the maturity of these early prospects hinges on the reasonableness of the conditions that will obtain during the active building season that is to come.

There is nothing that has a more important bearing on the future prosperity of the building industry that a definite understanding of what the wage scales will be. Labor cost is one of the big items of a construction operation, be it a house, a skyscraper, an industrial plant, a school or a church. The wage scale matter is one of the most important questions to be settled, and to that end the building trades employers of Indianapolis are now working. Negotiations have been started with the union representatives of the various building crafts who have announced their demands for the 1924 building season. As regards these demands, nothing of an informative nature has been given out except that increases in wages over the 1923 scale have been asked.

Many of the agreements with the crafts expire April 1 and the next few weeks will be busy ones for the building contractors in an effort to get definite wage standards for the various crafts worked out and signed up by the time the wage expirations come. An early settlement is sought for it will lend impetus to spring building.

GREAT SPORT BY BUILDERS BOWLING LEAGUE

Records Fall During the Past Month

Team Standing

Name	W.	L.	Pct.
Wege-Stanford	48	21	.696
Colvin's Triangles	44	25	.638
Thumbtacks	43	26	.623
Central Supply Co.	39	30	.565
Hugh Baker	34	34	.500
Conder-Culbertson	32	36	.471
Indianapolis Electric Supply Co.	26	43	.377
Robert Berner	9	60	.130

Some great spurts were staged in the Builders Bowling League at Indianapolis the past month and most of the teams are thundering along at a great pace. The outstanding features of the month's play were the crashing thru of the Wege-Stanford team to first position with a lead of four lengths over Colvin's Triangles, a steady climb by the Central Supply crowd, and the smashing of three season's high records.

The marble men hung on tight and then waded right thru the Triangles when the two teams clashed and came out on top after the shuffle. However, that three game series was a sizzle and the winners were forced to chalk up high single game score and high three game total in order to get a triple win.

Swinging along in third place the Thumbtacks held steady and boosted their percentage 46 points while the Central Supply came thru for a 48 point game. The Hugh J. Bakers failed to gain or lose while the Triangles slipped for 45 points, Conder and Culbertson 13, and R. E. Berner Co., lost 6.

Born of the Thumbtacks cut in with three big games for high individual total of 640, three pins better than the former record.

High Team Single Game
Wege-Stanford ---------- 953
High Total Team Score, 3 Games
Wege-Stanford ----------2728
High Individual Game
Mayer of Wege-Stanford ----------280
High Individual, 3 Games
Born, Thumbtacks ----------640

PROMINENT INDIANAPOLIS CONTRACTOR TAKES EXTENSIVE VACATION JOURNEY

Will Visit West and Coast as Far North as Vancouver

James Hodgson, Sr., well-known Indianapolis brick contractor, president of the Mason Contractors' Association of Indiana, a recently organized state organization, has taken advantage of the quiet spell in building construction work and with Mrs. Hodgson has gone for a visit to California and the west coast. Their itinerary includes Denver, Salt Lake City, Los Angeles, San Francisco, Seattle and Vancouver, British Columbia.

Mr. Hodgson will be gone for six weeks or more and in his absence T. J. O'Hara, vice-president of the Mason Contractors' Association of Indiana, will be in charge of the organization's affairs.

NOT FAR WRONG

Not Much Time For Sleep

Said a New York clergyman recently, "The modern home has become merely a place to sleep."

Now comes forward another man to counter with this, "A place to sleep! When? The modern home is a place in which you have to entertain your wife's relatives, carry the screens up to the attic, take care of the furnace, get the ashes out, get the screens down out of the attic, cut the grass, and attempt to save enough to pay the interest on the mortgage.

Robert Gillespie, St. Louis, and Walter McGarvey, Cincinnati, president and secretary of the International Brick Mason Contractors' Association of the United States and Canada, were interested spectators at the organization session of the Indiana Mason Contractors' Association.

James Rybolt, Jack Karstedt and Secretary Bonewitz put in a good word here and there.

A. A. Gill, Colfax, was an enthusiast also.

William Abeler, general contractor, Evansville, was another outsider who braved the raging winter weather elements and journeyed to Indianapolis to be present when a start was made.

ASSUME ATTITUDE OF PLAYING THE PUBLIC TO THE LIMIT

Contractors Told Wage Problem is None of Their Concern

The situation as regards Labor in the building construction field in Hammond remains unchanged. Several conferences have been had between Labor representatives and the building trades employers but no change of any consequence from the original status has developed. The Unions have refused to make any concessions from their demand of $1.50 per hour while the employers are sticking to their counter offer somewhat below that figure.

A new light was thrown on the negotiations recently when the special wage committee of the employers, in conference, was given to understand that this wage scale establishment was none of their business, that it was none of their affair at what figure the wage scale was set, that it was purely a matter between the Unions and the Public. Further, the employers were informed that as long as the Public was willing to pay the freight the contractors should worry. Not only that, but the contractors were told that if they were not smart enough to go out and get the business and figure in a higher wage so they could make a profit they had better get out of the field.

Evidently the Unions do not take into consideration the money the contractor has invested in the business or the equipment he has provided so the job can be carried on; nor does the Union stop to realize that on pay day the contractor must promptly pay the men on the job regardless as to whether he has received any money from the owner or not for the work done. It would appear that the Unions regard the contractor as nothing more nor less than a pay-master.

Every indication points to the belief that the Unions are dead set on milching the building construction business to the last cent without any thought of the financial burden the business is already carrying and the danger point of break down to which it has so closely approached. It will be all right for the Union men as long as the public will pay, but, when the latter bucks there is liable to be a lot of building craftsmen without jobs.

TO PAINT OR NOT TO PAINT?

Outcome of Wage Dispute Held the Answer

The first of March was almost as significant to the Hammond painting contractors as were the Ides of March to Caesar. All eyes of building men in the Calumet section were centered on the approaching date to see just what would happen between the bosses and the union employes. Neither seemed to be able to come to any mutual agreement on the wage scale and a locking of horns was generally expected. This situation is fraught with much importance as the outcome of this controversy will have a big bearing on the negotiations with the other crafts.

IN ABEYANCE

Cold Weather Halts Building

Continued snow flurries and the mercury flirting around not far above the zero mark has not lent any impetus to the building activity in Hammond. Fact of the matter is no new building operations have been started and all outside has come to a full stop.

A BIG JOB

Effect of Street Widening Projects Being Figured Out

The Committee making estimates of benefits to be derived from and damages to the abutting property on State and Hohman streets, thoroughfares to be widened to give Hammond good adequate traffic arteries, is deeply engrossed in its work. However, during the best part of the past week the members of the committee took a temporary vacation but will be back on the job in a few days so that reports may be made as soon as possible and the improvement worked pushed ahead if deemed feasible.

GOING SOUTH

Bricklayers Follow Trail of the Idle Rich

It seems that Florida building is profiting from the approach of the winter months. Reports from that section are to the effect that there is quite an influx of bricklayers, making such mechanics plentiful, a fact that has held the wage scale to $1 per hour and causing the men to lay twice as many bricks as are put up in other localities in a given time. There is an incentive to work when one knows he must in order to hold his job against the fellow who is only too willing to and is only waiting for an opening.

CALUMET BUILDING PROGRESS

Archt. Mac Turner is preparing plans for a two story brick apartment building, to contain 14 small suites, for Dr. H. W. Eastwood. The project to be located on Logan st., is estimated to cost $20,000.

Contractor J. H. McClay was the successful bidder on the remodeling of the W. B. Conley home into a church for the Jewish Bethel congregation. His estimate was $15,000 not including, wiring, heating or plumbing. He was also the successful bidder on the new $30,000 library building for the North Side at Hoffman and Oak Sts.

Plans prepared by architects, Murphy Bros., Louisville, Ky., are out for the new addition to St. Margaret's Hospital, on Douglass St., Hammond. Bids will be received March 12th. The esitmated cost is announced at $300,000.

J. Wesley Reed, general contractor has charge of the erection of the new Monroe St., M. E. Church, corner of Harrison St. and Cleveland Ave., Hyde Park Addition. This is a $25,000 brick veneer project that is being built on a time and material basis.

This list is a 1924 revised list and is guaranteed reliable and authenic. Address Box No. 28, Indiana Construction Recorder, 312 East Market Street, Indianapolis.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

AUDITORIUM AND SCHOOL BUILDING NOTICE TO BIDDERS

Bids will be received by the Board of Trustees for the Indiana State Sanatorium, Rockville, Ind., at the office of Herbert Foltz, Architect, 129 E. Market Street, Indianapolis, Ind., until 10 o'clock a. m., Thursday, March 20, 1924, for the construction of and the steam heating, electric work and plumbing in an Auditorium and School Building to be erected on the Institution grounds near Rockville, Indiana.

Drawings and specifications will be on file on and after Tuesday, March 4, 1924, in the office of the Superintendent of said Institution at Rockville, and releases will be made to bidders from the office of the Architect in Indianapolis on and after said date.

Proposals shall be made according to the form attached to the specifications and each shall be delivered in a sealed envelope addressed to the president of the Board of Trustees, care Herbert Foltz, Architect, marked Proposal, bearing the title of the work and the name of the bidder.

Proposals will be considered on each branch of work or on any combination of branches.

Each proposal must be accompanied by a certified check payable to the Board of Trustees in a sum equal to three per cent of the amount of the proposal, in accordance with conditions included in the proposal form, which check shall be forfeited in case of failure of any bidder to enter into a contract and furnish a satisfactory bond within eight (8) days after notification of the acceptance of his proposal.

The Board of Trustees is not obligated to accept the lowest or any other bid submitted but reserves the right to reject any or all proposals and to defer such acceptance or rejection for a period not to exceed eight (8) days.

A deposit of ten dollars ($10.00) will be required of prospective bidders for each set of drawings and specifications taken from the Architect's office, which amount will be returned in full in case the following two conditoins are complied with, viz: (1) The return of drawings and specifiatoins to the Architect within seven (7) days from the date of their release, and (2) the delivery to the Board of Trustees of a bona-fide bid at the time and place fixed for receiving bids. Should the bidder fail in the observance of either of these conditions, he shall be entitled to a refund of five dollars ($5.00); should he fail in the observance of both conditions, he shall forfeit the full amount of his deposit.

By order of the Board of Trustees,
CLEMENT E. KELLEY, Pres.
March 1, 1924.

SCHOOL HOUSE NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received up to 1:30 o'clock p. m., on Friday, the 14th day of March, 1924, at the Office of the Board of Trustees of the Schol Town of Orleans, Orange County, Indiana, the same being in the said town, for the remodeling of the Old Grade Building and the construction of a Gymnasium Addition to the High School Building. The improvements will also include the customary heating and ventilating apparatus and the installation of a Sanitary Flushing Closet System for each building. Full details, prints and plans and specifications for all such work are on file at the office of the undersigned Schol Board and at State Board of Accounts, where the same are open to the inspection of all persons interested. The same are also on file for bidders at the office of Allen & Garriott, Architects and Engineers, 401 Lombard Building, Indianapolis, Indiana.

For convenience, the plans and specifications are issued under two heads, viz: One for General Construction, and one for Heating, Plumbing and Electric Wiring.

For each set requested a deposit check of $25.00, made payable to the Architects in charge, will be required for the safe return of said plans and specifications.

All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits.

Each bidder will be required to deposit with his bid a certified check in an amount of not less than 3 per cent of his bid, payable to the Board of Trustees of said School Town of Orleans conditioned to secure the entering into of a proper contract and the giving of a proper and sufficient bond by such bidder in the event that he be awarded such contract.

The successful bidder will be required to enter into a contract in a form and with surety acceptable to the Board, requiring the completion of such work within a time to the satisfaction of said Board, in no event to be later than August 15, 1924.

The estimated cost of such addition is $40,000.

The right is reserved to reject any and all bids.

Dated at Orleans, Indiana, this 20th day of February, 1924.

SCHOOL TOWN OF ORLEANS,
By RALPH M. JENKINS, Pres.,
WM. JONES, Sec'y,
JAS. L. HOLLOWELL, Treas.,
CHAS. B. TEGARDEN, Trustee.
Board of School Trustees.
March 1st, 1924.

SCHOOL BUILDING NOTICE TO CONTRACTORS

Notice is hereby given, that sealed bids will be received up to 7:00 o'clock p. m., on Tuesday, the 18th day of March, 1924, at the office of the Board of Education of the School City of Valparaiso, Porter County, Indiana, the same being in the School Building in said city for the construction of a ward school building. Full details, prints, plans and specifications for all such work are on file at the office of the undersigned, where the same are open to the inspection of all persons interested. The same are also on file at the office of Herbert Erickson, Gary, Indiana. Bids will be received on the general construction, also separately on plumbing, heating and ventilating, wiring and heat regulation.

All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits.

Each bidder will be required to deposit with his bid a certified check in an amount of not less than two (2) per cent of his bid, payable to the Board of Education of such School City of Valparaiso, conditioned to secure the entering into of a proper contract and the giving of proper and sufficient surety bond by such bidder in the event that he be awarded such contract.

The successful bidder will be required to enter into a contract in a form and with surety acceptable to the Board, requiring the completion of such work within a time to the satisfaction of such Board, in no event to be later than August 15, 1924.

The estimated cost of such School Building is $50,000.00. The right is reserved to reject any and all bids.

Dated at Valparaiso, Indiana, this 19th day of February, 1924.

School City of Valparaiso,

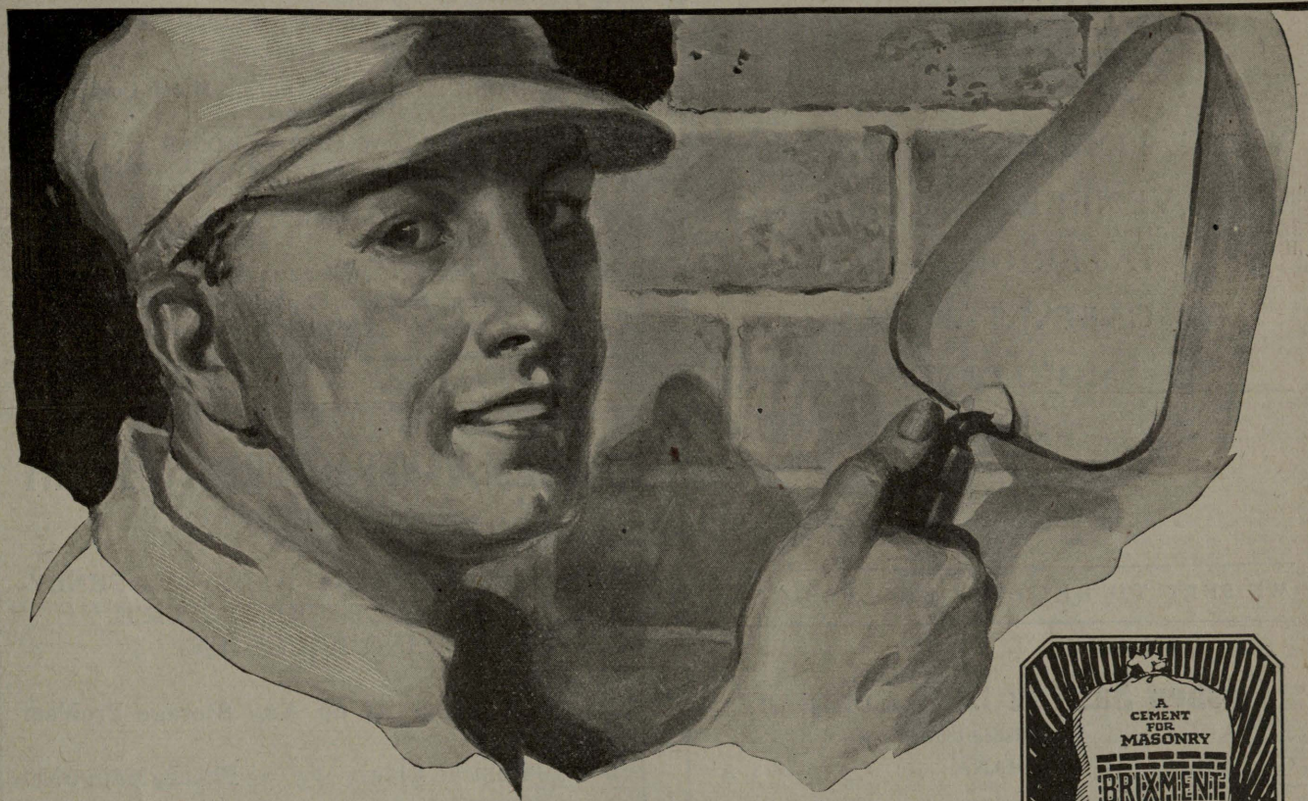
BETTER MASONRY AT LESS COST



This man's time costs you real money—*Make the most of it!*

A mechanic must have the right tools and the right materials to give the best service. *Every mason can do far better work and do it more economically in the end by using BRIXMENT for mortar.*

Read the following distinctive characteristics of BRIXMENT mortar—then figure the economies made possible by its use:

(1) Needs no slaking; can be used immediately after mixing (one part BRIXMENT; three parts sand).

(2) Lays faster because of unusual plasticity.

(3) Repels moisture.

(4) Less likely to freeze.

(5) Requires less mortar color and will not change the color used.

(6) Can be retempered.

(7) Used by nationally recognized architects and contractors.

Commence now to insure *better masonry at less cost*—clip and mail the coupon on the right today.

This structure 80x140 ft. was built of Hoosier Mat Face Tile throughout, including foundation and interior finish. Auditorium seats 2,000.

Better Buildings at Lower Cost

HOOSIER Hollow Building Tile, ideal for fireproof economical construction. These special designed 5-wall, glazed, vitrified, fire-clay tile have enormous strength, permitting use in all kinds of construction. Beauty of finish renders them adaptable for an almost unlimited variety of building projects.

Saves 25% On Cost

Hoosier Tile will save at least 25% in cost over brick construction; can be erected in small fraction of time required for other construction, thus saving labor cost.

Wide Range of Usefulness

Architects and Contractors will find HOOSIER Tile adaptable for factories, garages, stores, churches, schools, community houses and gymnasiums. This material, in the beautiful mat-face finish, vies with tapestry brick in appearance when used in dwellings, whether large or small.

Let us submit estimates on your specifications, as proof of HOOSIER TILE superiority. Samples furnished free. Write for descriptive literature.

REGIONAL MEETING AT VINCENNES TO HAVE HISTORIC TOUCH

Treat in Store for State Architects April 12

There is a matter Indiana architects don't want to forget, the next regional meeting of the society. This event is to be held at Vincennes Saturday, April 12, just a little over a month distant.

These meetings have developed from an experiment into a permanent part of the I. S. of A., have welded the architectural profession of the state more closely together than any other one agency employed by the organization, and have otherwise proved of inestimable value to the architects in many ways.

It is the first time Vincennes has entertained the architects and the members of the profession there are contemplating showing visitors a good time. Old Vincennes is rich in historic interest and a visit there should prove most enjoyable.

Just remember the date and prepare to visit the old frontier city which played such a prominent part in the pioneer days.

ARCHITECTURAL STUDY TOUR OF EUROPE OFFERS MANY ADVANTAGES

To Extend from June 21 to August 30

An announcement has just been received by the Indiana Society of Architects that should appeal to any of the members of the architectural profession of the state who may have in mind an extensive vacation trip the coming summer. The information at hand deals with the Arts Tour of 1924 under the auspices of the Institute of International Education.

This Arts Tour covers the interesting centers of the various sections of Europe and offers a choice between four overlapping courses, with emphasis on Architecture and Interior Decoration, on Painting, on Landscape Architecture, or on History, respectively. Local programs will be carried out for each course or section separately, in groups of not more than thirty members each. The Arts Tour will move as a whole, however, in travel from place to place.

The scheme of organization—that of a large group divided into sections on the basis of the congeniality and common educational interests of their members—combines the advantages of large-group and of small-group travel. It retains the advantages which a large group enjoys in having an adequate faculty of instructors who are authorities in their several subjects, in permitting special arrangements for the greater convenience or enjoyment of the group (such as the reservation of private cars or even trains for rail travel), in affording each member a wider field from which to choose close associates, and in permitting great freedom of individual action. It shares with the small group the advantages of ease, intimacy, and common interest in local plans.

Each of the sections will emphasize a specified subject, and will at the same time include in its program all other objects of outstanding importance in each city visited. In Rome, for instance, the program of every section will include such objects of universal interest as the Forum, St. Peter's, the Sistine Chapel, the Colosseum, the Palatine, the Pantheon, and so on. But to the general program will be added special programs appropriate to each section: for the architectural section, studies of the composition and decoration of important Renaissance palaces and Papal churches; for the students of painting, the Vatican galleries, the sculptures in the Capitoline Museum, and the paintings in the Borghese Gallery; and for the students of landscape architecture, the Roman villas and the villas at Tivoli and Frascati.

The architectural section will be under the personal guidance and attention of Professor Albert C. Phelps, Cornel University, who for many years has been at the head of the Department of the History of Architecture in the College of Architecture at Cornell and knows intimately that which is most vital to the interest and use of architects during such a tour.

Secretary Merritt Harrison had the good fortune to accompany Professor Phelps on just such a trip some years back, visiting England, France, Greece, Italy, Scotland and Switzerland, and advances the assurance that such a journey under such tutelage as proposed offers a wonderful opportunity for the study of architecture not only for the architectural student but the practicing architect as well.

Departure from New York is scheduled for June 21 with return to the home port August 30.

Anyone interested can secure detailed information by writing International Students' Tours, 405 Times Building, New York.

FURTHER EFFORT TOWARD ELIMINATION OF WASTE AND ALSO STANDARDIZATION

Architects, Engineers and Manufacturers to Discuss Tanks at Solicitation of United States Department of Commerce

Manufacturers of tanks, and manufacturers of equipment in which tanks are used, have been invited to meet in a series of conferences under the auspices of the Division of Simplified Practice on March 11, 12, 13 and 14 looking to the elimination of seldom-used sizes and varieties of tanks. More than 150 manufacturing representatives from twenty-four states have been invited, as well as delegates from the National Board of Fire Underwriters, American Institute of Architects, American Society of Sanitary Engineering and other technical groups and from fire departments of a number of leading cities. Distributors and consumers will be present.

The conferences will deal with hot water storage tanks, cold water storage tanks, pneumatic tanks, gasoline underground storage tanks, distillate and fuel oil storage tanks, and air receivers.

CITY COUNCIL ADOPTS NEW BUILDING CODE

New Measure Universally Meets With Approval of Citizens

After seven months of preparation and revision, the proposed new city building code was adopted by the city council Monday night of this week. It has been submitted to Mayor Elmendorf for his signature and will become effective within thirty days after it has received his approval.

The adoption of the code, which was prepared by Building Inspector Ed Kerth, will advance Evansville from class 3 to class 2 in fire insurance rates 8.6 per cent from the present rate. Underwriters five years ago promised to rerate the city as soon as certain conditions had been complied with, the last of which is the adoption of the new code. New assurances of a rerating were given after the code had passed at the first reading and underwriters from two or three prominent companies were at the meeting Monday to recommend the passage of the code and again promise a rerating.

The new code, quite a volume, covers every angle of construction, fixes fireproof building zones, defines types and uses of building to be erected within certain areas and removes the building department from the board of public works to the jurisdiction of the board of public safety. Recommendations that the code be adopted were filed by practically all of the trades unions and by the Chamber of Commerce committee appointed several weeks ago to make a study of its clauses.

The extending of the fireproof building zone was one of the principal changes made at the second reading. The fire zone section, within which nothing but fireproof buildings may be erected, has been greatly extended over the previous fire zone district and will materially reduce the fire hazard of the businss district of the city.

CHIPS AND SHAVINGS

On a bid of $15,000 John Wilkins, building contractor, was awarded the general contract for the erection of the new home for Arthur Kaiser, Kentucky and Taylor avenues.

Construction work on the new Lodge Avenue school, Green River road and Lodge avenue, will be started about March 15 by the Tri-State Contracting Corporation, to which company the contract was awarded on its bid of $26,486.

J. Bippus and Son, building contractors, started construction work last week on a five-room frame bungalow house for J. E. Teague, 210 East Louisiana street.

The old buildings at Second and Vine streets on the site of the proposed Y. W. C. A. new home have been taken over by the association. Preparations are being made for razing the old structures. Working drawings for the new building are progressing steadily at the office of Thompson and Geary, New York archi-

LARGE APARTMENT PROJECT TO BE STARTED AT ONCE

To Cost $300,000

Construction of what is heralded to be the finest apartment building in Fort Wayne will begin within two weeks at Union and Berry streets, according to the directors of the Apartment Building Company.

The structure is to be three-story brick, strictly modern throughout and a unique feature of the plans is that all apartments will face Berry or Union streets. None will face on an alley or a rear side. Forty-five two, three, four and five-room apartments will comprise the rooms of the building. The Tudor-Gothic style of architecture is to be followed. A. M. Strauss is the architect in charge.

RENEWED BUILDING ACTIVITY DEVELOPS AT FT. WAYNE

February Permits Show Big Gains in Issuance and Valuation

Other cities may have their building troubles but Ft. Wayne is going right along erecting new structures. In substantiation of that assertion attention is called to the February statistics just issued by the city building inspection department that shows a decided gain over the volume of business put out during the corresponding period in 1923. Also the past month far outdistanced January this year scoring heavily.

Last year when Ft. Wayne ran up the greatest building record in her history February just showed a moderate advance over the January business, but this year the increase is most impressive amounting to over a half a million dollars and has sounded a new note of encouragement to the local building fraternity. The total estimated valuation of new construction work for which permits were issued last month amounted to almost the entire valuation for both the months of January and February 1923.

Comparative figures show 36 more permits issued last month than during the same period a year ago while the gain in the amount of money involved was 72.3%.

These are the official figures of the city building inspector:

	Per.	Est. Val.
February, 1924_____	98	$733,450
February, 1923_____	62	425,550
Gain February, 1924___	36	$307,900

BIG CONSTRUCTION EXPANSION PROGRAM OF LOCAL COLLEGE GETS UNDER WAY

Active Operations Begun the Past Week

Ground was broken at ceremonies Sunday afternoon as the first step in the building program which calls for the enlargement and expansion of the facilities of Concordia College at a cost of $375,000. Active construction work began Monday, March 3, under the supervision of Max Irmscher & Sons, general contractors.

In the new dormitory to be erected as the first step in the building program, accommodation for 100 students will be provided. The structure will be of pressed brick. The heating and plumbing contract has been let to the Schwegman-Witte Company. Louis Gerke has the electrical contract. J. M. E. Riedel, architect, drew the plans for the building.

BUILDING PERMITS

To Fred Keller, for residence at 1209 Oakdale drive at cost of $5,500; to F. G. Mayer, for residence at 460 East Wildwood at cost of $5,000; to Joseph Bundy, for residence at Oxford and Smith at cost of $4,000, and for residence at Rockhill and Washington at cost of $8,000.

Paul Koehler, residence, Sherman street, cost $6,000.

David A. Arnold, residence, 2422 South Anthony boulevard, cost $4,800.

To Rump-Kintz company for a residence at 4120 Indiana avenue at cost of $9,000; to J. H. O'Bryan; The Home Realty company, residence at 1318 Home avenue at cost of $6,000.

BEST FEBRUARY BUILDING RECORD EVER RECORDED AT INDIANAPOLIS

Past Month's Activity Greatly in Excess of That Shown in January

The Indianapolis building movement last month showed considerably more strength than that developed in January and ran up figures approaching a $3,000,000 estimated valuation for new work for which permits were granted. It was the best February building record ever made in the history of the city.

Big gains were made over the January figures this year and those of February, 1923, 168.1 per cent and 69.48 per cent respectively. There were 150 more permits issued last month than during the preceding one, and 239 more than for the corresponding period a year ago.

A summary of the month's building activity compiled at the city building inspection department reads thus:

Kind	Per.	Est. Val.
Business buildings	19	$874,500
Industrial buildings	6	606,000
Residences	136	565,662
Public buildings	3	259,000
Tenements	3	167,000
Repairs, etc.	365	116,898
Miscellaneous	167	91,633
Accessory buildings	85	33,469
Total	784	$2,714,162

BUILDING OUTLOOK FOR YEAR GOOD

Gathering Evidence Points to a Big Year Ahead, According to Editorial Authority

Building construction throughout the United States is increasing rapidly at the present time, showing a big gain over the same period for the past year, according to a report issued by James B. Carrington, editor of "Architecture." Carrington estimates that during the first four months of 1924 the building situation will carry on at about its present gait, which can be reckoned around 15 per cent higher than in December, 1922, and January, 1923.

At the beginning of the spring season there will be a noticeably increased activity which should carry on for several months. All indications for the fall and winter months of 1924 point to even more building than at the present time, according to the report.

"The building outlook for 1924 can be termed as very good, but that does not mean that there will be abnormal boom conditions," says Carrington. "Many of the splurges in the construction field in the past have been neither healthy nor normal."

LABOR SHOWS FAITH IN NATIONAL JURISDICTIONAL AWARDS BOARD

Attitude at Pittsburgh Would So Indicate

Generally speaking, the recent meeting of the National Board for Jurisdictional Awards, held at Pittsburgh, was a very successful one and the attitude of labor organizations indicates that they recognize the importance of the work of the board and are willing to continue their confidence in its permanent usefulness in the building industry.

INDIANAPOLIS BUILDING PERMITS

(Week of Feb. 28, to March 6.)

***Apartment Building:** $85,000, 3620 N. Meridian. Owner, Jaquline Realty Co., O. B. Ent, Secy., % State Construction Co. General contractor, State Construction Co. Excavated. Brick.

OUTLOOK NONE TOO PROMISING

Labor Agitation Assuming Threatening Proportions

Slowly but surely the wage scale adjustment matter between the building trades employers and the Union crafts in the building field are being brought to a focus. Just recently there was a called meeting of representative general and painting contractors of the Calumet District held at Gary for a serious survey of the Labor wage situation. Association delegates from Gary, Hammond, East Chicago and Indiana Harbor were present all eager to arrive at some definite decision after a careful consideration of current conditions.

Hammond was represented by H. L. Morris, Guy Young and Secy., E. E. Cole of the B. T. E. A. It was a perilous trip over the ice-bound roads to the "Steel City," sometimes headed in the right direction sometimes not, but the reward was well worth the effort for after reaching their destination the Hammond men experienced one of the most enthusiastic contractors' meetings ever held in the northwest corner of Indiana.

There is nothing really new in the Labor question as it confronts the Calumet contractor this year, rather, it is the same old story of reckless greed bereft of common sense and reason. Every spring the demand for more and more wages is sprung on Public and building trades employer and is more of a habit now than being occasioned by necessity. At least that was the consensus of opinion of those present the other night and it is felt that the time has come to turn a deaf ear to its ceaseless wail, its implied threat. If the building trades wage earner was drawing a beggarly or niggardly pittance for his effort it would be a different matter, but such is not the case. His hours are good, his work is healthy and the scale of wage is higher than that paid in many other skilled fields.

It would appear that the Union painters of the Calumet District are to be the shock troops this year in the general wage assault. They have come out for a $1.50 per hour wage demand and the other crafts are marking time awaiting the outcome of this first charge.

The contractors of the four cities above mentioned are better organized today than ever before and the general contractors have assured the painting bosses that they are back of them in resisting the excessive demand that has been made by the employes.

As a follow up to the Gary meeting another similar affair was held in Hammond, the same cities being represented. In addition to the building trades employers present members of the Real Estate Board were in attendance and there was a lively discussion of the Labor situation in an effort to determine what could or must be done to eradicate the evils that threaten to retard building if allowed to continue.

Reference to the painting situation the contractor on the new Indiana Hotel advanced the information that there was a $100 a day penalty hanging over his head if the project was not completed by a certain time, otherwise he was willing to stand by the building trades employers in any move they might make. Since then it has been learned that that time penalty matter has been taken care of in a way that will aid the contractors in case the wage proposition comes to a show down.

All the contractors were urged to espouse the cause of organization not as a means of offense, rather of defense. Further illumination was thrown on that angle by Field Representative J. H. Owens of the Associated Building Contractors who was present and enumerated the accomplishments that had been achieved by the State A. B. C's., in the interests of the Indiana Contractor.

As the days have progressed the idea is being more deeply impressed by evidences at hand that, as said in the beginning, the wage adjustment matter is rapidly nearing a focus. About all that remains is, we shall see what we shall see when that time comes.

ANOTHER EVIDENCE OF UNREST

Building Record for February Shrinks Mightily

The effect of the disturbed and uncertain building conditions at Hammond has readily made itself felt at the city building inspection department office. Henry Vis in his February report shows that practically no large projects of any consequence were brought in for official approval and sanction during the past month. The work for which permits were granted was all of a small nature.

As compared with February a year ago, though there were ten more permits issued in Feb., 1924, the estimated total cost fell away 76.6%.

The figures for the two periods were:

Time	Per.	Est. Cost
February, 1924_____	33	$100,625
February, 1923_____	23	431,375

An association member without an up-to-date membership is like a soldier without a gun, he weakens the morale of his comrades.

Sealed Proposals

An advertisement for sealed proposals inserted in these columns places the proposition before the entire Indiana Construction Interests, affording a publicity in contracting and material supply circles from one end of the State to the other, publicity obtainable from no other single publication published in or entering the Indiana field. Copy should reach us, at the latest, Wednesday of the week of publication.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids will be received up to 1:30 o'clock p. m., on Friday, the 14th day of March, 1924, at the Office of the Board of Trustees of the Schol Town of Orleans, Orange County, Indiana, the same being in the said town, for the remodeling of the Old Grade Building and the construction of a Gymnasium Addition to the High School Building. The improvements will also include the customary heating and ventilating apparatus and the installation of a Sanitary Flushing Closet System for each building. Full details, prints and plans and specifications for all such work are on file at the office of the undersigned Schol Board and at State Board of Accounts, where the same are open to the inspection of all persons interested. The same are also on file for bidders at the office of Allen & Garriott, Architects and Engineers, 401 Lombard Building, Indianapolis, Indiana.

For convenience, the plans and specifications are issued under two heads, viz: One for General Construction, and one for Heating, Plumbing and Electric Wiring.

For each set requested a deposit check of $25.00, made payable to the Architects in charge, will be required for the safe return of said plans and specifications.

All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits.

Each bidder will be required to deposit with his bid a certified check in an amount of not less than 3 per cent of his bid, payable to the Board of Trustees of said School Town of Orleans conditioned to secure the entering into of a proper contract and the giving of a proper and sufficient bond by such bidder in the event that he be awarded such contract.

The successful bidder will be required to enter into a contract in a form and with surety acceptable to the Board, requiring the completion of such work within a time to the satisfaction of said Board, in no event to be later than August 15, 1924.

The estimated cost of such addition is $40,000. The right is reserved to reject any and all bids.

Dated at Orleans, Indiana, this 20th day of February, 1924.

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Notice is hereby given, that sealed bids will be received up to 7:00 o'clock p. m., on Tuesday, the 18th day of March, 1924, at the office of the Board of Education of the School City of Valparaiso, Porter County, Indiana, the same being in the School Building in said city for the construction of a ward school building. Full details, prints, plans and specifications for all such work are on file at the office of the undersigned, where the same are open to the inspection of all persons interested. The same are also on file at the office of Herbert Erickson, Gary, Indiana. Bids will be received on the general construction, also separately on plumbing, heating and ventilating, wiring and heat regulation.

All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits.

Each bidder will be required to deposit with his bid a certified check in an amount of not less than two (2) per cent of his bid, payable to the Board of Education of such School City of Valparaiso, conditioned to secure the entering into of a proper contract and the giving of proper and sufficient surety bond by such bidder in the event that he be awarded such contract.

The successful bidder will be required to enter into a contract in a form and with surety acceptable to the Board, requiring the completion of such work within a time to the satisfaction of such Board, in no event to be later than August 15, 1924.

The estimated cost of such School Building is $50,000.00. The right is reserved to reject any and all bids.

Dated at Valparaiso, Indiana, this 19th day of February, 1924.

School City of Valparaiso,

REGIONAL MEETING PROLIFIC WITH ATTRACTIVENESS

Vincennes One of the Most Interesting Cities in Indiana

Preliminary plans are under way to assure an interesting regional meeting of the Indiana Society of Architects at Vincennes Saturday, April 12.

This affair should prove doubly attractive not only from an architectural point of view but from an historical side. It has been several months since the big regional meeting and joint builders' conference held at Lafayette and the time is ripe for another regional meeting to get the architects together and talk things over.

Vincennes is in a position to offer more than ordinary interest to the visitor within her gates, for she is endowed with a historical atmosphere that dates back to pioneer days when "Red Coats of England" and the Colonial troops of Virginia were struggling for the supremacy that was to make or break the new American republic. Relics, too, remain of the old French settlement and occupation, and then, later, the presence of General William Henry Harrison and his activities of the days of the War of 1812.

Here is a chance for a day's outing that will repay for the time, effort and money expended.

Remember! Saturday, April 12.

ARCHITECTS FIGHT SHY OF SUGGESTION FOR JOINT ACTION IN PUBLIC MATTER

Suspect Attempt at "Buck Passing" and Veer Away From Proposition

Sensing an ax grinding scheme on the part of some person or faction, a majority of the architects who attended the regular monthly meeting of the Indianapolis Architects' Association at the Hoosier Athletic Club Wednesday night, March 12, became alertly wary, and while admiting that the organization should at all times stand ready to promote and further the architectural profession, nevertheless every precaution should be taken against acting too hastily lest there be a come-back.

It so happens that agitation has arisen once more at Indianapolis having to do with the courthouse building, the issue being whether the present structure with remodeling and alterations can be made adequate to meet the county's needs for years to come, or should be repleaced by a new structure either on the present site or some other to be selected.

The county council apparently has assumed the attitude that it is in need of expert advice in the matter as to how to proceed and what should be done, and in its seeming dilemma called in the Indiana Chapter of the American Institute of Architects. Several of the chapter officers and members met with the council and it was suggested that the chapter go into the matter and recommend procedure.

Since the proposition was such a big one and so much money would seemingly be involved Herbert Foltz, president of the chapter, called the attention of the Indianapolis association to the matter and said he felt that through joint action by both organizations a great public service could be performed in aiding the county officials, and such action would redound to the credit of the profession.

Mr. Foltz's suggestion at once aroused interest and caused a lively discussion. In the final analysis the concensus of opinion was that the officials were seeking not so much in the way of advice as they were to unload a responsibility, "pass the buck," have someone else "pull the chestnuts out of the fire for them," and be in a position to escape any criticism that might follow by saying it is not our suggestion, rather that of the architects' associations. It was felt that should a recommended scheme not meet with favor the architects would be accused of ulterior motives.

It was the understanding that the architects render their service and preliminary advice gratis. Most of the architects present expressed the opinion that there was but one thing for the county council to do and that was to employ an architect who would make a thorough survey of the situation and recommend what future action seemed best. The architects at the meeting felt that worth while data for the guidance of the county officers could not be compiled hurriedly on snap judgment, and for the architectural associations to attempt such action was to tread on dangerous ground, therefore the majority voted down a motion for the Indianapolis Architects' Association to enter upon any such scheme. However, the architects did favor militant, aggressive association action where necessary to advance the best interests of the architectural profession, the building industry and the welfare of the public.

In line with the latter it was voted to institute a Public Affairs Committee, which will be a standing one, and whose duty it will be to keep the association in touch with all proposed city ordinances having to do with building, public improvements as they relate to building and other matters of a similar nature. This committee is to consist of three members, these men being duly appointed to serve thereon: W. K. Eldridge, chairman; Merritt Harrison and Norman Hill.

The attention of the association was called to an alleged laxity on the part of some contractors in maintaining complete sanitary conditions on new construction operations and it was voted that all members of the Indianapolis Architects' Association include in the general contract a clause requiring the contractor to see to it that proper sanitary provisions are made and maintained at all times during the course of the building operation.

PENCIL SKETCHES

If it takes a ⅝-inch rod in a concrete slab to carry 75-pound load, how much grit does it take to tackle the average boarding house steak?

Do you suppose George would like a new application for I. S. A. from you? Send in one and see.

The land is filled with success wishers and so few success workers.

LOCAL MASON CONTRACTORS ORGANIZE AND LINK UP WITH NEW STATE ASSOCIATION

To Elect Officers Soon

The Evansville mason contractors held a special called meeting Wednesday night of this week and after a general discussion decided unanimously to organize a local mason contractors' association.

Those attending the gathering went even farther and passed a motion to affiliate with the Mason Contractors' Association of Indiana.

The charter members of the new organization are: William Abeler, Anderson & Veatch, Edward B. Goodge & Son, Kessler & Riebenthaler, Long & Smith, George L. Miller & Sons, Jacob P. Moers, John W. McFerran, Scarborough & Davies Co., George F. Taylor Co., Tri-State Contracting Co., J. Robert Wilkinson.

BAN PLACED ON WOOD SHINGLE ROOFING

New Evansville Building Regulations Strong for Fire Resistive Features

Every effort has been made in the formation of the new city building code for Evansville to lessen the fire menace. Not only has the zone requiring fire resistive construction been greatly extended but wood shingles for roofs throughout the city have been barred from use.

The new code calls for fireproof roofing on new structures and all roofs to be replaced must be of the same material. Another drastic change in the code is the filing of an affidavit with the procuring of a building permit, as to the true value of the structure intended. During the past, it is declared, certain contractors have under-estimated the value of the building to be erected and that Evansville has fallen far below the other cities of the state in figures when in reality the amounts represented here would have compared favorably with other cities had they been truthfully given in procuring the permit.

CEMENT POINTERS

A standard bag of cement contains 94 pounds net weight of cement. Four bags constitute a barrel of 399 pounds. One sack of portland cement is equal approximately to one cubic foot.

Always keep cement in a dry place.

Sand for concrete should be clean and well assorted in size.

Water that is fit to drink is suitable for use in concrete.

To prevent concrete from sticking to the forms and to aid in the removal of forms, crude oil, soft soap or whitewash should be painted on the forms before placing concrete, this being repeated each time the forms are used.

MOVE OFFICES

Well-Known Fort Wayne Contractor Removes to New Business Location

Max Irmscher and Sons, general contractors, among the most prominent contracting firms in northern Indiana, who have been located on Berry street, Fort Wayne, for years, announce the removal of their offices to 1113-1114 First National Bank Building that city which structure they just completed.

SPEAKS WELL FOR THE FUTURE

Educational Institutional Construction Ran to Large Percentage in 1923

Now and then one happens across an argument pertaining to building in which the subject at issue is what type of structure furnishes the largest proportion of the building volume over a year's period. Some hold to residences, others to office buildings, quite a few to industrial buildings, and so on. When one considers costs and the necessity of certain kinds of buildings it might seem that the great modern office structures-innumerable industrial interests, and millions of home builders, would probably, any one of these, stand out in front in the rolling of its individual building volume.

However, a recent survey of the Copper and Brass Research Association shows, after the compilation of figures for 1923 that school house construction led all the rest last year.

The figures as given out place the volume and per cent of the 1923 building effort, as regards type of structure, in this order:

Classification	Total	Pct.
Schools	$1,165,140,000	19.67
Apartments	947,670,000	16.00
Industrial Bldgs.	748,065,000	12.63
Dwellings	710,750,000	12.00
Hotels	643,820,000	10.87
Office Bldgs.	607,690,000	10.26
Hospitals	450,015,000	7.60
Churches	400,980,000	6.77
Public Bldgs.	248,770,000	4.20
Total	$5,922,900,000	100%

CONTRACTORS ELECT

Associations Name Officers for Ensuing Year

And now the Fort Wayne Builders' Exchange is all set for another year. A general election of officers of the member associations, and the unit organization, the Exchange itself, resulted as follows:

Mason Contractors' Association
President, Max Irmscher.
Vice-President, H. C. Offutt.
Secretary, George W. Schack.
Treasurer, Otto Gumper.

Builders' Association
President, Albert Weinmann.
Vice-President, Fred H. Grote.
Secretary, George W. Schack.
Treasurer, James McMullen.

TERRE HAUTE ARBITRATION CASE TO THE FORE AGAIN

Indianapolis Contractor Sues to Recover on Contract Award

Another chapter has been started in the Terre Haute arbitration case that hinges on Clause 45 of the General Conditions of the Standard General Contract Document of the A. I. A. This case, as will be remembered, had to do with the controversy between St. Anthony's Hospital, Architect J. G. Vrydagh of Terre Haute and the general contractor, the John A. Schumacher Company, Indianapolis, who was dismissed from the work without a chance for defense though the contract provided for arbitration in case of any misunderstanding with the owner.

Though the owner refused to countenance any suggestion for arbitration the same was resorted to as provided for under Clause 45 and an arbitration board consisting of Contractor Fred W. Jungclaus, appointed by the plaintiff; Engineer Robert W. Paige, appointed by the President of the Terre Haute Bar Association, and Architect H. Foltz, appointed by the other two arbiters, held formal sessions, swore witnesses and heard the evidence. A verdict for the Schumacher Company was rendered but the owner refused to recognize it.

As a result of the continued refusal of the owner, St. Anthony's Hospital, to pay the least heed to the provision and arbitration verdict suit for approximately $100,000 has been filed in Vigo superior court No. 2 against St. Anthony's Hospital by the John A. Schumacher Construction Company of Indianapolis. The suit is to collect an award, the $81,514.40, given the company by a board of arbitration December 20, 1923; for costs totaling $2,020.50, and for attorney fees amounting to $10,000. The interest brings the total to approximately $100,000.

Special interest attaches to this case as it is the first instance where arbitration clause 45 has been followed to the letter and carried through to an award verdict. Not only are building men in Indiana watching the outcome of this case but the attention of the country is focused on it since the actual life of this Standard Document is at stake and since it has been endorsed by national associations of architects, engineers and contractors, the final disposition of the case is of country-wide interest.

LUMBER STANDARDIZATION EFFORT MAKING GOOD HEADWAY

Big Conference to Be Held in April

Meeting for the purpose of formulating tentative recommendations on the points of the standardization program not disposed of at the general conference in Washington in December, the consulting committee on lumber standards made notable progress at a recent meeting in Chicago, adopting recommendations on grade marking, rough dry lumber sizes, inspection service, commercial nomenclature of species of trees; approving the shipping instructions, lumber abbreviations and definitions of defects and blemishes, and appointing sub-committees to consider further some of the questions upon which sufficient data are not yet in hand.

These special committees will later bring in reports on basic grades for yard lumber; basic grades for structural timbers; odd and short length lumber particularly with regard to the most suitable lengths for general and manufacturing use; mouldings, and shipping weights for lumber. Final recommendation was postponed in the latter case until the committee could have before it the shipping weights now used by the regional manufacturers' associations.

A further meeting of the central and consulting committees on lumber standards will be held March 20-22, preliminary to a third general conference which will be held under the auspices of the Departments of Commerce and Agriculture in Washington in April. This April conference, it is hoped, will mark the completion at least of yard lumber standardization. (Monthly Bulletin National Lumber Manufacturers' Association.)

INDIANAPOLIS BUILDING PERMITS

(Week of March 6th to March 13th)

***Furniture Building:** (rear add.), $26,800, 247 West Wash. Archt., Bacon & Tislow. Owner, J. F. Darmody, Pres. Darmody Candy Co. General contractor, J. E. McGaughey, American Central Life Bldg. Starting work. Brick.

Residence: (double), $10,000, 1918-20 No. Olney St. Owner, Silas Litteral, 5317 University Ave. General contract let to Woods-Richards Co., 920 Lemcke Bldg.

Residence: (double), $8,000, 1333-35 No. Tuxedo. Owner, Pearl Sanders, 1131 No. Dearborn. General contract let to F. L. Jordan, 5405 Guilford.

COURT HOLDS FOR ASSOCIATION

Bond of Member to Compel Observance of Association Regulations Ruled Valid

The long drawn out suit of the Calumet Building Trades Employers' Association against John Androff, plumber, and the New Amsterdam Insurance Co., on a bond to assure his living up to his obligations as an association member, has resulted in a verdict for the plaintiff. The suit was brought upon the allegation that Androff, by his actions during the strike of 1921, had forfeited his bond. When payment was demanded there was a hitch and the suit resulted.

The insurance company entered a claim that the bond was unlawful and in restraint of trade. However, Judge Crites, Hammond, after hearing the arguments held that the bond was good and within the law, but, the insurance countered with a claim that Androff was not guilty as charged. The case was venued to Valparaiso where Judge Crumpacker rendered a verdict in favor of the B. T. E. A. for $1,000 with interest and attorney fee costs additional.

Thirty days have been granted the insurance company in which to make an appeal to the Supreme Court.

NOW TO FIND THE SOURCE OF PAY

What's An Agreement and a Wage Scale That Stifles Work?

An agreement has been reached between the painting contractors and their union employes that means little or nothing toward creating an assuring stability, rather, on the face of things it looks like a dandy little trouble breeder.

Here is the gist of the agreement: The painters are to receive $55.00 for a five-day week, and if any of the other crafts are successful in negotiating an hourly wage scale of $1.50 the painters are to get the same concession.

There was a lot of loud talk and much gusto as to what the painter employers were going to do about readjusting the wage scale but when it came down to the last ditch and real action was called for there was a crumpling of the lines of defense and the employes put their demand across with little or no effort.

It surely was a grand blow-up and a deft stab at the association members who would that building construction costs be kept down to a level that would inspire confidence in financial circles and among prospective builders. Once more the Public has been made the goat and is expected to shell out unflinchingly. Everything will be all right as long as said Public falls for the scheme, but, the days are coming when the people are going to weary of "jumping through" every time a certain set of men takes it into its head to tilt wages. It is not the contractor who pays but the owner, and once the owner fails to provide the building project the contractor will not be in a position to provide the work that nets the weekly pay for the men who should be on the job.

CALUMET BUILDING PROGRESS

General Contractor M. V. Grim who has the work on the Hammond Dairy plant in charge is now entering upon the finishing stage.

Another blizzard crept in on Hammond a few days ago and kept the clamps down tight on building operations. Things ran along fine all through the fall and even into the late winter, and then just when everybody was sort of patting himself on the back that the worst was over along came the weather break that meant that the worst had just begun. All of which reminds one of the famous expression of Al Jolson, "You ain't seen nothing yet."

PROPOSE A PROJECT THAT IS A PROJECT

Electric Company Acquires Site for Gigantic Power Plant

Hammond has in prospect another real-for-sure large industrial power plant. The Edison Company has purchased a 74-acre plot along the lake shore a mile north of Lake Front Park. The site lies at the extreme northwest point of the State. The purchaser has in contemplation the erection of one of the largest electric power stations in the country for the purpose of furnishing electricity to northern Indiana cities, south Chicago and environs. It is reported that the owners have secured permission from the State authorities to erect an extensive break-water and will reclaim land along the lake front by filling in several acres of land.

The latest advice is that work on the new project will be started as soon as weather conditions will permit and that when the plant is completed it will represent an investment of several millions of dollars.

Washington: The Board of County Commissioners have voted in favor of building a thirty-room addition to the Daviess County Hospital. It is proposed to build the annex just east of the present building, leaving the old building for wards and a nurses' home.

GREATER TENDENCY TOWARD ARTISTIC DEVELOPMENT IN BIG OFFICE BUILDINGS CALLED TO THE ATTENTION OF INDIANA ARTISTS

Architect Cannon Acknowledges Benefits Contributed by Zoning and Engineering

The message of the architectural profession of its attempt to develop the modern skyscraper from a boxlike style of office building into a thing of beauty and an adornment to a city was sounded by Architect Fermor S. Cannon at a meeting of the Indiana Artists Club at Indianapolis Wednesday night, this week.

Mr. Cannon presented a new phase of architecture as it is being carried out today in the business districts of our modern cities where art is being catered to in new construction operations. This tact has been brought about through zoning schemes, one important feature of which provides for set-backs above certain specified heights.

The speaker stressed upon the fact that the present-day big city skyscraper, in its elemental form, with a broad base which narrows only by means of "set-backs" in the main structural walls, as the skyscraper rises, there is a resemblance to the Gothic cathedral in general appearance. The central part of the structure, rising towerlike "as high as the tower of Babel, if the architect so desires," is one of the features which helps to give dignity to the structural mass at the same time permitting the sunlight to penetrate to the street in opposition to the old canyonlike effect where one walks continually in the shadow in the district of tall office buildings.

Descriptions of scveral buildings erected in New York since the zoning law went into effect were given and the application was made to what can be done in Indianapolis in the future. That the development of the new architecture for office buildinggs owes much to the accomplishments of enggineers who have perfected the high-speed elevator, with its rate of 800 feet per minute under automatic control, was a tribute which Mr. Cannon felt should be paid by the architect.

Sealed Proposals

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given that the School City of Jasonville, Indiana, by its Board of School Trustees, will recive sealed bids for the construction of an addition to the present Jasonville High School and certain alterations to the present building which is located in the city of Jasonville, Greene County, Indiana, at the office of said Board in the Meridian Street School building at Jasonville, Indiana, until 2 P. M., April 14, 1924, in accordance with the plans and specifications prepared by Johnson, Miller, Miller & Yeager, architects, of Terre Haute, Indiana.

Separate bids will be received for the general construction of the building, and for the installation of the heating and plumbing systems of said building.

The total estimated cost of the general construction, heating and plumbing of work aforesaid is $51,000.

The plans and specifications are now on file at the office of Mr. E. A. O'Dell, superintendent of schools, Jasonville, Indiana, for inspection of the bidders, and additional copies of said plans and specifications may be obtained at the office of said architects at 30 North Fifth street, Terre Haute, Indiana, and in the office of the State Board of Accounts, State House, Indianapolis, Indiana.

All bids must be submitted on forms as prescribed by the State Board of Accounts and with a non-collusion affidavit. The right is reserved to reject any and all bids. Each bidder must deposit with his bid his certified check, made payable to the said Board in an amount equal to four per cent (4) of said bid, as a guarantee that he will enter into a contract and bond to carry on said work according to the plans and specifications if said contract be awarded to him. In the event the bidder fails or refuses to enter into a contract and bond, if a contract be awarded him, within ten days after the notice of the acceptance of his bid, said check and the amount of money, represented thereby shall become the property of the School City of Jasonville which sum is agreed upon as liquidated damages for the failure of the bidder to enter into said contract and furnish bond for its faithful performance.

Each bid must be enclosed in an envelope and the name of the bidder placed on the outside thereof.

School City of Jasonville, Indiana, by:
H. E. BERNS, President,
EDWARD KEERS, Secretary,
W. V. SIMS, Treasurer.
Dated this 5th day of March, 1924.
March 15, 22, 29, 1924.

SCHOOLHOUSE

NOTICE TO CONTRACTORS

Notice is hereby given that the School Board of the City of Batesville, Ripley County, Indiana, will receive sealed bids at the office of the secretary, which office will be moved to The Community Room of the Batesville Memorial Building on the date hereafter mentioned, in the City of Batesville, Indiana, until 10:30 A. M., Monday, April 7, 1924, for the furnishing of all materials and performing all labor for the construction and completion of the Batesville High School Building; also for the installation of all plumbing and sewerage, heating and ventilating and all wiring for said school building, which is to be located in said city corporation of Batesville, Indiana. Such construction and installations shall follow the plans and specifications approved by and now on file in the office of the State Board of Accounts, Secretary of the School Board, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to the treasurer, Mr. L. E. Howard, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the School Board of Batesville, Indiana, for the contract, and furnish sufficient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the School Board as liquidated damages. The estimated cost of the building complete is $46,500.00.

Each bidder must also file with the Secretary of the School Board when he files his bid, the usual statutory affidavit.

The School Board reserves the right to reject any or all bids, and waive any defects or informality if deemed in the interest of the school city of Batesville, Indiana. So to be.

Dated this tenth day of March, 1924.
Dr. HARRY TIMMERMANN, Pres.,
H. F. BUCK, Secretary,
L. E. HOWARD, Treasurer,

SUGGESTED MINIMUM LIVE LOAD REQUIREMENTS

Tentative Report of Building Code Committee of U. S. Department of Commerce

The department of commerce building code committee wishes to emphasize that the following report is strictly tentative in nature. It is based upon the best information seen possible to obtain to-date and is submitted merely for criticism and discussion by those interested in building codes and competent to discuss its recommendations.

It is not unlikely that the final report on this subject, revised with regard to the discussion thus obtained, will vary considerably from that following, and therefore any premature adoption in whole or in part of this suggestion by those revising or drafting building codes is advised against.

Recommended Load Requirements

Section 1. Definitions

1. Dead Load—The dead load in a building includes the weight of walls, permanent partitions, framing, floors, roofs, and all other permanent construction entering into a building.

2. Live Load—The live loads include all loads except dead loads.

Sec. 2. General

Buildings shall be of sufficient strength in all parts to support safely the imposed live loads, in addition to the dead load of the building, provided, however, that no building or part of a building shall be designed to support live loads less than those specified in the following sections.

Sec. 3. Human Occupancy

1. For rooms of private dwellings, hospital rooms and wards, small rooms in hotels, lodging and tenement houses, and in similar locations; and for rooms with fixed seats, as in churches, school classrooms, reading rooms, museums, art galleries, and theaters, the minimum live load shall be taken as forty pounds per square foot uniformly distributed, except that where floors of one and two family dwellings are of monolithic type or of solid or ribbed slabs the live load may be taken as thirty pounds per square foot.

2. For floors for office purposes the minimum live load shall be taken as fifty pounds per square foot, uniformly distributed. Provision shall be made, however, for a load of 2,500 pounds concentrated upon five square feet wherever this load would produce stresses greater than the fifty-pound distributed load.

3. For aisles, corridors, lobbies, public spaces in hotels, banquet rooms, halls without fixed seats, grandstands, theater stages, stairways, fire escapes or exit passageways, and other spaces where crowds of people are likely to assemble, the minimum live load shall be taken as 100 pounds per square foot uniformly distributed. This requirement shall not apply, however, to such spaces in private dwellings, for which the minimum live load shall be taken as in paragraph 1 of this section.

Sec. 4. Industrial or Commercial Occupancy

For floors used for industrial or commercial purposes, or purposes other than previously mentioned, the live load shall be taken as the maximum caused by the use which the building is to serve. The following loads shall be taken as the minimum live loads for the occupancies listed, and loads at least shall be assumed for uses similar in nature to those listed in this section.

Floors used for—	(lbs. per sq. ft.) Minimum live load
Storage purposes	100
Manufacturing (light)	75
Printing plants	100
Wholesale stores (light merchandise)	100
Retail sales rooms (light merchandise)	75
Stables	75
Garages—	
All types of vehicles	100
Passenger cars only	80

Sec. 5. Roof Loads

Roofs having a rise of four inches or less per foot shall be proportioned for a vertical live load of thirty pounds per square foot of horizontal projection applied to any or all slopes. With a rise of more than four inches and less than twelve inches per foot a vertical live load of twenty pounds on the horizontal projection shall be assumed. If the rise exceeds twelve inches per foot, provision shall be made for a wind force acting normal to the roof surface (on one slope at a time) of fifteen pounds per square foot of such surface.

Sec. 6. Allowance for Movable Partition Loads

Floors in office and public buildings and in other buildings subject to shifting of partitions without reference to arrangement of floor beams or girders shall be designed to support, in addition to other loads, a single partition weighing not less than 300 pounds per linear foot, placed in any possible position.

Sec. 7. Reductions in Live Loads

Except in buildings for storage purposes the following reductions in assumed floor live loads are permissible in designing all columns, girders, trusses, walls, piers and foundations.

Carrying one floor	No reduction
Carrying two floors	10% reduction
Carrying three floors	20% reduction
Carrying four floors	30% reduction
Carrying five floors	40% reduction
Carrying six or more fl'rs	50% reduction

Sec. 8. Wind Pressure

For purposes of design the wind pressure upon all vertical plane surfaces of all buildings and structures shall be taken at not less than fifteen pounds per square foot for those portions less than forty feet above ground, and at not less than thirty pounds per square foot for those portions more than forty feet above ground.

The wind pressure upon sprinkler tanks, sky signs, or upon similar exposed structures shall be taken at not less than thirty pounds per square foot of plane surface, acting in any direction. In calculating the wind pressure on circular tanks or stacks this pressure shall be assumed to act on six-tenths of the projected area, including the roof, and in the case of steel tanks the hemispherical bottom.

Where it shall appear that a building or structure will be exposed to the full force of the wind throughout its entire height and width the pressure upon all vertical surfaces thus exposed shall be taken at not less than thirty pounds per square foot.

Sec. 9. Live Loads to be Posted

The live load for which each floor of a commercial or industrial building is designed shall be certified by the building inspector and shall be conspicuously posted in the building, using durable metal signs. The owner shall be responsible for keeping the actual loads below the certified limits. Adequate measures shall also be taken by the building inspector to insure that these loadings are not exceeded.

Sec. 10 Occupancy Permits

Occupancy permits for buildings hereafter erected shall not be issued until the necessary floor-load signs have been installed. No change in the occupancy of a building now or hereafter erected shall be made until a revised occupancy permit has been issued by the building inspector certifying that the floors are suitable for the loads characteristic of the proposed occupancy.

Part III.—Appendix

Paragraph 1. Present Code Requirements

Early in the committee's work on live loads an extensive investigation was made of existing floor-load requirements. The provisions of 109 building codes were carefully examined and their application in local practice checked by correspondence with building inspectors.

Community Building, Flora, Ind.
(Drawn from actual photograph)
This structure 80x140 ft. was built of Hoosier Mat Face Tile throughout, including foundation and interior finish. Auditorium seats 2,000.

Better Buildings at Lower Cost

HOOSIER Hollow Building Tile, ideal for fireproof economical construction. These special designed 5-wall, glazed, vitrified, fire-clay tile have enormous strength, permitting use in all kinds of construction. Beauty of finish renders them adaptable for an almost unlimited variety of building projects.

Saves 25% On Cost

Hoosier Tile will save at least 25% in cost over brick construction; can be erected in small fraction of time required for other construction, thus saving labor cost.

Wide Range of Usefulness

Architects and Contractors will find HOOSIER Tile adaptable for factories, garages, stores, churches, schools, community houses and gymnasiums. This material, in the beautiful mat-face finish, vies with tapestry brick in appearance when used in dwellings, whether large or small.

Let us submit estimates on your specifications, as proof of HOOSIER TILE superiority. Samples furnished free. Write for descriptive literature.

NEW BUILDING CODE BENEFITS NOW BECOMING APPARENT

Reduction of Insurance Rates to Mean Big Saving to Citizens

Not only is Evansville assured of better building construction requirements and regulations under the new building code, which was adopted by the city council two weeks ago and signed by the mayor the past week, but the city will also be given a second insurance rating which will mean a reduction of 8.75 per cent from the present rate.

The code will become effective thirty days after its publication.

On account of its great length and volume the code is to be published in pamphlet form. Copy is now in the hands of the printer and the first publication will be made within the next two weeks. It is expected the code will finally become effective on or about May 1.

With the signing of the code, Mayor Elmendorf notified J. S. Johnson, secretary of the Chamber of Commerce, and suggested that the insurance underwriters of the state be notified. The underwriters, more than five years ago, promised to raise Evansville from third class to second class as soon as certain specifications were carried out, the building code being the principal change suggested. The other specifications outlined by the underwriters were carried out more than a year ago and the final adoption of the code removes the last obstacle toward a new insurance rating here.

The code which contains 56 chapters, was prepared by Building Inspector Ed Kerth. More than seven months was spent in its preparation. Twenty-two hours were spent in the first reading before the city council.

One of the most drastic changes in the new code is the removal of jurisdiction of the building department from the board of works to the board of public safety. The fire proof building zone is another big feature that is largely responsible for the new insurance rating.

PROSPECTS ENCOURAGING

Evidence Developing to Make Building Outlook Good

Local builders and building material supply men are convinced that construction activity in and around Evansville this spring will hold its own with past performances unless unforeseen developments arise to interfere with the promising prospective indications. Even at this early stage of the game several prospects of goodly size have appeared and give promise of early maturity. Chief of these is the new home of the Y. W. C. A. plans for which are well under way and it should not be long before bids are asked on this $250,000 project. The owner is now preparing to start active operations toward clearing the site so that building work may be started as soon as the general contract is awarded.

While no large contracts have been placed recently there has been considerable figuring going on and some new house and remodeling work has been started. The local architects are busy on new plans and there should be some active figuring of contracts along about April 1st, or soon thereafter.

FIRE CHIEF CONDEMNS WOOD SHINGLE ROOF

Advocates City Ordinance To Prevent Use of Such Shingles

Here is another crack aimed at the wood shingle for roofing purposes. Many other cities have eliminated the wooden shingle roof as too much of a fire hazzard with which to trifle. Fire Chief Henry Hilbrecht now comes forward in the defense of Ft. Wayne and proposes that the city council pass an ordinance that will hereafter ban the use of wooden shingles in local house construction. Then to back up his argument he advances figures to show what a menace the wood shingle roof is contending that of 1,071 fires in Ft. Wayne last year 483 of these were directly traceable to sparks falling on wooden shingle roofs. Hence, the ban he proposes.

BIG BURST OF BUILDING CROPS OUT DURING MARCH

Construction Activity Going Big

March promises not only to establish a new building record for Ft. Wayne for the third month of the year but may also run up figures well in excess of a million dollars estimated expenditure in new building projects which would make one of the best monthly records on building activity ever posted on the city books.

Up to and including March 18th, permits totaling $693,330 had been issued by the city building inspection department.

Of this amount new homes have accounted for the greater part, the figures showing that more than fifty new residence properties have been started during the present month.

TALK OF NEW TRACTIONAL TERMINAL DEPOT GROWS

Much Needed Improvement Now Under Serious Consideration

Though still more or less embryonic, assurance is given that the plans for a fine new traction depot for Ft. Wayne are in the making. Such a project has been under contemplation by the interurban officials for sometime and the only draw back to its immediate maturity is the uncompleted financial arrangements. It may be that the project will not develop definitely this year but an effort is to be made to build as soon as possible. Several of the lines entering Ft. Wayne are at present in the hands of receivers and the possibility of entering into a terminal agreement with a receiver without court action further complicates the situation.

INCREASED DEMANDS BRING ON BUILDING TROUBLES

Five Crafts Out

Plasterers, iron workers, sheet metal workers, composition roofers and cement finishers are on strike in Pittsburgh according to the Builders' Bulletin, published in that city. The plasterers are demanding $13.00 per day for a five-day week. They have been offered $12.00 a day for a five and one-half day week by the employers. The iron workers are demanding $11.00 per day and have been offered $10.00 by the employers.

The carpenters agreed to continue at work at the old rate of $9.60 per day for fifteen days while the offer made by the contractors to give them $1.30 per hour is being considered. Sheet metal workers are demanding $11.00 per day. The steam fitters have been granted an increase to $11.00 per day and the slate roofers have been advanced to $11.50.

INDIANAPOLIS BUILDING FIGURES GAIN FOR FEBRUARY REFLECTED AROUND STATE

Unusual Early Season Movement Recorded in Most of the Larger Cities

When Indianapolis came through at the end of February with a fine big month's new building total she did a big part toward rolling up a fine state total that amounted to $4,935,282, a 78 per cent gain over January and 51 per cent increase over the corresponding period in 1923.

This fine showing was made possible when seven of the ten Indiana cities reporting in their month's building construction volume registered substantial gains over February, a year ago, and nine of them exceeded the January figures for this year. Hammond was the only city of them all to register a loss clear across the board. Notable gains over both January, 1924 and February, 1923, were made by Elkhart, Ft. Wayne and Muncie, too, while not registering quite as strongly as the other cities, nevertheless, held their own nicely.

The state so far has made a good start and with any sort of a favorable break ought to come close to at least the 1923 yearly building figures which is the best record ever made in Indiana.

INDIANAPOLIS CONTRACTORS UNALTERABLY OPPOSED TO SHORTENING OF WORKING TIME

To Fight That Issue to a Finish

Though building trades wage scale negotiations in Indianapolis have not gotten far as yet in the way of setlements the contractor employers are determined to exert all their strength if necessary in opposing suggestions of certain building trade unions for a five-day week.

Contractors say the demand for a five-day week, as presented by some unions, and the unanimous request for increased wage scales would naturally boost cost of construction here and further delay many building projects, which have been held up repeatedly because of high costs.

In opposition to an insistence of a curtailment of working time it is intimated that if necessary contractors will cease operations in order to hold working time to the present basis.

Practically all the building crafts in Indianapolis have asked for an increased wage scale for the coming season but no definite plans for combating these demands have been worked out.

Meetings are being held frequently now by contractors on one side and by tradesmen on the other. They are conducting preliminary negotiations, with a view to reaching a scale agreement before the existing contracts expire April 1 and May 1.

While the scale of wages is still in an unsettled state and the final result can not be predicted at this time, assurance is given that there will be no five working days a week basis inaugurated in the Indianapolis building field.

SANITARY ENGINEERS OF INDIANA ENDORSE EFFORT OF STATE BUILDING COUNCIL

Also Show Inclination to Go Along With Associated Building Contractors of Indiana

Surface appearances tend to the belief that the Associated Building Contractors of Indiana have aroused a new interest and are to be backed up strongly by a new element, namely the master plumbers of the state.

It all came about at the annual convention of the Indiana Sanitary Engineers held at West Baden at which time the message of the A. B. C. of Indiana was carried directly to those building construction employers who handle the sanitary problems of structures. The message of the aim and purpose of and need for the big state contractors association was sounded by Field Representative J. H. Owens of the State A. B. C's., who backed his remarks up with an outline of achievements consummated.

Particular stress was put upon legislative activities and attention directed to the establishment of the Administrative Building Council of Indiana and that which it is seeking to accomplish.

This latter brought forth a lengthy discussion during which certain delegates raised objections to the attempt the council might make to impose too drastic regulations and requirements. However, such opposition was finally overcome when it was explained that the sole purpose was to standardize requirements and regulations in the interest of better building construction for the benefit of public welfare. A motion was then made and adopted, practically unanimously, but one negative vote being cast, to endorse the action of the Administration Council and get behind it in its effort to establish standard state building requirements.

INDIANAPOLIS BUILDING PERMITS

Week of March 13th to March 20th

*Apartment Building (40 apts.), $70,000.00, 2 sty. & bas., 43x195, 1309 N. Pennsylvania. Owner, The Prinscilla Realty Co., care Contractor. Archt. and general contractor, Lynn B. Millikan, 501 N. Delaware St. Start work shortly. Brick.

Residences: (5), at 5338 Broadway, cost $6,500, brick veneer; at 410 N. Euclid Ave., cost $5,200.00; at 918 Riley, cost $5,200.00; at 5539 Carrollton, cost $5,200.00; at 806 N. Riley, cost $5,800. Frame. Owner and builder, R. H. Shelhorn, 4836 College Ave. Owner builds.

LABOR MATTERS BIG FACTOR IN FUTURE BUILDING PROSPECT

Wage Affairs Topsy-Turvy

Unsettled labor conditions in the Calumet district are showing a tendency to work a retarding influence on prospective building operations. Generally at this time of the year the architects' office begin to take on considerable activity; prospective builders are not infrequent visitors, then there are preliminary plans and tentative estimates being gotten out, and even bids are beginning to be called for on plans that have already been prepared. However, the architects this year report that there is a lack of inquiries from the men who usually begin to grow interested about this time in contemplated work. Those who are contemplating building are inclined to be slow in reaching a decision whether to build this year or not, others who had intended to build seem to be inclined to allow their projects to go over till later before entering actively upon building operations. The "fly in the ointment" seems to be the unsettled state of the labor wage scale.

Many men interested in building affairs in the Calumet district are of the opinion that the various union building trades crafts have made a serious mistake in putting forth increased wage demands this spring. There is no question but that these demands have caused an uneasiness among prospective builders, an uneasiness that has made itself apparent in the decreased inquiries that are noticeable in architectural circles.

There is no way of telling at this stage of the game just what the building outcome will be, but the concensus of opinion in building circles is that the building trades mechanics would have been better off had they been content to hold the 1923 scale levels rather than to have demanded an increase in 1924. It is felt that such a move would have held construction costs down, would have encourage building, and in the end would have provided the men with plenty of work to keep them all busy throughout the year. There is no question but that advanced wage scales will cut off considerable building especially in the home building field where even now costs have run up prices to such an extent that the medium salaried man finds it almost impossible to try to build or buy a home.

ON THE JOB AT CHICAGO

Seek to Clear Up Vexing Muddle

An effort is being exerted in a determined way in Chicago to bring about peace in the union labor ranks of the building crafts. Seventeen national presidents of the various building trades unions have been meeting in the Windy City in an endeavor to straighten things out and decide just who is who of the two groups who have been striving for supremacy in the two building trades councils. One of the groups is composed of the men who voted to accept the Landis Award as a basis for computing wage scales, the other is made up of those who refused to recognize the Award of the noted jurist. The men up above know that no progress can be made as long as the split exists in their ranks and they are anxious to close up the breach as soon as possible.

ACTION OF PAINTER BOSSES ONLY AGGRAVATED WAGE SITUATION

Draws Much Adverse Comment

When the painter bosses decided to jump through and sign up the agreement with the union employes at an advanced figure they may have thought they were getting out from under and that everything for them would be straightened up. However, such action has not tended to clear up the situation at all. Many contractors are very much dissatisfied with the outcome of the painting wage problem and openly express the opinion that the men who signed up did not have backbone enough to stick to their guns, further, had the painter bosses been in better relationship, had more confidence in each other, they never would have stooped to a compromise.

The painting contractors over at Gary did not buckle up so easily, instead, they are holding a solid front for the $1.25 per hour scale and the end is not in sight yet.

There still remain the carpenters, electricians and laborers who are to be reckoned with and the general contractors are contending that they will resist any and all advanced demands for wages that these crafts may come forward with.

There were several meetings this week of general contractors and also the Central Council, the latter body composed of representative contractors of Gary, Hammond, Indiana Harbor, East Chicago and Whiting. At those meetings plans were talked over that are to guide the building trades employers in their negotiations with the unions.

ALWAYS SOME WHO BELIEVE IN MAKING THE SECRETARY WORK

Why Not Be Prompt With Dues

Someone has suggested that, now that investigations are in order, it might be well to have a committee appointed to find out what the contractors have done with all the money they made during the 1923 building campaign. Many of them appear to be in sore straits for it is the hardest thing in the world to get them to come across with their association dues. Could it be they were playing oil across the boards, politics, or getting mixed up in other fortune producing ventures?

MUST HAVE HEARD THAT POPULAR SONG, "LINGER AWHILE"

Anyway Winter Hangs On

Winter still lingers in the lap of spring, bold creature. Not only that but the blustery fellow seems intent on making the sitting a rather permanent affair. About every other day he blows his icy breath across the scene, and it congealing turns to veils of snow upon which the sun has little effect under the contrary attitude of Old Boreas. There is still a lot of frost in the ground which makes foundation excavating a difficult matter.

Sealed Proposals

SCHOOL GYMNASIUM NOTICE FOR BIDS

Notice is hereby given that the Board of Trustees of the Consolidated School Town of New Harmony and Harmony Township, in Posey County, State of Indiana, will receive sealed bids or proposals for the construction of the Ribeyro School Gymnasium, according to the plans and specificaitons now on file in the office of George C. Taylor, Secretary of said Board, at New Harmony, Indiana, and the office of H. E. Boyle & Co., Architects, Evansville, Ind.

Bids will be received at the office of George C. Taylor, Secretary of said Board, at New Harmony, Indiana, until ten o'clock in the forenoon on Tuesday, the 15th day of April, 1924.

Proposals or bids are to be sealed, addressed to George C. Taylor, Secretary of the Consolidated School Board of New Harmony and Harmony Township, Indiana, and marked "Proposals for Ribeyre School Gymnasium" and delivered at the above mentioned office before the time above stated.

Bids will be received on separate items as follows:

1st—On the buildings complete, except the plumbing, heating and electrical wiring.
2nd—On the plumbing system complete.
3rd—On the heating system complete
4th—Separate proposals will be received on the brick work, carpenter work, concrete work, steel, painting, plastering, excavating and hardware.
5th—On the electrical lighting system complete.

The "General Conditions" of the specifications on file shall apply to all contracts that may be made for any part or parts of the said building.

Each bidder must file with the Secretary of the said Board when he files his bid, the usual statutory affidavit, and a certified check, or bid bond, in an amount not less than 2% of the amount of the proposal, as a guaranty that he will accept said bid and carry out the construction of said work.

All proposals are to be binding on the contractors for a period of ten (10) days, and all contracts entered into are to be subject to provisions of an act of the General Assembly entitled "An Act concerning contracts attempted to be entered into where bonds have been afterwards disallowed by the State Board of Tax Commissioners." Approved March 6, 1923, and found on Page 257 of the Acts of 1923.

The successful bidder will be required to furnish either a Surety Company or personal bond, acceptable to the said Board of Trustees, in an amount equal to the contract price, insuring the faithful completion of said building according to the contract.

The Board reserves the right to reject any and all bids, and re-advertise said building.

CHARLES FORD,
GEORGE C. TAYLOR,
MILES A. PERRY,
WILBUR BALDWIN,
Board of Trustees of the Consolidated School Town of New Harmony and Harmony Township, Posey County, Ind.

Dated this the 17th day of March, 1924.
March 22-29-April 5.

tees, will recive sealed bids for the construction of an addition to the present Jasonville High School and certain alterations to the present building which is located in the city of Jasonville, Greene County, Indiana, at the office of said Board in the Meridian Street School building at Jasonville, Indiana, until 2 P. M., April 14, 1924, in accordance with the plans and specifications prepared by Johnson, Miller, Miller & Yeager, architects, of Terre Haute, Indiana.

Separate bids will be received for the general construction of the building, and for the installation of the heating and plumbing systems of said building.

The total estimated cost of the general construction, heating and plumbing of work aforesaid is $51,000.

The plans and specifications are now on file at the office of Mr. E. A. O'Dell, superintendent of schools, Jasonville, Indiana, for inspection of the bidders, and additional copies of said plans and specifications may be obtained at the office of said architects at 30 North Fifth street, Terre Haute, Indiana, and in the office of the State Board of Accounts, State House, Indianapolis, Indiana.

All bids must be submitted on forms as prescribed by the State Board of Accounts and with a non-collusion affidavit. The right is reserved to reject any and all bids. Each bidder must deposit with his bid his certified check, made payable to the said Board in an amount equal to four per cent (4) of said bid, as a guarantee that he will enter into a contract and bond to carry on said work according to the plans and specifications if said contract be awarded to him. In the event the bidder fails or refuses to enter into a contract and bond, if a contract be awarded him, within ten days after the notice of the acceptance of his bid, said check and the amount of money, represented thereby shall become the property of the School City of Jasonville which sum is agreed upon as liquidated damages for the failure of the bidder to enter into said contract and furnish bond for its faithful performance.

Each bid must be enclosed in an envelope and the name of the bidder placed on the outside thereof.

School City of Jasonville, Indiana, by:

H. E. BERNS, President,
EDWARD KEERS, Secretary,
W. V. SIMS, Treasurer.

Dated this 5th day of March, 1924.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given, that the undersigned, Trustee VanBuren School Township, Pulaski County, Indiana, will receive sealed bids at his office in Star City in said township until one o'clock P. M.

SATURDAY, APRIL 12, 1924

for the furnishing of all materials and labor for the building, erection, and completion of a one-story brick school building, with basement, in the town of Thornhope, Indiana, and a two-story addition or annex to the present school building in Star City, Indiana, both of said buildings to be built in accordance with plans and specifications on file in the office of the said Trustee.

Bids to be made separately on each building, but a joint bid may be made to include both. A certified check in the sum of $1,000.00, payable to D. A. Skillen, Trustee, must accompany each bid for each building as a guaranty that bidder to whom contract is awarded will enter into contract and give bond according to law within ten days after notice is given him that he has been awarded contract for said work.

At the same time and place sealed bids will be received for the heating and ventilation of each of the above named buildings, each bid to be accompanied by a certified check payable to D. A. Skillen, Trustee, in the sum of $300.00, conditioned as for general contract. Separate bids to be made on each job, but a joint bid may be made to include both.

At the same time and place sealed bids will be received for the plumbing and water supply for each of the above named buildings, each bid to be accompanied by a certified check in the sum of $200.00 for each building, payable to D. A. Skillen, Trustee, conditioned as for general contract. Separate bids to be made on each job, but a joint bid may be made to include both. A Joint bid may be made on heating and ventilation, and on water supply and plumbing on both buildings.

At the same time and place sealed bids will be received for the electrical work for each of the above named buildings, each bid to be accompanied by a certified check in the sum of $200.00 for each building, payable to D. A. Skillen, Trustee, conditioned as for general contract. A joint bid may be made on both.

Plans and specificationus for the above named work may be had for the use of bidders from the Trustee, or Samuel Young, Architect, Monticello, Indiana, upon a deposit of $10.00 for each building on general contract, and $5.00 each for heating and ventilating, plumbing and water supply, and electrical work for each building, all of which will be returned to contractor upon return of plans and specifications in good condition on or before date of letting and provided contractor submits bid on work for which he receives plans.

The right is reserved to reject any or all bids.

SCHOOLHOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that the School Board of the City of Batesville, Ripley County, Indiana, will receive sealed bids at the office of the secretary, which office will be moved to The Community Room of the Batesville Memorial Building on the date hereafter mentioned, in the City of Batesville, Indiana, until 10:30 A. M., Monday, April 7, 1924, for the furnishing of all materials and performing all labor for the construction and completion of the Batesville High School Building; also for the installation of all plumbing and sewerage, heating and ventilating and all wiring for said school building, which is to be located in said city corporation of Batesville, Indiana. Such construction and installations shall follow the plans and specifications approved by and now on file in the office of the State Board of Accounts, Secretary of the School Board, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to the treasurer, Mr. L. E. Howard, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the School Board of Batesville, Indiana, for the contract, and furnish sufficient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the School Board as liquidated damages. The estimated cost of the building complete is $46,500.00.

Each bidder must also file with the Secretary of the School Board when he files his bid, the usual statutory affidavit.

The School Board reserves the right to reject any or all bids, and waive any defects or informality if deemed in the interest of the school city of Batesville, Indiana. So to be.

Dated this tenth day of March, 1924.

A REMEDY PROPOSED TO ELIMINATE A MUCH ABUSED FEATURE

"Or Equal" in Specifications Intended to Broaden Has Developed Much Annoyance

(From The Michigan Architect and Engineer)

The use of the words **or equal** in many specifications of architects and engineers has been a constant source of abuse and complaint on the part of architects, engineers, owners, manufacturers and contractors, and many of the best architectural and engineering firms have been seeking a way to avoid this undesirable feature.

Unquestionably the use of the words **or equal** was originally intended to broaden the scope of the specifications and to give the architect and engineer latitude in determining which materials or products represented the biggest value to the owner for the purpose for which they were intended, and to avoid many other abuses which it was assumed might occur if the specifications were drawn up so that only one kind of material or make of product would be acceptable under the specifications.

It was also presumed that it would be fairest to the bidder. However, the cure has, in most cases proved worse than the disease.

Many of the bad consequences of the use of the words **or equal** have developed because of the usual method of awarding contracts by the bidding system.

The bidding system is an invitation to manufacturers of materials and equipment to give their lowest prices, and, to the contractor, to use these materials and furnish the labor and customary contracting equipment.

The result is a tendency on the part of some contractors in figuring specifications to ask themselves:

"How can I be low bidder and get the job?"

Then, after he gets the job:

"What can I get away with through the latitude allowed in the words **or equal**, so as to come out on the job and make some money on it?"

If the contractor is permitted to make substitutions, the bidding has not been fair to the other contractors who figured in strict accordance with the specifications and quoted only on materials which the architect or engineer specified.

It is usually the case, therefore, that the low bidder is not the one who gets the contract, but the lowest price gets it.

Unquestionably, it is the object of the architect and engineer to give fair play in their specifications, and write them up with the desire that all bidders shall be on an equal and even basis.

Assuming this to be a fact, how can specifications be written eliminating the words **or equal** and yet not tie up the job to any particular material, product or apparatus, and yet not eliminate any other material , product or apparatus which later on may be found better suited for the work?

The purpose of this article is to point a way.

It is proposed that architects and engineers draw up their specifications and under each class or division of the work incorporate the following paragraph:

> The contractor (or bidder) is required to give a basic bid on all materials, products and apparatus of the qualities and makes specified and in addition to the basic bid, the contractor is further requested to give alternate prices on other makes, which will, in his opinion conform to the specifications, stating the additions or deductions involved in the furnishing of these alternate makes and specifying the makes on which these alternates are based. Where no alternates are given in the bids, the makes specified must be furnished and installed.

What would be the result if architects and engineers were to follow out the above suggestion of requiring a basic bid?

1st. The basic bid would determine the real low bidder.

2nd. If, for any reason it was desired to take advantage of some of the alternate bids, the differencein cost would have been previously established, thereby avoiding the annoyance which usually results in securing these adjustments.

3rd. As is now the case as soon as specifications are sisued to contractors, the different manufacturers seek an opportunity to have their material accepted, the architect or engineer could advise them that if the contractors will give alternate bids on their materials, products or apparatus, consideration will be given their products, or alternate bids could be requested on any particular product.

4th. The bids would then be just and equal because all contractors would figure on the same materials, products and apparatus in their basic bids.

5th. If the bids exceeded the appropriation, without calling for new bids, the architect or engineer could refer to these alternates and determine the reductions which would be available.

6th. In event the owner feels justified or disposed to spend a greater amount for a higher grade of product, than that specified by the architect or engineer, the amount could be readily determined.

7th. While the low bidder on the basic bid may not have quoted on all of the makes or qualities available, other bids may incorporate most of them. The differential could, therefore, be easily determined by referring to the other bids. In apparatus and materials wide variations in qualities and designs exist.

8th. There would be a material saving in the time of compiling bids to determine the low bidder, for, at the same time of tabulation, only the bids on the basic specifications should be considered to determine the low bidder. The additions or deductions for the alternates could then be determined and a careful study or survey made by the architect or engineer at his convenience to determine the relative values and adaptabilities of these materials, products or apparatus.

9th. And most important—the specifying of one make or kind of material is a recommendation of that particular product to the owner by the architect or engineer writing the specifications. Often the owner insists, for some reason of his own, on another product. In the specifying of one product only, the architect or engineer has placed himself in a position where he may tell the owner that this is what he recommends. If the owner wants to substitute, it is up to him and he takes the responsibility accordingly. In specifications, as written with the words **or equal** it is an invitation to the owner to consider himself in the light of a judge as to what is equal because the architect or engineer has made no definite recommendation on this point.

10th. In specifying only one make of product or apparatus, the relation between the producer of this product or apparatus and the architect or engineer would be much closer, because the latter could demand greater responsibility on the part of the producer of material, products and apparatuus to meet with the spirit of his specifications.

It is rapidly being recognized that the use of the words **or equal** shows a weakness on the part of a specification writer because they are in about the same position as physicians who do not know whether to write a prescription for castor oil or paregoric.

Specification experts certainly should know what is best suited for the installation and prescribe accordingly.

The use of the words **or equal** encourages the use of substitutions.

The use of the words **or equal** has obliged many manufacturers to reduce the quality of products in order to meet low priced competition.

Complete and concise specifications make for clean, close and even bidding, and, to a great extent eliminates the elements of chance in bidding, and assures the contractor a legitimate margin of profit which he must have, and at the same time guarantees to the owner, value for the money he has expended.

An architect or engineer is in the same relative situation as a doctor, who must diagnose his case correctly and write his prescription so that the pharmacist will know just how it is to be filled.

Substitutions have killed many a doctor's patient and ruined many an architect's or engineer's job.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

BUILDING LABOR SITUATION IN INDIANA UNSETTLED

Practically in Accord With National Condition, But Hope for Satisfactory Adjustment Held Out

Though in Evansville and Indiana there is at present a somewhat uncertain tone regarding the future building labor situation, due to the fact that most of the working agreements and wage scales the various trades employers have with their employes expire April 1 or May 1, and no definite terms have been made for 1924, there are those who look for satisfactory settlements within the next few days.

The Indiana situation is similar to the one existing throughout the country and while the influences that bear on the future are annoying to a certain extent they are not considered seriously menacing.

According to a national survey of building labor conditions, made by a prominent building construction financing organization the present situation is considered generally favorable.

The findings of the survey show (1) Wages generally well established with slight upward tendencies in larger cities where prospective building conditions are large. (2) General employment at peak wages with especially pressing demand for bricklayers and plasterers. (3) Possible shortage of common labor with the development of activities now indicated by the unprecedented volume of building permits. (4) Possibility of ensuing difficulties through jurisdictional dispute between Carpenters' union and Sheet Metal Workers over installation of metal trim work. (5) Successful and significant co-operation of building trades unions and contractors in establishing building trades apprenticeship schools to help relieve the labor shortage.

"One of the factors in promulgating the generally favorable tone now pervading the situation," the survey states, "has been the unusual amount of employment throughout the building crafts during the winter months. These conditions are partly due to the mild weather in some sections of the country, but it is noted that efforts to increase the volume of construction in the so-called off seasons have been successful. It is significant that the government has seen fit to take up this important phase of the building situation semi-officially through the formation of committees on seasonal operations in the construction industries, which now has in preparation voluminous recommendations on plans and methods of equalizing activities throughout the year."

CHIPS AND SHAVINGS

The architectural department of Crane company in Chicago is at work on plans for the erection of a big office and warehouse building to be erected at Eighth and Walnut streets.

The construction of the new high school at Tamms, Ill., and the colored high school at Sandusky, Ill., has been let by contract to William Abeler, general contractor of Evansville.

BANKER SEES ANOTHER BIG BUILDING YEAR FOR FT. WAYNE

Inclined to Believe Speculative Building Will Not Be So Strong As Previously

Building in Ft. Wayne during the spring of 1924 will approximate that of the same period last year with possibly a slight reduction in volume. Such is the opinion of a prominent local banker who bases his assertion upon the large number of financial inquiries that have been coming into his bank from persons who are desirous of erecting homes and other structures.

In view of the hitherto unheard of local volume of building business transacted in Ft. Wayne in 1923 it is suggested as possible that 1924 may see a slight decline, but, at that the season's operations are expected to be active according to present indications. To date the local building figures for this year are ahead of the figures for the corresponding period a year ago.

Though much building construction work is booked for in 1924 there is evidence at hand that speculative building will not assume large proportions.

During the last few years when Ft. Wayne was undergoing an unusual expansion, many persons engaged in lines of business other than real estate or building, built homes purely for speculative purposes, selling them at large profits. Such a condition, however, is held to be more or less of an unhealthy one and no city should or can thrive long on it. Of course those who make it a business of building sale homes will boost that feature of the building movement but unless new industries came into Ft. Wayne during 1924, increasing the population materially, the city will have solved its housing problem within a year. There will, of course, be the natural growth which will require a normal amount of building.

Ft. Wayne in comparison with other cities of similar size has as fine modern homes as any of the rest. This is due in a great measure, to the fact that trust companies here are operated on an entirely different basis from those in most other cities, making loans which enable the building of modern homes, while in other cities, where the trust companies are operated as banks, this is not possible.

LARGE CHURCH CONTRACT AWARDED

When Completed Will Represent An Investment of $450,000

The general contract for the construction of the proposed new Trinity English Lutheran church at Wayne and Ewing streets has been awarded by the building committee of the congregation to Charles R. Wermuth, general contractor, for a consideration of $378,050. The above bid is a combined estimate and includes the installation of heating apparatus, plumbing and wiring in the church. W. A. Sheets was the next lowest bidder.

LOCAL SHRINERS OPEN BIDS ON TEMPLE ADDITION

Irmscher & Sons Low on General Contract

The building committee of Mizpah Shrine temple the past week opened contractors' bids for the construction of the big auditorium which is to be erected as an adjunct to the organization's new clubhouse on Berry street.

The lowest bidder on the general contract was Max Irmscher & Sons, $336,743. The other bids were Indiana Engineering and Construction Company, $359,950; Charles R. Wermuth & Sons, $363,323; Buesching-Hagerman & Co., $394,000; Rump-Kintz Company, $367,527; Hallbauer-LeBalm, Inc., $447,218.

WAIVER OF LIEN

None this week.

THOUGH NO WAGE SCALE SETTLEMENTS HAVE BEEN REACHED BUILDING PROSPECTS LOOM BRIGHT

Maturity of Promising Indications Dependent Upon Outcome of Wage Negotiations

While actual building activity in Indianapolis has not developed to a brisk stage, nevertheless, there is a prospect for a good season ahead contingent, it must be admitted, upon a favorable settlement of matters pertaining to the wage scales that are to prevail in 1924. Most of the agreements with the various crafts expire April 1st and the building trades employers are, and have been, working hard to reach a settlement before the date of expiration. Negotiations are still pending but no definite conclusions have been reached as yet. Increased wage demands have been made by practically all of the crafts and to these the contractors have countered with various propositions and it is upon these features that the negotiations are now centered.

Future business hinges to a great extent upon the outcome of these wage negotiations naturally, but in the meantime the local architects' offices are busy on prospective plans, indicating an encouraging volume of building business a little later. Already new residence construction work is beginning to appear and many permits are being issued daily at the building inspector's office.

IS IT NOT TO INVITE THE AX?

What Is Working Time and a Wage Without the Main Essential, Work?

Unfortunately, during the past few years there has been such a vast volume of building work and craftsmen were in such demand that a certain element in the ranks were able to "get across" the "do less work" propaganda to some extent and, having succeeded, have grown more bold and are even now proposing a shorter working week, namely but five days instead of six. However, such advocates would increase the wage scale to take care of the "lay out." The theory is presumably that by cutting down the working period the work will be made to last longer. But, why not get the work out of the way and make way for new work, the chances are that at a reasonable labor cost there would be plenty of employment in building circles to go all around for a long time to come for prospective owners under such conditions would not be inclined to hold back feeling they were being milched. The craftsman occupies an important position and is greatly needed, but equally important is the owner who proposes the building and foots the bills. The workman may busy around and do little or nothing in his effort to conserve his income, and in so doing disgust the prospective builder who may in turn cut off the "flowing gold," dispense with the workman who is not useful.

There appeared recently a modern fable that serves to illustrate the economic disease that has sought to benefit the individual at the expense of the industry.

There was a wise old hen fussed around a great deal and would have regulated the affairs of the barn yard. She approached a young and industrious pullet and said:

"M' dear, I hear you cackling almost every day. Did it ever occur to you that by laying each day you are making less work for hens If you will follow my example and lay only once a week you will be just as happy and then there will be work for six more hens. You see these incubators are laying off so many hens there is great unemployment. The only thing to do is to organize and do less work so there will be more employed."

The pullet looked up in amazement and was about to ask for further information when she was interrupted by the farmer's boy coming with a hatchet, and his mother saying, "Get that old three-year-old. She don't lay nohow."

STRESSES UPON IMPORTANCE OF BUILDING INDUSTRY

Calls Latter the Balance Wheel

In an address delivered at the public works conference in Washington a few weeks ago, Secretary of Commerce Hoover made the following statement: "A great deal of investigation has been carried on by the department of commerce and other departments during the last three years into the relationship of the business cycle to public action and I think it is amply demonstrated that these great waves of unemployment which bring such tremendous disorder to the ranks of the workers and waste in production are in large degree due to the fluctuation, the irregular movement of the great balance-wheel which should rest on the industry, and that is the construction industry."

INDIANAPOLIS BUILDING PERMITS

(Week of March 20th to March 27)

***Apartment:** $20,000, 17th and Central. Owner, Louis P. Dailey (plumber), 1659 Central. General contract let to Conder and Culbertson, 623 No. Noble St.

CALUMET CONTRACTORS OPPOSED TO WAGE SCALE INCREASES

Adopt Resolution to That Effect and Appeal for Public Support

The Central Council of the general contractors of the Calumet District, representing the cities of Hammond, Gary, East Chicago and Indiana Harbor, met at the quarters of the Building Trades Employers' Association, 108 Citizens National Bank building, Hammond, Wednesday, March 19th, in an endeavor to map out a campaign in case a threatened strike is called April 1st, by the building trades mechanics who are insistent in demanding an increase in the 1924 wage scale.

Another meeting was held again March 21st, at which things were again gone over previous to a presentation of the contractors position to the representatives of the building trades unions. It is felt that if some definite agreement is not reached prior to April 1st, relative to the wage scales for the coming season a strenuous time is ahead for the building industry in this section of the state.

The turnout at the March 19th meeting was most encouraging despite the fact that there was about six inches of snow and slush on the roads and the air was filled with a driving snow, too. Every one of the above cities was well represented by prominent local contractors all of whom after a general discussion unanimously adopted the following resolution:

WHEREAS, Several of the Labor Unions are demanding an increase of two dollars per day over the 1923 scale, and

WHEREAS, The wages demanded are more than that paid in Chicago, or any other nearby locality for the same class of work, and will impose an unfair and unwarranted burden on the building industry in this section, and will discourage building operations in the Calumet District, we feel that the demands of the Local Unions are unreasonable and unwarranted,

THEREFORE, We building contractors of the Calumet District hereby go on record as being unalterably opposed to any increase in wages or changes in working conditions that will tend to increase the cost of buildings or rents, and we hereby pledge ourselves not to pay any increase in wages the coming year.

It was further voted to make this stand known generally and to ask the public for support in this movement to hold construction costs down.

TO JUNK FORMER BUILDING TRADES COUNCILS AT CHICAGO

International Presidents Decide to Make a Fresh Start

The international presidents of the labor unions that are involved in the makeup of the two Building Trades Councils at Chicago have decided to scrap both of the present councils and install an entirely new set of officers and make a new start. The idea is to get the new body going and then seek to have the contractors who are operating under the Landis Award sign up agreements with the new council. Some think the men back of the idea have another guess coming and are of the impression that it is hard to get one to stick his hand in the fire after he has been burnt once.

SNOW BOUND

Calumet District Buried

Snow, then more snow, and heaps of it. Spring was ushered in in the Calumet District by one of the greatest snows of the year making it seem that winter was just approaching rather than departing. Hammond citizens awoke Friday morning to find a great blanket of wet snow spread all over the landscape and it took a powerful lot of shoveling to get things in shape so the flivver could be put through its daily paces. Many are complaining that this snow shoveling operation is getting quite monotonous. But, the complaining don't seem to have much effect on the downfall that has been hemming us in of late.

ANNOUNCE NEW FACTORY PROSPECT

Chicago Company Purchases Site

A report from the Chamber of Commerce is to the effect that the Street Cattle Car Company, has purchased forty acres near the Standard Steel Car Company plant at Hammond, upon which to erect new shop buildings for the building of cattle cars. The Street Company formerly owned a plant at the Union Stock Yards, Chicago, but sold the property to the Chicago Junction Railway Company.

FORD PLANT TO BE ENLARGED

Plans Out for Big Improvement

The industrial life of the Calumet District continues to grow steadily. Henry Ford has plans out for the construction of a half-million dollar addition to his big plant at Hegewick, Ill., just across the state line from Hammond.

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Sealed proposals will be received in accordance with the law until 1:00 o'clock on the 16th day of April, 1924, at the office of the superintendent of schools, Marion, Indiana, for the demolition and removal of the rubbish of the old Martin Boot's school, located on West Third street, Marion, Indiana; and the erection and completion of a new school building on the site of the same, the furnishing of all labor and material required in the erection thereof. Said material to be furnished and labor performed according to drawings and specifications as prepared for the same by Hiram Elder, architect, Marion, Indiana, the estimated cost of which is $200,000.00.

Plans and specifications for the same are now on file in the office of the State Board of Accounts, also the Superintendent of Schools, at Marion, Indiana, and at the office of the Architect.

Copies of plans and specifications will be furnished to contractors by the architect, and may be held for a period of eight days, after which time they must be returned to the architect.

A deposit of $25.00 will be required by the architect for the return of the drawings and specifications in an undamaged condition, and in case of damage or failure to return drawings and specifications, the sum deposited will be forfeited to the architect for the replacement of the said drawings.

Separate bids will be received on the general construction, the plumbing and heating. All bids shall be made on blank forms No. 96, adopted by the State Board of Accounts, furnished the bidders by the Superintendent of Schools.

Each bid must be accompanied by a certified check made payable to the Trustees of the School City of Marion, Marion, Indiana, in the sum of five per cent of the amount of the bid as a guarantee that the bidder will, if awarded the contract, enter into an agreement with the Trustees of the School City of Marion, Marion, Indiana, and furnish a bond of the full amount of the contract; said bond to be acceptable to the School Trustees.

Bidders will be required, if unknown to the Trustees, to furnish satisfactory evidence of their ability and experience in constructing work of like character.

The Trustees reserve the right to reject any one or all bids, also to waive any defect or informality if deemed in the interest of the School City of Marion, Marion, Indiana, so to do.

SCHOOL CITY OF MARION,
By WILARD ELKINS, President.
E. E. BLACKBURN, Secretary.
M. E. SHIRA, Treasurer.
ELBERT E. DAY, Superintendent.
March 29th-April 5th, 1924.

SCHOOL GYMNASIUM
NOTICE FOR BIDS

Notice is hereby given that the Board of Trustees of the Consolidated School Town of New Harmony and Harmony Township, in Posey County, State of Indiana, will receive sealed bids or proposals for the construction of the Ribeyro School Gymnasium, according to the plans and specificaitons now on file in the office of George C. Taylor, Secretary of said Board, at New Harmony, Indiana, and the office of H. E. Boyle & Co., Architects, Evansville, Ind.

Bids will be received at the office of George C. Taylor, Secretary of said Board, at New Harmony, Indiana, until ten o'clock in the forenoon on Tuesday, the 15th day of April, 1924

Proposals or bids are to be sealed, addressed to George C. Taylor, Secretary of the Consolidated School Board of New Harmony and Harmony Township, Indiana, and marked "Proposals for Ribeyre School Gymnasium" and delivered at the above mentioned office before the time above stated.

Bids will be received on separate items as follows:

1st—On the buildings complete, except the plumbing, heating and electrical wiring.
2nd—On the plumbing system complete.
3rd—On the heating system complete
4th—Separate proposals will be received on the brick work, carpenter work, concrete work, steel, painting, plastering, excavating and hardware.
5th—On the electrical lighting system complete.

The total estimated cost of the general construction, heating, plumbing and electrical wiring of work aforesaid is $30,000.00.

The "General Conditions" of the specifications on file shall apply to all contracts that may be made for any part or parts of the said building.

Each bidder must file with the Secretary of the said Board when he files his bid, the usual statutory affidavit, and a certified check, or bid bond, in an amount not less than 2% of the amount of the proposal, as a guaranty that he will accept said bid and carry out the construction of said work.

All proposals are to be binding on the contractors for a period of ten (10) days, and all contracts entered into are to be subject to provisions of an act of the General Assembly entitled "An Act concerning contracts attempted to be entered into where bonds have been afterwards disallowed by the State Board of Tax Commissioners." Approved March 6, 1923, and found on Page 257 of the Acts of 1923.

The successful bidder will be required to furnish either a Surety Company or personal bond, acceptable to the said Board of Trustees, in an amount equal to the contract price, insuring the faithful completion of said building according to the contract.

The Board reserves the right to reject any and all bids, and re-advertise said building.

CHARLES FORD,
GEORGE C. TAYLOR,
MILES A. PERRY,
WILBUR BALDWIN,
Board of Trustees of the Consolidated School Town of New Harmony and Harmony Township, Posey County, Ind.
Dated this the 17th day of March, 1924.

tees, will recive sealed bids for the construction of an addition to the present Jasonville High School and certain alterations to the present building which is located in the city of Jasonville, Greene County, Indiana, at the office of said Board in the Meridian Street School building at Jasonville, Indiana, until 2 P. M., April 14, 1924, in accordance with the plans and specifications prepared by Johnson, Miller, Miller & Yeager, architects, of Terre Haute, Indiana.

Separate bids will be received for the general construction of the building, and for the installation of the heating and plumbing systems of said building.

The total estimated cost of the general construction, heating and plumbing of work aforesaid is $51,000.

The plans and specifications are now on file at the office of Mr. E. A. O'Dell, superintendent of schools, Jasonville, Indiana, for inspection of the bidders, and additional copies of said plans and specifications may be obtained at the office of said architects at 30 North Fifth street, Terre Haute, Indiana, and in the office of the State Board of Accounts, State House, Indianapolis, Indiana.

All bids must be submitted on forms as prescribed by the State Board of Accounts and with a non-collusion affidavit. The right is reserved to reject any and all bids. Each bidder must deposit with his bid his certified check, made payable to the said Board in an amount equal to four per cent (4) of said bid, as a guarantee that he will enter into a contract and bond to carry on said work according to the plans and specifications if said contract be awarded to him. In the event the bidder fails or refuses to enter into a contract and bond, if a contract be awarded him, within ten days after the notice of the acceptance of his bid, said check and the amount of money, represented thereby shall become the property of the School City of Jasonville which sum is agreed upon as liquidated damages for the failure of the bidder to enter into said contract and furnish bond for its faithful performance.

Each bid must be enclosed in an envelope and the name of the bidder placed on the outside thereof.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given, that the undersigned, Trustee VanBuren School Township, Pulaski County, Indiana, will receive sealed bids at his office in Star City in said township until one o'clock P. M.

SATURDAY, APRIL 12, 1924

for the furnishing of all materials and labor for the building, erection, and completion of a one-story brick school building, with basement, in the town of Thornhope, Indiana, and a two-story addition or annex to the present school building in Star City, Indiana, both of said buildings to be built in accordance with plans and specifications on file in the office of the said Trustee.

Bids to be made separately on each building, but a joint bid may be made to include both. A certified check in the sum of $1,000.00, payable to D. A. Skillen, Trustee, must accompany each bid for each building as a guaranty that bidder to whom contract is awarded will enter into contract and give bond according to law within ten days after notice is given him that he has been awarded contract for said work.

At the same time and place sealed bids will be received for the heating and ventilation of each of the above named buildings, each bid to be accompanied by a certified check payable to D. A. Skillen, Trustee, in the sum of $300.00, conditioned as for general contract. Separate bids to be made on each job, but a joint bid may be made to include both.

At the same time and place sealed bids will be received for the plumbing and water supply for each of the above named buildings, each bid to be accompanied by a certified check in the sum of $200.00 for each building, payable to D. A. Skillen, Trustee, conditioned as for general contract. Separate bids to be made on each job, but a joint bid may be made to include both. A Joint bid may be made on heating and ventilation, and on water supply and plumbing on both buildings.

At the same time and place sealed bids will be received for the electrical work for each of the above named buildings, each bid to be accompanied by a certified check in the sum of $200.00 for each building, payable to D. A. Skillen, Trustee, conditioned as for general contract. A joint bid may be made on both.

Plans and specificationus for the above named work may be had for the use of bidders from the Trustee, or Samuel Young, Architect, Monticello, Indiana, upon a deposit of $10.00 for each building on general contract, and $5.00 each for heating and ventilating, plumbing and water supply, and electrical work for each building, all of which will be returned to contractor upon return of plans and specifications in good condition on or before date of letting and provided contractor submits bid on work for which he receives plans.

The right is reserved to reject any or all bids.

SCHOOLHOUSE
NOTICE TO CONTRACTORS

Notice is hereby given that the School Board of the City of Batesville, Ripley County, Indiana, will receive sealed bids at the office of the secretary, which office will be moved to The Community Room of the Batesville Memorial Building on the date hereafter mentioned, in the City of Batesville, Indiana, until 10:30 A. M., Monday, April 7, 1924, for the furnishing of all materials and performing all labor for the construction and completion of the Batesville High School Building; also for the installation of all plumbing and sewerage, heating and ventilating and all wiring for said school building, which is to be located in said city corporation of Batesville, Indiana. Such construction and installations shall follow the plans and specifications approved by and now on file in the office of the State Board of Accounts, Secretary of the School Board, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to the treasurer, Mr. L. E. Howard, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the School Board of Batesville, Indiana, for the contract, and furnish sufficient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the School Board as liquidated damages. The estimated cost of the building complete is $46,500.00.

Each bidder must also file with the Secretary of the School Board when he files his bid, the usual statutory affidavit.

The School Board reserves the right to reject any or all bids, and waive any defects or informality if deemed in the interest of the school city of Batesville, Indiana. So to be.

Dated this tenth day of March, 1924.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, glazed, vitrified, fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

REGIONAL MEETING FOR STATE ARCHITECTS NEXT SATURDAY

Interesting Program Planned

Next Saturday, April 12th, will mark the gathering once more of the Indiana architectural clan for a regional meeting, this time at Vincennes. These regional affairs, instituted about two years ago as an experiment by the Indiana Society of Architects, have proved so successful and aroused so much interest that they have become a regular part of the working machinery of the Society. The function of the regional meeting is to bring local architects in direct contact with the I. S. of A. and impress first hand with what the organization has done and is seeking to do.

The Vincennes meeting will practically complete a circuit of the State for affairs of this nature, as regional meetings in the past two years have, from time to time, been held at Ft. Wayne, South Bend, Lafayette, Indianapolis, Terre Haute and Evansville.

These meetings have afforded many architects an opportunity to visit the various cities on a holliday jaunt, see and inspect local architecture, form new acquaintanceships, and actually feel the influence that the I. S. A. is exerting for good.

Vincennes architects are preparing for you. Why not join the crowd Saturday, next week?

RULES FOR STANDARD GRADE MARKING OF LUMBER ADVOCATED

Definite System for Grading Recommended

Recommendations on **grade marking** as announced at the meeting of the consulting committee on lumber standards held in Chicago, were as follows:

(a) That the grade be marked on lumber of grades equivalent to No. 2 Common, and better grades; that on lower grades the grade mark be optional.

(b) That if marked at all, all pieces of a given grade be grade-marked; (Except that unavoidable mechanical skips are of course allowed).

(c) That the grade mark of association mills include name of association under whose rules lumber is graded or an appropriate distinguishing insignia thereof; and a clear grade mark.

(d) That insignia, if used, to identify association, and the grade-marks, be uniform among all mills applying same.

(e) That grade-marked lumber be so marked as to identify the mill which manufactured it, or, if an association mill, then to identify the association; **provided**, that the Association shall have assumed the financial responsibility for the maintenance, in the manner herein outlined, by its individual members or subscribers, of agreed Standards of Size and Grade.

(f) That an easily branded mark or insignia, copyrighted and nationally uniform, be used in connection with grade mark to identify shipments from mills of lumber manufactured in accordance with **American Lumber Standards.**

(g) That an appropriate mark symbolizing **American Lumber Standards** be copyrighted and its use be limited to those mills which shall have agreed to maintain the agreed standards of size and grade and to submit their lumber product upon complaint to official association inspection.

WHAT IT TAKES TO MAKE A MODERN HOTEL ROOM POSSIBLE.

No Wonder Rates Are High As The Buildings.

Here is an interesting contribution of the George A. Fuller Company, famous as builders of New York's original Flatiron Building, and now internationally known as construction specialists.

Below they have figured the requirements for erecting just one single bedroom in a newly constructed hotel; taking into consideration all classes of such structures:

5½ tons of stone and marble of various kinds.

48½ barrels of cement.

3,034 bricks of all kinds.

682 linear feet of pipe of various kinds.

41 square feet of terrazzo and mosaic floors.

36½ square feet of tile floors.

454½ square feet of wood and cement floors.

34 square feet of roofing.

2¼ radiators.

3 3/5 doors.

1 3/5 windows.

63½ yards of expanded metal.

A FEATURE OF IMPORTANCE TO FUTURE ARCHITECTURAL BUSINESS

Fixing of Wage Scales Should Encourage Greater Building Activity

Matters are transpiring around the State, in fact, have been consummated, that mean much to the architectural professional practice from a business angle. Though of an indirect nature, still the adjustment of wage scales for 1924 between the building trades employers and the employes which have been made or are about to be made in the larger Indiana cities have an important bearing on the ultimate maturity of the prospects now in architect's offices.

The settlement of the wage scale problem will remove much of the uncertainty that has been gripping prospective builders and has caused them to hold back to a certain degree. With the signing up of wage agreements a new impetus to building should be imparted and make its influence felt in architectural circles.

PENCIL SKETCHES.

The man who cuts into the big things for the world is one who has a non-revertable edge.

It's what we think—what we do—that makes us what we are.

You may have tired and aching feet—but your arm is not tired writing applications for I. S. A.

The world is made up of two classes of people—the up and doers and the down and outers.

Hew to the line if you expect to come out straight.

How do you expect to get ahead if you don't use the one you have.

When we were boys they used linen sheets—now they use sheetrock.

Moores' push pins are fine in their place—but why not pin your faith to the membership committee, by sending in an application for I. S. A.

Inspiration is the hair-spring of action in the things beautiful.

The future no man knows—but we can challenge opportunity of the present.

HALF A MILLION AND MORE DOLLARS WORTH OF BUILDING WORK STARTED IN MARCH.

Evansville Takes on a Decided Activity.

Spring building work in Evansville during March got under good headway according to the official report of City Building Commissioner Edward C. Kerth and makes it appear as if the city was in for an active season. Not only is actual operation started but the prospective work indicated is most encouraging.

Last month the projects started almost doubled the entire total of all the work started in January and February, while the estimated valuation of the March business ran to $549,274, or $332,426 in excess of the combined valuation rolled up over the previous two months period.

One of the most satisfactory features of the March performance was the fact that the bulk of the building work during the month related to entirely new structures, 170 permits being issued for that class of construction while 131 permits were for additions and alterations. The new projects were estimated to cost $499,340, while the alterations and additions were listed at $49,934.

Comparative figures revealed that March building was 483% better than that of January this year, 453% better than February, and 214% ahead of the business of March last year. As for the permits granted there were 88 more issued in March, 1924 than during the corresponding period in 1923.

BUILDING CODE EFFECT ALREADY IN EVIDENCE.

New Regulations Arousing Wide Spread Interest.

Though the new city building code will not go into effect till May 1st, interest in it is keen and its influence is already making itself felt. Under the new regulations and requirements the fire zone has been extended, a condition that will require additional permits to be secured for alterations and additions so that all new work may conform to the code clauses aimed at reducing the fire hazzard. Even now these permits are being issued which accounts for the increased permits for old construction work issued in March.

An indication of the interest the new code has aroused is evidenced by the flood of inquiries that are pouring in daily at the office of the building inspection department asking for detailed information on the scope and particular application of the city building law.

OLD LANDMARK GIVES WAY

Church Site Being Cleared For New Y. W. C. A. Building.

Tuesday this week, saw the beginning of actual work toward the new Y. W. C. A. building, to be erected at Vine and Second streets, when the first steps were taken toward razing one of the city's oldest landmarks, the old Vine street Presbyterian church, erected in 1840.

CHIPS AND SHAVINGS

Work of pouring concrete for the first floor at the new addition to the A. L. Maxwell company building, Second and Vine streets, was started during the past week by the Tri-State Contracting corporation.

The Scarborough-Davies Contracting company is building a five room and bath frame bungalow for Joe Herron, plastering contractor, in the 1400 block on Cleveland avenue.

ANOTHER GREAT BUILDING TOTAL RUN UP IN MARCH.

New House Work Contributes Largely to a Fine Early Spring Record.

The March building figures for Fort Wayne this year totaled the best sum for early spring construction work ever recorded in this city. The new building work for which permits were granted the past month amounted to $1,683,495. This was $233,495 in advance of the 1923 figures which was the record for March up to this time. Four large projects passed upon with values ranging from $125,000 to $275,000, three educational institutions and one new office building, went a long way to swell the magnificent total that was run up. However, much credit must be attributed to new home building work as 141 permits or more than half of those granted during the month, were for new residences. The average cost of the homes ran a little better than $5,000. To date 1924 building in Ft. Wayne is $397,380 ahead of that for the first three months in 1923.

TWO AND A HALF MILLION DOLLAR GAS PLANT BEGUN

Big Project Started at Ft. Wayne

Work was started the past week on a new $2,500,000 gas plant at the Wabash Railroad and St. Marys River which is one of the largest individual construction projects ever attempted in Ft. Wayne. The New plant is for the northern Indiana Gas and Electric Company and will occupy a 20-acre site at the above mentioned location. The work is under the supervision of engineers of the Koppers Company an affiliated concern of the Western Gas Construction Co. of Fort Wayne.

The very latest ideas for the economical manufacture of gas will be incorporated in the new plant, and when completed Ft. Wayne will have one of the most modern and adequate gas manufacturing institutions of any city of her size in the United States.

Gas will be manufactured by two processes, there will be coal gas and water gas and two to be mixed later.

This new plant will mean much to the future of the city both from a healthful and an industrial point of view. The output of coke annually will be 66,000 tons which will be available to the local market and will, if used, help considerably in reducing the smoke nuisance. On the other hand the increased production of gas volume will mean much to the industrial life of the city as gas is used quite extensively for various processes in many factories.

BANK CLEARINGS BESPEAK HEALTHY TONE IN LOCAL BUSINESS CIRCLES.

Last Week's Figures Forge to The Front

Though weather conditions have been all set against an active business movement, nevertheless, Ft. Wayne's volume of business has swept along at goodly proportions according to last week's bank clearings that were only a few hundred dollars under the two million dollar level. The clearings amounting to $1,999,134.03 were $36,452.23 in excess of week before last's figures, and $41,725.91 ahead of the corresponding period a year ago.

WAIVER OF LIEN

None this week.

BUILDING WAGE MATTERS BEING SETTLED AMICABLY.

Four Unions Sign Up With Prospect of Others Falling In Line Shortly.

With the adoption the past week of a definite wage scale agreement between four building trades unions and representatives of the Building Contractors' Association, and the assurance that satisfactory wage scales will soon be completed with the other thirteen labor organizations of the building trades, the building labor situation for the year in Indianapolis and Marion county looks promising and the probability is that, with a settlement reached between the employer and the employe, building operations, that have been rather retarded by the uncertainty of the new wage scale adjustment, will now take on renewed activity.

Increases for Three Crafts.

Three of the four agrements which have been signed provide for increases in wages, two of them for 7½ cents an hour and the other 12½ cents an hour. The agreement with the hoisting engineers, however, provides for no increase, the scale remaining at $1.25 an hour. The sheet metal workers have signed an agreement calling for $1.05 an hour, an increase over last year of 7½ cents. The new wage agreement of the plasterers calls for $1.50 an hour, an increase of 12½ cents. The painters will receive $1.05, an increase of 7½ cents.

Wage scale agreements have been submitted to international boards of arbitration by the electricians, the carpenters and the elevator constructors. The wage scale that is worked out by these boards will be retroactive to April 1, and labor leaders have expressed the opinion that the negotiations will not interfere with building operations.

The carpenters had asked for $1.25 an hour, and the request was refused by the contractors. The carpenters' scale last year called for 92½ cents an hour. The electricians are now receiving $1.12½ an hour under the old contract and the elevator constructors $1.25 an hour.

The agreements of four unions, the bricklayers, plumbers, steamfitters and hod carriers, do not expire until May 1. The bricklayers now are receiving $1.35 and have submitted a demand for $1.50 an hour, the same as has been negotiated with the plasterers. Owing to the scarcity of bricklayers and plasterers there has been little difficulty in fixing a wage scale. The plumbers and steamfitters are now receiving $1.22½ an hour and the hod carriers 72½ to 75 cents an hour. Negotiations are now in progress between the contractors and each of the four organizations and it is expected that a satisfactory wage scale will be signed before May 1.

Work on the wage scale of the asbestos workers and lathers are still in progress and labor representatives said that contracts probably would be signed soon.

The demands of some of the unions for a five-day week and longer term contract, two or three years, instead of one year, were not pressed by the wage scale committee when the contractors announced that they would oppose vigorously both measures. Practically all the labor organizations favored the longer contract as a means of settling wage disputes for longer periods and stabilizing the industry, but withdrew their demands it was said, in order to encourage building.

While there have been increases in the scales they are not as much as were asked but correspond favorably with the wages that are being paid around the country in the various cities.

SOLON MAKES APPEAL FOR GREATER ATTENTION TO VOCATIONAL TRAINING

Argues That Present Educational Effort is Overcrowding the Professions, While Industrial Fields Are Suffering

We are educating 90 per cent of our youth to be white-collar workers, but have white-collar jobs for only 10 per cent. declares Senator Capper, of Kansas, is a recent editorial. The result of this over-production of white-collar workers is bound to be as disastrous, economically, as over-production in wheat or agricultural products, he says.

"Our industries clamor for the trained worker," says the editorial. "But our schools continue to turn out thousands upon thousands of young men and women fitted only for already over-crowded professions.

"Many different reasons are assigned by historians for the fall of the Roman Empire. Rome, however, did not fall until the Romans grew too proud to labor. Neither physically, morally, nor economically can any white-collar nation long endure. The fiber, stability, and soundness of American life depend on establishing the dignity of labor, not as a copy-book maxim, but as a national habit of mind."

What is needed in America today is a better balanced educational system, Senator Capper declares.

"A trade, vocational training for all is the complement of a balanced education," in his opinion. "Without such training for its citizens, the United States can not maintain its traditions, its national health, nor its place in the world. We must educate hand as well as head. Such training builds character as well as self-reliant independence. We are beginning to see it and certainly none too soon."

WHEN IS THE NEXT TRAIN TO CEDAR RAPIDS?

What's this? The report trickles in from Iowa that the carpenters and painters of Cedar Rapids have voted to voluntarily reduce their wage demands in order to stimulate building operations. One of the Calumet contractors upon being informed of the good news remarked that if any of the Unions in Indiana were to take such a tack the undertakers would have to work overtime taking care of the contractors who would drop over from heart failure. Who knows?

QUITE A TANGLE

Nobody Able to Straighten Out Knotty Labor Situation in the Calumet

Labor conditions in the building industry field in the Calumet district are all at sixes and sevens with every prospect that a deadlock on the wage scale proposition will be the outcome. On the one side are the carpenters, electricians, painters and building laborers, and opposed to that array are the building trades employers. The contractors have been standing pat on their contention for a continuation of the 1923 wage scales while the above crafts have demanded an advance all along the line. A general conference of the contractors of the Calumet District was held at the B. T. E. A. headquarters at Hammond, Friday, March 28th, at which reports were submitted, none of which was overly optimistic. It was reported that several conferences had been held with the carpenters, electricians and painters at which things were talked over but no definite agreements had been concluded. In view of the situation a program was mapped out for action in case the worst comes to pass and a strike ensues.

The carpenters advanced the information that they had decided to postpone action looking to an enforcing of an advanced wage scale and in the meantime will take a referendum vote on whether to press the advanced demands or not. The contractors on March 31st met again and notified the carpenters' representatives that they want an agreement signed up now as they did not favor a postponement of action on this matter till the busy season. The building trades employers are of a mind to give the carpenters five more days of grace, or a week at the most, in which to reach a settlement, and, if nothing is agreed upon by that time it is proposed to man the work with men who are willing to work for the current scale.

The motive back of the argument for a postponement of a settlement of the carpenters' scale at this time is to get the contractors in a tight place, and the move is a shrewd one. The scheme is to let the contractors load up with work between now and June the first and if they don't come across with the $1.50 per hour scale to call a strike and tie up everything in a building way. The building trades employers have smelled a mouse and are not to be caught napping. Even should the postponement be allowed it would not aid conditions any for the contratcors would still be at sea as to how to figure and it is a foregone conclusion that prospective builders could hardly expect to receive conservative building estimates when the contractors were in the dark as to the ultimate wage outcome. Now is the time for a settlement or none at all.

A GLEAM OF HOPE

New Solidarty Evidenced in Building Employers' Ranks

One thing the wage controversy has demonstrated is that the contractors of the Calumet District are better organized and working in closer harmony than ever before. Even the "Home Builders," the fellows who do not enter into the larger field of building operations, have apparently awakened to the probable consequences if an advanced wage scale is put into force, and as a result they have come out in the open and cast their lot with the building trades employers deciding to stick with the other contractors in demanding a settlement based on the 1923 scales.

MUST HAVE BEEN "BIG BEN"

An Awful Awakening

After the meeting was over the other evening, when the speech making was ended, when the cigar smoke was hanging lazily over the room a surcease from trouble seemed to creep in on our physical wariness and mental perturbation and pictured a rippling lake, stirred by a gentle south wind, a boat, a can of bait, and a long string of fish. Just when our ecstacy was at its height somebody asked for a report from the secretary. Curses! They might just as well have scuttled the boat and dumped us into the lake as to have brought us back from midsummer to the month of March with its wage scale altercations. There seems to be a joy eliminator in all groupes.

CALUMET BUILDING PROGRESS

George P. Pearson & Son were the successful bidders on the general contract for the construction of a brick veneer bungalow on the Wildwood Road for J. J. Ruff. The house will be one story high, 40x44, and will cost $17,000.

Mr. Blanke of the Builders and Manufacturers Mutual Casualty Co., Chicago, was in Hammond last week shaking hands with the regulars and endeavoring to convince the others that there were many advantages to be gained by carrying one's compensation insurance in "Our Own Company."

Sealed Proposals

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Notice is hereby given that the School Board of the School City of Rising Sun, Ohio County, Indiana, will receive sealed bids at the office of William T. Burns, secretary of said board, in the city of Rising Sun, Indiana, until 10:30 A. M. on

MONDAY, APRIL 28th, 1924,

for the furnishing of all materials and performing all labor for the construction and compietion of a new High School Building in said city; also for the installation of all plumbing and sewerage, heating and ventilating and all wiring for said school building, which is to be located in said city corportion of Rising Sun, Indiana. Such construction and installations shall follow the plans and specifications approved by and now on file in the office of the State Board of Accounts, Secretary of said School Board, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Ind. Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrew for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on Forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to the Treasurer, Mrs. Fannie Rabb Green, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract enter into a bona fide agreement with the School Board of the School City of Rising Sun, Indiana, for the contract, and furnish sufficient bond equal to one hundred (100%) per cent of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the School Board as liquidated damages. The estimated cost of the building complete is $28,500.00.

The School Board reserves the right to reject any or all bids, and waive any defect or informality if deemed in the interest of the School City of Rising Sun, Indiana.

All bids will be opened at room in rear of the National Bank.

Dated this April 1st, 1924.

HARRY L. GIBSON, President,
WILLIAM T. BURNS, Secretary,
MRS. FANNIE RABB GREEN, Treas.
Members of the School Board of the School City of Rising Sun, Indiana.

April 12th, 1924.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

NOTICE IS HEREBY GIVEN, That sealed bids will be received up to 1:00 o'clock P. M. on Wednesday, the 24th day of April, 1924, at the office of the Board of School Trustees of the School Town of Brownstown, Indiana, in said town, for the construction of an addition to and the remodeling of the school building of the school town of Brownstown, Indiana, together with the installation of heating, ventilating and lighting system therefor and the installation of a sanitary flushing closet system, all in accordance with full details, prints, and plans and specifications for all of said work now on file in the office of the undersigned Board of School Trustees of the School Town of Brownstown, Indiana, where they are open to the inspection of all persons interested.

Said plans and specifications, or copies thereof, are also on file for bidders at the office of Allen & Garriott, Architects and Engineers, 401 Lombard Bldg., Indianapolis, Ind.

For convenience the plans and specifications are issued under two heads, viz—one General construction and one for Heating, Plumbing and Electric Wiring.

Bids will be received upon said proposed work as a whole, or on any separate part thereof; any combination of bids will be considered. Bidders desiring copies of plans and specifications will be required to deposit $25.00 with the above named architects upon receipt thereof, which amount will be returned upon safe return of plans and specifications.

All bidders will be required to file their bids in form required by law and to accompany their bids with affidavit required by law. Each bidder is required to deposit with his bid a certified check payable to the undersigned Board of School Trustees, in an amount of not less than 3 per cent of the total amount of his bid, to secure the entering into of a proper contract and giving a proper and sufficient bond in the event that he be awarded the contract.

The successful bidder or bidders will be required to enter into a contract in a form and with surety acceptable to the undersigned Board in an amount equal to the amount of such contract, conditioned for the faithful performance of said work in accordance with the plans and specifications therefor, and for the completion of said work not later than September 15th, 1924.

The Addition to be constructed to be 101 feet in length by 62 feet in width, two stories in height, brick with slate roof.

The estimated costs of the improvements is $34,000.00.

The right is reserved to reject any and all bids.

Dated at Brownstown, Indiana, this 2nd day of April, 1924.

ORLEAN R. EMERSON,
CHARLES V. SAGE,
ROSCOE M. ROBERTSON,
Board of School Trustees of the School Town of Brownstown, Indiana.
John C. Branaman, Attorney.
April 5th and 12th-1924.

SEWER SYSTEM
NOTICE TO BIDDERS

Notice is hereby given that sealed proposals will be received by the Board of Public Works at their office in the City Hall of South Bend, Indiana, up to 10:00 o'clock A. M. of the 8th day of April, 1924, for the execution of the following work:

River Park Sewer System No. Three (3) under improvement Resolution No. 1283. Estimated cost ($375,000.00) in the City of South Bend, Indiana.

A set of specifications and plans may be had by a deposit of Five ($5.00) dollars, either cash or certified check, which will be returned to bidders upon receipt of plans and specifications at Board of Public Works.

Complete drawings and specifications of said work are now on file in the office of the Department of Public Works in the City Hall, of South Bend, Indiana. The Board reserves the right to reject any or all bids.

L. D. SLAUGHTER,
L. P. HARDY,
ALBERT F. HONER,
Board of Public Works.

specifications as prepared for the same by Hiram Elder, architect, Marion, Indiana, the estimated cost of which is $200,000.00.

Plans and specifications for the same are now on file in the office of the State Board of Accounts, also the Superintendent of Schools, at Marion, Indiana, and at the office of the Architect.

Copies of plans and specifications will be furnished to contractors by the architect, and may be held for a period of eight days, after which time they must be returned to the architect.

A deposit of $25.00 will be required by the architect for the return of the drawings and specifications in an undamaged condition, and in case of damage or failure to return drawings and specifications, the sum deposited will be forfeited to the architect for the replacement of the said drawings.

Separate bids will be received on the general construction, the plumbing and heating. All bids shall be made on blank forms No. 96, adopted by the State Board of Accounts, furnished the bidders by the Superintendent of Schools.

Each bid must be accompanied by a certified check made payable to the Trustees of the School City of Marion, Marion, Indiana, in the sum of five per cent of the amount of the bid as a guarantee that the bidder will, if awarded the contract, enter into an agreement with the Trustees of the School City of Marion, Marion, Indiana, and furnish a bond of the full amount of the contract; said bond to be acceptable to the School Trustees.

Bidders will be required, if unknown to the Trustees, to furnish satisfactory evidence of their ability and experience in constructing work of like character.

The Trustees reserve the right to reject any one or all bids, also to waive any defect or informality if deemed in the interest of the School City of Marion, Marion, Indiana, so to do.

SCHOOL GYMNASIUM
NOTICE FOR BIDS

Notice is hereby given that the Board of Trustees of the Consolidated School Town of New Harmony and Harmony Township, in Posey County, State of Indiana, will receive sealed bids or proposals for the construction of the Ribeyro School Gymnasium, according to the plans and specificaitons now on file in the office of George C. Taylor, Secretary of said Board, at New Harmony, Indiana, and the office of H. E. Boyle & Co., Architects, Evansville, Ind.

Bids will be received at the office of George C. Taylor, Secretary of said Board, at New Harmony, Indiana, until ten o'clock in the forenoon on Tuesday, the 15th day of April, 1924.

Proposals or bids are to be sealed, addressed to George C. Taylor, Secretary of the Consolidated School Board of New Harmony and Harmony Township, Indiana, and marked "Proposals for Ribeyre School Gymnasium" and delivered at the above mentioned office before the time above stated.

Bids will be received on separate items as follows:

1st—On the buildings complete, except the plumbing, heating and electrical wiring.
2nd—On the plumbing system complete.
3rd—On the heating system complete

4th—Separate proposals will be received on the brick work, carpenter work, concrete work, steel, painting, plastering, excavating and hardware.
5th—On the electrical lighting system complete.

The total estimated cost of the general construction, heating, plumbing and electrical wiring of work aforesaid is $30,000.00.

The "General Conditions" of the specifications on file shall apply to all contracts that may be made for any part or parts of the said building.

Each bidder must file with the Secretary of the said Board when he files his bid, the usual statutory affidavit, and a certified check, or bid bond, in an amount not less than 2% of the amount of the proposal, as a guaranty that he will accept said bid and carry out the construction of said work.

All proposals are to be binding on the contractors for a period of ten (10) days, and all contracts entered into are to be subject to provisions of an act of the General Assembly entitled "An Act concerning contracts attempted to be entered into where bonds have been afterwards disallowed by the State Board of Tax Commissioners." Approved March 6, 1923, and found on Page 257 of the Acts of 1923.

The successful bidder will be required to furnish either a Surety Company or personal bond, acceptable to the said Board of Trustees, in an amount equal to the contract price, insuring the faithful completion of said building according to the contract.

The Board reserves the right to reject any and all bids. and re-advertise said building.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

Notice is hereby given, that the undersigned, Trustee VanBuren School Township, Pulaski County, Indiana, will receive sealed bids at his office in Star City in said township until one o'clock P. M.

SATURDAY, APRIL 12, 1924

for the furnishing of all materials and labor for the building, erection, and completion of a one-story brick school building, with basement, in the town of Thornhope, Indiana, and a two-story addition or annex to the present school building in Star City, Indiana, both of said buildings to be built in accordance with plans and specifications on file in the office of the said Trustee.

Bids to be made separately on each building, but a joint bid may be made to include both. A certified check in the sum of $1,000.00, payable to D. A. Skillen, Trustee, must accompany each bid for each building as a guaranty that bidder to whom contract is awarded will enter into contract and give bond according to law within ten days after notice is given him that he has been awarded contract for said work.

At the same time and place sealed bids will be received for the heating and ventilation of each of the above named buildings, each bid to be accompanied by a certified check payable to D. A. Skillen, Trustee, in the sum of $300.00, conditioned as for general contract. Separate bids to be made on each job, but a joint bid may be made to include both.

At the same time and place sealed bids will be received for the plumbing and water supply for each of the above named buildings, each bid to be accompanied by a certified check in the sum of $200.00 for each building, payable to D. A. Skillen, Trustee, conditioned as for general contract. Separate bids to be made on each job, but a joint bid may be made to include both. A Joint bid may be made on heating and ventilation, and on water supply and plumbing on both buildings.

At the same time and place sealed bids will be received for the electrical work for each of the above named buildings, each bid to be accompanied by a certified check in the sum of $200.00 for each building, payable to D. A. Skillen, Trustee, conditioned as for general contract. A joint bid may be made on both.

Plans and specificationus for the above named work may be had for the use of bidders from the Trustee, or Samuel Young, Architect, Monticello, Indiana, upon a deposit of $10.00 for each building on general contract, and $5.00 each for heating and ventilating, plumbing and water supply, and electrical work for each building, all of which will be returned to contractor upon return of plans and specifications in good condition on or before date of letting and provided contractor submits bid on work for which he receives plans.

The right is reserved to reject any or all bids.

ARCHITECTURAL INFLUENCE STRONG AT INDIANAPOLIS HOME SHOW

Plan Displays Carry Big Appeal

Among the many impressive features of the Home Complete Show at the Manufacturers' Building, State Fair grounds, Indianapolis, the past week, was an undeniable architectural influence from which it was hard to escape. It was more pronounced than ever before and undoubtedly will exert a future effect on prospective builders to the benefit of the architect.

One's first impression was the importance of orderly planning as conveyed by the layout of the show itself. There seemed to be an orderly arrangement to everything and the confusion of exhibits of former years was entirely missing, there was not the packing, crowding in, and jamming up of various displays, instead, everything seemed to be orderly arranged for artistic effect that added greatly to the atractiveness of the affair.

All sorts of building materials, of fine quality, furnishings, interior decorations, modern housekeeping appliances, and even shrubbery and flowers were brought into commission to exemplify the completeness to which home ownership should be carried.

And there were plans and plans and models that drew a full share of interest. First there was a complete home, an exact reproduction of an Indianapolis architect-planned home, with a landscaped yard, and an interior tastefully furnished. Then the Small House Service Bureau, Great Lakes Division, of the A. I. A., had a profuse display of plans that attracted large crowds. Plans also were again in evidence at the Indianapolis News booth where the exhibits submitted in the Architectural Competition for a small house were hung to draw much attention. And still more plans appeared at the Indianapolis Star booth, they having been entered in the house planning competition for women—the idea being to get women's conception of the ideal house.

Thus planning the home along architectural ideas had a most conspicuous place in the Home Show and that the effort was not in vain was demonstrated by the interest the crowds showed in the plans and in the house that was architecturally planned.

IMMENSE HOUSING SCHEME TO AFFORD RELIEF TO DWELLERS OF NEW YORK'S CONGESTED DISTRICTS

Material Used Sufficient to Build Good-sized Town

Scores of New York families beset for years by the in conveniences caused by the housing shortage, have begun to move into the model apartments erected in Long Island City, Astoria and Woodside, L. I., by the Metropolitan Life Insurance Company as that organization's contribution toward relieving the distressful situation.

There are approxifately 2,150 separate apartments in the three great building operations and they have been declared by experts to be the last word in proper ventilation, sanitation and comfort. The most popular feature of it all is the fact that the Metropolitan is renting them at not to exceed nine dollars per room per month, insisting that it is possible to do this and earn sufficient interest on the investment. No charge is made for the bath room.

But aside from the relief it affords to New York's population, the Metropolitan housing program offers other interesting features, not the least of which is the great quantity of building material necessary for the completion of the work.

In the seven blocks of buildings thirty-two million bricks were used and the steel and iron involved weighed 2,585 tons. Other great quantities of material utilized were as follows: concrete, 3,000 cubic yards; stone, 16,000 cubic yards; lumber, 5,600,00 square feet; copper, 20 tons; glass, 235,000 square feet; paint, 92,500 gallons; roofing, 270,000 square feet; flooring, 1,400,000 square feet; tiling, 63,750 square feet; doors, 15,130; windows, 15,000; trim, 7,000,000 square feet; wiring 1,382,000 linear feet; plumbing fixtures, 10,575; lighting fixtures, 14,202; hardware, 116,000 pieces; lath, 10,000,000, and plastering, 600,000 square yards.

Readers with a statistical trend of mind might find some pleasure in comparing the above figures with the quantity used in the erection of the buildings of a sizeable town. On the assumption that the families occupying the Metropolitan apartments will be of average American size—five in number—it is seen that the total population of these three groups will be 11,000, or sufficient number to populate a city of considerable size.

So it is evident that with the same quantity of material as the Metropolitan used in Long Island it might be possible to build an entire community.

The new apartment homes have many conveniences seldom found in lower-priced dwellings. There will be heat and hot water from central plants and electric lighting fixtures in each room. In addition each kitchen has an overhead clothes dryer and in some instances a Pullman dining bay is to be used instead of a larger dining room.

INDIANA ARCHITECT LEAVES TO RESUME STUDY AT PARIS

Clarence C. Martindale, former Indianapolis architect, who returned about a year ago from several years' study in Europe has left for Paris again. Mr. Martindale, while back here, delivered several interesting talks before architects, artists and others on his travels, observations and impression of European architecture and life. He left for New York, Tuesday, and expected to sail for France the latter part of the week.

PROPOSE FINANCING SECOND MORTGAGES ON LUMBER BUILT HOUSES

Scheme to Be Advocated at Lumber Manufacturers' Convention

Proposals for financing second mortgages on small lumber built houses will be considered at the annual convention of the National Lumber Manufacturers' Association at Chicago, April 17-18, no obstacle to home ownership being so great as that of financing the second mortgage.

The formulation of a definite program is suggested and possibly the organization of a National Finance Corporation by lumbermen to furnish, by properly secured loans, the means of financing second mortgages on small houses of lumber construction.

This general subject was initiated at the recent convention of the Ohio Association of Retail Lumber Dealers by Mr. T. F. Laist, of the National Lumber Manufacturers' Association. It has been received with wide-spread interest. —National Bulletin, National Lumber Manufacturers' Association.

BUILDING RUSH OF LATE MARCH SUDDENLY LETS UP

Construction Activity Not So Brisk

The exact date when the new building code will go into effect at Evansville is problematical and dependent upon the time when copies of the code are obtainable for builders, according to a statement last week by City Building Inspector Ed B. Kerth.

"The new building code is of such a scope and variance, necessitating a complete reorganization of the office system that a certain date can not be set at this time. There has been such a rush and increase in business and demand upon the building inspector's office, causing a necessary delay in the printing of the code.

The rush for building permits at the building inspector's office during the latter part of March came to an abrupt end on April 1, and business settled down to the usual average of about 60 permits a week. The new building code has aroused a lively discussion and the building inspector's office has been turned into a special information bureau for those seeking enlightenment on the various new features of the code.

All indications, it is said, point to a healthy activity, in the building lines. While no permits for special large building projects have been taken out during the past week., the usual and even than better amount of permits for residence type buildings were taken out during the week. The trend of remodeling unsightly two-story stables into one-story garages, so noticeable during the past two weeks, is said to be largely caused by the strict regulations of the new building code.

NOT QUITE UP TO BUSINESS OF FIRST QUARTER IN 1923

This Year's Building in Evansville Somewhat Off

Building permits issued in Evansville during the first quarter of 1923 exceed permits issued for the first quarter of 1924 by $263,441, according to the records of the local city inspection department. A total of $1,039,563 was issued during the first three months of last year against a total of $776,122 for the same period of time of this year.

March, 1924, represented the largest month's business of both years with a total of $549,274. Permits issued this year for the following months: January, $94,112; February, $132,736; March, $549,274. For 1923 the permits issued were: January, $235,200; February, $450,898, and March, $353,465.

Permits issued during the first quarter of 1923 totaled 471 of which 313 are for new construction and 158 for old work. The permits for the first quarter of 1924 total 460 of which 281 are for new work and 179 for old construction.

LOCAL BUILDERS FACING BUSY SEASON

Readjustment of Effort to Fill Needs Expected to Keep Building Going at a Good Pace

Early indications point to an active building season ahead for Ft. Wayne and optimism amongst those of the local building fraternity is ruling strong. The trend of construction affairs in March when building figures ran up to and over one and a half millions of dollars making for the best building volume ever recorded locally during the early spring lent new hope to builders who are loking forward to the future with confidence.

Last year was a remarkable one for Ft. Wayne in the matter of home building and there are those who are of the opinion that such activity may show a slight easing up in 1924. However, there seems to be a tendency this season toward more industrial and commercial building, and while the contemplated projects are not of large proportions the prospective work may be of sufficient volume to make up for any slack in home building efforts. In 1923 there were quite a few large projects started and it will take considerable hustling to duplicate that volume of last season's business.

A prominent local realtor in sizing up the local situation and building outlook said: "The total number of homes erected probably will fall slightly under figures for last year. This will not affect the building business to any degree," he explained, "as considerable attention will be devoted to small business and industrial buildings, such as garages and stores. Heretofore, the smaller industrial buildings have been more or less neglected due to the dire need of **homes** to house the steadily growing population. This shortage has been partly overcome with the result that builders are turning their attention to other lines."

Further, this man argued that the majority of storerooms in the city are bringing high rents in proportion to the money invested in them.

"It will be noticed," he said, "that the majority of homes which are vacant now are those which are unsuited for general use. There is little vacancy reported in new and improved buildings.

"The city's business interests are well cared for with reference to office space, particularly in the downtown district, but the constant increase in population and consequent increase in the number of business firms and organizations will make it necessary to increase this type of development within the next year or two.

"There is a changed status of the building business so far as residences are concerned which will cause many small operators, who do their building purely in a speculative basis while actually employed in other lines of business, to leave the field. It is generally expected that banks will discourage this type of operator during the next year, while firms established in the business, and which are operating systematically, will be encouraged."

FROM LAND GRANT TO DESIRABLE BUSINESS SITE.

Recent Realty Deal Shows Astonishing Increase In Valuation.

From a land grant process, that cost the original heirs nothing away back in the days of President Monroe, to a value of $120,000 in 1924 is the valuation increase story of the site recently acquired in the business section of Ft. Wayne by the Farmers Trust Company upon which eventually the financial institution contemplates erecting a modern bank and office building.

This is but one of many instances that develop continually to impress with the fact of the ever increasing value of down town real estate.

It has not been many years since sites which formerly housed residences have blossomed out into valuable business property. Many of the former owners would be considerably surprised if they were told what their former residences are valued at because of the steady growth of the city's business district.

SEASONABLE CONSTRUCTION REPORT TO BE RENDERED SOON

Various Aspects Gone Into by Department of Commerce

Seasonal aspects of construction are considered in a report made by the division of building and housing of the department of commerce. The report measures the progress of the division in undertaking an investigation of seasonal construction at the request of one of the committees of the president's conference on unemployment.

When the work is ended a final report will be made with probable discussion of weather conditions, and their effect on the efficiency of labor, use, production and haulage of materials; and the extent of seasonal variations in building activity in cities throughout the country. The report will also include consideration of the effect of customs, such as uniform leasing dates, and other factors not dependent on climate, together with a discussion of methods of economical winter building.—Bulletin, National Association of Building Trades Employers.

THE APPRENTICE AS AN ASSET

Painter Bosses in Convention Stress That Point

That the apprentice in the building trades must be considered by the employer as an asset rather than as a liability is a thought that has been expressed by a number of writers and speakers on the general subject of apprenticeship training during the past few months.

This was again stated by one of the speakers at the Atlantic City convention of the International Association of Master Painters and Decorators of the U. S. and Canada who said in part: "We must banish from our minds the thought that because the boy of today is more advanced in his ideas than the boy of ten years ago, he is hopeless as a means to the end we wish to accomplish. The times create these conditions and we must face them and make the best of them. If the boy of today demands more pay and consideration than the boy of ten years ago, we must meet him at least half way, if not all the way. A mere decade or two have made no difference in the boy's human nature. He is just as susceptible to thoughtful help, to kindness and consideration as he ever was. We must therefore lay aside the idea that he may possibly be a liability to us and replace it with the idea that in him lies our only hope for future progress and prosperity."

INCLINED TO PLAY IT SAFE

Building Crafts at Chicago Show Tendency to Ride Along at Present Scale to Keep Building Going

Confronted with a building program which is expected to almost equal that of 1923, Chicago contractors are facing a problem for the year 1924 which will give them considerable worry and tax their capacity in meeting the demands of the building public. With a record of nearly three hundred and thirty million dollars' worth of building construction for the past year and the great demand for building labor throughout the country, Chicago can not hope to do any better this year and contractors will do a wonderful job if they in any way equal the record of 1923. The one great thing that is giving much concern is the persistent rumors that some of the trades are going to make demands upon the employers for an increase of wages beyond the present uniform rate of $1.25 an hour. The majority of the trades it is known are wise enough to say that they do not want an increase in the rate of wages.

These leaders recognize the fact that to do so at the present time would only tend to bring nearer the end of the great prosperity in building construction and cause many contemplated projects to be deferred until reasonable rates could be fixed and construction work done with some hope of guaranteeing the investor a safe and speedy return after completion.—Building Construction Employers' Association Monthly Bulletin.

INDIANAPOLIS BUILDING PERMITS

Week of April 3r dto April 10th

Apartment Building: $75,000.00, 2 sty. & bas., 22x129x61x63, 3537 N. Pennsylvania St. Private plans. Owner, Arthur Baynham, 3543 N. THE END OF THE ROW

Contractors and Carpenters of Calumet District Fail to Get Any Nearer an Agreement on Wage Scale

As has been said, he who fights and runs away lives to fight another day, at least so it has been proven in the Calumet district as regards the building labor situation. Both building trades employers and employes have been arrayed opposite each other numerous times of late but have never reached any definite conclusions. Thus both sides have withdrawn only to return to contend again on the wage scale issue, and the fight goes on and on from day to day and week to week.

Another chapter was added to wage scale negotiations March 31st when the carpenters' committee and the committee from the Central Council of General Contractors of the Calumet District met. When the matter of signing up an agreement was gone into the carpenters' representatives informed the contractors that the former had no power to sign an agreement. Further, the carpenter delegates announced that they had been instructed by the District Council of Carpenters to demand $1.50 per hour. It was also admitted by the craftsmen that no referendum vote of the local unions had been taken, nor had headquarters been notified of the contemplated advance in the scale. It was argued that before an agreement could be signed the proposition would have to be submitted to the locals. The carpenters wanted a sixty-days' extension of time in which the matter could be considered. To this plea the contractors turned a deaf ear and then the opposition decided that the vote could be taken in a week or so. Since it has been known all along that the wage scale would have to be adjusted and new agreements signed April 1, the contractors can't see why the matter was not gone into before this by the carpenters and so informed the latter. The contractors have told the carpenters that they want an agreement signed up at once and that unless there is not some action to that end in the immediate future they will have to take matters into their own hands and provide a way so that building construction can be carried ahead.

OUST EXECUTIVE BOARD

Gary Painters Don't Like Action Taken By Officials

And Gary is having her troubles also. Over there the painters are on their high horse. The painting contractors of that city having failed to reach an agreement with their employes turned the matter over to the general contractors. The latter after several meetings with the executive board of the union painters reached an agreement fixing the 1924-25 scale at $1.25 per hour this to be ratified at a meeting of the union, March 31. This proposition went by the board since not enough members turned out to make a vote binding. Another special meeting was called for April 2, and when the craftsmen got together and heard of the agreement they immediately fired the executive board and repudiated all action taken by them. Thus is the paint situation all stirred up.

READY TO BREAK

Contractors Tired of Quibbling

The building trades employers of the Calumet District the past week called the turn. First the contractors of Gary met April 3, and issued an ultimatum to all crafts that had not reached an agreement that if satisfactory agreements were not concluded at once all such workmen would be laid off and not be reemployed until agreements were signed. Then the General Contractors Council of the Calumet District met at Indiana Harbor, endorsed the action of the Gray contractors and adopted a resolution to send notices to the same effect to all the unions in the building trades in the District who had not reached and signed up agreements.

SIGNS OF SPRING CHEER

Things Perk Up in the Calumet

Glory be! The sun somehow found its way through the clouds recently and shown for two whole days. Even the grass has turned a little greener and the robins have been arriving in increasing numbers daily. The weather man seemed to have been a litle miffed over the turn things had taken and has issued rain and colder warnings. If it snows any more this season the old town will probably be buried as the majority of citizens have sworn off from shoveling snow. Enough is enough! That is the way every one up here feels about the long drawn out winter through which we have just passed.

CALUMET BUILDING PROGRESS

The general contract for the construction of an addition to the Northern Indiana Gas Co., warehouse and garage was let to Fred C. Rowley, Chicago, at $30,000. The plumbing was awarded to the Hammond Plumbing Co.

provided therefor and shall be accompanied by the usual non-collusion affidavit or affidavits required by law, and all bidders are required to deposit with their bid a certified check in an amount not less than two (2) per cent of the amount of the proposal; or a good and sufficient bond in a sum equal to such bid or bids, conditioned as by law provided, payable to the State of Indiana, and signed by at least two free-hold sureties who are residents of Pike County, Indiana, or signed by a properly authorized and qualified bonding or surety company, which bond shall guarantee the faithful performance and execution of the work so bid for in case the same is awarded to said bidder and that the contractor so receiving said contract shall promptly pay all debts incurred by him in the prosecution of said work including labor, materials furnished and for boarding laborers.

The general nature of the proposed undertaking and for which bids are to be received as above, set forth is the erection and construction of a new high and grade school building for Monroe Township, Pike County, Indiana, all of which is more definitely set forth and described in the plans and specifications, together with the complete drawings thereof, which are now on file in the office of the Trustee of Monroe Township, Pike County, Indiana. The said building is to be located on Lot Number Nine (9) in Jordan's Addition to the Town of Spurgeon, Indiana, the exact location to be as hereinafter marked and set out by Harry E. Boyle, 401 Furniture Building, Evansville, Indiana, architect, and from whom forms for bids, instructions to bidders, copies of plans and specifications and more detailed information may be had upon request.

The Trustee and Advisory Board of Monroe Township, Pike County, Indiana, reserve the right to reject any and all bids.

The estimated cost of the proposed work is Thirty-five Thousand Dollars.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

NOTICE IS HEREBY GIVEN, That sealed bids will be received up to 1:00 o'clock P. M. on Thursday, the 24th day of April, 1924, at the office of the Board of School Trustees of the School Town of Brownstown, Indiana, in said town, for the construction of an addition to and the remodeling of the school building of the school town of Brownstown, Indiana, together with the installation of heating, ventilating and lighting system therefor and the installation of a sanitary flushing closet system, all in accordance with full details, prints, and plans and specifications for all of said work now on file in the office of the undersigned Board of School Trustees of the School Town of Brownstown, Indiana, where they are open to the inspection of all persons interested.

Said plans and specifications, or copies thereof, are also on file for bidders at the office of Allen & Garriott, Architects and Engineers, 401 Lombard Bldg., Indianapolis, Ind.

For convenience the plans and specifications are issued under two heads, viz—one General construction and one for Heating, Plumbing and Electric Wiring.

Bids will be received upon said proposed work as a whole, or on any separate part thereof; any combination of bids will be considered. Bidders desiring copies of plans and specifications will be required to deposit $25.00 with the above named architects upon receipt thereof, which amount will be returned upon safe return of plans and specifications.

All bidders will be required to file their bids in form required by law and to accompany their bids with affidavit required by law. Each bidder is required to deposit with his bid a certified check payable to the undersigned Board of School Trustees, in an amount of not less than 3 per cent of the total amount of his bid, to secure the entering into of a proper contract and giving a proper and sufficient bond in the event that he be awarded the contract.

The successful bidder or bidders will be required to enter into a contract in a form and with surety acceptable to the undersigned Board in an amount equal to the amount of such contract, conditioned for the faithful performance of said work in accordance with the plans and specifications therefor, and for the completion of said work not later than September 15th, 1924.

The Addition to be constructed to be 101 feet in length by 62 feet in width, two stories in height, brick with slate roof.

The estimated costs of the improvements is $34,000.00.

The right is reserved to reject any and all bids.

Dated at Brownstown, Indiana, this 2nd day of April, 1924.

ORLEAN R. EMERSON,
CHARLES V. SAGE,
ROSCOE M. ROBERTSON,
Board of School Trustees of the School Town of Brownstown, Indiana.

John C. Branaman, Attorney.
April 5th and 12th-1924.

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

Of Indiana Construction Recorder, published weekly at Indianapolis, Indiana, for April 1, 1924, State of Indiana, County of Marion, ss:

Before me, a notary in and for the state and county aforesaid, personally appeared Donald Campbell, who, having been duly sworn according to law, deposes and says that he is the owner of the Indiana Construction Recorder, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 443, Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the name and address of the publisher, editor, managing editor and business manager are:

Publisher, Donald Campbell, 312 E. Market St., Indianapolis, Indiana; editor, Donald Campbell, 312 E. Market St., Indianapolis, Ind.; managing editor, none; business manager, Donald Campbell, 312 E. Market St., Indianapolis, Indiana.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent. or more of the total amount of stock.) Donald Campbell, 312 E. Market St., Indianapolis, Ind.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent. or more of total amount of bonds, mortgages, or other securities, are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company, but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances or conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

5. That the average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the six months preceding the date shown above is ————. (This information is required from daily publications only.)

DONALD CAMPBELL, Owner.

Sworn to and subscribed before me this first day of April, 1924.

(Seal) JUNE STEELE MYERS,
Notary Public.

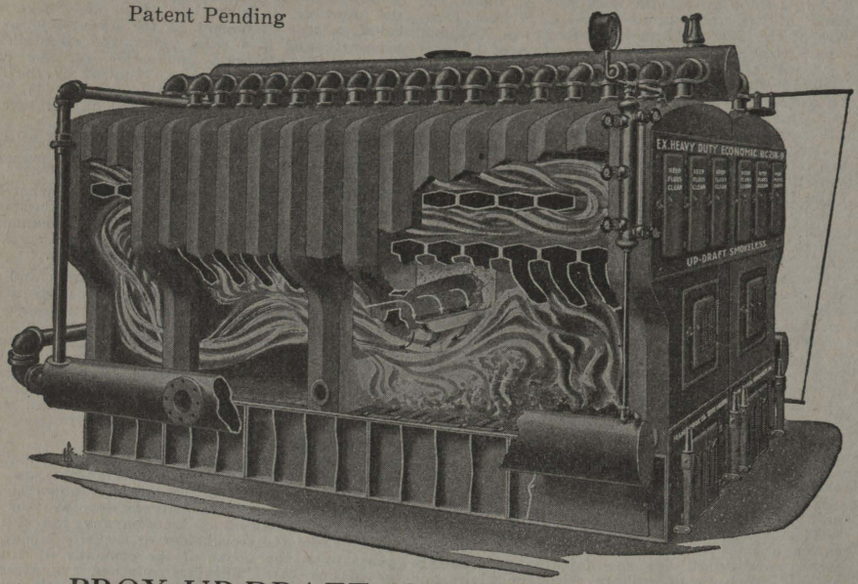
"BC" Series Up-Draft Smokeless Boiler

Patent Pending



PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

WRITE FOR OUR 1923 CATALOG

1. PROX BOILERS are made in sizes and capacities suitable for any requirements.

2. Especially desirable where continuous service is required, such as hospitals, schools, churches, apartments, office buildings etc.

3. In case of accident, any section can be taken out- and replaced, without interrupting the service.

4. Each section is an independent heater, only connected to other sections through the manifolds, permitting a section to be plugged out until repair part arrives.

ROMANTIC ATMOSPHERE INTERWOVEN INTO REGIONAL MEETING.

Historic Setting Lends to Interest of State Architects' Gathering.

Just a little different touch was added by Vincennes to the regional meeting of the Indiana Society of Architects, held there April 12, to lend an added attraction that appealed in a different manner from the spell that has held forth at other regional affairs. There was the routine business, and the usual necessary current matters to be discussed, of course, all of which was on the program, but beyond that was an alluring romantic historical atmosphere that hung low to envelop the visitors and carry them back to the yesterdays of the frontier, the battles and struggles of the pioneers who with indomnitable courage, hewed out a habitation on the banks of the Wabash and from which has grown a prosperous modern Indiana city which, with its variagated architecture traceable to the influences of the various nationalities that have held forth there at different times, holds particular interest for the architect. The older structures in their lines show the French, English and Southern Colonial influence giving way more recently to the modern American type of structure both commercial and residential.

The Board of Directors met in the morning at the Grand Hotel at which seven architects responded. New members admitted were Frank B. Hunter, Indianapolis; George W. Freyermuth, South Bend, and Ralph O. Yeager, Terre Haute.

Architect Harry Boyle was appointed a committee to write to the State Board of Registration for Engineers and enter a protest against the promiscious issuance of engineer's licenses to applicants. There is a growing feeling among the architects that more discretion should be exercised by the engineering license board.

Merritt Harrison was appointed delegate to represent the I. S. of A., at the annual convention of the A. I. A., at Washington D. C., in May.

Walter Scholer was appointed delegate to attend the Semi-Centennial of the Founding of Purdue University, May 1, 2, and 3, at Lafayette, this in response to an invitation to the Society to have a delegate present at that event.

In the afternoon the visiting architects were taken for an auto trip of the city, visiting the various historic sites of early military importance, the old Catholic Cathedral built in 1826, the old house in which the first Indiana Territorial Legislature met, July 9, 1805; the old home of General William Henry Harrison and some of the larger industrial plants.

A return was then made to the Grand Hotel where an evening dinner was served and entertainment features were introduced. A most interesting address was made by Lowell L. Houston, Vincennes, on "The Early History of Indiana" who described the coming of the French priests to this seciton of the world, and the subsequent development of the country through early pioneer days, the struggles between the French and British, then between the latter and the American colonial armies under General George Rogers Clark and next the campaign of General William Henry Harrison and to the admission of Indiana to the Union.

Those present at the meeting were:

Harry E. Boyle, Evansville; H. M. Griffin, Connersville; Nat Smith, Crown Point; George W. Allen, Laporte; Merrit Harrison and A. A. Honeywell, Indianapolis; Warren D. Miller and Ralph O. Yeager, Terre Haute; John B. Bayard, J. C. Bixby, J. W. Gaddis, L. L. Houston, John T. Reep, Lester W. Routt, B. F. Sager, Rudolph W. Schucker, Vincennes.

STATE ARCHITECTS FOR REMOVAL OF CHURCH EDIFICES FROM WAR MEMORIAL SITE.

Adopt Resolution to That Effect At Recent Regional Meeting.

After a thorough study of the motif and plan as proposed by the models submitted by Architects Walker and Weeks, Cleveland, who are planning the Indiana War Memorial, to be located at Indianapolis, the Board of Directors of the Indiana Society of Architects and the members who attended the regional meeting at Vincennes, Ind., Saturday, April 12, adopted the following resolution:

Whereas, Chapter 245 of the Acts of the General Assembly of the State of Indiana, 1920, as created by Chapter 50 of the Acts of 1920, and as amended, providing for "An Indiana World War Memorial to be located at Indianapolis," sets out that the purpose of this Memorial is to "commemorate the Valor and sacrifice of soldiers, sailors and marines of the United States, of all patriotic organizations, and all others who rendered loyal service and made sacrifices at home and overseas in the great world war," which fact makes the Indiana World War Memorial national in scope, and

Whereas, The above Act as amended further sets out that "Square Twenty-five (25), known as University Square in the city of Indianapolis, according to the original plat thereof" when dedicated now or hereafter for memorial purposes, shall be developed "so as to secure a harmonious and unified architectural and aesthetic effect of the entire series of grounds" (from St. Clair street to New York street), and

Whereas, The Board of Trustees of the Indiana World War Memorial in carrying out the provision of the above Act, conducted a country-wide competition upon a high plane, which attracted the best architectural talent in the United States, which resulted in the selection of the design as illustrated by plaster models now on public exhibition by a jury of men whose ability is nationally recognized, and

Whereas, These models provide for an "harmonious and unified architectural and aesthetic effect" in the development of memorial place, as set out in the Memorial Act, as voted upon by our legislature, Therefore,

Be It Resolved, By the Board of Directors and by the Regional meeting of the Indiana Society of Architects, both assembled at Vincennes, Indiana, this, the twelfth (12th) day of April, 1924, that we commend the Board of Trustees of the Indiana World War Memorial for their successful progress in carrying out the will of the legislature, and through it the will of the people of Indiana, in obtaining the present expression in plaster models of the proposed development of Memorial Place in an aesthetic, harmonious and unified character, and

Further, That we believe it is self-evident that the two church edifices, as well as the other buildings now standing, must eventually be removed regardless of the location of the Memorial Building in Memorial Place, and

Further, That copies of this resolution be sent to the Board of Trustees of the Indiana War Memorial, to the Marion County Board of Commissioners, and to the press.

Give us the opportunity of demonstrating our various lines of building materials before placing your orders.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

LETHARGY HITS LOCAL BUILDING OPERATIONS

Noticeable Let Down Lately

But twelve permits for residences, representing building to the amount of $35,000, were issued at the office of the city building inspector last week. There were sixty-two permits issued for repairs to garages and sheds representing a total in building cost of $10,060.90. The great number of permits issued during recent weeks for converting old stables into garages shows the trend of motor traffic through the city.

BUILDING OFFICIALS PREDICT BIG CONSTRUCTION OUTPUT THIS SEASON

That's the Word Brought Back from Louisville by Evansville Commissioner

Cheering news, full of optimism, was brought back to Evansville by City Building Commissioner Edward Kerth, from Louisville, Ky., where he attended the tenth annual convention of the National Building Official's Conference. A general survey of building conditions and prospects gleaned from the reports made by the delegates, representing practically every state in the Union, tends to inspire the belief that the country is in for another big building construction period in 1924.

Discussions developed the information that most all localities are working along constructive efforts to institute more substantial building structures and are going in more or less to establish certain maximum sky line heights.

During the conference the new Evansville building code was submitted for the consideration of the delegates and was generally approved by them.

DEVELOPMENT OF RESTRICTIVE RESIDENCE SECTION UNDERWAY

Novel and Atractive Features Contemplated

Surveys have been completed for a new home addition, comprising seven acres bounded by Kentucky, Bellemeade, Willard and Lincoln avenues.

The community idea will be followed in the development of the addition. In addition to the erection of houses that will be distinct in construction features, plans are being considered for tse most effective landscaping of the property as a whole.

All houses and garages in the addition will be of brick eighteen of the thirty homes to comprise the community, will be started at first. Driveways through the addition will be private. It is expected permission will be granted by the board of public works to lay out that section of Mulberry street traversing the property, into a private court. It will be named Mulberry Court. To insure the prevalence of an established standard in homes, a minimum cost in construction will be established. Plans are being made to provide this section with features that will make for distinctive novelty and attractiveness.

GRATIFYING INCREASE IN BUILDING FOR FIRST QUARTER 1924 SHOWN BY PERMITS

Value of Proposed Structures Runs $324,740 More Than Last Year's Volume Over Same Period

An increase of $324,740 in the value of new buildings for which permits have been issued in Fort Wayne during the first three months of this year as compared with the same period in 1923, is shown by an analysis of the volumes of building business that have passed through the office of the city building inspector over the first quarter of both years.

This increase is most gratifying because of the fact that active building operations were hardly expected this spring to measure up to those of 1923 when things were moving along at a record breaking pace.

Builders generally expected a slight decline during this year, bringing the totals under those of last year because an unusually large building campaign was carried on during 1923.

An interesting feature to be found in the comparative building data of the two years has to do with the discovery that the number of apartment building permits has decreased from eleven during the first quarter of 1923 to two in the same period this year. According to authorities on the subject, this change is unusual as a decided increase in the number of apartments erected each year is usual in large cities due to the lack of housing facilities. In this class of building, one permit was issued in January, 1923; four in February, and six in March, the total value being $437,900. January and March drew blanks in this class of construction during 1924, but two permits were issued in February, with a value of $7,350.

The value of the factories for which permits were issued also decreased. The approximate total value of factories planned during the first three months of 1923 was $400,000, while that of the first three months of this year was $18,000. This decrease is assigned to the fact that 1923 was an unusual year in this class of construction also, due probably to the fact that a large number of industries were brought to Fort Wayne, while the building permits issued for this year indicates the normal degree of growth.

There has been a steady increase in the value of permits for the remodeling and building of dwellings during the three months of 1924, the figures show. Forty-two permits were issued during January, 1924; January, 74, and February, 183. The value of dwellings for which permits were issued in January was $209,900; February, $272,850, and March, $717,605, making a total of 299 permits with a value of $2,200,355, while the total of 1923 was 290 homes with an approximate valuation of $1,292,940.

There was a decrease in the number of private barn and garage building permits issued during this year when the totals are compared with those of the same period of 1923. A total of 101 permits for this type of construction were issued during 1923, with a value of $79,-670; during January, February and March of this year, only 91 permits were issued while the value decreased to $28,370.

In addition to the fact that the values stated in permits issued this year are greater than those of 1923, the number of public buildings erected has decreased, indicating that the increase in value is due to an increase in the number of dwellings and public buildings.

There were no building permits issued during January and February of this year for the erection of public buildings. Permits for the erection of four public buildings were issued during March. In 1923, permits for the construction of 15 public buildings were issued in January, seven in February and 21 in March carrying the total up to 53.

BUILDERS WIND UP A GREAT BOWLING SEASON

Hang Up a String of Creditable Records

—Team Standing—

Teams	W.	L.	Pct.
Wege-Stanford	58	26	.690
Colvin's Triangles	56	28	.667
Central Supply	50	34	.595
Thumbtacks	48	36	.571
Hugh J. Baker	42	42	.500
Conder & Culbertson	37	47	.440
Indpls. Elec. Supply	.32	.52	.381
Robt. Berner	13	71	.180

The most successful season of the Builders Bowling League's four years history has been brought to a close with the Wege-Stanford Marble & Tile Co. aggregation out in front. It was a hard fight but the "Tile-Setters" finally managed to set the rest of the teams back to the rear and did a nice job of it. Les Colvin's Triangles couldn't get any of their three corners wedged into first place but did manage to anchor strongly in the runner-up position. Then came the Central Supply Co. gang, who supplied the whole league with a thrill and by a spectacular sprint landed third. The Thumbtacks managed to stick into the fourth berth just ahead of Hugh J. Baker & Co's. "fire resistive outfit" who stood the hot pace and failed to warp. Conder and Culbertson's "contractors" were tardy getting started and blamed it on slow delivery of material, they were up only three stories when operations ceased. The Indianapolis Electric Supply Co. delegation now and then shocked the whole crowd, but there was too much of an alternating current directed to the lost column. While all the other builders were going ahead the "Steel Workers" from the Robert E. Berner Structural Steel Co. couldn't get the head pin rivet to perform right and failed to build their games-won structure very high.

It was a hectic twenty-eight weeks' struggle and during that period there was a continual shifting of teams for positions, all of which kept interest high throughout the season and developed some fine bowling.

Fortune smiled on the leaders who carried off high single and high three-game scores, 953 and 2728 respectively, while C. B. Mayer of the victors registered high single man with a 280 performance. Born of the Thumbtacks, copped the individual high three game record when he ran up a 640 total one night. Of the fifty-five players who participated in the season's play, 42 of them rolled 150 or better, Tucker's and Born's 180 averages topping the list.

A final farewell by way of a dinner at the Hoosier Athletic Club, marked the season's windup at which time these officers were elected to handle the league affairs next season: President, J. E. Woodward; Vice-president, F. O. Brafford; Secretary and Treasurer, W. H. Dwyer.

EIGHT BUILDING CRAFTS SIGNED UP AT INDIANAPOLIS

Cement Finishers Strike

So far, though it was passing through the wage scale readjustment period the past few weks, building construction operations have apparently shown no outward signs of having been disturbed in the least by the wage negotiations that have been going on in Indianapolis.

There are fourteen of the building crafts each spring in Indianapolis whose wage and working agreements expire either April 1st or May 1st, and of these eight have been satisfactorily adjusted. The expiration of the hod-carriers, brick-layers, steam-fitters and plumbers do not come to pass till May 1st, and every effort is being made to effect adjustments by that time.

No agreements have been reached with the carpenters or cement finishers as yet though the former are working along at the 1923 scale pending a decision which is expected shortly. The cement finishers were obdurate in their demands and when the latter were not acceeded to they went out on a strike, being the only local building craft to take such action this spring.

The hourly scales to date that have been agreed upon are:

Trade	Scale
Hoisting Engineer	$1.25
Iron Worker	1.25
Electrician, 1st 3 mos.	1.15
Electrician—2nd 3 mos.	1.22½
Electrician, rest of year	1.25
Plasterer	1.50
Lather	1.25
Painter	1.05
Sheet Metal Worker	1.05
Asbestos Worker	1.00

E. E. Cole----------Secretary

108 Citizens National Bank Bldg., Hammond, Indiana

CARPENTERS OF THE CALUMET SIGN UP FOR $1.25 PER HOUR.

Long-Standing Controversy Brought To a Satisfactory Conclusion.

Practically all the murky, haze laden atmosphere that has enveloped the Calumet District building construction labor situation has cleared away and the outlook now is far more promising than it has been for several months. The long drawn-out wage controversy with the carpenters has been terminated by mutual agreement between that craft and the general contractors with the new scale set at $1.25 per hour for the next two years. Also the roofing contractors have signed up with the representatives of the Union roofers at a scale similar to the carpenters' scale, the same to hold good for a period of two years and nine months.

The agreement made with the carpenters will have a far reaching effect as other crafts had used the carpenters as buffers, or shock troops, and agreed to not ask for increases if the carpenters failed to secure an advance from the 1923 scale. Particularly did the Union laborers agree to abide by the last year's scale if the carpenters did, and as a result the former scale holds the same for 1924 as it was last season.

Now that the brick-layers, carpenters, roofers and laborers have come to terms, the other building crafts, too, are expected to drop in line and move forward with building operations.

Seeking for a reason for the successful termination of the wage scale trouble there is but one answer, and that points to organization amongst the contractors who stood together and steadfastly contended for what seemed justifiable. The general contractors of the Calumet District, builders of Hammond, Gary, Indiana Harbor and Gary formed a Central Council and together worked through that body in handling the wage scale adjustment. Backed loyally and substantially by all these men, the Council was in a position sufficiently strong to bring enough pressure to bear, to command attention and recognition to such an extent that it accomplished what no single city set of contractors would have been able to do.

All of which clearly demonstrates the truth that in "Union There Is Strength" and it is to be hoped the contractors will not soon forget the possibilities to be obtained through a determined organization effort.

REPRESENTATIVE OF STATE A. B. C. EXTENDS VALUABLE AID.

State Contractors' Association Sends Field Man to Offer Assistance.

The Calumet contractors are indebted to Field Representative J. H. Owens of the Associated Building Contractors of Indiana for the assistance he rendered in the way of counsel when the carpenters' wage controversy reached the crucial stage. "Jack" was "Johnny on the spot," and then turned his attention to the painter contractors and sought to aid them in their wage tangle.

CALUMET BUILDING PROGRESS.

Archt. J. T. Hutton & Son, Hammond, are preparing plans for a Masonic Temple 85 feet by 104 feet to be two stories and basement on the corner of Sixth and Jefferson streets. Plans ready May 1. They are also making plans for a school building 61 feet by 144 feet, two-story, at Calumet City (West Hammond). Plans ready May 1.

Archt. Mac Turner is preparing plans for a one story and basement brick garage building for the Rimbach Estate, corner Sibley street and Morton Court. Plans ready about May 1. He is working on plans for a one story and basement brick Auto Sales Room, 50 feet by 130 feet, 667-669 Hohman street, for J. C. Paxton. Plans ready April 25. Estimated cost, $25,000.

Chas. N. Scott was the low bidder on the Torens apartment, addition to be built on top of garage, corner Plummer and Sohl street. Contract price, $85,000.

A. C. Berry & Co., architects, are preparing plans for a three room addition to a school building at Manhattan, Ill.

The bids on the school building at East Chicago, opened the 9th, were Rufus Danner & Co., $246,412; Great Lakes Cons. Co., $239,950; Stranberg, $265,000; Anderson Co., $247,242; E. P. Stranberg, $230,899; Smith & Co., $242,850; Hansen Bros., $231,650; Midland Cons. Co., $230,000.

BUILDING SHOWS INDICATION OF BOOMING SOON.

Wage Settlement Effect Felt.

Since the carpenters' agreement has been reached a new tone is optimism has made itself felt in Calumet building circles. Just as soon as the rest of the crafts sign up, only a few still holding out, a decided active building campaign is looked for though the volume is a little late in getting launched.

Sealed Proposals

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Notice is hereby given, That Norman E. Williams, Trustee of Monroe Township, Pike County, Indiana, with the concurrence of the Monroe Township Advisory Board. will. until 9 o'clock a. m. on Saturday, May 3rd, 1924, at the banking office of The First National Bank of Spurgeon, Indiana, in the Town of Spurgeon, Indiana, receive sealed bids and proposals for the erection and construction of a high and grade school building in the Town of Spurgeon, Pike County, Indiana, in accordance with the plans and specifications and detail drawings heretofore adopted therefor by the said Trustee and Advisory Board, and which are now on file in the office of the said Trustee of Monroe Township, Pike County, Indiana.

All bids shall be made out on forms expressly provided therefor and shall be accompanied by the usual non-collusion affidavit or affidavits required by law, and all bidders are required to deposit with their bid a certified check in an amount not less than two (2) per cent of the amount of the proposal; or a good and sufficient bond in a sum equal to such bid or bids, conditioned as by law provided, payable to the State of Indiana, and signed by at least two free-hold sureties who are residents of Pike County, Indiana, or signed by a properly authorized and qualified bonding or surety company, which bond shall guarantee the faithful performance and execution of the work so bid for in case the same is awarded to said bidder and that the contractor so receiving said contract shall promptly pay all debts incurred by him in the prosecution of said work including labor, materials furnished and for boarding laborers.

The general nature of the proposed undertaking and for which bids are to be received as above, set forth is the erection and construction of a new high and grade school building for Monroe Township, Pike County, Indiana, all of which is more definitely set forth and described in the plans and specifications, together with the complete drawings thereof, which are now on file in the office of the Trustee of Monroe Town-

NOTICE TO CONTRACTORS

SCHOOL HOUSE

Notice is hereby given that the undersigned trustee of Otter Creek school township, Ripley county, Indiana, will receive sealed bids at the office of said township trustee at Holton, Indiana, at 10:30 o'clock a. m. on

THURSDAY, MAY 8, 1924

for the furnishing of all the material and performing all of the labor for the construction and completion of the Otter Creek Township High School Building at Holton, Indiana. Such construction and installations shall follow the plans and specifications approved by and now on file in the office of the State Board of Accounts, township trustee, Chas. P. Williams, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to Charles P. Williams, trustee, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the said school township of Otter Creek for the contract, and furnish sufficient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $35,000.00.

The undersigned trustee and advisory board reserves the right to reject any and all bids, and waive any defects or informality, if deemed in the interest of said Otter Creek school township.

Dated April 14th, 1924.

CHARLES P. WILLIAMS,
Trustee of Otter Creek School Township, Ripley County, Indiana.

LUTHER L. LANE,
FRANCIS M. ELLIS,
JACOB N. FURLOW,
Advisory Board.

April 19th-26th-May 3d, 1924.

METAL LOCKERS

NOTICE TO BIDDERS

The Board of Trustees of the Indiana State Normal School will receive bids on or before 10 A. M., Wednesday, April 30, at the office of the Ball Teachers' College, Eastern Division, Indiana State Normal School, Muncie, Indiana for metal lockers for the new gymnasium and prices bid are to cover such delivery and setting up. Bids should be made on the following:

1. WOMEN'S LARGE LOCKER ROOM. Approximately one hundred ninety-five (195) single tier lockers, of the approximate size 12x12x72 (twelve by twelve by seventy-two); approximately two hundred fifty-six (256) double tier back to back lockers of approximate size 12x12x36 (twelve by twelve by thirty-six)

2. MEN'S LARGE LOCKER ROOM. Approximately one hundred eighty-five (185) single tier lockers approximate size 12x12x72 (twelve by twelve by seventy-two); approximately one hundred twenty-eight (128) double tier lockers back to back of the approximate size 12x12x42 (twelve by twelve by forty-two).

3. TWO VARSITY ROOMS. Approximately eighty-eight (88) single tier lockers of approximate size 18x18x72 (eighteen by eighteen by seventy-two).

The 18x18x72 (eighteen by eighteen by seventy-two) lockers are to be made from heavy steel wire with a lighter wire inside to prevent pulling of towels, etc., through meshes of heavy wire.

It will be necessary for you to present samples of your lockers at the opening of the bids if you expect to have your bids considered.

Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by certified check equal to 5% of the amount of bid.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,
HELEN C. BENBRIDGE, Secy.

April 19th-26th, 1924.

WINDOW SHADES

NOTICE TO BIDDERS

The Board of Trustees of the Indiana State Normal School will receive bids on or before 10 A. M., Wednesday, April 30, at the office of the Ball Teachers' College, Eastern Division, Indiana State Normal School, Muncie, Indiana on window shades in the following numbers and dimensions:

Number of Windows	Width of Windows	Length of Windows
6	48¾"	8' 3"
84	36½"	8' 3"
4	33½"	8' 3"
4	33½"	5' 7"
184	32½"	8' 3"
8	32½"	5' 7"
4	31½"	8' 3"
2	24 "	4' 6"
8	16 "	7' 4"

Note—The window frames are of metal and the flat surface on each side of a frame over which the edge of the shade will lie is 1½" wide. The shade should be 1" to 1½" narrower than given length of the window so that the edge of the shade will not become frayed by contact with the side of the window frame.

Samples must be submitted or bids will not be considered. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by certified check equal to 5% of the amount of bid.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,
HELEN C. BENBRIDGE, Secy.

April 19th-26th, 1924.

ELECTRIC LIGHT FIXTURES

NOTICE TO BIDDERS

Bids will be received by the Board of Trustees of The Indiana State Normal School at 10 A. M., April 30, at the office of the Ball Teachers' College, Eastern Division, Indiana State Normal School, Muncie, Indiana, for electric lighting fixtures to be installed in the new Science Hall at Muncie, Indiana. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by a certified check equal to 5% of the amount of the bid.

Detailed plans and specifications for the particular lighting system must be made, the location of the different fixtures being in accordance with the general plans and specifications for the buildings on file in the office of Kibele and Garrard, Architects, 335 The Johnson Building, Muncie, Indiana.

Samples of fixtures must be submitted or bids will not be considered.

I never dreamt of such lumber

Many a builder grown old in the business expressed surprise that a lumber could have the many features of Celotex.

The ease and rapidity with which it is used as sheathing, as plaster base or as roof insulation amazes him. The lack of waste has his approval. He notices the rigidity of the walls, for Celotex is stronger than wood sheathing.

Celotex has the insulating value of cork and when in place generally costs less than the materials it replaces.

Builders everywhere approve Celotex and they find it to their advantage to explain to their clients how Celotex will cut fuel bills a fourth to a third as long as the house stands—and do it at no added first cost.

Write for complete literature on Celotex to The Celotex Company, 645 N. Michigan Ave., Chicago, Ill., Branch Representatives, The Indianapolis, Celotex Co., 205 E. Ohio St., Phone Main 7089, Wm. J. Ryan, Manager

Celotex is a strong, rugged, weather-proof durable building lumber made from the long, tough fibres of cane. It is better than wood sheathing—equals cork for insulation.

Celotex is used for sheathing instead of wood; for plaster base, roof insulation, sound deadener and exterior finish.

Stock sizes: Thickness 7/16 in.; width 4 ft.; lengths 8 ft. to 12 ft. Weight about 60 lbs. per 100 sq. ft.

WARNING SOUNDED

Benton Harbor Findings in Concrete Building Collapse Impress With Need for the Greatest Precaution

Since quite a few collapses of concrete buildings have attracted public attention, one case at Benton Harbor last January particularly being focused upon, the monthly bulletin of the Illinois Society of Architects for April comes forward with an admonition that more care be exercised in this sort of construction particularly in the winter months. Then follows an editorial from the April 3rd issue of Engineering News-Record which should be a sufficient reminder to all architects that too great care can not be exercised in such operations to protect the client.

"Let us review the case. **The building was designed in competent fashion and was being built by an experienced contractor with experienced supervision.** The cement is a standard brand and such of it as is available passes the standard specification; there is no other way by which its acceptability can be judged. The aggregate could have been better, but dozens of structures built of it are standing. The proportioning was careless and inaccurate, but no more so than in most jobs where the necessity of precise proportioning has not yet penetrated. The chances are that the resulting mixture was leaner than that specifid and the optimum strength of such a mix lower than a proper safety factor on the loaded building would require. But even the leaner mix under normal temperature exposure would be expected to attain a strength at least twice that of the strongest piece of concrete taken from the ruins. Calcium chloride was used as an accelerator but there are no valid tests which show that the usual proportion of this salt reduces strength materially. In short, assuming normal temperature, there was no reason for the building to fail.

But it did fail—because it was built in extremely cold weather, with only perfunctory measures for protection against the dangers of low temperature. If no effort whatever had been made to counteract the cold, the Benton Harbor collapse would have been merely an example of criminal ignorance; as it is. it is an example of **a little knowledge being a dangerous thing.**

Efforts were made to heat the aggregate and water, but no one knew just how effective they were; tarpaulins were provided, but they covered, with dangerously wide openings, **only one story and had to be moved as soon as a higher floor was placed;** salamanders were provided, but they were pitifully few for temperatures far below zero or even for those below freezing. Stories were run up with creditable rapidity even for fair weather, but an extra special effort was apparently made to speed up in the coldest weather, **so that we have the fifth-story tarpaulin moved to the sixth story three days after the floor between had been placed and in a temperature at 16 deg. below zero..** It was only to be expected that this concrete—even with the opportunity for set it might get in the brief intervals of sunshine and warmth—would melt away like ice and collapse when the struts below it were removed on a warmer day.

The dangers of cold weather concreting had been harped on for years. Such a failure as this will do more good to remind engineers and contractors of their actuality than a thousand lectures. But in order to make definite what may be learned, some specific facts may be recorded for future reference.

A salamander is not a standard heating unit. To say that so many salamanders per square feet of surface should be used is not to specify precisely. There are possibilities of variation in the stove itself, in its fuel and its rate of fueling, its location and the outside temperature. **The only safe precaution is to have thermometers inside the building and constant inspection to see that the heating provided is sufficient to keep the temperature over 55 deg. for four or five days before being subjected to freezing temperature. This involves complete enclosure,** which means not only a light tarpaulin, but one sufficiently far from the outside column to insure air circulation around it and enough tarpaulins so that they do not have to be moved until the concrete they protect is safely set. **Steam pipes, if they can be used, are far safer than any salamander, and heat holes leaving openings between stories being cured are an additional precaution.**

It goes without saying that water must be heated and aggregate freed of frozen lumps, but it is safer to go further and actually heat the aggregate before it is placed in the mixer. Frozen lumps may get by the steam thawing process and even go through a torch heated mixer in the minute allowed there. To have safe concrete the whole mix before dumping should be at least 60 deg. in temperature."

These are fairly elementary facts. They are recognized by those who successfully place concrete in cold weather—and the number who do so place it is growing every year. All that is necessary to insure safety is a recognition of the fact that concrete **sets but slowly below 50 deg., practically not at all below 40 deg. and absolutely not at all below 32 deg., that frozen or very cold ingredients add to the difficulties of setting whatever the exposure temperature and that repeated freezing and thawing of a partly set concrete permanently reduces its strength.** There is much oral testimony to the contrary of the last statement, but tests uniformly bear it out and to go contrary to such tests is merely taking unnecessary chances. The behavior of concrete in cold weather once recognized, there remains only to provide conditions of making and setting which remedy the difficulties. This can be done at a moderately low additional cost, which generally is more than made up by the gains from a continuing construction through the cold weather period.

The Benton Harbor building need not discourage builders from going ahead in cold weather; its record, though, might well be posted on every concrete job as a warning of what neglect of any of the proper precautions may lead to.

ENGINEERS ENDORSE STAND TAKEN BY STATE ARCHITECTS' BODY REGARDING WAR MEMORIAL SITE

Hold Churches Should Be Removed

The American Association of Engineers, Indianapolis Chapter, passed a resolution at its meeting on Thursday, April 17, 1924, backing up the resolution concerning the Indiana World War Memorial,, passed by the Indiana Society of Architects.

The Memorial Committee of the Indianapolis Chapter of A. A. E. consists of L. A. Turnock, chairman; H. E. Boyle, Walter Scales and W. K. Eldridge.

WAGE SCALE CONTROVERSY WITH BRICKLAYERS AT EVANSVILLE SETTLED

Muddle Smoothed Out Through Arbitration Agency

A spring without some sort of threatening wage scale flare-up would be much as an April without rain, or a May minus flowers, therefore, Evansville fell in with the normal trend of things recently and had her regular spasm between the brick mason contractors and the Union bricklayers.

The latter came forward with a demand for $1.50 per hour at which the bosses bucked and for a time there the two factions stood. Finally not getting anywhere the bricklayers individually laid down their tools and walked out. The local Mason Contractors' Association then sent in a S. O. S. to the Mason Contractors Assn., of Indiana, and the state body got busy and was able to effect an arbitration board made up of officers of the National Association, officers of the International Union of the bricklayers, Evansville and Indianapolis contractors and after an eight-hour conference the dispute was settled. A settlement was effected on this basis: Evansville bricklayers are to receive $1.40 per hour till July 1st, and $1.42½ is to be the scale after that until April 1st, 1925.

PROSPECTS PROMISING FOR AN ACTIVE YEAR FOR EVANSVILLE BUILDING CONSTRUCTION INTERESTS

Signs of Future Activity Continue to Develop

Though the figures covering building construction operations in Evansville have not been of startling proportions of late, nevertheless, the tone of things in local construction circles is good and the indications are promising for the future. Active operations have not gotten under much of a headway as yet but there is a fair amount of work underway with plenty of prospective news of projects that show every likelihood of developing to maturity before long.

There is considerable residence planning going on in the architects' offices and some of this work will be out for the attention of the contractors shortly. Then, too, quite a few property owners are in a mood to improve their buildings and modernize them by remodeling and making additions. Most of this work is not of a large nature, averaging from $3,00 to $8,000 or $10,000, but it is helping to keep men busy and affords the contractors opportunities to hold their working organizations together for the big work that will come later.

Of interest to Evansville contractors is the outside of the city work upon which the local architects are engaged. That work covers schools, churches, and store buildings that are to be built within a hundred and fifty-mile radius of Evansville, being contemplated for southern Indiana, Illinois and western Kentucky. Though outside of the city these projects have quite a bearing on the local material supply market as much of the materials required are sold through Evansville firms and go a good way to make business good in this city.

CHIPS AND SHAVINGS

Concrete foundations have been completed for the one-story frame addition to the factory department of the Luhring Lumber company, Morton and Division streets. The addition will provide about 1,600 more square feet of operating space for this department, which now covers about 12,500 square feet.

The two-story brick building across the street known as Kelly's Corner, is being remodeled to be converted into a modern store, display room and office building.

According to computations made by the division of building and housing of the department of commerce, the percentage of lumber-built homes in eleven different representative states ranges from 59 to 97 per cent of all dwellings of towns with a population of more than 2,500. In the rural districts including towns of less than 2,500 inhabitants, lumber-built dwellings constitute about 98 per cent of the whole.

Scarborough-Davies Co., general contractors, expect to have the new Sunday school and community addition to First Evangelical church, Eighth and Division streets completed in a few days so that dedication exercises may be held by the congregation in a week or two.

Jacob Behrick, Mt. Vernon, Ind., contractor was awarded the general contract for the erection of the new Ribeyre gymnasium-auditorium at New Harmony.

SECOND IN FIRST QUARTER BUILDING OPERATIONS

Ft. Wayne Makes Good Showing When Compared With Other Indiana Cities

Official reports on building permits issued in eleven Indiana cities during the first quarter of 1924 show that the estimated valuation of the new construction work started during that period amounted to $15,649,888 as against $16,367,316 rolled up over the corresponding period last year. This was a loss of 4.32%

A tabulation of the figures of the individual cities gives Indianapolis first place, she having registered $5,939,696. Ft. Wayne followed next with $2,651,100. Then comes Gary, $2,110,784 trailed in order by South Bend, Terre Haute, Evansville, Elkhart, Hammond, Kokomo, Michigan City and Muncie.

SEES GOOD BUILDING CONDITIONS AHEAD FOR 1924

Favorable Trend Noted in National Survey

Improved labor conditions in the building trades throughout the country point to the completion of another year of intensified construction during 1924, with little danger of interruptions due to strikes, according to a nation-wide survey just completed by S. W. Straus and Co.

The report summarizes conditions as follows:

Wages generally well stabilized, with slight upward tendencies in larger cities where prospective building operations are large.

General employment at peak wages with especially pressing demands for bricklayers and plasterers.

Possible shortage of common labor, with the development of activities now indicated by unprecedented volume of building permits.

Successful and significant co-operation of building trades' unions and contractors in establishing apprenticeship schools to help relieve the acute labor shortage.

WAIVER OF LIEN

None this week.

TERMS REACHED BETWEEN CONTRACTORS AND CARPENTERS

Compromise Effected Though New Scale Is An Advance Over 1923 Figures

Prospects for building construction activity were given quite a boost at Indianapolis the past week when another wage scale argument was satisfactorily adjusted with the carpenters, one of the major crafts. All of the latter are now in line with the exception of the bricklayers and their present agreement does not expire till May 1st, next Thursday, by which time it is hoped to have things threshed out agreeably for all concerned.

As for the carpenters, their scale expired April 1st, and though the 1924-25 hourly working wage was at issue, and it seemed at times as if it was going to be a difficult matter to get employers and employes to a mutual agreement, the men stuck to their jobs and there was no cecession of work during the period of nearly a month over which the negotiations were carried.

A final decision was reached early this week when the men were granted a 12½ cents increase per hour, by the contractor employers, up to July 1st, this to be raised another 5 cents after that date.

This settlement was the result of a conference between national officers of the union and the building contractors of the city. The carpenters were given a scale of $1.05 an hour until July 1, and $1.10 after that date.

The carpenters had asked a new scale of $1.25 which was rejected by the bosses, who offered $1.05. The matter was referred to the national officers for arbitration, and a compromise scale was agreed upon after several days' negotiations. The old rate was 92½ cents an hour.

STATE MASON CONTRACTORS' ASSOCIATION JUMPS IN TO ASSIST EVANSVILE MEMBERS

Throws All Strength into Effort to Settle Wage Scale Mix-up

The Indianapolis members of the Brick Mason Contractors Association of Indiana, the new state organization that was just organized a few months ago to look after the interests of the brick masons are well pleased over the outcome of the Evansville bricklayers' wage scale dispute in that it is a direct result of the effort of the new association to "keep peace in the family" and eliminate strikes, lockouts and other delays to the progress of the building industry.

Hardly had the new association gotten fairly underway than signs of trouble began to appear in the direction of Evansville. The local body, affiliated with the B. M. C. of Indiana, was unable to cope with the situation and sent an appeal to the State Headquarters. President James Hodgson, Sr., was out west entour and M. M. Bonewitz, secretary, was sent to Evansville. He found things in bad shape and decided to call upon the International Arbitration Board in order to straighten things out. This board, composed of Thomas Preece, first vice-president, and Secretary Gleason of the Bricklayers and Plasterers' International Union, and Robert Gillespie, president, and Secretary Walter McGarvey of the Brick Masons International Association of the United States and Canada, met in Indianapolis, heard the evidence, and rendered the decision that has undoubtedly saved the Evansville situation.

Several communications have been received from the Evansville mason contractors complimenting the State Mason Contractors' Assn., upon the way it handled their affair and accomplished results.

PURDUE UNIVERSITY INVITES STATE CONTRACTORS ASSOCIATION TO PARTICIPATE IN SEMI-CENTENNIAL

A. E. Kemmer to Act As Delegate

Some months back Purdue University through its Engineering Extension Department bestowed upon the State Building Industry a real recognition, the nature of which had never before been accorded the Indiana building business by an educational institute. The occasion of that recognition took the form of a conference composed of architects, contractors, engineers and Labor representatives.

And now the Trustees of Purdue have extended another invitation to the Associated Building Contractors of Indiana to have a representative delegate present at the Semi-Centennial of the founding of the university, May 1, 2, 3.

Acting in response to the above the State A. B. C. has named A. E. Kemmer, Lafayette, to represent the organization at the Semi-Centennial ceremonies.

INDIANAPOLIS BUILDING PERMITS

Week of April 17th to April 24th

Mill Building: $87,676.00. Archt., Bacon and Tislow, 31 W. Ohio. Owner, Acme-Evans Milling Co. General contractor, J. G. Karstedt Co., Lemcke Building. Starting work, reinf. concrete.

INDICATIONS THAT BIG STEEL MILL WILL BE BUILT SENSED

Engineers At Work

Engineers are engaged in laying out the site at Hammond upon which to be erected the first units of the new monster Jones Laughlin Steel Company plant.

Plotting out the ground and taking borings where foundations are proposed to be constructed for the series of proposed mills is said to be the work on which a staff of engineers are now occupied.

This is the first move toward the outlook of actual construction beginning this year on the big Hammond plant of the Jones & Laughlin Steel Company, the largest independent steel producer in the country.

BUILDING LABOR SIGNS UP

Stalling of Electricians Is Only Cloud in the Sky Now

One more hump along the road to a settlement of the building trades wage scale matter in the Calumet District has been negotiated successfully and the outlook for 1924 seemingly grows brighter as the days go by.

The latest barrier to be surmounted was overcome April 17th when committees from the building trades employers and the Hod Carriers' and Building Laborers' Union met, talked things over, and finally reached an agreement which was signed up on the 1923 wage basis. The hourly scales decided upon were $1.10 for Plasterer Tenders, $1.00 for Mortar Mixers, $0.87½ for Hod Carriers and Building Laborers. This turn of affairs clears up the situation promisingly and yet there is a menace left, the electricians haven't come to terms and at Gary this craft is out on a strike. They have continued at work at Hammond, East Chicago, Indiana Harbor and Whiting, however, at the 1923 figures and have agreed to stick till May 1st, after that there is no telling which way the cat will jump. It is generally thought that the action of the men at work on electrical contracts are holding on till May in the last named cities waiting to see what the outcome at Gary will be.

The general contractors have gotten into the argument to the extent of exerting what influence they can on the electrical contractors in an endeavor to get all of them in the Calumet District to back up those at Gary in the attempt to hold the scale to the 1923 figure.

Other pressure is being brought to bear on the Home Builders, of which there are considerable in this locality, to line them up to and get them to impress upon the contractors who do their electric work to make a stand, too, for the last year scale. This is going to be a real task as most of the smaller electrical contractors still carry their Union cards and are under the domination of the organization.

If the larger and leading electrical contractors would make a determined effort, throw their hats in the ring, and back up the Gary contractors, it would have a big influence in effecting a satisfactory settlement over there.

There don't seem to be the bond between the electrical bosses that there should be and even those who are members of the Hammond B. T. E. A. admit they are not inclined to enter the fray unless they can have the absolute assurance that all the outside of the city contractors in the electrical contracting field will line up to a man and back this thing to the limit. All of which indicates that the bosses have not the confidence in each other that they should.

THE ROADS TO THE FISHING GROUNDS MUST BE BLOCKED

Else Why Did This Catch the Secretary's Fancy?

Of Beasts or Birds that roam the roads,
I'd rather be a crow,
For then past all the detour signs
Quite undismayed I'd go.

BUILDING NOT UP TO PACE SET AT THIS PERIOD A YEAR AGO

New Home Demand Off

Building construction is opening up considerably in the Calumet District, but not to the extent that it did last year at this time. Home buying is not as active and the Home Builders claim that sales are harder to make now than in 1923.

CALUMET BUILDING PROGRESS

Buckley & Skidmore, architects, Hammond Building, are preparing plans for a two-story and basement addition to the Hammond Furniture Co. store building, East State St., for Mr. Arkins, to cost $10,000.

H. B. Olney, Indiana Harbor, was awarded the contract for the $150,000 addition to the East Chicago City Water Works.

McEwin & Eesley have started construction on a $20,000 residence for Attorney Floyed Murray in Southview Addition.

Fred C. Rowley, contractor, formerly of Chicago, has purchased a home site in Broadmoor just south of the Little Calumet River and started construction of a $20,000 residence there.

The National Live Stock Remedy Co. has purchased the SiFo Products Plant and will add to Hammond's diversified industries. The company when it gets going will manufacture animal remedies.

Sealed Proposals

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Notice is hereby given, That Norman E. Williams, Trustee of Monroe Township, Pike County, Indiana, with the concurrence of the Monroe Township Advisory Board. will. until 9 o'clock a. m. on Saturday, May 3rd, 1924, at the banking office of The First National Bank of Spurgeon, Indiana, in the Town of Spurgeon, Indiana, receive sealed bids and proposals for the erection and construction of a high and grade school building in the Town of Spurgeon, Pike County, Indiana, in accordance with the plans and specifications and detail drawings heretofore adopted therefor by the said Trustee and Advisory Board, and which are now on file in the office of the said Trustee of Monroe Township, Pike County, Indiana.

All bids shall be made out on forms expressly provided therefor and shall be accompanied by the usual non-collusion affidavit or affidavits required by law, and all bidders are required to deposit with their bid a certified check in an amount not less than two (2) per cent of the amount of the proposal; or a good and sufficient bond in a sum equal to such bid or bids, conditioned as by law provided, payable to the State of Indiana, and signed by at least two free-hold sureties who are residents of Pike County, Indiana, or signed by a properly authorized and qualified bonding or surety company, which bond shall guarantee the faithful performance and execution of the work so bid for in case the same is awarded to said bidder and that the contractor so receiving said contract shall promptly pay all debts incurred by him in the prosecution of said work including labor, materials furnished and for boarding laborers.

The general nature of the proposed undertaking and for which bids are to be received as above, set forth is the erection and construction of a new high and grade school building for Monroe Township, Pike County, Indiana, all of which is more definitely set forth and described in the plans and specifications, together with the complete drawings thereof, which are now on file in the office of the Trustee of Monroe Town-

NOTICE TO CONTRACTORS

SCHOOL HOUSE

Notice is hereby given that the undersigned trustee of Otter Creek school township, Ripley county, Indiana, will receive sealed bids at the office of said township trustee at Holton, Indiana, at 10:30 o'clock a. m. on

THURSDAY, MAY 8, 1924

for the furnishing of all the material and performing all of the labor for the construction and completion of the Otter Creek Township High School Building at Holton, Indiana. Such construction and installations shall follow the plans and specifications approved by and now on file in the office of the State Board of Accounts, township trustee, Chas. P. Williams, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to Charles P. Williams, trustee, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the said school township of Otter Creek for the contract, and furnish sufficient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $35,000.00.

The undersigned trustee and advisory board reserves the right to reject any and all bids, and waive any defects or informality, if deemed in the interest of said Otter Creek school township.

Dated April 14th, 1924.

CHARLES P. WILLIAMS,
Trustee of Otter Creek School Township, Ripley County, Indiana.

LUTHER L. LANE,
FRANCIS M. ELLIS,
JACOB N. FURLOW,
Advisory Board.

April 19th-26th-May 3d, 1924.

METAL LOCKERS

NOTICE TO BIDDERS

The Board of Trustees of the Indiana State Normal School will receive bids on or before 10 A. M., Wednesday, April 30, at the office of the Ball Teachers' College, Eastern Division, Indiana State Normal School, Muncie, Indiana for metal lockers for the new gymnasium and prices bid are to cover such delivery and setting up. Bids should be made on the following:

1. WOMEN'S LARGE LOCKER ROOM. Approximately one hundred ninety-five (195) single tier lockers, of the approximate size 12x12x72 (twelve by twelve by seventy-two); approximately two hundred fifty-six (256) double tier back to back lockers of approximate size 12x12x36 (twelve by twelve by thirty-six)

2. MEN'S LARGE LOCKER ROOM. Approximately one hundred eighty-five (185) single tier lockers approximate size 12x12x72 (twelve by twelve by seventy-two); approximately one hundred twenty-eight (128) double tier lockers back to back of the approximate size 12x12x42 (twelve by twelve by forty-two).

3. TWO VARSITY ROOMS. Approximately eighty-eight (88) single tier lockers of approximate size 18x18x72 (eighteen by eighteen by seventy-two).

The 18x18x72 (eighteen by eighteen by seventy-two) lockers are to be made from heavy steel wire with a lighter wire inside to prevent pulling of towels, etc., through meshes of heavy wire.

It will be necessary for you to present samples of your lockers at the opening of the bids if you expect to have your bids considered.

Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by certified check equal to 5% of the amount of bid.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,
HELEN C. BENBRIDGE, Secy.

April 19th-26th, 1924.

WINDOW SHADES

NOTICE TO BIDDERS

The Board of Trustees of the Indiana State Normal School will receive bids on or before 10 A. M., Wednesday, April 30, at the office of the Ball Teachers' College, Eastern Division, Indiana State Normal School, Muncie, Indiana on window shades in the following numbers and dimensions:

Number of Windows	Width of Windows	Length of Windows
6	48¾"	8' 3"
84	36½"	8' 3"
4	33½"	8' 3"
4	33½"	5' 7"
184	32½"	8' 3"
8	32½"	5' 7"
4	31½"	8' 3"
2	24 "	4' 6"
8	16 "	7' 4"

Note—The window frames are of metal and the flat surface on each side of a frame over which the edge of the shade will lie is 1½" wide. The shade should be 1" to 1½" narrower than given length of the window so that the edge of the shade will not become frayed by contact with the side of the window frame.

Samples must be submitted or bids will not be considered. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by certified check equal to 5% of the amount of bid.

BOARD OF TRUSTEES OF THE INDIANA STATE NORMAL SCHOOL,
HELEN C. BENBRIDGE, Secy.

April 19th-26th, 1924.

ELECTRIC LIGHT FIXTURES

NOTICE TO BIDDERS

Bids will be received by the Board of Trustees of The Indiana State Normal School at 10 A. M., April 30, at the office of the Ball Teachers' College, Eastern Division, Indiana State Normal School, Muncie, Indiana, for electric lighting fixtures to be installed in the new Science Hall at Muncie, Indiana. Bids must be made on Form 96 prescribed by the State Board of Accounts and must be accompanied by a certified check equal to 5% of the amount of the bid.

Detailed plans and specifications for the particular lighting system must be made, the location of the different fixtures being in accordance with the general plans and specifications for the buildings on file in the office of Kibele and Garrard, Architects, 335 The Johnson Building, Muncie, Indiana.

Samples of fixtures must be submitted or bids will not be considered.

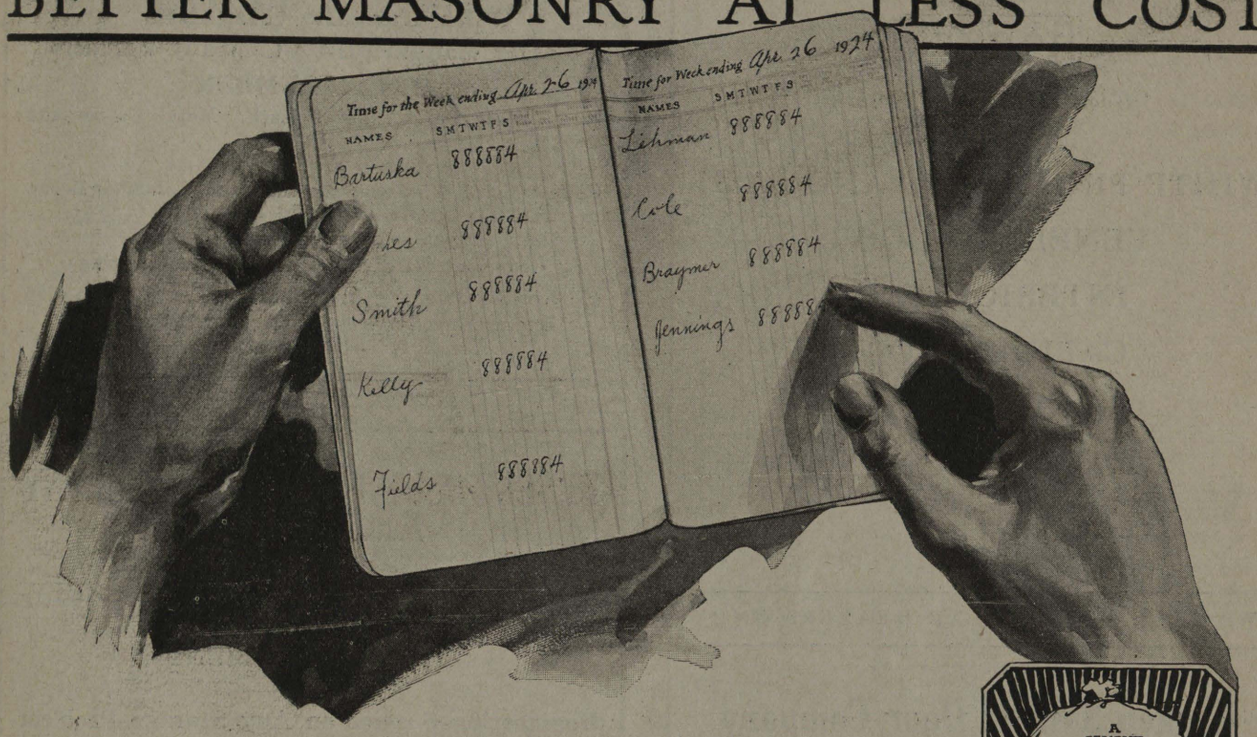
BETTER MASONRY AT LESS COST



Make your mason's hour count for more

The saving of time is an inevitable factor in every successful building operation. The contractor who can effect this economy in the highest degree is naturally working under the best conditions and can control and profit by the largest volume of worth-while business.

Because of its following distinctive characteristics, BRIXMENT not only assures better masonry but enables the contractor to save time, labor, material and money:

(1) Needs no slaking; can be used immediately after mixing (one part BRIXMENT, three parts sand). (2) Lays faster because of unusual plasticity. (3) Repels moisture. (4) Less likely to freeze. (5) Requires less mortar color and will not change the color used. (6) Can be retempered. (7) Used by nationally recognized architects and contractors.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

Indiana Society of Architects

Office of the Secretary
500 BOARD OF TRADE BUILDING
Indianapolis, Ind.

WINNER OF ARCHITECTURAL EXHIBIT EXPRESSES DEEP GRATITUDE OVER OFFICIAL AWARD.

Gives Credit To Men In The Back Office For Honor That Came To His Firm.

As an aftermath of the Annual Exhibit of Indiana Architects held recently at the John Herron Art Institute, Indianapolis, the Board of Directors of the Indiana Society of Architects is in receipt of an appreciative acknowledgement of the prize award made for what was decided by vote of the architects to be the best architectural endeavor executed during the year of 1923.

While the volume of the exhibits was not up to expectations the character was excellent and it required considerable individual inspection to reach a decision. When the vote was tabulated, the result showed the exhibit of the new Indianapolis Athletic Club, submitted by Architect Robert Frost Daggett, Indianapolis, to be the winner, a decision that, when announced, met with popular favor.

In regard to the above contest this letter has been received by Treasurer Parker of the Indiana Society of Architects:

Mr. Wilson B. Parker, Treas.,
Indiana Society of Architects,
507 Board of Trade Building,
Indianapolis, Ind.

Dear Parker:

This is to acknowledge receipt of your letter and check from the Indiana Society of Architects, as prize for the Indianapolis Athletic Club.

Please accept my sincere thanks for this token of appreciation from the Society, but the expression of goodwill and appreciation from the boys means more to me than the winning of the prize, which, by the way, I am turning over to Mrs. Daggett with instructions to get something which will always bring to mind the kindly feelings and appreciation expressed by my fellow "pencil pushers" for the work done on the Athletic Club.

I wish I could tell you of all the men in my office who deserve praise also for their work on this club, and in accepting this prize I do so, ever bearing in mind the credit that should go to them also.

With sincere and deep appreciation, I am,

Very truly yours,
Robert Frost Daggett.

GIFTED ARCHITECT FORCED TO RETIRE FROM INDIANA FIELD BECAUSE OF ILLNESS.

His Place Taken By Former Detroit Man

Owing to illness, and upon the advice of his physician, who has counseled a respite from business for at least a year, Wm. MacLucas of the architectural firm of George and Mac Lucas, Indianapolis, has been forced to withdraw from active practice and will be succeeded by J. D. Zimmerman, who has formed a new partnership with Mr. George, the same to be known as George and Zimmerman with offices at 501-02-03 Meyer-Kiser Bank Bldg. Though having not decided definitely, Mr. Mac Lucas may return to his former home in Scotland for a rest.

Mr. Zimmerman, the junior member of the new firm has practiced architecture in Detroit for seven years, having been connected with the larger Detroit architects, such as Albert Kahn, Smith, Hinchman and Grylls, George W. Graves. He also had an office of his own. He was at one time in charge of the architectural department of the Ford Motor Car Co. In the last three years, Mr. Zimmerman has been in charge of building large state institutions in the south, including the Mississippi State Hospital, a million dollar institution, also auditoriums and schools in and around Birmingham and Chattanooga.

PROMINENT INDIANA ENGINEER TAKEN BY DEATH.

John S. Spiker of Vincennes a Victim of Typhoid Fever.

The past week saw removed from Indiana engineering circles one of the most active and widely known members of that profession when John S. Spiker, Vincennes, stricken with typhoid fever, answered the final summons following a week's illness.

Mr. Spiker, born in Clay County, Illinois, moved to Vincennes in the early eighties where he attended Vincennes University, graduating in 1887. The next year he was elected Knox County surveyor and ever since then had been actively connected with the engineering profession of the state up to the time of his death, except for the three years from 1891 to 1894 when he completed a special course of engineering at Purdue University. From 1898 to 1902 he was President of the Indiana Engineering Society and has always taken an active interest in that organization.

While more directly connected with civil engineering, at the same time, the deceased was constantly in demand as consulting engineer in matters pertaining to heating, ventilating and structural work.

No civil engineer in Indiana has done more for the development of the southern end of the state than Mr. Spiker, who at various times has planned and supervised the construction of large drainage projects, levee work, bridges and roads. His efforts were not confined to Indiana, but extended over into southern Illinois and western Kentucky. No other man connected with the engineering profession in Indiana, or the territory in other states adjacent to southern Indiana, was so universally acquainted, or his services more in demand, than was Mr. Spiker. He had reached the point where he was looked to as an authority.

He also took an active part in the development of his home city, Vincennes, held public positions of trust both in the municipal and county governments and worked continually for the best interests of his city and southern Indiana.

The deceased was a devout student of engineering and industriously kept abreast of the times, incorporating into his work the latest and most progressive ideas. Of a pleasing personality he was never too busy to greet a stranger and give audience to those who had something of merit that meant for progress. His reputation was built upon painstaking effort and careful exactitude, and his passing removes from his community a sterling citizen, and from his profession an honored member whose future absence will be keenly felt.

MANY LOCAL BUILDING PERMITS ISSUED.

Good Volume of Work Started Last Week

A new tone of activity swept in upon local building circles last week in direct contrast to the quietness that prevailed in the early spring. True it is that scope of the structures started was not large, but the volume was fair and lent a new impetus to the business.

The city building inspection department was quite a busy place with answering inquiries and issuing permits. There were seventy-three permits issued during the week which was considerable increase over previous weeks' issuances. Many take it from that performance that at last the spring building rush has or is about to open up in Evansville.

Quite a few permits were issued for the erection of new homes while the rest covered repair, addition and alteration work. This new activity was encouraging and builders now are looking forward to even greater effort toward building construction operations.

OUTLOOK FROM EVANSVILLE ARCHITECTS OFFICES IS ENCOURAGING.

Plan Makers Busy on Projects For Three States.

A survey of the local architects would impress one with the idea that the future building outlook for Evansville and the territory in that district adjacent to it is promising. While some few projects have been put out by the local architects for bids for construction in southern Indiana, Illinois and western Kentucky the real volume of new work has not made its appearance as yet. However, every one of the local architects' offices is engaged in preparing plans for buildings contemplated for erection in some nearby locality in one of the above three states. Many of these contemplated projects are of good size and include such types of structures as churches, schools, public buildings, stores and a good class of residences.

CHIPS AND SHAVINGS

Preliminary plans have been completed and actual work has been started by Harry E. Boyle and company, architects, on plans for the new Howell M. E. church to be erected at Stinson and Dearborn streets. It will be a Gothic style brick with Bedford stone trim edifice, costing about $35,000.

The contract for alterations at the Vendome hotel, to provide more guest rooms, has been awarded to Walter Graul, contractor.

The Scarborough-Davies Contracting company has been awarded the contract for re-pointing the entire exterior brick work of the Old National bank building.

OPENING UP OF BUILDING SEASON MAKING ITSELF FELT.

Many Unemployed Now Being Given Work.

A revival of active building operations is now on in earnest in Ft. Wayne and business is getting better right along in construction circles. Home building in the matter of projects is the leading effort right now. Several large projects have been started recently and the demand for labor is increasing.

There were numerous calls for help at the free employment bureau last week for common laborers and some carpenters. Fifteen of the latter calls were met, while 200 laborers were given employment. Much of the cry for help now being registered is attributed to the opening up of out-door construction work.

FINE SHRINE AUDITORIUM TO MEET ONE OF CITY'S LONG FELT WANTS.

Ft. Wayne Will Be In Position To Take Care of Large Conventions When Structure Is Completed.

The outstanding building construction operation begun this spring in Ft. Wayne is the new Mizpah Shrine Auditorium, ground for which was broken just recently. The structure when completed will be one of Ft. Wayne's most unique and beautiful buildings and will fill a long felt want, in that it will provide an auditorium capacity capable of accommodating national, state and northern Indiana conventions which heretofore have been passed up by the city because there was no suitable place to house such affairs.

The building will extend 156 feet along Berry street and will have a depth of 146 feet with a height of 70 feet above the sidewalk. Its construction will be entirely fireproof. The capacity will be 3,900 seats, or 2,400 on the main floor and 1,500 in the balcony. The auditorium will have nine exits and six stairways.

It is claimed that the stage will be the largest in the state. It will be 92x38 feet in size. Its proscenium opening will be 65 feet across.

It is a local product having been conceived and planned by Architect Guy Mahurin and is being erected by contractor Max Irmscher, both Ft. Wayne men.

FAMOUS OLD STOCK FARM TO BE TURNED INTO RESIDENCE DISTRICT.

City Moving Out Farther and Farther

Another of the old historic spots of this vicinity is to be changed into a group of suburban dwellings. The site is 54 acres of the old Brudi stock farm, five miles out on the Lincoln highway, and once noted for the thoroughbred cart and saddle horses that were kept there.

TO ERECT LARGE GARAGE

Work Started on Big Down Town Auto Building.

One of the largest garages in the city will be erected at the corner of East Washington boulevard and Lafayette street. The structure will be three stories in height, of fireproof construction and will provide 20,000 square feet of floor space. The building has been leased to the Becker Motor company, local Ford dealers for 10 years.

ANOTHER GOOD SIGN

Indications In Banking Circles Point To Better Business.

Bank clearings last week would indicate that Ft. Wayne business took a brace and is ruling stronger. The clearings ran to $2,404,475, an increase over the previous week, and also showed a substantial gain over the corresponding period in 1923.

WAIVER OF LIEN

None this week.

BRICK LAYERS SIGN UP AT AN INCREASED SCALE.

Hourly Wage For Current Year Fixed at $1.50 Per Hour.

Another menace to the local building outlook at Indianapolis was removed a few days ago when the Mason Contractors of the city and the representatives of the Bricklayers Union reached a basis for a wage agreement for the current year.

Though there was no outward evidence of trouble to come with the expiration of the last year's scale on May 1st, nevertheless there was a threat lurking in a situation where no agreement had been reached, and such a condition would have caused uneasiness, dissatisfaction, and an instability in building circles, all of which would have exerted a retarding influence on building operations in the immediate future.

Negotiations were started several months back with the Union submitting a demand for $1.50 per hour, an increase of 15c over the 1923 scale. The Mason Contractors Association opposed an increase to such an extent and the two factions stood on that ground for weeks unable to come to terms. Finally last week when it was felt that no agreement could be reached a call was sent to the National Arbitration Board made up of members of the Mason Contractors Association of the United States and Canada on the one side and officers of the Brick Layers and Plasterers International Union on the other side. The arbitration board went into session Friday, April 25, but after hearing evidence referred the matter back to the local Mason Contractors Association for lack of sufficient grounds for appeal.

New negotiations were again started by the local parties concerned resulting in the Mason Contractors Association finally acceding to the Union's demand for $1.50. Since other large city contractors are paying the $1.50 scale to the brick layers it was felt that in order to assure an adequate supply of that craft to Indianapolis to handle the construction work in prospect there was no other alternative but to meet the scale paid in other cities, such action being but a matter of self defense.

Then, too, wage matters with the hodcarriers have also been adjusted on this basis: Brick tenders, 82½c per hour, plaster tenders, 87½c, both an advance of 10 cents per hour.

ALL BUILDING CRAFT WAGE AGREEMENTS SIGNED UP.

Plumbers And Steamfitters Fnally Fall Into Line.

Every effort was made at Indianapolis this week to straighten out wage scale readjustments. Of the thirteen building crafts operating under agreements eleven had been brought into line, the only two remaining with whom to settle being the plumbers and steamfitters. The scale agreement with them expired May 1.

After determined negotiations over several weeks the plumbers signed up April 29 at $1.30 per hour for the first three months of 1924, dating from May 1st and $1.35 for the remaining nine months.

The steamfitters hung back and it looked as if they might strike, but on May 1st, they came through and signed up on the same basis as the plumbers.

This cleans the slate as wage agreements with all the crafts have now been reached thus eliminating any strike threat over wages this season.

AUSTRALIAN MASON CONTRACTOR ENTERTAINS INDIANAPOLIS CONTRACTORS WITH TALK ON CONDITIONS IN HIS COUNTRY.

James Hodgson, Sr., Returns From Western Tour With Interesting Visitor.

After an extended and glorious trip through the West and a sojourn through parts of western Canada, James Hodgson, Sr., the popular and well-known brick mason contractor of Indianapolis, has returned home and says that while the scenic beauty of the country through which he traveled was most attractive, still, there is nothing like being "Back home again in Indiana."

Mr. Hodgson, a keen observer, made a survey of building conditions and said that while some high sounding building reports had come out of the West, he failed to find conditions or prospects any better out there than here at home. He says there seemed to be much hang over work from last year under construction, but there was a dearth of new work bely impressed him had to do with the fact that the employed craftsmen were "working their heads off" as there were four or five other men standing around ready to take advantage of any employment opening that presented itself.

A chance acquaintance Mr. Hodgson made at Seattle proved most agreeable and as a result he brought back with him Mr. and Mrs. Tom Warbrick of Sydney, Australia, for a short stay. Mr. Warbrick, who is a brick mason contractor and builder, is making a tour of the world with his wife, and he and "Jim" soon became fast friends, nor was the fact that Mr. Hodgson was a former Londoner a small element in cementing the friendship.

While in Indianapolis, Mr. Warbrick made a most interesting talk before the members of the Mason Contractors Association, recounted his observations of America, his impressions of our great country, and set forth the working and building conditions in Australia. This latter portrayal held the undivided attention of the local masons who at the conclusion of the visitor's talk expressed their appreciation to him and also to Mr. Hodgson for prevailing upon Mr. Warbrick to visit Indianapolis and the association meeting.

CONCERTED ACTION STARTED TO OPPOSE WAGE INCREASE DEMAND OF CALUMET ELECTRICAL CRAFTSMEN

This Action Taken Out of Fairness to Crafts Who Signed up at Last Year's Scale

The concensus of opinion as revealed by the discussion developed at a general meeting of contractors, home builders, and realtors at Hammond, April 23rd, was that to grant the advanced demand of $1.50 per hour of the electrical craft would be unfair to the other building trades craftsmen who have already signed up at the 1923-24 scale, last season's figures.

The meeting was called for the express purpose of considering what action should be taken on the wage proposition submitted by the electricians. It was admitted that the increase that would be involved should the advanced demand of the craft in question be met would not add much to construction costs, but the effect of granting an increased wage rate to this set of craftsmen would be had in that it would tend to arouse serious dissatisfaction amongst the other building trades. It was felt that, in justice to the carpenters, roofers and building labor who all have agreed to accept last year's scale, the electricians are no more entitled to a wage boost than the other building trades who have signed up at the previous year's figures. Further, it was contended that the electrical craft is no more superior than the other trades nor any more important.

Therefore, the decision was reached that, to the best interests of the industry and all concerned, the increased demand for wages should be resisted. A special committee has been appointed whose duty it will be to canvas all home-builders, contractors and electrical contractors who were not present at the meeting and solicit their unqualified support in resisting this unreasonable and selfish demand put forth by the electricians' Union.

MODERN, THAT'S ALL

A New Vamp on the Scene

Spring, gentle spring, is a giddy young thing,
In actions she's just like a Flapper;
She's as warm as of old, but the next day she's cold,
She makes me so mad I could slap her.

PURELY FOR THE GOOD OF THE BUILDING INDUSTRY

Contractors in Offensive Stand Seek to Assure Revival and Continuation of Construction Operations

Labor troubles this spring in the Calumet district have impressed deeply with their strong influence on the building trend. As the weeks sped by it developed that craftsmen's demands for increased wages had a strong retardent influence on new building operations. Increased wages indicated advanced construction costs, scared off owners who contemplated building, made it harder for prospective builders to finance projects and cut down sales on vacant property, future sites for new structures. However, with this bogey looming to mock and frighten prospective builders, nevertheless, there was every promise that if satisfactory reasonable scales could be arranged and labor conditions could be stabilized all hope for a good building year ahead was not gone. It was this latter indication that has made the Calumet contractors bend every effort to oppose greatly advanced wage scales and seek to bring about amicable agreements with the building trades mechanics. The stand of the building trades employers has been purely defensive not offensive, and in the end, if they are successful in their contentions, it will prove out that their action will accrue to the benefit of the employes in that that for which they stood will mean greater building operations and assurance of steadied and continued employment for the men in their working organizations.

CALUMET BUILDING PROGRESS

The Masonic Temple for which Hutton and Son, Hammond, are the architects, mentioned last week in this column, is to be located at Gary instead of Hammond as reported.

The Mee Hotel, Hammond, is being dressed up by a firm of Chicago contractors who are revamping the entire front of the building thus adding greatly to the appearance of the structure.

General contractors George P. Pearson & Son, are remodeling the auditorium of the Masonic Temple, Hammond, into an up-to-date theater. The place has been leased to the United Artists Corporation for a term of years and is to be known as the Temple theatre.

Plans calling for the addition of an auditorium and gymnasium to the First M. E. Church, Hammond, are in course of preparation by Architect Kenneth P. Vaughn, 239 E. State St., Hammond. The project will be one story and basement, 60 ft. by 80 ft., and is estimated to cost $35,000. Bids will be received May 20th.

A BONUS BOOMERANG

Arbitrator Holds Bonus Agreement in Effect Till Building Operation Is Completed, Even Though Labor Supply May Ease Up

Supreme Court Justice Ford, acting as arbitrator between a mason builders' association and bricklayers' union, recently ruled that in cases where employers agreed to pay bonus over regular union wages higher pay must continue for period building is under construction. Here is the question submitted to Justice Ford:

"Where there is a signed wage agreement at an established rate between a trade association and its employes, and where such rate was increased by members of said association in order to properly man their jobs, are these members compelled to continue to pay such increased rate for the life of the job?"

Builders who paid $14, $16 and $17 a day to get bricklayers last summer when skilled mechanics were scarce, under decision, must continue this wage.

Sealed Proposals

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Notice is hereby given that W. Cyrus Wampler, Township Trustee, and the Advisory Board of Vigo Township, Knox County, Indiana, will receive sealed proposals until one o'clock P. M., Tuesday, May 20th, 1924, at the office of W. Cyrus Wampler, Township Trustee, for the erection and completion of the addition to and the remodeling of the Vigo Township School Building, for Vigo Township, at Edwardsport, Knox County, Indiana.

All material and labor to be according to the plans and specifications furnished by J .W. Gaddis, Architect, Vincennes, Indiana, which plans and specifications are on file at the office of W. Cyrus Wampler, Township Trustee of Vigo Township, and at the office of J. W. Gaddis, Architect, Vincennes, Indiana, which plans, specifications and this notice are calling for independent bids for the building proper, independent bids for the heating and ventilating, independent bids for the plumbing and independent bids for the electric wiring.

Certified check of 2 per cent must accompany each proposal, as evidence of good faith, and that the bidder will enter into a contract with the Township Trustee, if the proposal is accepted.

The envelope containing the proposal must be plainly marked "Proposal for the Addition to and the Remodeling of the Vigo Township School Building;" or "Proposal for the Heating and Ventilating," or "Proposal for the Plumbing," or "Proposal for the Electric Wiring, etc.

The right is reserved to reject any or all bids.

W. CYRUS WAMPLER,
Township Trustee of Vigo Township, Edwardsport, Knox County, Indiana.

May 3rd-10th-17th, 1924.

NOTICE TO CONTRACTORS

SCHOOL HOUSE

Notice is hereby given that the undersigned trustee of Otter Creek school township, Ripley county, Indiana, will receive sealed bids at the office of said township trustee at Holton, Indiana, at 10:30 o'clock a. m. on

THURSDAY, MAY 8, 1924

for the furnishing of all the material and performing all of the labor for the construction and completion of the Otter Creek Township High School Building at Holton, Indiana. Such construction and installations shall follow the plans and specifications approved by and now on file in the office of the State Board of Accounts, township trustee, Chas. P. Williams, and the office of the architect, Karl P. Henkel, 108 Heinemann Building, Connersville, Indiana.

Copies of plans and specifications will be furnished any contractor applying for same on deposit of the sum of $15.00 to be held in escrow for the return of said plans and specifications to the architect on or before seven days after the opening of the bids, after which date all checks on deposit will be cashed and no refund made.

All bids shall be made and submitted on forms 96 bidding blanks. Each bid shall be accompanied by certified check upon a solvent bank, made payable to Charles P. Williams, trustee, in the amount of not less than three per cent of the total amount of their bid, tendered as a guarantee that the bidder will, if awarded contract, enter into a bona fide agreement with the said school township of Otter Creek for the contract, and furnish sufficient bond equal to one hundred per cent (100%) of the contract price.

If, for any reason whatsoever, the bidder shall fail to enter into proper agreement or fail to execute a proper bond, the full amount of the certified check shall be retained by the school township as liquidated damages. The estimated cost of the building complete is $35,000.00.

The undersigned trustee and advisory board reserves the right to reject any and all bids, and waive any defects or informality, if deemed in the interest of said Otter Creek school township.

Dated April 14th, 1924.

CHARLES P. WILLIAMS,
Trustee of Otter Creek School Township, Ripley County, Indiana.

LUTHER L. LANE,
FRANCIS M. ELLIS,
JACOB N. FURLOW,
Advisory Board.

April 19th-26th-May 3d, 1924.

INDIANA CITY INSISTS ON "REGISTERED ARCHITECT."

New Local Building Law To Demand Plans In Accordance With State Registration Act.

The new building code at Evansville contains one clause that will be of particular interest to the architectural profession in that it is the first official document of Indiana municipalities to publicly take cognizance of and acknowledge the status of the registered architect. By registered architect the new code implies registered architectural engineer, a classification provided for and required by the Engineers Registration Law passed by the last General Assembly.

Hereafter plans for all building construction in Evansville, costing over $1,000 must be filed at the office of the city building commissioner, and on all work of a scope requiring an architect, where engineering phases are brought into use, the plans submitted must bear the name of the architect who must be duly registered as required by law.

All of which means recognition of the registration law, putting up to the architect the responsibility for his plans, and greater service and supervision for the prospective builder.

ATTENTION OF ARCHITECTS DIRECTED TO BONDING OF INCOMPETENT CONTRACTORS

National Association of General Contractors Condemns Practice

As every architect knows there are contractors and contractors, good, bad and indifferent and yet almost invariably they have to be weeded out through the process of performance, an operation that times innumerable, has brought trouble and grief to the architect.

It is heartening to know that contractors themselves have awakened to the menace that lurks within their ranks and have seen fit to call attention to an abuse that makes it possible for a shyster to step in, bid and compete against the reputable contractor. Such competition is made possible through the ease with which many irresponsible contractors are enabled to secure and put up a surety bond.

The attention of the members of the Indiana Society of Architects has been called to the above abuse through a communication just received at the secretary's office in which it is pointed out that the Associated General Contractors of America have taken a decided stand in the matter as is shown by the following resolution adopted at a recent annual convention:

"Whereas, Bond agents are writing bonds for contractors who are obviously incapable of performing their contracts or who have obviously demonstrated that they cannot be relied upon to carry out their obligations in good faith, and

"Whereas, The bonding of these irresponsible contractors gives them an unwarranted credit rating and in the eyes of the public stamps them as responsible bidders; and

"Whereas, Once this false stamp of responsibility is given by the bonding company to an irresponsible bidder the engineer or architect is often obliged by a misguided publication to award him the contract; and

"Whereas, The ease with which the surety bond may be obtained by almost any agency designating itself as a general contractor enables innumerable persons to embark upon extensive construction projects which they cannot carry through to successful completion; and

"Whereas, Numerous defaults of these irresponsible companies who can obtain surety bond bring public censure upon the engineer and architect, dissipate engineering or architectural funds, produce an inferior quality of workmanship and keep construction in a demoralized condition; and

"Whereas, These numerous defaults have greatly increased the rate of bond premium, thereby adding to the cost of construction paid by the public; and

"Whereas, Operations of these injudiciously bonded bidders react injuriously upon those contractors who faithfully perform their obligation, create suspicion and distrust of all contractors and retard the development of companies that are willing and able to render satisfactory construction service; and

"Whereas, The bonding of bidders unqualified by either experience, personal integrity or financial soundness to assume their contracts is preventing the development of constructive service and the adoption of ethical practices which are essential to the establishment of construction as an orderly industry; therefore be it

"Resolved, That the Associated General Contractors join with the representatives of the surety companies for a complete and impartial analysis of the bonding situation, seeking to find a proper solution for the issues confronting both the bonding companies and contractors."

INDIANAPOLIS ARCHITECTS OPPOSE RETENTION OF CHURCH STRUCTURES ON WAR MEMORIAL SITE.

Hold Them To Be a Detriment To Proposed Scheme.

Considering the Indiana War Memorial Plaza and general scheme from the angle of the original purpose and its conception as portrayed and carried through in their plans by the architects employed the members of the Indianapolis Architects Association Wednesday night at the regular monthly meeting went on record to the effect that the two churches now located on the site will detract from the purpose of the original scheme and render incomplete the proper execution of the Memorial idea. Further, the Indianapolis architects recommended that the War Memorial Commission be authorized to proceed with the destruction of the two edifices interfering with its work as outlined by law.

The position taken by the local architects is reflected by the following resolution that was adopted:

"Since it was the original conception of the people of Indiana, expressed by their General Assembly, to provide a lasting and fitting memorial to the sons of this state, who died in the world war, and

Since in compliance with the expressed sentiment a law was passed creating a commission authorized to proceed with the acquisition of the necessary ground and the erection of the memorial, and

Since the interest of the whole state and not the interset of a few citizens should be considered, and

Since the same spirit of unselfishness should be evidenced by those particularly affected, as was evidenced by the men for whom this plaza is intended as a memorial, be it

Resolved, That the presence of the two church buildings now in the plaza property will detract from and make incomplete the proper execution of the whole memorial, and

That the memorial commission be urged to proceed with the removal of these buildings, and

That the commission be assured of the earnest support of this organization in their endeavor to carry out the plaza as originally contemplated, and

That copies of this resolution be sent to the commission, the Indianapolis newspapers and the congregations of the two churches involved."

ORGANIZATION AND CURRENT NEWS

ANDERSON

ELECT NEW OFFICERS

Anderson Contractors Name Men to Carry on Association Affairs

The local Associated Building Contractors' organization has taken on new life with the opening of the building season and is once more holding regular meetings at which much interest is being aroused and a new enthusiasm is being shown.

The annual election of officers was held this week which brought out a good crowd and resulted in the naming of these men:

Ben Wright, president; W. E. Thompson, vice-president; Blythe Johnson, secretary; Harry Thomas, treasurer; John Longnecker, Harry Lambert and Joseph Plessinger, trustees.

Calumet District

PAINTERS AGREE ON WAGES AND SIGN UP AS ELECTRICIANS BALK AND STRIKE.

Trouble Still Riles Calumet Building Situation.

It just seem as if we can't get away from that pestiferous old bogey the labor situation; about the time one thinks the skids have been put under the said bogey and it looks as if it had become less of an element in the building affairs of the Calumet District, something goes wrong and the annoyance still lingers around. It looked last week as if the situation had been cleared up, but not so. The painters who were gumming things up finally fell into line and out went the electricians.

The painters' local met the latter part of April and voted to continue to hold out for their demand of $1.50 per hour, and in turn the contractors lived up to their declarations to man their jobs with non-union men if the painters were set on carrying out their threat to refuse to work for less than their demand. When it had been demonstrated that the contractors could secure enough help to proceed with their work, and that these men were satisfied to go along at the figure offered, the members of the Union got busy and hurriedly sought a re-opening of negotiations. The final outcome of the whole affair was that the Union accepted the offer of the contractors based upon the 1923 scale. The union men then returned to work terminating a strike that had been in progress for two months. Had these tradesmen been wise and reasonable and let well enough alone they would have not been forced to undergo a long lay off, would have been two months' wages ahead and building would not have been tied up, another instance of one of those wasteful economic losses the amount of which is irreparably lost and can not be made up.

The same day that the painters returned to work the electricians kicked over the traces and struck for a wage scale of $1.50 per hour. Now the electrical contractors say that they will not be as patient as were the painter bosses and have no intention of waiting a long time for a settlement, instead, they announce that if the electricians do not sign up in a few days at the scale offered they will begin to employ non-union men to carry on their work.

It is a great life, this contracting game; it is more like riding over an old corduroy road; it is just one long series of bumps and as far as getting labor scales adjusted there seems to be no end to the road.

EVANSVILLE

BIG VOLUME OF NEW BUILDING WORK REGISTERED IN APRIL

More Permits Issued Last Month Than During Entire Three Months Preceding

According to the monthly report for April, prepared by Commissioner of Buildings Edward C. Kerth, there were more city building permits issued in April than during entire months of January, February and March of this year. The total for last month was 483.

The total number of permits for new residences during April was 200, involving construction estimated at $324,535; and for repairs, remodeling, new roofs, etc., 283 permits at an estimated cost of $66,701.

As expressed in building permits the trend of building has shown a decided upward trend by months since the beginning of the year with 70 permits issued for January; 89 permits for February, and 301 permits for March, and 483 for April; making a total of 943 permits involving construction estimated at $1,157,458 to date, the greatest proportion of which involves residential improvement, or new houses.

Thursday, the last day of grace under the old ordinance, brought many applicants to the building department office, Ninety-four applications being made for permits.

NEW BUILDING CODE NOW IN EFFECT TO ASSURE CLOSER SUPERVISION OF CITY BUILDING OPERATIONS

Expected to Greatly Benefit the Citizenry

The new city building code for Evansville, prepared by Building Inspector Ed Kerth and passed by the city council, became effective May 1st. The code is one of the most rigid in the state, and according to previous promises of fire insurance underwriters, will result in Evansville being advanced from second to a first-class city. The reduction in insurance rates will be approximately 8 per cent.

Underwriters have studied the code and have expressed an opinion that little or no difficulty will be experienced in procuring the reclassification of the city. Chamber of Commerce and city officials have started plans calling for a conference with the board of underwriters as soon as possible in order that the advancement may be completed as soon as possible.

As regards requirements regulating preliminary procedure in order to secure official permission to build several drastic changes from the old order are incorporated in the new code enabling a closer check and supervision of new construction work.

For instance, on any building project estimated at more than $1,000, there must be a duplicate set of plans and specifications presented at the department of buildings office, (formerly known as city building inspector's office) at the time of application for building permit.

Applicants for building permits must give the names of the contractor, the registered architect, and the owner of the proposed building. Complete information must be supplied as to building detail, and an affidavit must be filed, as to the true estimate of construction costs.

When the plans and specifications are approved by the department of buildings, the applicant will pay at the office of city controller the amount established for such permit, and will be issued a receipt. This receipt will then be presented at the department of buildings office for issuance of the permit.

Edward C. Kerth, civil engineer, formerly city building inspector, will hereafter be known as commissioner of buildings, in charge of the department of buildings office. He is to be assisted in the management by Carl Dreisch, secretary.

FT. WAYNE

APRIL BUILDING SHOWS SUBSTANTIAL VOLUME THOUGH IT SUFFERS BY COMPARISONS.

Big Total Posted But Not Enough To Top Previous Records.

There was a time not so long ago that a monthly building volume of $1,000,000 for Ft. Wayne was heralded as a wonderful achievement but today the city can turn in considerable over that total and yet in comparison with previous figures show a loss. For instance, during April this year the estimated valuation on the new work for which permits were issued amounted to $1,609,612, which appears to be a healthy business and yet that sum was 4.5 per cent behind the March building total and 16.9 per cent in arears of the figures recorded in April, 1923.

At that there was a brisk activity last month, 451 permits having been granted which while devoid of many big projects made for much employment as they covered a large number of new residences and numerous additions and alterations of all kinds of structures.

Comparative figures are:

Period	Per.	Est. Val.
April, 1924	451	$1,609,612
April, 1923	383	1,939,275

KILL BUILDING LINE PROPOSITION SUGGESTED FOR MAIN THOROUGHFARE

Property Owners Buck on Scheme as Needless Expense

The scheme proposed some time ago and one that would have had quite a bearing on certain future building operations down town, namely the widening of Main Street and the establishment of a building line over a given area of considerable extent was given a black-eye this week and probably buried in the discard when the Board of Public Works rescinded all previous action taken regarding the matter.

Much opposition developed relative to the proposed improvement and the city attorney was requested by the board some time ago to make a thorough investigation to the legal phases of the situation and to study the remonstrances which were signed by nearly two hundred property owners. This investigation took several weeks and brought the following communication from the city attorney to guide the action to be taken:

"As suggested and requested by you, I had a disinterested investigation made as to the sentiment of the property owners on West Main street concerning the West Main street building line resolution now pending before your board.

"The report I received is that a large majority of the people owning property on West Main street are against the establishment of a building line at this time.

"In regard to the question submitted to me by you as to your power to rescind all action at this time, I am of the opinion that your board has the power to rescind, if you so desire."

Fortified by that opinion the board acted accordingly and put the quietus on the proposition and returned the street to its former status.

INDIANAPOLIS

INDIANAPOLIS BUILDING OPERATIONS SHOW IMPROVEMENT.

Fall Behind April, 1923 Figures, However

Last month saw a big spurt in building activity in Indianapolis when 2110 permits were granted. This was 583 more permits than were granted in March and ushered in a great movement of new house building, in fact it was that type of construction work that carried the burden as no really large projects came up for consideration though there were a few moderate sized structures that helped to swell the total. Also, there was a large volume of repair and alteration work which in the aggregate rolled up a nice sum to add to the whole.

As for estimated valuations April's total amounted to $2,492,173 which was $276,860 more than the like items turned in in March.

A comparison of the April, 1924, and 1923 building figures shows that while the permits issued this year ran 349 ahead of April a year ago the estimated valuation of this increased issuance of permits was $723,803 behind the valuations recorded over the corresponding period a year ago.

The influence of the unsettled labor situation that prevailed throughout April, due to a readjustment of the wage scales, is reflected in last month's building record in that it tended to retard large building contemplations while the smaller structural work where the Union domination is not so strong seemed to go ahead without hinderance.

The building records show the following:

March, 1924	1527	$2,215,313
April, 1924	2110	2,492,173
April, 1923	1761	3,215,976

Residence and Garage: $7,000. 4069-71 Broadway. Owner, B. H. Bass, 3827 Broadway.

SOUTH BEND

NO LABOR TROUBLE IN SOUTH BEND BUILDING FIELD

Volume of Construction Work to Date Not Up to That of 1923

Records at the South Bend Builders' Exchange according to Secretary E. H. Hyman, show that the city building circles have failed to experience any labor difficulties this spring. The wages being paid to local building trades mechanics are the same that prevailed last year and there seems to be no dissatisfaction in the ranks of the workers.

Building operations have sloughed off some this season and the prospects are not nearly as promising as they were this time last year. The volume of building permits issued since January 1st, is running behind that for the corresponding period a year ago while the amount of the estimated valuations posted for new building construction thus far is approximately half a million dollars in arears of the figures registered over the same period in 1923.

TERRE HAUTE

UNFAVORABLE CONDITIONS ARISE TO AFFECT TERRE HAUTE BUILDING AFFAIRS

Local A. B. C. Active

Things have not broken very good this season for Terre Haute building construction with the result that operations are rather quiet and prospects are not overly encouraging.

In the first place the mines are idle in western Indiana and, as Terre Haute depends to a great extent on the mining industry, naturally business is quiet and building prospects are at a low ebb. Building men also work out over the coal area and the cities and towns there are very quiet with few building projects in contemplation.

Then added to the above two of the building crafts at Terre Haute, the carpenters and tinners, have refused to sign up at the proposed scale offered and have gone out on a strike. As for the rest of the crafts in building construction circles they have all signed up and have caused no trouble.

steam heat, comp. roof, terra cotta front.

Sealed Proposals

CITY HALL BUILDING

NOTICE OF SALE OF CITY PROPERTY

The undersigned the Common Council of the City of Rochester, Fulton County, Indiana, hereby give notice that on Tuesday the 3rd day of June, 1924, up to the hour of one o'clock P. M. in the Council Chamber located at Rochester, Fulton County, Indiana will receive sealed bids for the old city hall building, situated in the City of Rochester, Fulton County, Indiana, including all the materials contained in said building.

The successful bidder shall be required to properly and promptly tear down and remove all of said building and every part thereof, and shall properly clean up and dispose of all rubbish and debries within twenty-one days from notice to such purchaser from the undersigned and if such successful bidder shall fail to have such work fully completed, as aforesaid, he shall be required to pay to the city of Rochester, Fulton County, Indiana, the sum of ten dollars per day as liquidated damages for such failure for the use and benefit of the proper fund of said City of Rochester, Fulton County, Indiana, for each day of such failure after the expiration of twenty-one days from the date of such notice.

If the successful bidder for such old building should be awarded the contract for the erection of the proposed new building on the same site, he may be permitted by permission of and under the direction of the Common Council of the City of Rochester, Fulton County, Indiana, and the Architect in charge of said work to leave such materials on the premises as may be of value for use in the new building.

All bids must be in writing and comply in every respect with the provisions of the law and each bid must be accompanied by a certified check for ten per cent of the amount of such bid, payable to said City of Rochester, Fulton County, Indiana, and to be forfeited by the successful bidder if he does not, on said 3rd day of June, 1924, enter into a proper contract and execute to them a sufficient bond to the approval of said Common Council of the City of Rochester, Fulton County. Indiana, for the doing of all of said work.

The Common Council of the City of Rochester, Fulton County, Indiana, hereby reserves the right to reject any and all bids, and if a satisfactory bid is not received in writing, as aforesaid, and if in the opinion of the Common Council of the City of Rochester, Fulton County, Indiana, they can sell said property to a better advantage and for a higher price than was offered in any of said bids then they will at once, at the same time and place, proceed to sell said property at public auction.

Said sale will be made for cash and for not less than two-thirds of the appraised value of said building. It being expressly represented hereby that the real estate upon which said building stands, the equipment inside said building, consisting of all furniture, attached or unattached, and all light fixtures are not and will not be offered for sale the same being hereby expressly reserved from this sale, and no part of said premises will be sold or offered, except the building, as hereinabove described.

The successful bidder shall not, take possession of, tear down, alter or in any manner deface said building, to and until so notified by the undersigned Common Council of the City of Rochester, Fulton County, Indiana, in writing.

The said Common Council of the City of Rochester, Fulton County, Indiana, hereby reserves the right at any time before they shall give a written notice to such successful bidder to proceed in the removal of said building, to return the purchase prise so paid by the successful bidder, declare the sale invalid and of no force and effect and retain such building the same as if said sale had not been made, as the property of said City of Rochester, Fulton County, Indiana.

Done this the 6th day of May, 1924.

(Signed)

Common Council of the City of Rochester, Fulton County, Indiana.

By M. O. King, Mayor.

Attest: Etta Kessler, City Clerk.

May 10-17-24, 1924.

At the same time and place, separate bids will be received for furnishing and installing a complete heating plant, and the plumbing and sewering for the above named building.

All bids must be in writing, sealed and with the envelope endorsed, giving the name of the bidder and the class of work bid upon and on bid forms as on file, and all bids will be opened and read publicly at the time and place fixed in this notice.

The Common Council of the City of Rochester, Fulton County, Indiana, reserves the right to reject any or all bids.

Each bid for the general construction shall be accompanied by a certified check for the sum of Two Thousand ($2,000.00) dollars, each bid for the heating and ventilating shall be accompanied by a certified check for the sum of Five Hundred Dollars ($500.00) and each bid for the plumbing and sewering shall be accompanied by a certified check for the sum of Two Hundred Dollars ($200.00). These checks must be made payable to the City of Rochester, Fulton County, Indiana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into contract and execute bond approved by the Common Council of the City of Rochester, Fulton County, Indiana, for the performance thereof, if his bid or bids are accepted. The checks of those bidders who fail to be awarded contracts shall be returned to them when the contracts are let.

Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified checks as liquidated damages for the use and benefit of the proper fund of City of Rochester, Indiana.

Each bidder shall file with his bid the statuatory affidavit required under section 8698 Burns Revised Statutes of the State of Indiana, 1914.

Copies of the plans and specifications may be obtained from the office of the Architects, National Sign Corp. Bldg., Kokomo, Indiana, upon deposit of twenty-five dollars for each set; said deposits will be returned to the bidders upon the safe return of the plans and specifications to said office of the Architects on or before the day and hour set for receiving bids.

Each bidder receiving plans and specifications will be required to submit a bid or bids to the Common Council of the City of Rochester, Fulton

CHAPEL AND OFFICE BUILDING
NOTICE TO BIDDERS

Notice is hereby given that the Board of Trustees of Earlham Cemetery Association, Richmond, Indiana, will receive sealed bids at the office of Werking & Son, Architects, Richmond, Indiana, until ten o'clock a. m., on the 27th day of May, 1924, for the construction of two stone buildings; a Chapel and an Office and Rest Room. All bids shall include all labor, materials and supplies for the complete construction or installation of that part of the work bid on, and all strictly in accordance with the plans and specifications drawn by Werking & Son, Architects, Richmond, Indiana, and now on file in the office of said architects.

Bidders will submit their bids as follows:

1. For the construction of Chapel.
2. For the construction of Office and Rest Room.
3. Installation of Plumbing in Chapel.
4. Installation of Plumbing in Office and Rest Room.
5. Wiring for electricity in Chapel.
6. Wiring for electricity in Office and Rest Room.

Bidders at the same time in the same bid may submit bid for any one or more of the above divisions, but in so doing must indicate the amount at which the respective divisions are bid; and in this way bidder is only required to submit his bid for such portion or portions of the total work as he may desire.

All bids must be upon forms prescribed by the Architects, and each bid shall be accompanied by a certified check equal to two percentum of the bid, payable to George Eggemeyer, Chairman, with the condition that the successful bidder shall enter into a contract with sufficient surety for the performance thereof.

The successful bidder or bidders will be required to enter into a written contract for the work to him let, and to deliver his bond in sum equal to the amount of contract, and as usually conditioned for faithful compliance.

The Board of Trustees reserve the right to reject any and all bids submitted.

By the Trustees of Earlham Cemetery,
Richmond, Indiana.

May 10th, 1924.

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Sealed bids will be received by Edgar Beatty, Trustee of Barton School Township, Gibson County, Indiana, at the Somerville Bank, Somerville, Indiana, until Friday, May 23, 1924. merville, Indiana, until Friday, May 23, 1924, at two o'clock P. M., and then opened, for the following:

The remodeling of the Somerville School Building; also for the heating, wiring and plumbing, all in accordance with the plans and specifications on file at said Bank in Somerville and at the office of the County Superintendent of Schools, at Princeton, Indiana, the estimated cost of which improvement, including the heating, wiring and plumbing is Fourteen Thousand (14,000) Dollars.

Bids for the improvement of said building and for the heating, wiring and plumbing will be received separately, or bids for all the work as a whole will be received.

All the bids must be submitted on Blank Form No. 96 prescribed by the State Board of Accounts. Each bid shall be in a sealed envelope, with writing thereon plainly indicating the character of the work to which the bid relates, as for example: "Bid for heating the Somerville School Building."

Each bid must be accompanied by a certified check for five (5) per cent. of the maximum bid. The check must be drawn payable to the order of Edgar Beatty, Trustee of Barton School Township, Gibson County, Indiana.

In case a bidder whose bid shall be accepted shall not within five (5) days after notice of such acceptance comply with his bid by entering into a written contract with said Trustee in accordance with his bid and the provisions of the plans and specifications, his certified check and the proceeds thereof shall be, and remain, the absolute property of said Township as liquidated damages for such failure, it being impossible to estimate the amount of damages such failure would occasion to said Township.

The contractor shall execute a contract meeting the approval of said Trustee. The right is reserved to reject any and all bids.

Dated this 1st day of May, 1924.

EDGAR BEATTY,
Trustee Barton School Township, Gibson County, Indiana.

May 10th, 1924.

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the trustee of Green township, Grant county, Indiana at Point Isabel, until one (1) o'clock p. m., sharp on Thursday, May 29, 1924, for the furnishing of all materials and finishing and doing all labor required for the proposed New Consolidated Elementary High School, located at the Village of Point Isabel, in Green township, Grant county, Indiana. Separate bids will be received for the following classes of work:

1. General contract for the building.
2. Plumbing.
3. Heating and ventilating.

The estimated cost of fully completing said building is $56,000.00.

All contractors desiring to bid on any class of work shall be required to post a certified check with the architect or trustee for the amount of twenty-five ($25.00) dollars, made payable to Ward M. Kilgore, trustee, before said plans and specifications are delivered to him in order to guarantee the return of said plans and specifications to the architect.

If for any reason the bidder fails to return the plans and specifications then his check becomes a forfeit to fixed and liquidated damages, and the certified check is retained by the trustee and his advisory board and reverts to such fund as statutes covering these matters require.

Before submitting proposal as a bid, all plans,

drawings and specifications shall be returned to the office of the architect. Such proposal shall be typewritten and signed by the bidder and accompanied by a certified check to the amount of five per cent (5%) of the bid, and made payable to the order of Ward M. Kilgore, trustee, Green township, which check shall be taken and retained by the trustee and his advisory board as fixed and liquidated damages if after his proposal has been accepted the bidder for any reason refuses or neglects to enter into a formal written contract to the satisfaction of the board to carry out the proposal, and execute bond in a penalty in at least the full amount of his bid with sureties to the approval of the board as required in the specifications. In the event any bidder whose proposal shall be accepted shall not within ten days after notice of the acceptance of his proposal enter into such a written contract with the board and secure the contract by a surety bond in the full amount of the contract price, and in form and terms and with the sureties to the approval of the trustee and his advisory board, such certified check shall be and remain the absolute property of the trustee and his advisory board as fixed liquidated damages for such failure, and the bidder shall be liable for nothing beyond the proceeds of the certified check.

The bidder shall accompany his bid also with an affidavit of non-collusion, as prescribed under the statutes of the state of Indiana.

All bids shall be made out on bidders' blank form No. 96, as prescribed by the Indiana State Board of Accounts. All affidavits of non-collusion shall be made out on blanks as prescribed by the Indiana State Board of Accounts. The above blanks and blank bonds may be procured from the trustee of Green township or at the office of the architect.

Payments on account of contract shall be made once each month in amounts as estimated and certified by the architect, and approved by the trustee and his advisory board, which amounts are understood to be fifteen per cent (15%) less than the estimated values of materials permanently in place in the building and for labor performed at the time at which estimates are made.

For the purpose of checking estimates the contractor shall be required to file with the architect a typewritten itemized list of the costs of labor and materials entering into the work included in his proposal before the contract is signed.

Forty-five days after all work embraced in the contract, including all additional work (if any is authorized by the trustee and his advisory board) is completed agreeably to the drawings and specifications and to the satisfaction of the architect and the owner, the balance then unpaid shall be paid upon the contractor giving a release as per Article 29 general conditions.

The contractor shall begin operations upon the site when notified by the architect. He is to accept the premises in such condition as delivered to him by the owner, and is to prosecute the work in such a manner as to accomplish its entire completion, ready for occupancy on or before July 1, 1925.

ALTERNATES

There will be but one bid, but the contractor must indicate on his bid the deduction from the full amount of said bid that he will allow for each alternate as indicated in the specifications, and keep each item separate; any bid not so made out will be subject to rejection.

STANDARDS

Where only one brand or make of material or brand or make of building specialty has been specified, its equal in durability and efficiency may be used, but contractors bidding on the work shall be required to mention in their bid the names or makes of any other material or specialty they wish to use as an equal, in efficiency and durability, otherwise should he be awarded the work he will be required by the owner and architect to use the ones named as standard in the specifications.

Copies of the plans and specifications may be procured from Ward M. Kilgore, trustee, Swayzee, Ind., R. F. D., or from Thomas R. McGaw, architect, 316 Citizens National Bank Building, Kokomo, Ind.

Signed: WARD M. KILGORE,
Trustee.

May 10, 1924.

SCHOOL BUILDING

NOTICE TO CONTRACTORS

Notice is hereby given that Wyatt Corn, Township Trustee, and the Advisory Board of Marion Township, Pike County, Indiana, will receive sealed proposals until two o'clock P. M., Saturday, May 24th, 1924, at the office of Wyatt Corn, Township Trustee, in the town of Velpin, Pike County, Indiana, for the erection and completion of the addition and repairs to the Marion Township School Building at Velpin, Pike County, Indiana.

All to be according to the plans and specifications as furnished by J. W .Gaddis, Architect, Vincennes, Indiana, which plans and specifications are on file at the office of Wyatt Corn, Township Trustee, of Marion Township, and at the office of J. W. Gaddis, Architect, Vincennes, Indiana, which plans, specifications and this notice are calling for independent bid for repairs and addition to the building proper, independent bid for the heating and ventilating and independent bid for the plumbing.

Certified check of 2 per cent must accompany each proposal, as evidence of good faith and that the bidder will enter into a contract with the Township Trustee, if the proposal is accepted.

The envelope containing the proposals must be plainly marked "Proposal for the Remodeling and addition to the Marion Township School Building," "Proposal for the Heating and Ventilating," or "Proposal for the Plumbing, etc.

The right is reserved to reject any or all bids.

WYATT CORN,
Township Trustee, of Marion Township, Velpin

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned Trustee of Stoney Creek School Township, Henry County, Indiana, will receive sealed bids until One O'Clock P. M., May 21st, 1924, at the school house in the Town of Blountsville, County of Henry, State of Indiana, for the furnishing of all materials, and labor for the building, erecting and completion of an additional school building to be erected on the school lot and property owned by Stoney Creek School Township, in the Town of Blountsville. Said addition to said school building, is to be erected, and completed according to plans and specifications thereof prepared by Charles W. Taylor, Architect of New Castle, Indiana. Said plans and specifications are on file at the office of said Trustee Blountsville, Indiana, and also at the office of the Architect in the City of New Castle, Indiana. Bids will be received for the erection of said addition according to said plans and specifications.

Separate bids will be received, for a new heating and ventilating plant. Also at the same time and place sealed bids will be received for plumbing, lighting all according to plans and specifications. All bids must be sealed and accompanied with a certified check for the sum of 3 per cent of the contract price payable to William M. Barr, Township Trustee of said Township, to be held by him in case the successful bidder fails to enter into a contract.

Each bidder will be required to use Form No. 10 as prescribebd for bidders by the state board of accounts, and be legally sworn to by each bidder as required by law.

The bidder to whom contract is awarded will enter into contract and give bond according to law within ten days after notice is given him that he has been awarded contract for said work.

Estimated cost is $30,000.

The right is reserved to reject any and all bids.

WILLIAM M. BARR,
Township Trustee, Stoney Creek School Township, Blountsville, Henry County, Indiana.
Yergin & Yergin, Attys., New Castle, Ind
May 10th, 1924.

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Notice is hereby given that W. Cyrus Wampler, Township Trustee, and the Advisory Board of Vigo Township, Knox County, Indiana, will receive sealed proposals until one o'clock P. M., Tuesday, May 20th, 1924, at the office of W. Cyrus Wampler, Township Trustee, for the erection and completion of the addition to and the remodeling of the Vigo Township School Building, for Vigo Township, at Edwardsport, Knox County, Indiana.

All material and labor to be according to the plans and specifications furnished by J .W. Gaddis, Architect, Vincennes, Indiana, which plans and specifications are on file at the office of W. Cyrus Wampler, Township Trustee of Vigo Township, and at the office of J. W. Gaddis, Architect, Vincennes, Indiana, which plans, specifications and this notice are calling for independent bids for the building proper, independent bids for the heating and ventilating, independent bids for the plumbing and independent bids for the electric wiring.

Certified check of 2 per cent must accompany each proposal, as evidence of good faith, and that the bidder will enter into a contract with the Township Trustee, if the proposal is accepted.

The envelope containing the proposal must be plainly marked "Proposal for the Addition to and the Remodeling of the Vigo Township School Building;" or "Proposal for the Heating and Ventilating," or "Proposal for the Plumbing," or "Proposal for the Electric Wiring, etc.

Separate and independent bid is required for the electric wiring only of what is known as the Westphalia school.

The right is reserved to reject any or all bids.

W. CYRUS WAMPLER,
Township Trustee of Vigo Township, Edwardsport, Knox County, Indiana.

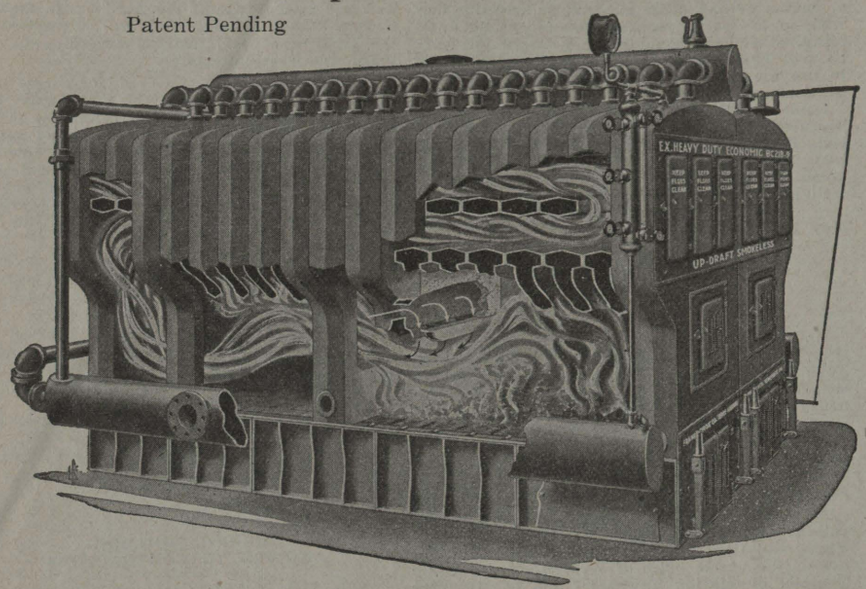
"BC" Series Up-Draft Smokeless Boiler

Patent Pending



"Prox Boilers are equipped with a top header, which is a positive steam separator, assures dry steam carrying maximum number of B. T. U's. Water boiling up will not go into main and cause water knock, no matter how hot a fire may be in any part of boiler. A side connection to this header with natural drain to rear of boiler discharges all water and condensation to side headers. This is only one of the many superior features of Prox Boilers."

PROX UP-DRAFT SMOKELESS BOILERS

Burns all grades of fuel, such as bituminous coal, lignite, coke, oil, gas, wood.

Capacities - 1750 sq. ft. to 22,800 sq. ft. steam

Celotex for sheathing gives many advantages

CELOTEX solves the cost problem of insulating a house against heat and cold. On the wall it generally costs less than the wood sheathing and paper which it replaces.

Cork, thickness for thickness, could not give better insulation, nor does wood sheathing make as rigid a wall.

When a house is sheathed with Celotex and its roof insulated with Celotex, the usual fuel bills are cut from a fourth to a third.

If Celotex is used also as a plaster base and as sound deadener in floors the full advantages of this marvelous building lumber are realized, both by architect and by owner.

Should you not have a Celotex sample and specifications, let us send you them now. Address please, Dept. V5 The Celotex Company, 645 N. Michigan Avenue, Chicago, Ill.
Branch Mill Representatives, The Indianapolis Celotex Company, 205 E. Ohio St. Phone, Main 7089. Wm. J. Ryan, Manager.

Celotex is a strong, rugged, weather-proof durable building lumber made from the long, tough fibres of cane. It is better than wood sheathing—equals cork for insulation.

Celotex is used for sheathing instead of wood; for plaster base, roof insulation, sound deadener and exterior finish.

Stock sizes: Thickness 7/16 in.; width 4 ft.; lengths 8 ft. to 12 ft. Weight about 60 lbs. per 100 sq. ft.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

DELEGATES PREPARING TO ATTEND A. I. A. ANNUAL CONVENTION

Indiana Profession to Be Well Represented

Indiana is to have a real representation this year at the annual convention of the American Institute of Architects which opens at Washington for a three-day session, beginning next Wednesday, May 21st.

The Indiana Chapter, A. I. A. will have three delegates in attendance, Fermor S. Cannon, Robert Frost Daggett and Herbert Foltz of Indianapolis, while the Indiana Society of Architects will be officially represented by Secretary Merritt Harrison also of Indianapolis. Since these men are members of the Indianapolis Architects Association their presence at the big architectural convention in Washington will give to Indiana architectural associations a one hundred per cent representation at the approaching meeting of the country's architects.

Plans are being made for the Indiana delegation to leave in a body Monday, May 19th, in order to attend some preliminary meetings before the convention begins. Mr. Daggett who is a member of the Committee on Architectural Relations will meet with the other members to arrange a report, while Mr. Harrison will meet with representatives from other State Architects' organizations which bodies, though not affiliated with the A. I. A., are encouraged to send delegates to the Institute's annual gatherings.

NEW ARCHITECTURAL CLUB TAKES ACTIVE POSITION IN INDIANAPOLIS FIELD

Draughtsmen's Organization a Live One

If there is anything that the recently organized Architectural Club of Indianapolis lacks it is not enthusiasm or spirit. This organization, composed of the draughtsmen employed in the local architects' offices, seems to have met a long felt want and is prospering. It has a large membership and regular weekly noon luncheons are held at the Board of Trade Building at which there is an average attendance of from twenty-five to thirty.

The organization is a live aggressive one and has shown an active interest in local architectural and civic matters in addition to inculcating a spirit of good fellowship amongst the embryo architects. Since the removal of the two church edifices from the Indiana War Memorial site has aroused so much agitation the members of the club put it on record as unanimously in favor of the removal of the churches expressing the opinion that the retention of the buildings would interfere seriously with the idea and scheme as conceived and the ultimate carrying into execution the purpose intended.

It has been proposed that the club inaugurate a series of week end motor tours to various points of interest in Indiana, the first to be held this week end when the members will drive to Madison, Ind., and the State Park, Clifty Falls, in that locality.

FEATURE OF THE ARCHITECTURAL PROFESSION SELDOM STRESSED

Interesting Thought As to Capitalization of Immaturity Points to a Handicapping Evil

Though it was not labeled "The Arrival of the Architect," the thought advanced suggested such a title for a discussion that took place at the meeting of the Indianapolis Architects' Association, Wednesday night.

The talk had centered around a comparison of the rewards for effort that come to members of the various professions such as law, medicine, architecture. It was cited that some doctors and lawyers after four or five years practice "arrive," in other words, gain prominence and have incomes that are not to be despised. Then the question was asked, "What architect can you name whose income could be pointed to as of such figures after a few years practice?"

Herman Scherrer, who is well known to all the architects of the State, after listening quietly for a time, sized up the situation when he said, "The trouble is that the young man in the profession today is too anxious to achieve success and fame rapidly. He grows tired of draughting and immediately sets himself up as an architect after a few years of experience and expects to make a name for himself at once, or, coming out of college, does the same thing with a similar idea. These men are too eager and would seek to do what it has taken the recognized architects of the country years to accomplish. Quoting from my own experience, after twenty years, since graduating, I am just beginning to notice the names of my classmates appearing in the architectural journals."

The thought comes to mind, wasn't Mr. Scherrer right? Isn't it a fact that to be a real, successful architect, a man, qualified with originality, ability to handle his architectural problems, and execute work properly, must be backed up by experience that covers all phases of his profession? Experience only comes with the years. Ambition is laudable if not misdirected but misdirected ambition has had its influence on the architectural profession and has crowded the ranks with incompetents who cause a competition that has not reacted to the credit or advancement of professional practice.

ORGANIZATION AND CURRENT NEWS

ANDERSON

QUIETLY FUNCTIONING

Local A. B. C. Right On the Job

While not shouting the word from the housetops the Anderson A. B. C. has gone right along in well regulated fashion and in a business-like way taken good care of contracting interests. The wage scale problem came up as usual and was dispensed with without any trouble, the members simply setting themselves to the task before them and carrying it through to a satisfactory conclusion. There was no serious trouble experienced and the construction work on hand was kept moving without delay.

A general meeting was held Wednesday night at which there was a good attendance and a universal expression on the part of members to back up the association in its aim to encourage building affairs and conditions.

Calumet District

LABOR SKY STILL CLOUDED BUT CLEARING

Two More Crafts Sign Up

There is no escaping the fact that the Labor wage fuss that arose in the Calumet District this spring to entangle building affairs caused a decided slackening up of construction operations and spread quite a damper over prospective work. It remains to be seen whether the working out toward a settlement of the wage problem will have a stimulating effect on the new work that was contemplated and then shelved when the crafts came forward with increased demands.

The past week saw a further brightening of the Labor horizon when the painters and electricians in Gary came to terms with the contractors there and signed agreements calling for $1.25 per hour each.

There are still mutterings of an ominous nature coming from the lathers, but since all the lathing contractors carry Union cards it is not likely there will be a great deal of trouble in that direction.

Gary teamsters went on a strike a few days ago when their demand for $7.50 per day was turned down. The contractors offered $6.50 per day but would not listen to the more advanced demand.

WHEN THRIFT HURTS

It All Depends How Directed

Bankers are a peevish lot. They want a contractor clear down through the entire building operation, and they don't seem a bit particular about his saving any money on the deal if he can, that is if said saving is diverted from their coffers.

It so happened that Mr. Blanke, Chicago, of the Builders and Manufacturers Mutual Casualty Co., was in the District last week looking things over, and incidentally picked up some nice insurance business, all of which seems to have peeved some of our bankers. However, the contractors are not peeved for they find that their dealings with "Our Company" has saved them quite a few sheckles.

APRIL BUILDING RETURN FAILS TO REFLECT LABOR TROUBLE.

Hammond Shows Healthy Gain.

Not withstanding the fact that things were more or less topsy-turvy during the last few weeks, due to the unsettled condition of wage negotiations, building construction in Hammond during the month of April showed a nice pick-up, stacked up considerably ahead of the volume of business shown for March and ran in excess of the figures recorded in April a year ago.

There were 171 permits issued in Hammond in the past month for a total estimated valuation of $576,575, this as against 131 permits for a valuation of $408,075 issued over the corresponding period in 1923. This was a gain of 40 permits and an increase of 41 per cent in the amount of money involved.

CALUMET BUILDING PROGRESS.

Freeland & Whitney Hammond, galvanized tank and container manufacturers, have closed a contract with A. N. Hutson for the erection of a factory building, brick construction, 1 story, 44x 100 feet, estimated to cost $10,000.

Mike Pryor, has just awarded a contract to Rhoades and Graves for the construction of a $9,000 brick veneer bungalow on Carrol street, Calumet City.

A 32-apartment flat building is being erected on Davis street, at 119th street, Robertsdale, by Mr. Argus.

When estimates on the new Eastwood Apartments were opened they were found to be higher than the owner had contemplated and now the plans are to be revised and refigured.

The way bids have been topping the estimates has made it hard to finance some of the new projects that had been contemplated in and around Hammond with the result that quite a few of them are being held in abeyance.

E. E. COLE.

EVANSVILLE

ACTIVE AND BUSY THOUGH NOT CROWDED FOR TIME

Construction Operations Moving Along Fairly Well

Local building, while not booming ahead with a big splurge, continues to show a healthy activity with no interruption from labor trouble. Work started early in the spring has made good progress and is now moving along toward rapid completion.

No large projects have made their appearance as yet but many of the smaller types of structures continue to spring up for estimating. Home building is keeping the contractors busy to say nothing of the numerous alteration and addition work that is being contracted.

The Evansville architects are busy on considerable prospective work to be erected in Southern Indiana towns and also have some projects for Southern Illinois and Western Kentucky to which local contractors will give attention when ready for estimates.

In other words, while not over-worked, the city is busy and building affairs are moving along in good shape with a promsng project for the future.

CLOSE SUPERVISION GIVEN TO BIG HOUSING STRUCTURES

Approval of Materials Subject to Thorough Tests and Proven Usages

In dealing with "apartment houses" the new city building code treats them in the same terms as tenement houses—the code provisions applying similarly to both styles of structures though the one may be more elaborate than the other.

The code also makes allowance for approved materials the word approved referring to a device, material or form of construction which has been approved by the Underwriters' Laboratories; or such approval may be given by the commissioner of buildings as the result of tests or investigation made under his direction; or he may issue approval upon satisfactory evidence of competent or impartial tests or investigations conducted by others.

The aim of the code is to assure to Evansville the best in building construction according to present day custom practice and usage as regards safety and public welfare.

FT. WAYNE

SCHOOL BOARD TO HANDLE SUPERINTENDING OF NEW SCHOOL CONSTRUCTION WORK

Step Taken to Reduce Cost

A new order in local school construction work has just been decided upon by the Ft. Wayne Board of Education in an effort toward economy. The board has quite a building program under contemplation that will call for considerable work and the members have decided to standardize design and construction.

It has long been advocated by members of the board that a worth-while economy could be practiced by the school city in its work of spending money for expansion in new building program, by standardizing the work of drawing plans for buildings and supervising construction. The repeated use of the same architectural drawings for schools of a type found to be satisfactory and economical to construct, is further proposed by these board members.

The first move of an economical nature was made this week when the salary of H. J. Collier, Jr., business manager of the Board of Education, was raised $700 and he was delegated to directly supervise plans for a four room addition to the Franklin School and also superintend the construction of same.

It is proposed hereafter to have Mr. Collier supervise all new school construction work and thus save the expense usually entailed through fees for superintendency.

LABOR WAGE PROBLEM NIL AT FT. WAYNE

Union and Non-Union Men Going Right Along Side by Side

Local contractors have been successful in keeping the building situation well in hand this spring and operations have moved right along without any serious check from Labor troubles. Some of the crafts were given increases as an incentive to keep building going and the wages being paid are on a par with those ruling in other Indiana localities. There have been no strikes, lockouts, or walkouts and union and non-union men are working along side by side with no interruption to business.

Some merchants have come out openly and demanded nothing but union labor on their building work, other concerns have held out just as strongly for non-union men and then, again, other prospective builders have shown no special preference just so their work is rushed through. As a result of such conditions practically all craftsmen and contractors have been kept busy and since neither union nor non-union men have the bulge all are working hard to hold their jobs and are turning out good work, knowing it is up to them to produce.

HERE'S THE ANSWER

A Real For-Sure Optimist Boosting Building Affairs

Somehow or other the attitude of Ft. Wayne builders has always reflected a note of hope, of cheer, of promise and sometimes one was led to wonder why, for other places sound, now and then, a drab note.

It all came out the other day when the Optimist Clubs of Indiana, Ohio and Michigan met in Ft. Wayne for an annual conference. There in the very front ranks was President Max Irmscher, president of the Associated Building Contractors of Indiana. Since Max is also president of the local Builders Exchange it must be he has injected the spirit of optimism into his fellow colleagues.

INDIANAPOLIS

IT LOOKS LIKE A LONG, LONG WAIT

Man Who Postponed Building That Home Several Years Ago Is Out of Luck

Referring to home building operations the coming season one large operator in that field of construction at Indianapolis admitted that the cost of new houses this year has mounted considerably.

He frankly admitted that a five-room modern bungalow, the average sized house, will cost about $5,000 this year. The same house last year, he said, could have been built for $4,850. In 1917 it would have cost only $2,750, and yet back in 1917 and 1918 there were prospective builders who laid aside their contemplated structures on the theory that prices would come down and they would wait for the decline. That being the case they must still be waiting.

LABOR REQUIRED IN INDIANAPOLIS BUILDING FIELD TO ADD TO CONSTRUCTION COST

General Average Increase 8.9%

Building labor in Indianapolis this year will cost more than it did in 1923 as is to be seen from a resume of the wage scales agreed upon between the building trades employers and the various building trades unions for this season.

With but two exceptions, increases were granted to all the trades, the hoisting engineers and the iron workers being the only crafts to continue at the 1923 scale.

Comparing the new wage basis, recently arrived at, with the figures of last year, the increases in hourly wages by trades are: Asbestos workers, 10c or 11 1/9% increase; brick-layers, 15c or 11%; carpenters, 12½c or 12%; cement finishers, 5c or 5.3%; electricians, 12½c or 10%; hod-carriers, 10½c and 12½c, or 14%; hoisting engineers, 0; iron workers, 0; lathers, 22½c or 21.9%; painters, 7½c or 7.8%; plasterers, 20c or 15%; plumbers, 10c or 8.16%; steamfitters, 7½c or 6%; sheet metal workers, 7½c or 7.8%.

A general average hourly wage for all the trades in 1923 would have totaled $1.08 1/3, while in 1924 it will figure $1.18, an increase of 9 1/3c per man per hour over the whole labor operation.

The wage scales for the two years are:

	1923	1924
Asbestos Workers	$ .90	$1.00
Brick Layers	1.35	1.50
Carpenters	.97½	1.10
Cement Finishers	.95	1.00
Electricians	(1.10	(1.15
	(1.12½	(1.25
Hod Carriers	(.72	(.82½
	(.75	(.87½
Hoisting Engineers	(1.15	
	1.25	1.25
Iron Workers	(1.17½	
	(1.25	1.25
Lathers	1.02½	1.25
Painters	.97½	1.05
Plumbers	1.22½	(1.30
		(1.35
Plasterers	1.30	1.50
Steam Fitters	1.25	(1.30
		(1.35
Sheet Metal Workers	.97½	1.05

MUNCIE

REAWAKENED ORGANIZATION INTEREST SHOWN BY MUNCIE CONTRACTORS

Glass Named to Serve on State A. B. C. Executive Board

A spirit of revival and rejuvenation has injected itself into the Associated Building Contractors of Muncie, the membership of which turned out strong the other night, even including Charles Morrow, who had been among the miss ing for sometime. There was sounded a general note for more aggressive action and a more regular attendance at meetings that the purposes of the organization might the more readily be carried out. The main feature of the evening was to be found in the fact that interest was far from dead and that those present were all impressed with the need for an association that building conditions could be closer checked and improved when the occasion demanded.

General Contractor Lee Glass was re-elected to serve as Muncie's official representative on the Executive Board of the Associated Building Contractors of Indiana, the state contractors' organization.

TERRE HAUTE

IMPORTANT MEETING OF STATE CONTRACTORS MAY 22

Quarterly Conference of A. B. C. of Indiana Scheduled for That Date

The next active proposition on the program of the Associated Building Contractors of Indiana is the First Quarterly State Conference of the organization for the year of 1924 to be held at Terre Haute, May 22, and the contractors of the city are busily making plans for the entertainment of the contractor delegates who will attend.

These conferences held in various cities about the state every three months have developed beyond the experimental stage and have already proven their worth in the effort to create a closer contact between the builders of Indiana that they may more readily appreciate and understand the current influences that are continually arising to bear upon the building construction industry here and there, more or less affecting the entire contracting fraternity no matter where located.

Especially interesting should be the approaching conference, it being the first of its kind to transpire since the State A. B. C. convention at Ft. Wayne in January. In the meantime the building season has opened up once more and wage scales have been readjusted, all of which should be conducive to the production of reports latent with importance and valuable information to every builder in Indiana. Then, too, not a little interest should develop from a detailed summary of prospects having to do with the future outlook, a composite assemblying of which will furnish some idea of what may be expected in the months ahead.

No local association has been more loyal to the State A. B. C. than the affiliated organization at Terre Haute, and an appreciation of that fact can not be more clearly demonstrated than by the other local city organizations sending at least one delegate to next week's meeting.

The conference will be called to order at 2 p. m. at 671½ Wabash Ave., the local A. B. C. headquarters, where the business session will be held. That evening all delegates will be the guests of the Terre Haute contractors at a 6 p. m. dinner for which an interesting program is promised.

CARPENTERS THREATEN TO HAVE ALL TRADES CALLED OUT WHEN WAGE DEMANDS ARE TURNED DOWN

Building Trades Employers Refuse to Advance Scale Beyond $1.00 Per Hour

Contractors of Terre Haute resumed operations this week on an "open shop" basis as far as carpenters are concerned, following a failure to reach a wage agreement at a joint meeting of contractors and carpenters held May 10.

At the conference the contractors renewed an offer of $1 an hour, but with a two-year contract instead of $1.25 an hour on a one-year contract asked by the carpenters. When the committee representing the workmen refused to accept the offer contractors announced their intention of resuming work at the $1.00 per hour irregardless of the union carpenters' demands. Members of the union say that if non-union carpenters are employed other building trades unions will decline to work with them. Such action, it is said, would suspend all building activities.

THE SAME PROBLEM EVERYWHERE

Contractors, No Matter Where, Must Face the Same Issue

When will the building industry outgrow the old system of contractors going broke innumerable times through guesswork in estimating. By the use of technical knowledge it is possible to prepare an accurate estimate of quantities. Guessing works a hardship both on the guesser who errs and the man who spends his time and money developing an organization worthy of the name and capable of preparing an accurate estimate.

Several contractors who maintain such organizations frequently call attention to the fact that they are figuring daily against destructive competition, referring to contractors, who were skilled mechanics in their own line, perhaps bricklayers or carpenters, and who through their aggressiveness have entered the field of contracting.

The mere fact that these men are skilled in their own line does not mean that they are qualified or competent to estimate the cost of a project which includes many items and problems with which they are not familiar. They become acquainted with these facts only through bitter experience, with a resulting loss to themselves, other contractors and the industry generally. The contractors mentioned above do not bemoan the fact that there are new-comers in the field, but seek to convey the idea that since these men are in the field, they should have an accurate knowledge of costs and construction, not only for their own protection, but for the protection of their competitors as well.

This is not a local problem. It exists most everywhere. Contractors everywhere are seeking a solution and are going at it through association effort realizing that by working together knowledge may be assembled and disseminated that will prove of benefit in putting contractors on the right track.

The success of such efforts is dependent upon the members and in the solving points to the fact that the contractors' greatest problem is "contractors" and that the industry is aided greatly by association with competitors rather than by holding aloof from them.

There is no profit in trading dollars, but there is much to be gained from the honest exchange of legitimate ideas. —(The Iowa Builder, official organ of the Master Builders Association of Iowa).

Sealed Proposals

CITY HALL BUILDING

NOTICE OF SALE OF CITY PROPERTY

The undersigned the Common Council of the City of Rochester, Fulton County, Indiana, hereby give notice that on Tuesday the 3rd day of June, 1924, up to the hour of one o'clock P. M. in the Council Chamber located at Rochester, Fulton County, Indiana will receive sealed bids for the old city hall building, situated in the City of Rochester, Fulton County, Indiana, including all the materials contained in said building.

The successful bidder shall be required to properly and promptly tear down and remove all of said building and every part thereof, and shall properly clean up and dispose of all rubbish and debries within twenty-one days from notice to such purchaser from the undersigned and if such successful bidder shall fail to have such work fully completed, as aforesaid, he shall be required to pay to the city of Rochester, Fulton County, Indiana, the sum of ten dollars per day as liquidated damages for such failure for the use and benefit of the proper fund of said City of Rochester, Fulton County, Indiana, for each day of such failure after the expiration of twenty-one days from the date of such notice.

If the successful bidder for such old build-

ing should be awarded the contract for the erection of the proposed new building on the same site, he may be permitted by permission of and under the direction of the Common Council of the City of Rochester, Fulton County, Indiana, and the Architect in charge of said work to leave such materials on the premises as may be of value for use in the new building.

All bids must be in writing and comply in every respect with the provisions of the law and each bid must be accompanied by a certified check for ten per cent of the amount of such bid, payable to said City of Rochester, Fulton County, Indiana, and to be forfeited by the successful bidder if he does not, on said 3rd day of June, 1924, enter into a proper contract and execute to them a sufficient bond to the approval of said Common Council of the City of Rochester, Fulton County. Indiana, for the doing of all of said work.

The Common Council of the City of Rochester, Fulton County, Indiana, hereby reserves the right to reject any and all bids, and if a satisfactory bid is not received in writing, as aforesaid, and if in the opinion of the Common Council of the City of Rochester, Fulton County, Indiana, they can sell said property to a better advantage and for a higher price than was offered in any of said bids then they will at once, at the same time and place, proceed to sell said property at public auction.

Said sale will be made for cash and for not less than two-thirds of the appraised value of said building. It being expressly represented hereby that the real estate upon which said building stands, the equipment inside said building, consisting of all furniture, attached or unattached, and all light fixtures are not and will not be offered for sale the same being hereby expressly reserved from this sale, and no part of said premises will be sold or offered, except the building, as hereinabove described.

The successful bidder shall not take possession of, tear down, alter or in any manner deface said building, to and until so notified by the undersigned Common Council of the City of Rochester, Fulton County, Indiana, in writing.

The said Common Council of the City of Rochester, Fulton County, Indiana, hereby reserves the right at any time before they shall give a written notice to such successful bidder to proceed in the removal of said building, to return the purchase prise so paid by the successful bidder, declare the sale invalid and of no force and effect and retain such building the same as if said sale had not been made, as the property of said City of Rochester, Fulton County, Indiana.

Done this the 6th day of May, 1924.
(Signed)
Common Council of the City of Rochester,
Fulton County, Indiana.
By M. O. King, Mayor.
Attest: Etta Kessler, City Clerk.
May 10-17-24, 1924.

CITY HALL BUILDING

NOTICE TO CONTRACTORS

Sealed proposals will be received by the Common Council of the City of Rochester, Fulton County, Indiana, until one o'clock P. M., Tuesday, the 3rd day of June. 1924. in the Council Chamber in City of Rochester, Indiana, for the erection and completion of a building the estimated cost of which is $40,000.00, to be located in City of Rochester, Indiana, according to the plans and specifications prepared by the Elmer E. Dunlap Co., Architects, copies of which are now on file in the office of the Common Council of the City of Rochester, Fulton Co., Indiana, and in the office of the Architects, National Sign Corp. Building, Kokomo, Ind.

At the same time and place, separate bids will be received for furnishing and installing a complete heating plant, and the plumbing and sewering for the above named building.

All bids must be in writing, sealed and with the envelope endorsed, giving the name of the bidder and the class of work bid upon and on bid forms as on file, and all bids will be opened and read publicly at the time and place fixed in this notice.

The Common Council of the City of Rochester, Fulton County, Indiana, reserves the right to reject any or all bids.

Each bid for the general construction shall be accompanied by a certified check for the sum of Two Thousand ($2,000.00) dollars, each bid for the heating and ventilating shall be accompanied by a certified check for the sum of Five Hundred Dollars ($500.00) and each bid for the plumbing and sewering shall be accompanied by a certified check for the sum of Two Hundred Dollars ($200.00). These checks must be made payable to the City of Rochester, Fulton County, Indiana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into contract and execute bond approved by the Common Council of the City of Rochester, Fulton County, Indiana, for the performance thereof, if his bid or bids are accepted. The checks of those bidders who fail to be awarded contracts shall be returned to them when the contracts are let.

Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified checks as liquidated damages for the use and benefit of the proper fund of City of Rochester, Indiana.

Each bidder shall file with his bid the statuatory affidavit required under section 8698 Burns Revised Statutes of the State of Indiana, 1914.

Copies of the plans and specifications may be obtained from the office of the Architects, National Sign Corp. Bldg., Kokomo, Indiana, upon deposit of twenty-five dollars for each set; said deposits will be returned to the bidders upon the safe return of the plans and specifications to said office of the Architects on or before the day and hour set for receiving bids.

Each bidder receiving plans and specifications will be required to submit a bid or bids to the Common Council of the City of Rochester, Fulton County, Indiana, or failing to do so, the deposit for plans and specifications will be retained for the use and benefit of the proper fund of City of Rochester, Indiana.

Done this the 6th day of May, 1924.
(Signed)
Common Council of the City of Rochester,
Fulton County, Indiana.
By M. O. King, Mayor.
Attest: Etta Kessler, City Clerk.
May 10-17-24, 1924.

SCHOOL BUILDING

NOTICE TO CONTRACTORS

Notice is hereby given that Wyatt Corn, Township Trustee, and the Advisory Board of Marion Township, Pike County, Indiana, will receive sealed proposals until two o'clock P. M., Saturday, May 24th, 1924, at the office of Wyatt Corn, Township Trustee, in the town of Velpin, Pike County, Indiana, for the erection and completion of the addition and repairs to the Marion Township School Building at Velpin, Pike County, Indiana.

All to be according to the plans and specifications as furnished by J. W .Gaddis, Architect, Vincennes, Indiana, which plans and specifications are on file at the office of Wyatt Corn, Township Trustee, of Marion Township, and at the office of J. W. Gaddis, Architect, Vincennes, Indiana, which plans, specifications and this notice are calling for independent bid for repairs and addition to the building proper, independent bid for the heating and ventilating and independent bid for the plumbing.

Certified check of 2 per cent must accompany each proposal, as evidence of good faith and that the bidder will enter into a contract with the Township Trustee, if the proposal is accepted.

The envelope containing the proposals must be plainly marked "Proposal for the Remodeling and addition to the Marion Township School Building," "Proposal for the Heating and Ventilating," or "Proposal for the Plumbing, etc.

The right is reserved to reject any or all bids.

WYATT CORN,
Township Trustee, of Marion Township, Velpin
Pike County, Indiana.
May 10th-May 17th.

SCHOOL BUILDING
NOTICE TO CONTRACTORS

Notice is hereby given that W. Cyrus Wampler, Township Trustee, and the Advisory Board of Vigo Township, Knox County, Indiana, will receive sealed proposals until one o'clock P. M., Tuesday, May 20th, 1924, at the office of W. Cyrus Wampler, Township Trustee, for the erection and completion of the addition to and the remodeling of the Vigo Township School Building, for Vigo Township, at Edwardsport, Knox County, Indiana.

All material and labor to be according to the plans and specifications furnished by J .W. Gaddis, Architect, Vincennes, Indiana, which plans and specifications are on file at the office of W. Cyrus Wampler, Township Trustee of Vigo Township, and at the office of J. W. Gaddis, Architect, Vincennes, Indiana, which plans, specifications and this notice are calling for independent bids for the building proper, independent bids for the heating and ventilating, independent bids for the plumbing and independent bids for the electric wiring.

Certified check of 2 per cent must accompany each proposal, as evidence of good faith, and that the bidder will enter into a contract with the Township Trustee, if the proposal is accepted.

The envelope containing the proposal must be plainly marked "Proposal for the Addition to and the Remodeling of the Vigo Township School Building;" or "Proposal for the Heating and Ventilating," or "Proposal for the Plumbing," or "Proposal for the Electric Wiring, etc.

Separate and independent bid is required for the electric wiring only of what is known as the Westphalia school.

The right is reserved to reject any or all bids.

W. CYRUS WAMPLER,
Township Trustee of Vigo Township, Edwardsport, Knox County, Indiana.

Insulation? Of Course!

But What Kind?

Builders know good building practice demands the use of insulation.

But it is important to realize what **real** insulation is and how to make it save coal and bring comfort to buildings. The flexible board form in which Flax-li-num is made was chosen after years of experiment by one of the pioneer makers of insulation.

A more flexible and less substantial form was found to disintegrate after a period of years of actual use; a more rigid form was found to buckle and warp or shrink under varying humidities and climatic conditions.

Flax-li-num is rigid enough to stay in place and to apply easily. It has the toughness and the "body" of all good building materials. Yet it is flexible enough to permit its being forced in between studding and to take up all settlement and shrinkage of timbers without pulling away, tearing or breaking its air tight joints.

It has behind it 12 years of wide and varied use in houses, in "ice boxes," roofs, and in railroad refrigerator cars. It is guaranteed against disintegration against warping, buckling or shrinking. And it combines with its great durability the utmost in insulating efficiency. Ten thousand Flax-li-num insulated refrigerator cars built last year alone prove that. Home owners everywhere will vouch for it.

Write for specifications and sample and ask for your copy of chart showing the time value of all walls in stopping heat and cold.

URGES HUGE CUTS IN BUILDERS HARDWARE.

Government Seeks Further to Reduce Waste in Building Industry.

Sweeping reductions in hardware used in building, which will be of vital interest to the building construction industry, whether an architect, a big contracting firm or an owner was recommended at a meeting held in the Department of Commerce, May 20, under the auspices of the Division of Simplified Practice.

The recommendations were prepared by the Advisory Committee on Standardization of Builders' Hardware, which spent more than a year in co-operation with the Federal Specifications Board and the United States Bureau of Standards in an exhaustive study of the varieties of locks, butts and shelf hardware.

The committee recommended the elimination of 71 finishes of the 100 now in use. They also recommended the retention of but 1,205 items in locks, butts and shelf hardware as against a vastly greater range. Comparison with the catalog of a typical manufacturer showed that in the 1922 edition there were 2,998 similar items, without the finish variations. In this case the retention will represent an elimination of 1,793 items or 60 per cent.

More than 100 organizations from 14 states were invited to send delegates to the meeting to take action on the committee's recommendations. Forty of these are national associations representing practically every group concerned, either as manufacturers, distributors or consumers. Included in the list were: American Institute of Architects, American Engineering Standards Committee, National Contractors Association, American Hardware Manufacturers Association, National Retail Hardware Association of Indianapolis, and National Association of Builders Exchanges of Baltimore; American Construction Council and Associated General Contractors of America, both of Washington.

NOT TO LEAVE

Architect Mac Lucas To Continue Practice at Indianapolis.

It is with pleasure that the Recorder is afforded this opportunity to inform the members of the Indiana architectural profession that W. H. Mac Lucas, well-known architect, formerly connected with the firm of George and Mac Lucas, Indianapolis, is not as seriously indisposed as previously reported and has no intention of quitting the Indiana field.

He announces that though he was quite ill recently, and a trip to Scotland to visit his old home would have afforded him a much desired pleasure, he has fully recovered, foregone a trip to the old country, and will continue to practice individually in Indianapolis, where in the past few years he has executed some fine work.

Mr. Mac Lucas and Mr. George have dissolved partnership. "Mac" says he likes Indianapolis too well to leave, that business is good, and just as soon as he can locate desirably, will open a downtown office.

His determination to remain in Indiana is fortunate as he is a talented member of the architectural fraternity, having brought to the state a thorough conception of the highest ideals of the profession, ideals born of long and intensive training under the exacting practice as pursued in the old country, both in Scotland and England.

SAME ESSENTIAL BUILDING MATERIALS 6,000 YEARS AGO

Intervening Years Have Effected Little Change

Few architects and contractors stop to realize what an old industry building is, or how many of the materials which are so essential in modern construction have been in use for many thousands of years.

Wood was, of course, probably the earliest material to be used after man left the natural caves and the first contractors came into existence. But even so useful and seemingly modern material as glass was used much more widely by the Romans than in the U. S. A.

The window glass trust of Ancient Rome had a bit more competition than the companies of today for mica, alabaster, and shells were also employed to let light into the Roman houses. But the demand was pretty brisk for other purposes and the ancient corporations must have declared many a stock dividend to dodge the imperial income taxes, for glass was used for paving, as a coating for walls, and for all sorts of decorative purposes.

But even the Roman glass of the first century seems quite modern in comparison to a building found by a party of exploring scientists in Babylonia.

The building, which is located four miles from the ancient city of Ur, is estimated to be about 6,000 years old. The front face of the structure was excavated and found to be in a splendid condition. It is, in fact, the grand-daddy of all existing structures.

The materials used?

Well, they found half columns built of brick. The wall over the main entry was decorated with terra cotta figures. (Sounds pretty much like some of our modern buildings, doesn't it?) Limestone was also popular with these primitive contractors, it appears, for the explorers found many blocks beautifully carved into artificial flowers and figures of animals. Such relief work is frequently employed on the finer structures of today.

So there isn't such a big difference between the old boys of a good many thousand years ago and the contractors now. To be sure, we have skyscrapers like the Straus and the Burnham buildings—but look at the pyramids.

And as for such modern materials as brick, stone, glass, stucco, and lumber—

In reality, they're old stuff!

(Bulletin Associated Building Contractors of Illinois.)

PENCIL POINTS

Without a definite purpose in life we cannot hope to hit the bulls eye.

The man who can't enjoy the good things of life without passing some of it on to his less fortunate friends is of Gods noblemen.

Balanced qualities is a fine attainment. So would 100 per cent membership for I. S. A.

The mistakes of life are many, but a rubber eraser may correct a lot of them. It's a mighty poor pencil that has no rubber.

Operation—By the looks of some of our designs we need it.

ORGANIZATION AND CURRENT NEWS

ANDERSON

CONTRACTORS SEE HOPE FOR NORMAL BUILDING VOLUME.

General Conditions Considered Favorable to Prospective Builders

At a meeting of the local A. B. C., this week there was a good representation of the building contracting fraternity present, and while nothing of unusual importance was developed, considerable discussion was indulged in as to how to make the organization more effective and of greater service to the contractors. Attention was called again to the quarterly conference of the State A. B. C., to be held at Terre Haute, Thursday, May 22, to which it was decided to send several delegates from Anderson.

A review of the local building situation in Madison County was taken up and a summary of the evidence brought out tended to show that while activity was not as brisk as might be desired, nevertheless conditions were favorable, prospective work is developing and should mature a little later to carry the city on to a normal, if not exceedingly active building campaign this summer.

All wage scales have been agreed upon with the building trades crafts, material prices are ruling steady, and as Anderson, like other of the smaller cities, is somewhat of a late starter in building activity for the season, the bulk of the work coming after summer arrives, the general concensus of opinion of the contractors is that under favorable auspices Anderson will roll up her quota of new buildings by the time 1925 comes around!

Calumet District

REACTION SETTING IN

Indications Point to Detrimental Rebound as Result of Wage Increases

The trend of building affairs in the Calumet District in the last week or so leads to the belief that they have arrived at the very verge of that which the contractors' associations sought so hard to prevent, and in the seeking tried to warn the Chamber of Commerce and the Union Labor Organizations would happen if an insistent demand for increased wages was persisted in by the building trades mechanics. The demand for an advance was insisted upon and now it books as if the Public was about to strike in retaliation for the way building construction costs have been boosted by the raising of wages beyond what is considered reasonable and legitimate levels.

Just such a condition was sensed and in order to save the day the building trades employers set about to stay the threat. It was readily realized that construction labor costs had been inflated to the snapping point through continued wage boosts secured by the Unions, through over-bidding of the set wage scales and the paying of bonuses by those known as Home Builders, also the same practice indulged in by wild cat and irresponsible contractors. It seemed that these wage tilters all were imbued with the idea that they could secure any wage they wanted, pay what was demanded and irregardless of conditions, pass the whole along to the Public who would foot the bill.

When so much objection was raised by prospective builders to the high estimates submitted, the contractors saw the hand-writing on the wall and interpreted its meaning. They sought to pass the warning around but others were of the opinion that the Public had been paying the bill and would continue to do so. However, the Public has evidently been aroused to the situation and come to the conclusion that the limit has been reached, and it has shown an inclination not to be gouged any farther.

There is every indication that prospective builders have been fed up on inflated building costs and from the attitude now being shown it begins to appear as if those responsible for a further increase in construction costs are due for an awakening, and will find that their greed will react to their disadvantage Many of those who had building projects in mind are evidencing an inclination to postpone their work till prices assume a more reasonable level.

Then, further, the steady increase of building operation costs seems to have put a damper on the financing of same for loans are not nearly as readily obtainable today as formerly.

The contractors saw the whirlwind coming and sought to secure protection against it, but they were laughed at, so to speak, and now it would seem that many of those who sneered, jeered, were not interested, or thought they could ride the gale, are due to reap the whirlwind that their own business has brought upon them.

LOOKED AROUND AND SAVED

Got a Good Job, Too

Nobody can say, but it is just possible that a Hammond contractor who bucked at what he thought an exorbitant price started something. He had a job on hand and when he wanted some bids he was confronted with a demand for 16c per yard for lathing. He looked around a little and found a man who would do the work for 12c per yard, four cents under the Union price. He awarded the work to the 12-cent man and got a good job.

EVANSVILLE

BIG CONSTRUCTION OPERATION INVOLVED IN COUNTY HOSPITAL IMPROVEMENT PLANS

Largest Project So Far Planned in Evansville Territory This Season

Preliminary details announced the past week indicate a building project for the vicinity of Evansville that when completed is estimated to cost $655,000. It pertained to the improvements contemplated at the Vanderburgh County Tuberculosis Hospital which it is hoped to get under way this season.

The plans which are now in course of preparation will call for the following which will give some idea of the scope of work to be incorporated in the undertaking:

Construction of buildings providing for convalescent wards for men and women, childrens' ward, colored ward, home for nurses, quarters for the institution's help and a power house.

Remodeling of the administration building.

Purchase of equipment.

Improvement of the hospital grounds.

Building plans were prepared by Clifford Shopbell, local architect and his associate, Frank Fowler of Evansville.

These plans, if carried out, will provide a tuberculosis hospital that will be able to take care of the entire tri-state territory needs.

LANDSCAPE GARDENING TO BE TAKEN UP BY LOCAL FIRM

New Venture Started by Evansville Men

A new industry in connection with building is to be developed in Evansville in the way of landscape architecture.

Articles of incorporation have been filed with the secretary of state by directors of the Crescent Landscape Nurseries of Evansville. Capital stock of the firm will be $20,000.00.

Incorporators and officials are: F. W. Guthrie of the F. W. Guthrie company, vice-president; J. C. Vaught of the Evansville Structural Supply company, secretary-treasurer, and John C. Sterneman, general manager.

The company will operate a general nursery and greenhouse business and will engage in landscape gardening. Mr. Sterneman, the general manager, formerly of the Thornburg Nursery company, is a graduate in landscape gardening of the University of Switzerland. He was an employe of the Swiss government for ten years, having charge of all its landscape work.

FT. WAYNE

LOCAL BUILDING HOLDING ITS OWN WITH RECORD OF 1923.

But $15,249 In Arrears of Last Year's Total to May 15.

The inclination to build continues strong in Ft. Wayne and is keeping operations active, not only that but the resulting volume of business is keeping a close pace with the record breaking one rolled up in 1923. There were those who looked for a let-up this year after the great effort put forth last season, but to date the slackening has hardly been noticeable, in fact, the difference in the two years' work while favoring 1923 is of such small proportion as to be inconsequential.

Up to the middle of May the records at the city building inspectors' department showed that over a million dollars worth of new building construction work had been licensed for the month which assures a good building activity for the month even though the issuance of permits for the second half of May should show a falling off. Approximately the month's business is on a par with that for the corresponding period in 1923.

While a few large projects have been started this year they have been decidedly in the minority, the great bulk of the building activity having to do with residences, smaller commercial and mercantile structures and alteration and addition structural work.

Comparative building figures for the two years to May 15, are:

Months	1923	1924
January	$ 390,885	$ 239,450
February	425,550	733,450
March	1,450,000	1,683,495
April	1,939,275	1,609,612
May	1,083,042	1,007,505
Total	$5,288,752	$5,273,512

FT. WAYNE MASONS TAKE OVER SUMMER COLONY BUILDING PROJECT.

Eph Dailey, Former Exchange Secretary, Interested.

The taking over of a big new country club proposition at Lake Tippecanoe by Ft. Wayne Masons, word of which has just been announced, probably means that another large building improvement project scheduled for Lake Wawasee will be shelved.

Local masonic interests had in mind the establishment of a summer colony at Wawasee to include cottages, clubhouse and golf course. However, it seems that they have taken over a similar project now under construction at Lake Tippecanoe and will promote it in place of the original scheme contemplated at the other summer resort.

At present the golf course has been completed and will be ready for play within a few weeks, and the clubhouse, now in course of construction, is expected to be completed some time in July.

Nearly two hundred acres of land is included in the deal. The property is located on the shore of Tippecanoe lake, about twelve miles west of Warsaw. Original plans for the club development, which, it is believed, will be substantially carried out, will make the club one of the finest of its kind in Indiana if not in the entire middle west.

Eph Dailey, formerly secretary of the Ft. Wayne Builders Exchange, and well known in Indiana building construction circles is one of the men who helped to put the deal through and will assist in carrying the project to maturity.

$100,000 CHURCH CONTEMPLATED

First Unit To Be Built This Summer

The city's church building program was further enlarged the past week with the announcement that the Emmanuel Baptist Church will erect a new structure at Oliver and McKee streets, which when completed, will cost $100,000. The project is to be built along the unit plan, the first of which, an auditorium, is to be figured soon with the idea of having it completed by September.

INDIANAPOLIS

RULES SET FORTH BY CITY BUILDING COMMISSIONER

Definite Data of Uniform Nature Required to Secure Permits

That there may be no misunderstandings as regards new building construction to arise later to cause trouble for the owner, that a definite examination in the issuance of permits may be had, and to facilitate the work of the city building inspection department Commissioner F. F. Hamilton has set forth the following rules by which those seeking permits are to be governed.

First — Foundation plans complete, showing that lines, footings, piers, yard area and depth of foundation must be filed, together with city engineer's street number slip.

Second—Floor plans, showing all joists, partitions, doors, windows, bridging and fire blocking, are required.

Third—Complete sectional elevation locating footings, walls and roof must be filed.

Fourth—Scale of all plans must be ¼ inch to one foot.

Fifth—All plans must be in duplicate.

Sixth—Blue prints must be submitted for all dwellings, stores, apartments, shops and other buildings except sheds.

BUILDING MOVEMENT HINGES ON RESIDENTIAL WORK

Larger Prospects Have Not Shown Up to Any Extent

The settling of the wage scales with the building crafts has not made any preceptible change in the building situation at Indianapolis as yet, for, things are moving along at about the same pace set all spring, with no spurt or big increase in sight as a result of the settling of the wage problem.

Big work of a local nature has been somewhat slow developing this spring and to date no unusually large projects have appeared for figures. This does not mean that prospects are not promising for a good building season. The architects' offices are busy on prospective projects that have not quite reached the stage for active estimating. The work indicated is in fair volume but not of a large individual scope, falling of the latter being made up by a larger number of medium sized and smaller buildings.

Residence construction still is carrying the volume burden, this class of work being active and in greater proportion than any other type of structural construction effort. At the city building inspection department there is a constant daily growing demand for permits for new residences with no prospect of a lot up in sight.

There are those who attribute the lack of big building to current business conditions which have been more or less affected by unseasonable weather. but a better break is expected when things brighten up and will be reflected in a revival of building activity.

AS SEEN BY A SURETY BOND AUTHORITY

Contractor Who Tempts Fate With Limited Capital and Poor Organization Antagonizes Success and Invites Trouble

One of the most serious obstacles to the success of many contractors is the persistency, with which they attempt more than they can possibly do with limited capital and inadequate organization.

Surety companies hold the key to this situation and should, refuse to entertain the application of the contractor who constantly tempts fate—the contractor whose gambling instincts frequently keep the Claim Department working over time.

It is true that often times the companies ultimately escape loss through careful handling, but usually the class of con-

tractor referred to is the one who compels surety companies to complete undertakings at enormous cost and causes a generous share of the anxiety suffered by company officials.

TERRE HAUTE

STATE CONTRACTORS MEET IN QUARTERLY CONFERENCE.

Builders From All Sections of Indiana Assemble at Terre Haute to Discuss Building Affairs.

The building contracting interests of Indiana were well represented at Terre Haute, Thursday, when the State A. B. C., quarterly conference was called to order. It was the first session of the kind held in 1924 and drew delegates from all sections of the state.

Among the cities represented were: Anderson, East Chicago, Evansville, Ft. Wayne, Hammond, Indiana Harbor, Indianapolis, Kokomo, Lafayette, Logansport, Michigan City, Muncie, Princeton, South Bend, Terre Haute, and Vincennes.

The regular business session was called to order at 2:00 p. m., at the headquarters of the local A. B. C. The roll call showed one of the most representative attendances of the state organization ever recorded at a conference. Reports were made by the various delegates on conditions prevailing in their home localities and the activities as indulged in by the local associations in seeking to encourage building through the negotiation of satisfactory wage scales and otherwise bringing about favorable influences to keep building construction operations moving.

The conference was brought to a close with a Six Thirty P. M. Dinner at which the visiting delegates were the guests of the Associated Building Contractors of Terre Haute.

TO START AGGRESSIVE CAMPAIGN TO RECRUIT APPRENTICES.

Plan To Interest This Year's High School And College Graduates.

The Associated General Contractors of America is about to inaugurate a plan that has long been advocated by the National Association of Building Trades Employers, whereby committees from the local chapters will between now and the close of the school year present the claims of the construction industry to boys who are about to graduate from grammar school, high school and college. We have repeatedly urged that member associations and non-member organizations appoint committees to present this matter, especially in the grammar schools.

School officials will welcome such committees, because they are interested in having the boys who have been under them find their proper place in life. No one can present the claims of the industry in as forceful a way as can contractors themselves.—(Bulletin National Association of Building Trades Employers.)

FAMOUS LAST WORDS

Frequently Heard.

Once upon a time there was a contractor who built and built and was most active in erecting houses for other people. He should have made a lot of money but somehow he never seemed able to accumulate much of this world's goods. Then came the final reckoning and as he passed on his last words were, "I figured too low."

CONTRACTORS TOO INDIVIDUALISTIC

Too Prone to Play a Lone Hand

Mr. John W. Cowper, former president of the Associated General Contractors of America in a recent article says: "I find that one of the great troubles with the contractors, and the reason they have been subjected to so many abuses, some real and others imaginery, is that they are individualists of the most selfish and narrow kind and are unable to realize that the greatest benefits derived are the big things that effect the industry as a whole. Now to improve these conditions so that they will bring about the greatest good to the greatest number can only be done through united effort, which will have its expression in an association, and I think there is no better time than at this point to quote Theodore Roosevelt who said in effect, 'Every man owes at least a portion of his time to the betterment of the business with which he is connected,' and you can perform no higher service to your personal business than to give your association freely, of your time, of your effort, of your initiative and of your money."

CONTRACTING LADEN WITH THE ETERNAL QUESTION OF SELFISHNESS

Labor Knows It and Thus Profits By the Ego That the Builder Cherishes

Many folks malign the crafts but they are not wholly to blame. The workman is only human and when his ilk learns and knows that there are contractors who are always willing to tilt the scale a little, a selfish move purely in order to secure men, it is no wonder he hangs back and demands just a little more than is offered. There is just this much to it, the men are wise in their sticking together and working in unison, while the contractors as a whole don't seem to realize the advantage of that scheme, or, if they do realize it they cast the realization aside and feel they can beat the game by playing it individually. Their one thought seems to be to get the men no matter what the cost. As a result the building trades employers' ranks are never solid to ward off an assault.

Even when wage scales are agreed upon there are some contractors who eagerly seek to court the favor of the workmen by paying more than the scale calls for, a move that tends to break down the unity for which organization contends. It is such contractors who, putting selfish interest above all else, cause the long drawn out Labor disputes each year, for the workmen play for that opening and know if they hold out long enough they can break through to their own advantage.

It is not the workmen who are the the contractors' greatest obstacle, but that spirit of selfishness, born of keen competition, that works to the detriment not only of the contractors but of the whole building industry. And, so, just as long as that selfishness is allowed to exist the contractors will be compelled to "pay the freight." The cost may be passed on to the owner, but the time comes when the owner refuses to foot the bill, ceases building and the contractor reaps the whirlwind of his selfishness by finding himself without work, idle.

Sealed Proposals

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is Hereby Given, That sealed bids will be received up to 1:00 o'clock P. M. on Thursday the 5th day of June, 1924, at the office of the Board of School Trustees of the School Town of Brownstown, Indiana, in said town, for the construction of an addition to and the remodeling of the school building of the school town of Brownstown, Indiana, together with the installation of heating, ventilating and lighting systems therefor and the installation of a Sanitary Flushing Closet system, all in accordance with full details, prints and plans and specifications for all of said work now on file in the office of the undersigned Board of School Trustees of the School Town of Brownstown, Indiana, where they are open to the inspection of all persons interested.

Said plans and specifications, or copies thereof are also on file for bidders at the office of Allen & Garriott, Architects and Engineers, 401 Lombard Bldg., Indianapolis, Ind.

For convenience the plans and specifications are issued under two heads, viz. one, General construction and one for Heating, Plumbing and Electric Wiring.

Bids will be received upon said proposed work as a whole, or on any separate part thereof; any combination of bids will be considered. Bidders desiring copies of plans and specifications will be required to deposit $25.00 with the above named architects upon receipt thereof, which amount will be returned upon safe return of plans and specifications.

All bidders will be required to file their bids in form required by law and to accompany their bids with affidavit required by law. Each bidder is required to deposit with his bid a certified check payable to the undersigned Board of School Trustees, in the amount of not less than 3 per cent of the total amount of his bid, to secure the entering into of a proper contract and giving a proper and sufficient bond in the event that he be awarded the contract.

The successful bidder or bidders will be required to enter into a contract in a form and with surety acceptable to the undersigned Board in an amount equal to the amount of such contract.

CITY HALL BUILDING

NOTICE OF SALE OF CITY PROPERTY

The undersigned the Common Council of the City of Rochester, Fulton County, Indiana, hereby give notice that on Tuesday the 3rd day of June, 1924, up to the hour of one o'clock P. M. in the Council Chamber located at Rochester, Fulton County, Indiana will receive sealed bids for the old city hall building, situated in the City of Rochester, Fulton County, Indiana, including all the materials contained in said building.

The successful bidder shall be required to properly and promptly tear down and remove all of said building and every part thereof, and shall properly clean up and dispose of all rubbish and debries within twenty-one days from notice to such purchaser from the undersigned and if such successful bidder shall fail to have such work fully completed, as aforesaid, he shall be required to pay to the city of Rochester, Fulton County, Indiana, the sum of ten dollars per day as liquidated damages for such failure for the use and benefit of the proper fund of said City of Rochester, Fulton County, Indiana, for each day of such failure after the expiration of twenty-one days from the date of such notice.

If the successful bidder for such old building should be awarded the contract for the erection of the proposed new building on the same site, he may be permitted by permission of and under the direction of the Common Council of the City of Rochester, Fulton County, Indiana, and the Architect in charge of said work to leave such materials on the premises as may be of value for use in the new building.

All bids must be in writing and comply in every respect with the provisions of the law and each bid must be accompanied by a certified check for ten per cent of the amount of such bid, payable to said City of Rochester, Fulton County, Indiana, and to be forfeited by the successful bidder if he does not, on said 3rd day of June, 1924, enter into a proper contract and execute to them a sufficient bond to the approval of said Common Council of the City of Rochester, Fulton County. Indiana, for the doing of all of said work.

The Common Council of the City of Rochester, Fulton County, Indiana, hereby reserves the right to reject any and all bids, and if a satisfactory bid is not received in writing, as aforesaid, and if in the opinion of the Common Council of the City of Rochester, Fulton County, Indiana, they can sell said property to a better advantage and for a higher price than was offered in any of said bids then they will at once, at the same time and place, proceed to sell said property at public auction.

Said sale will be made for cash and for not less than two-thirds of the appraised value of said building. It being expressly represented hereby that the real estate upon which said building stands, the equipment inside said building, consisting of all furniture, attached or unattached, and all light fixtures are not and will not be offered for sale the same being hereby expressly reserved from this sale, and no part of said premises will be sold or offered, except the building, as hereinabove described.

The successful bidder shall not take possession of, tear down, alter or in any manner deface said building, to and until so notified by the undersigned Common Council of the City of Rochester, Fulton County, Indiana, in writing.

The said Common Council of the City of Rochester, Fulton County, Indiana, hereby reserves the right at any time before they shall give a written notice to such successful bidder to proceed in the removal of said building, to return the purchase prise so paid by the successful bidder, declare the sale invalid and of no force and effect and retain such building the same as if said sale had not been made, as the property of said City of Rochester, Fulton County, Indiana.

Done this the 6th day of May, 1924.
(Signed)
Common Council of the City of Rochester, Fulton County, Indiana.
By M. O. King, Mayor.
Attest: Etta Kessler, City Clerk.
May 10-17-24, 1924.

CITY HALL BUILDING

NOTICE TO CONTRACTORS

Sealed proposals will be received by the Common Council of the City of Rochester, Fulton County, Indiana, until one o'clock P. M., Tuesday, the 3rd day of June. 1924. in the Council Chamber in City of Rochester, Indiana, for the erection and completion of a building the estimated cost of which is $40,000.00, to be located in City of Rochester, Indiana, according to the plans and specifications prepared by the Elmer E. Dunlap Co., Architects, copies of which are now on file in the office of the Common Council of the City of Rochester, Fulton Co., Indiana, and in the office of the Architects, National Sign Corp. Building, Kokomo, Ind.

At the same time and place, separate bids will be received for furnishing and installing a complete heating plant, and the plumbing and sewering for the above named building.

All bids must be in writing, sealed and with the envelope endorsed, giving the name of the bidder and the class of work bid upon and on bid forms as on file, and all bids will be opened and read publicly at the time and place fixed in this notice.

The Common Council of the City of Rochester, Fulton County, Indiana, reserves the right to reject any or all bids.

Each bid for the general construction shall be accompanied by a certified check for the sum of Two Thousand ($2,000.00) dollars, each bid for the heating and ventilating shall be accompanied by a certified check for the sum of Five Hundred Dollars ($500.00) and each bid for the plumbing and sewering shall be accompanied by a certified check for the sum of Two Hundred Dollars ($200.00). These checks must be made payable to the City of Rochester, Fulton County, Indiana, and will be held by them as a guaranty of good faith that said bidder or bidders will enter into contract and execute bond approved by the Common Council of the City of Rochester, Fulton County, Indiana, for the performance thereof, if his bid or bids are accepted. The checks of those bidders who fail to be awarded contracts shall be returned to them when the contracts are let.

Should the successful bidder or bidders fail to enter into such contract and execute such bond, then he or they shall forfeit the amount of said certified checks as liquidated damages for the use and benefit of the proper fund of City of Rochester, Indiana.

Each bidder shall file with his bid the statuatory affidavit required under section 8698 Burns Revised Statutes of the State of Indiana, 1914.

Copies of the plans and specifications may be obtained from the office of the Architects, National Sign Corp. Bldg., Kokomo, Indiana, upon deposit of twenty-five dollars for each set; said deposits will be returned to the bidders upon the safe return of the plans and specifications to said office of the Architects on or before the day and hour set for receiving bids.

Each bidder receiving plans and specifications will be required to submit a bid or bids to the Common Council of the City of Rochester, Fulton County, Indiana, or failing to do so, the deposit for plans and specifications will be retained for the use and benefit of the proper fund of City of Rochester, Indiana.

Done this the 6th day of May, 1924.
(Signed)
Common Council of the City of Rochester, Fulton County, Indiana.
By M. O. King, Mayor.
Attest: Etta Kessler, City Clerk.

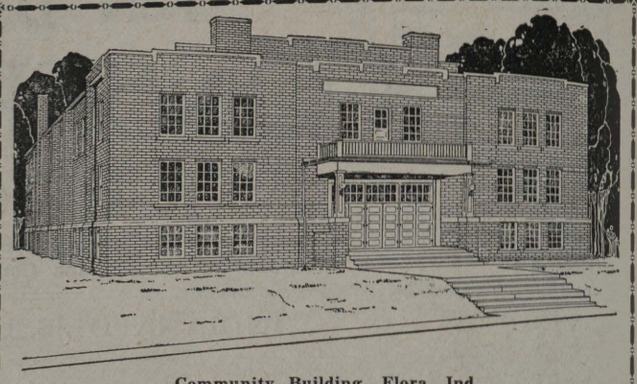
Structural Steel for all types of Buildings, Garages, etc.

Steel Bridges Enquiries Solicited



Community Building, Flora, Ind.
(Drawn from actual photograph)

This structure, 80x140 feet, was built throughout of HOOSIER GIANT BRIX, including foundation and interior finish. Auditorium seats 2,000.

HOOSIER GIANT BRIX

GIVE BETTER BUILDINGS AT LOWER COST

The chief object in any building project today is to secure better buildings at lower cost. The public demands economy without the sacrifice of quality. Architects and contractors are meeting this demand with HOOSIER GIANT BRIX, the ideal material for high grade, economical construction.

Homes of HOOSIER GIANT BRIX

In residence construction, whether for outside veneer or solid walls, HOOSIER GIANT BRIX offer all the advantages of brick construction and yet save 25% over the cost of brick. HOOSIER GIANT BRIX can be laid up in a small fraction of the time required for other construction, thus making big savings in labor cost. In beauty they match fine quality tapestry brick. They equal brick in strength and load-bearing capacity. HOOSIER GIANT BRIX are five-walled, vitrified, mat-face fire-clay units, and are adaptable for any construction where brick can be used.

For INDUSTRIAL BUILDING

HOOSIER GIANT BRIX and HOOSIER Building Tile are adaptable for every type of industrial buildings, such as schools, gymnasiums, churches, factories, garages, stores and other fireproof structures. This material insures big savings on construction cost and makes a building unsurpassed for beauty and serviceability.

Architects and contractors are invited to send for samples and illustrated literature describing HOOSIER GIANT BRIX and Building Tile. Let us submit estimates on your specifications.

UP AGAIN

Further Illumination Thrown on Much Mooted Subject

The "or equal" phrase as employed by some architects in specification writing has, ever since its adoption drawn down upon itself more or less condemnation from members of the profession, and is held more or less of an interloper in that it is inadequate to definite specific service such as good specifications should render. There are those also who hold to the "or equal" as legitimate usage and some public officials insist on the phrase. Naturally under such conditions arguments and discussions are bound to follow and will continue to be a bone of contention until there is a complete change of opinion one way or the other.

The May Bulletin of the Illinois Society of Architects contained an interesting article on the subject as follows:

"As Chairman Swerm of the Entertainment Committee stated at the April meeting, the use of the specification phrase "or equal," probably is the result of a lazy mental attitude, rather than because of the specifier's desire to avoid the making of a choice. Much effort has been expended by manufacturers of building materials looking toward the elimination of this phrase in specifications, and there is no doubt that it is used to a far less extent now than formerly. As with every question, however, there are two sides to this one, and the careful architect will not permit the entreaties of the manufacturers to sway him in the choice of his words unless his judgment coincides with the belief of the person urging the elimination of the phrase in a particular instance.

A word of caution may be well in view of what seems to be a universal endeavor on the part of advertisers to force a phrase that is definite by the name of a particular product or names of several manufacturers of the same kind of product. There are times when the exigiencies of the occasion demand that the architect specify a material with the phrase "or equal thereto" appended. His judgment alone can rule as to whether the use of that phrase in the particular instance is proper. There is no reason why one of several materials cannot be set up as a standard if the architect really is willing to accept without question any other material that may be submitted for his approval as long as the census of the profession is that there is equality.

But this, it may be said, is the crux of the situation. There are many cases where the choice of the architect is based on desiderata that include the submission of other items on the basis of equality with that specified. The situation of the item in building construction, the facility of its use, or the permanence under the use conditions, may call for a special article which only one manufacturer makes. Further, if the architect uses the "or equal" phrase, in order that he may maintain friendly relations with one of the advertisers or manufacturers of material which he has not specified by name, it would be better for him if he would frankly tell the one in evident disfavor that his material could not be considered and eliminate all chances for argument. Where the name of a manufacturer or a particular item is specified, to the exclusion of any others, the specifier sets up a target at which all the competitors will shoot, and if the architect is not desirous of fostering warfare, he will not invite in that fashion. It is difficult enough to make the specifications precise and absolute. Arguments always will arise, no matter with what care the spepcifications are written, as human nature is unavoidably quarrelsome where competitive business rules.

If the architect is able to write his specification without naming a particular manufacturer or item, he may eliminate some trouble, but on the other hand, other difficulties may arise. He may be overrun with requests from all the producers of that item to approve the material submitted, and if disfavor annoys any of them, they may appeal to the owner. This, of course, means the introduction of unfortunate controversies that will be three-cornered unless the owner acedes to the instructions of his architect. Some owners unfortunately feel that when an architect specifies by name he is unduly favoring that person, and the backbone of the architect must be strong enough to support his judgment after it has been expressed in the specifications. The wise architect will analyze each specification for material on the basis of general worth, serviceability, and cost, and after making his choice, will see to it that the situation is maintained in his control. So, while the phrase "or equal" as a general rule should be eliminated from specifications, an architect should do his own thinking on this matter and not follow blindly the suggestions of manufacturers or material men."

ENDORSE STICKING TO ORIDINAL WAR MEMORIAL PLAN

Practically Whole of State Architectural Profession Against Retention of Churches on Memorial Site

Though there is considerable disagreement as to the wisdom and suitability of allowing the two church edifices now located on the World War Memorial site at Indianapolis to remain intact, to intrude themselves upon the scheme as worked out by the officially selected architects, there is no question as to how the architectural profession of the State stands in the matter.

The organizations that have taken the above stand are the Indiana Society of Architects, Architectural Club of Indianapolis and the Indianapolis Architects Association, the latter having just recently adopted this resolution which was sent to the War Memorial Commission:

Whereas, It is the will of the citizens of Indiana expressed by act of the General Assembly of 1921 to provide a Memorial "to commemorate the valor and sacrifice of soldiers, sailors and marines" —in the World War and

Whereas, A Memorial Commission proceeding under the act has acquired ground and selected a design for a Memorial, and

Whereas, The interests of all the citizens of Indiana should be considered in the execution of this plan, therefore

BE IT RESOLVED: That the Architects Association of Indianapolis, at a regular meeting on May 14, 1924, heartily endorses the plan as originally adopted by the Memorial Commission and assures the Commission of the Association's confidence and earnest support in carrying this plan to completion,

That the presence of the two church buildings now in the Plaza will make impossible the final and fitting completion of the Memorial as originally contemplated and a way should be found to provide ultimately for their removal.

Associated Building Contractors of Indiana

MAX IRMSCHER, President
Ft. Wayne

C. C. PIERSON, Secretary
Indianapolis

ORGANIZATION AND CURRENT NEWS

QUARTERLY CONFERENCE OF STATE A. B. C. AT TERRE HAUTE A BIG SUCCESS.

Much Interesting Information Developed

Building contractors of Indiana again evidenced their faith and interest in the association scheme, which encourages the interchange of ideas of builders by a getting together periodically for that purpose, when fifty-nine of them from ten Indiana cities, representing a large portion of the State, responded to the quarterly conference call of the Associated Building Contractors of Indiana sounded for Terre Haute, May 22. Except for Muncie and the Calumet District, all local city subsidiary A. B. C. organizations were represented by delegates, making for one of the best representative attendances recorded at a conference since that scheme was instituted by the state organization of builders over a year ago.

Another pleasing feature was the spirit displayed, the delegates entering eagerly into the discussions whole-heartedly and not hanging back for the other fellow to lead the way. This order encouraged a wide range of topics pertinent to the building industry and the influences that are current today and are having a direct effect on the business which was shown throughout the state to be not as brisk as it was a year ago, traceable in a way to increased wages to the building trades crafts, industrial, commercial and mercantile business depression and a hesitancy on the part of financial interests to negotiate building loans under prevailing conditions. A summary of the evidence submitted by the various delegates indicates that large building projects this year are not so plentiful and that the bulk of work, except for that started last fall and has run over into this season, tends toward smaller types of construction effort such as residences, lesser business structures and remodeling, addition and repair work.

President Irmscher Extends Welcome to Delegates

The conference was held at the headquarters of the Terre Haute A. B. C., on Wabash avenue, and was presided over by President Max Irmscher with Field Representative J. H. Owens, acting as secretary. The president in his address welcomed the delegates and referred to the attendance as a direct testimony of the interest the State A. B. C. has aroused and inculcated amongst the builders. He said there was no question but what the organization had been of great benefit to the contractors in more ways than one and to the whole of the building industry through the co-operative effort it had been able to effect with other allied building interests, pointing to beneficial legislative activity started and consummated through the combined effort of those interests. He referred particularly to the establishment of the State Administrative Building Council, a body created by an act of the last legislature, and assured the delegates it would not be long before the council would be actively functioning through a standardization of building regulations and requirements applicable to the whole state. In conclusion he asked those present to carry the message back home to their colleagues to back up and support the Administrative Council and to further continue to support the Associated Building Contractors of Indiana in the work it is seeking to accomplish for a better understanding amongst contractors and the advancement of improved building conditions.

Building Conditions Around the State

A roll call of cities represented, to secure some idea of prevailing conditions, then followed bringing forth this information:

Anderson—Building quiet; no labor trouble, all scales agreed upon. Carpenters demanded a 10c per hour increase over old scale of 90c which was settled on the basis of 90c per hour on all work already started and $1.00 per hour on all new work.

Evansville—Building quiet as far as big work is concerned but considerable residence building going on. Labor conditions good with agreements made with all crafts except hod carriers whose union was not recognized and these men are being paid at common laborers' wages.

Ft. Wayne—Building good and only slightly behind that of last year. Agreements made with but three crafts, bricklayers, electricians and plasterers. Other crafts working along on open shop basis with no discrimination being shown toward unon men. The latter and non-union men are working along side by side.

Indianapolis—Tendency toward a building let-up though volume of work to date compares favorably with that of 1923. Labor problem settled. Employment conditions are off and there is no shortage of labor such as was experienced last year, in fact, there is a surplus of men, a condition which is having the effect of getting more efficiency out of the workmen who are fighting to hold their jobs.

Kokomo—Conditions are satisfactory though there is not much new work in sight. There has been no labor trouble in the building field and contractors have been able to carry work along with no interruption.

Lafayette—Not much building. Labor demanded increased wages but lack of work settled things back to 1923 scale basis. Plenty of men but not much prospect of future work.

Princeton—Very quiet. No trouble. Little or no building in progress or in sight. Some railroad shop building operations but citizens generally not inclined to start private work.

South Bend—Industral conditions have toned down local operations with building activity considerably in arrears of 1923 record. Residential construction has carried the burden this season. Many building craftsmen idle with no call for employment. Last year's scales prevailing.

Terre Haute—With a strike of carpenters and sheet metal workers on since May 1, owing to refusal of contractors to come across with a raise, action backed up by public sentiment, and with the coal business at a low ebb building prospects are almost nil. Work in progress is moving ahead with contractors using non-union carpenters and tinners. Since work is so scarce, other building trades unions have shown no tendency to call a sympathetic strike to encourage carpenters and tinners who are out.

Vincennes—Little or no building of any consequence; not enough to stir up labor fuss this season over wage scales. Some small house operations which are being carried along on an open shop basis.

The most impressive part of these reports was the fact that building operations have receded to such a point somewhere that the old labor shortage bogey seems to have been driven to cover and

contractors announce that they are continually assailed with applications for employment. They further state that there is such a plentiful supply of men that they are enabled to pick their men and when they fail to produce they can be replaced by workmen who can get out good work. Times have surely changed and the contractors at Terre Haute all said that though wages may seem high the workmen are more efficient than formerly and are actually earning their money today, being spurred on by the knowledge that if they don't work there are many unemployed building trades craftsmen who are only too eager to step in and deliver. Such a condition it is admitted will speed up building and in the long run have a tendency to reduce construction costs. One thing is assured, there is no more loafing on the job and there are so many good men available that thorough work is bound to result.

State Building Council Action Reviewed By Walter Wise

Next came a report from Walter W. Wise on what the Administration Building Council had done. He glossed over briefly the preliminary work of the Council and announced that definite action was about to be launched with the distribution about the state of a set of standard minimum floor loads that had been decided upon after much research work. These loads have been carefully worked out for various kinds of structures after consultation with the Hoover Building Committee of the U. S. Department of Commerce and a study of recognized authorative codes employed about the country.

Pays Tribute to Contracting

The conference closed with a six-thirty P. M. dinner at the Elks Club House at which all visitors were the guests of the Terre Haute A. B. C. Guy Brill presided and at the conclusion of the banquet introduced Attorney J. M. Fitzgerald who eulogized the contractor and his work. He said in part: "I, for one, take off my hat to the contractor. As I travel about the city and see his handicraft as reflected in the great buildings that I pass, also the beautiful residences, I envy him for his creative genius, for the things accomplished. As we work in our great office buildings and other places of business, or repose in our homes there comes to use a sense of security inspired by our confidence in you men, the contractors who build. Through the development of your business you bring to humankind the conveniences that make life more enjoyable, safer, more worth while. The contractor is an accurist, one who deals with set facts so necessary to successful building, and, because he deals in such percision must necessarily understand his problem the solution of which makes our habitations worth while. He must be able to discern the purpose of his work and execute it with ability and thus, when completed, it reflects the hand of genius. It is a great calling, yours, and that you are aware of that fact and the responsibility that goes with it is clearly shown by your attendance at this conference at which you are permitted to interchange ideas that will make for your advancement, and your avocation.

And to men of your caliber I wish in closing to sound a warning, also an appeal. There is much propaganda being circulated these days that has for its purpose a changing of the powers of the U. S. Supreme Court; to you men I say turn a deaf ear to such and when you go back home to the various parts of the State warn your fellowmen against this insidious menace and urge them to stand back of the Supreme Court as it is now constituted and empowered, for therein lies the greatest safety of our government and our country."

Others who spoke were President Irmscher, Attorney Harry Fenton, General Counselor of the State A. B. C., Jas. Hodgson, Sr., and E. H. Hyman.

Shown By the Roll Call

Those present at the conference were as follows:

C. J. Rozelle, Anderson; Ben Diehl, Phil Kessler, O. T. Smith, J. L. White, Evansville; Henry Aumann, Max Irmscher, John C. Kreidt, G. W. Schack, Ft. Wayne; Fred Bock, Robert E. Berner, M. M. Bonewitz, Harry Fenton, James Hodgson, Sr., F. W. Jungclaus, T. J. O'Hara, J. H. Owens, C. C. Pierson, Max Schumacher, Walter W. Wise, Indianapolis; E. L. Danner, Kokomo; C. A. Wallace, Lafayette; Wm. Toelle, Princeton; E. H. Hyman, South Bend; Guy Brill, Frank Burget, Wm. Caton, D. D. Donham, A. W. Dudley, E. Dunning, H. E. Eberwein, J. M. Fitzgerald, J. W. Freitag, D. W. Gustin, Albert Hartman, Aug. E. Hartman, R. H. Jenkins, L. E. Johnson, F. J. Kline, G. A. Monninger, Glenn North, Wm. Noffke, J. F. O'Connell, W. M. O'Laughlin, J. D. Raffin, F. T. Ranahan, F. L. Richart, Geo. Roehm, W. H. Roberts, H. A. Toelle, O. A. Toelle, Geo. J. Vollmuth, A. J. Weinhardt, A. J. Weinhardt, Jr., J. Paul Welch, E. W. Whitlow, C. Wissel, Terre Haute; S. L. Kirk, Henry Knauth, Vincennes.

Calumet District

LATHERS' UNION SEEKS TO USURP BUILDING SPOTLIGHT

Seeks to Stir Up More Trouble in the Calumet Section

The B. T. E. A. had another run in with the Labor element last week when one of the association members, H. L. Morris, general contractor, bucked at paying 16 cents per yard, the price charged by the lathing contractors, and sought to have his work done by a non-union lathing contractor, who quoted considerably under the other figure. Then it started, the trouble caldron began to simmer, stew and boil.

Representatives of the union building trades crafts descended upon Mr. Morris in all their wrath and barked around with great gusto. They threatened to pull all their men off the job if he did not at once discharge the non-union contractor and he condescendingly sought to accommodate the representatives by inviting them to go ahead.

That seemed to be the very thing they didn't want to do. Anyway, they didn't pull the men, instead, they sought to convert the non-union contractor and did. He joined the Union. Everything went along alright until the other lathing contractors found out the new union man was cutting into their business seriously. The next move was a threat by the Business Agent to take up the cards of the new contractor and his men though no valid reason was given. The question is, what was the big idea?

The B. T. E. A. felt called upon to go to the bat in the matter and there followed a heated session with the Business Agent of the Lathers' Union at which association contractors advanced the information that they would stand for no discrimination toward the lathing contractor in question. Further, the association contractors said that if the Union fails to give this contractor a square deal, seeks to brand him as unfair, or tries to cancel the cards of him and his men without good and sufficient reason, the B. T. E. A. general contractors will continue to employ his services, card or no card. Now it is up to the Union.

MORE BAD LUCK

Northern Delegation to State Contractors Conference Has Plans Upset

Why confine the expression "the breaks of the game" to sports alone? "The breaks" beset daily life constantly as some of us Calumet folks were reminded very impressvely one day last week. Several association contractors were all set for the run down to the State A. B. C. conference at Terre Haute when the pendulum of circumstance veered the other way and away went our plans, to leave us stalled in Hammond. The man who was going to drive the party to Vigo County couldn't get away.

CURTAIL OFFICIAL POWER

Miners of Illinois Start Innovations

Every once in awhile there comes a flash that seems to indicate that a new light is penetrating the ranks of Union Labor to awaken the members to certain practices that are employed to work to the aggrandizement of one of their men, or a certain set of men

The new light this time comes bursting in from Illinois where the miners of that state have clipped the ambitions of the president by curtailng his appointive powers, action that will serve to prevent him from building up a strong political machine for his own personal advantage. Also, the miners have cut the salaries of the business agents during strike periods. It will be interesting to see hereafter if the said agents will be so eager to call strikes on the slightest provocation and be willing to foot the bill with rank and file.

CALUMET BUILDING PROGRESS

J. Wesley Reed, general contractor, has the new Hyde Park Church, Hammond, ready for plastering.

General Contractors McEwin & Eesley have started work on the new home of Sheriff Hut Olds in South View Addition. The estimated cost is given at $20,000.

It looks as if the widening of South Hohman street, Hammond, was going to materialize. Figures are being taken and contracts let for moving back some of the buildings and cutting 20 feet off the front of the others.

Joe A. Scott has the contract for a one-story brick garage building 50x60 for Mose Mouder, corner Oakley Ave. and Logan St.

Architect Mac Turner is preparing plans for Mr. Markowitz for a one story brick garage building 50x75, corner Wabash and Gostlin streets. Estimated cost $12,000.

E. E. COLE.

SOUTH BEND

BUILDERS' EXCHANGE EXERTS EFFORT IN SERVICE ENDEAVOR

Active in Local Building Field

Believing in the principle that a local contractors' association should be more than a mere name if it is to receive the support of its members and hold their interest the South Bend Builders Exchange has pursued an aggressive policy in an endeavor to be helpful as well as protective to the contractors and the building interests. To that end it has taken an active part in labor negotiations and matters attendant thereto, has provided adequate quarters for the filing of plans where those who wish to submit estimates can consult and figure drawings, and also maintains an employment bureau where applications for work by craftsmen are recorded and calls for men by the contractors are taken care of. This latter service has been developed to the point where a contractor needing help can secure it on short notice, or craftsmen looking for employment can be placed with little loss of time when openings are available.

Thus the South Bend association plays an important part in the building affairs of the city and through its ministrations is in a position to speed up construction operations, proving helpful to the contractors in more ways than one, and on the other hand aids the craftsmen in their employment problem.

TERRE HAUTE

THRIVING A. B. C. ORGANIZATION HOLDS FORTH AT TERRE HAUTE

Fine Quarters, Co-operative Spirit and Stunt Ideas Encourage Lively Interest

There is no more prosperous and flourishing contractors' organization in Indiana than the Associated Building Contractors of Terre Haute. Through a constructive policy instituted early in the history of the association the membership has grown to goodly proportions and a conservative administration of the finances has placed the organization on a sound financial basis with a bank balance it is doubtful if any other similar organization in the state can duplicate.

The Terre Haute contractors have fine commodious quarters in the business section on Wabash Ave., the main thoroughfare of the city. There is a reception room, light and attractive, and a large meeting room which all goes to make for plenty of room for both business and social functions.

Quite an interest has been aroused in attendance by a novel scheme whereby each individual member who attends the meeting held on the second Friday of the month is paid one dollar. Then at the meeting on the fourth Friday a member's name is drawn by lot and if present that member receives a dollar, if absent the dollar is held and added to the drawing on the fourth Friday of the next month when two dollars is paid the lucky one. If members whose names are drawn are absent the money is added to the pot each fourth Friday of the month until some one is present whose name is drawn. The men have a lot of fun out of these drawings and as the pot increases so does the attendance.

The association serves suppers in its rooms occasionally, such as fish fries, oyster suppers and clam bakes during the winter and in the summer turns to picnics. And so it is that the contractors of Terre Haute have built up one of the best organizations of the state.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given that the undersigned, trustee of Jefferson township and ex officio trustee of Jefferson School Township of Wells County, Indiana, and the advisory board of said township will receive bids, at the trustee's office in the school building located and situated at Ossian, Indiana, until 1:15 o'clock P. M., on Saturday, June 21st, 1924, for the construction of a new high school and elementary school building, and for the installation of heating and ventilating system and plumbing and drainage system and for electric wiring, all for said proposed building.

All bids shall include all labor, material and supplies necessary for complete construction or installation of that part of the work bid on, and shall be strictly in accordance with the plans and specifications provided therefor, which have been properly accepted and approved, and are now on file in the office of said trustee in said school building at Ossian, Ind., and also in the office of Everett I. Brown, architect in the Studebaker Bank building at Bluffton, Ind.

Said proposed school building is to be located, and erected and constructed on the new site for such school building, at Ossian, Indiana, in section 15, township 28 north, Range 12 east in said Jefferson township.

All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts, and to accompany such bids with proper affidavits, or such bids will be considered as irregular, and each proposal or bid must be endorsed on the envelope giving the bidder's name after stating the class of work bid upon.

The estimated cost of said building is $100,000.

Bidders will submit their bids as follows:

(1) For the complete construction of such school building according to the plans and specifications therefor (general contract).

(2) For the installation complete of each the heating, ventilating system, plumbing and drainage system.

(3) For the installation complete of electric wiring.

(4) For the construction as a whole or any combination of contracts, as provided for by the plans and specifications therefor. All bids and contracts to be subject to approval of the state board of tax commissioners of Indiana.

All bids must be sealed. Each bid on the general contract shall be accompanied by the certified check of the bidder for $2,000.00. Each bid on the heating and ventilating system and plumbing and drainage system shall be accompanied by the certified check of the bidder for $1,000.00.

Each bid on the electric wiring shall be accompanied by the certified check of the bidder for $200.00.

Each bid for complete construciton or for any combination of contracts shall be accompanied by the bidder's certified check in an amount equal to the total amounts required for the contracts included in the bid if the same had been bid for separately. All checks shall be payable to George W. Todd, trustee. The proceeds of the certified check accompanying the bid of each successful bidder shall become the sole property of said Jefferson School Township in the event such successful bidder shall fail to enter into a contract and execute and furnish an acceptable bond within ten days after he has been notified that his bid has been accepted. All certified checks of unsuccessful bidders will be returned to them.

The successful bidder or bidders will be required to enter into a written contract or contracts and to execute a bond or bonds with sufficient surety or sureties to be approved by said trustee in an amount equal to the amount of the contract or contracts and conditioned for the faithful performance of the same. It being expressly understood that said trustee and advisory board reservies the right to hold the lowest and best bid open until such time as they are able to close contract on the sale of bonds to cover the cost of said school building, and they reserve the right to reject any and all bids.

GEORGE W. TODD,

Trustee of Jefferson Township and Ex Officio Trustee of Jefferson School Township of Wells County, P. O., Ossian, Ind.

JOHN O. DAILEY,
RUFUS C. MAHNENSMITH,
MARTIN HENLINE,

Members of Advisory Board Jefferson Township, Wells County, Ind.

May 31st-June 7th-June 14th, 1924.

SCHOOL HOUSE

NOTICE TO CONTRACTORS

Notice is hereby given that James Wright, Township Trustee, and the Advisory Board of York Township, Benton County, Indiana, will receive sealed proposals until three o'clock Saturday, June 21st, 1924, at the school house, Raub, Indiana, for the erection and completion of the addition to and the remodeling of the York Township school building for York Township, at Raub, Benton County, Indiana. The improvement will also include Heating, plumbing and ventilating system. Full details, plans and specifications are now on file at the office of the undersigned trustee and at the office of the Architect, John A. Bruck, Kentland, Indiana, and are open for inspection of all persons concerned.

Copies of plans and specifications will be furnished contractors applying for same on deposit of the sum of $20.00 made payable to the township trustee for the safe return of said plans and specifications.

Bids will be received on separate items as follows:

1st. On the Addition complete, except heating and plumbing and electric wiring.

2nd. Heating and plumbing.

Electric wiring will be let at a later date. All bidders will be required to file their bids on forms required by the Indiana State Board of Accounts and to accompany such bids with proper affidavits. Each bidder will be required to deposit with his bid a certified check in an amount of not less than 3 per cent of his bid, payable to the township trustee to insure that the successful bidder will enter into written contract with said Township Trustee and will furnish bond with resident freeholder surety of Benton County, Indiana, or a Surety Company bond to the approval of said trustee and advisory board that he or they will faithfully perform and execute the work and contract awarded to him or them according to said plans and specifications under the direction of said Architect and to the acceptance of said Trustee aforesaid and according to law.

The estimated cost of such addition is $35,000. The right is reserved to reject any and all bids and to take a reasonable time for making a decision in awarding said contract.

Dated at Raub, Indiana, this 16th day of May, 1924.

JAMES WRIGHT, Trustee,
W. S. McCONNELL,
HARRY BOWMAN,
SCOTT McEWAN,
Advisory Board.

May 31st, 1924.

signed Board of School Trustees of the School Town of Brownstown, Indiana, where they are open to the inspection of all persons interested.

Said plans and specifications, or copies thereof are also on file for bidders at the office of Allen & Garriott, Architects and Engineers, 401 Lombard Bldg., Indianapolis, Ind.

For convenience the plans and specifications are issued under two heads, viz. one, General construction and one for Heating, Plumbing and Electric Wiring.

Bids will be received upon said proposed work as a whole, or on any separate part thereof; any combination of bids will be considered. Bidders desiring copies of plans and specifications will be required to deposit $25.00 with the above named architects upon receipt thereof, which amount will be returned upon safe return of plans and specifications.

All bidders will be required to file their bids in form required by law and to accompany their bids with affidavit required by law. Each bidder is required to deposit with his bid a certified check payable to the undersigned Board of School Trustees, in the amount of not less than 3 per cent of the total amount of his bid, to secure the entering into of a proper contract and giving a proper and sufficient bond in the event that he be awarded the contract.

The successful bidder or bidders will be required to enter into a contract in a form and with surety acceptable to the undersigned Board in an amount equal to the amount of such contract, conditioned for the faithful performance of said work in accordance with the plans and specifications therefor, and for the completion of said work not later than September 15th, 1924.

The addition to be constructed to be 101 feet in length by 62 feet in width, two stories in height, brick, roof as per specifications.

The estimated cost of the improvement is $34,-0000.00.

The right is reserved to reject any and all bids.

SCHOOL HOUSE
NOTICE TO CONTRACTORS

NOTICE IS HEREBY GIVEN, That sealed proposals will be received at the School Building at Cicero, Ind., by Otto K. Jensen, trustee of Jackson township, Hamilton County, Indiana, until 2 o'clock p. m., June 16th, 1924, for the remodeling of, and an addition to the school building at Cicero, Indiana, all in accordance with the plans and specifications prepared for same by Wilson B. Parker, architect, 507 Board of Trade Building, Indianapolis, Ind.

Plans and Specifications are on file at the office of Otto K. Jensen, trustee, Central Bank, Arcadia, Ind., and at the office of the architect.

Separate bids will be received as follows:

1. General construction of addition and remodeling of old building.
2. Heating and ventilating.
3. Plumbing.
4. Electric wiring and fixtures.

The estimated cost of all improvements including heating and ventilating, plumbing and electric work is fifty thousand dollars.

All bids must be submitted on forms as prescribed by the State Board of Accounts, each bid sealed, with proper designation on the envelope, indicating the character of the bid.

Each bid must be accompanied by a certified check for two per cent of the amount of the bid, drawn payable to the order of Otto K. Jenesen, trustee of Jackson township, Hamilton County, Indiana.

In case any bidder whose bid shall be accepted, shall not within ten days after notice of such acceptance, comply with his bid by entering into a written contract with said trustee in accordance with his bid and the provision of the plans and specifications, his certified check and the proceeds thereof, shall be and remain the absolute property of said township as liquidated damages for such failure, it being impossible to estimate the amount of damages such failure would occasion to said township. The right is reserved to reject any and all bids.

Dated this May 22, 1924.

OTTO K. JENSEN, Trustee.
May 31, 1924.
